Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Clinton County

Financial Condition	The General Revenue Fund remains in poor financial condition. The cash balance of the General Revenue Fund is not sufficient to handle any emergencies or sudden downturn in the economy.
Self-Insured Medical Plan	The County Commission implemented a self-insured medical plan in January 2017 without performing a cost analysis to project the potential liability to the county, calculate the premiums, determine the reserve balance necessary to meet the potential obligations, or determine the financial feasibility of the plan.
County Collector's Controls and Procedures	The County Collector is consistently not performing one of her main responsibilities, which also violates state law. The County Collector has not prepared and filed an annual settlement for the years ended February 28 (29), 2016, 2017, and 2018. The County Collector did not distribute the late payment penalties on delinquent city taxes in accordance with state law, and did not correctly distribute city commissions withheld from the collections of December 2017 city taxes.
Senate Bill 40 Board's Payroll	The SB40 Board made payments to employees totaling \$5,714, before payroll taxes, during the year ended December 31, 2017, that were not supported by adequate documentation. The SB40 Board approved "an incentive to the staff for the quality of their work and the hardship of the payroll difficulties of 2017" totaling \$3,300 on December 22, 2017. The SB40 Board does not require timesheets or other documentation for hours worked, and records of leave balances are not maintained.
Capital Asset Dispositions	The county has not established adequate controls and procedures for the disposition of capital assets.
Disbursements	The county did not maintain adequate documentation to support some disbursements made with the Sheriff office's 4 credit cards. The county has not established a policy for providing employee meals while not on travel status. The county has not established adequate procedures to ensure Sheriff's office credit card bills are paid timely.
Sheriff's Controls and Procedures	The Sheriff's office does not prepare adequate bank reconciliations for the inmate/commissary account, and monthly lists of liabilities are not prepared to reconcile to the inmate/commissary account balance. Office personnel do not record all checks issued from the inmate/commissary account in numerical sequence. They have not disbursed commissary net proceeds remaining in an inactive inmate/commissary bank account to the county Inmate Prisoner Detainee Security Fund, as required by state law.
Prosecuting Attorney's Controls and Procedures	The Prosecuting Attorney's office does not maintain a book balance or prepare adequate bank reconciliations, and monthly lists of liabilities are not prepared to reconcile to the bank reconciliation. Office personnel do not deposit receipts timely, and do not always assess the statutorily required fees from defendants who owe court-ordered restitution.

Passwords	The County Clerk and Ex Officio Recorder of Deeds have not established adequate password controls to reduce the risk of unauthorized access to computers and data.
-----------	--

Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.
---------------------	--

In the areas audited, the overall performance of this entity was Poor .*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information	18
---	----

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Clinton County

We have audited certain operations of Clinton County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, LLC, Certified Public Accountants, was engaged to audit the financial statements of Clinton County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

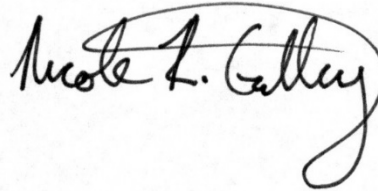

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Clinton County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Clinton County Management Advisory Report State Auditor's Findings

1. Financial Condition

The General Revenue Fund (GRF) remains in poor financial condition.

The following table reflects the beginning cash balance, budgeted receipts and disbursements, and projected ending cash balance of the GRF for the year ended December 31, 2018, and the actual receipts, disbursements, and beginning and ending cash balances, for the 4 years ended December 31, 2017:

		Year Ended December 31, ⁽¹⁾				
		2018	2017	2016	2015	2014
Beginning Cash Balance	\$	9,717	512,257	211,929	130,012	6,347
Receipts		2,798,144	2,198,530	2,716,740	2,379,968	2,797,892
Disbursements		2,807,597	2,701,070	2,416,412	2,298,051	2,674,227
Ending Cash Balance	\$	264	9,717	512,257	211,929	130,012

(1) Information was compiled from audited financial statements for 2017 and 2016 and county budgets for the other years.

The cash balances of the GRF is not sufficient to handle any emergencies or sudden downturn in the economy. Receipts were significantly less than disbursements in 2017 and the GRF would have had a deficit cash balance at December 31, 2017, had the county not transferred approximately \$103,000 from the Emergency Management Fund (EMF) to the GRF throughout 2017. Revenues decreased significantly during 2017. A delay in the mailing of property tax statements resulted in a delay in property tax collections. In addition, expenditures increased significantly during 2017 as a result of the Sheriff's office and jail expenditures increasing from approximately \$976,000 in 2016 to approximately \$1,240,000 in 2017.

As discussed in MAR finding number 2, the County Commission implemented a self-insured medical plan without performing a cost analysis to ensure the plan is adequately funded. Any claims against the plan that exceed the cash balance of the Health Reimbursement Fund (HRF) will be the responsibility of the GRF and the EMF.

The County Commissioners indicated they are aware of the concern and stated they are hopeful additional property tax revenues will be generated as a result of a housing development project and some new businesses coming to the county.

It is essential the County Commission address the financial condition of the GRF in the immediate and long-term future. To ensure the financial condition of the GRF is improved, the County Commission should reduce spending as much as possible, evaluate controls and management practices to ensure efficient use of county resources, and attempt to maximize all sources of revenues.

Clinton County
Management Advisory Report - State Auditor's Findings

A similar condition was noted in our 2 prior audit reports.

Recommendation

The County Commission closely monitor the county's financial condition and perform a study of the county's current level of expenditures and determine whether normal operations and other financial commitments have expanded to the point where they cannot be sustained by operating revenues. If so, expenditures should be reduced where possible without eliminating necessary services. In addition, a long-range budget should be prepared and used in planning for future years' operations.

Auditee's Response

We have been closely monitoring the financial condition of the General Revenue Fund and are aware of the financial challenges facing the county. We placed a tax issue on the November 2018 ballot, which was defeated by the voters. We have met with elected officials to discuss recommendations from the audit of the county, but we do not have the power to force officeholders to make changes in the operation of their offices concerning controls and management practices. We have encouraged officeholders to curtail expenses and have notified one officeholder that their budget is expended for the year ending December 31, 2018, and have cut off non-essential spending.

2. Self-Insured Medical Plan

The County Commission implemented a self-insured medical plan in January 2017 without performing a cost analysis to project the potential liability to the county, calculate the premiums, determine the reserve balance necessary to meet the potential obligations, or determine the financial feasibility of the plan.

The County Commission solicited bids and selected an insurance broker for employee health insurance benefits in September 2016. The County Commission followed the insurance broker's recommendation to implement a self-insured medical plan and in December 2016 the county contracted with a third party administrator (TPA) to review, process, and pay claims.

Expenditures of the HRF include monthly claim administration service fees charged by the TPA and reimbursements to the TPA for medical and prescription drug claims processed and paid to providers by the TPA. The County Commission also followed the insurance broker's recommendation and established employee premiums for the 2017 plan year at the 2016 health insurance benefit plan rates. The county did not increase employee premiums for 2018 because revenues were sufficient to meet expenditures in 2017 and the HRF had a cash balance of \$40,339 at December 31, 2017. However, expenditures of \$466,395 have exceeded revenues of \$307,912 through October 9, 2018, and transfers totaling \$130,000 from the EMF have been necessary to prevent a deficit fund balance.

Clinton County
Management Advisory Report - State Auditor's Findings

Performing a cost analysis is essential to ensure the county has sufficient funding available to meet current and future expenditures of the self-insured medical plan.

Recommendation

The County Commission prepare a cost analysis to project the potential liability to the county for expenditures of the self-insured medical plan, calculate the employee premiums and fund reserve balance necessary to meet the projected liability, and determine the financial feasibility of the plan.

Auditee's Response

We will take the recommendation under advisement and look into making changes in the spring of 2018.

3. County Collector's Controls and Procedures

Controls and procedures in the County Collector's office need improvement. Property taxes and other monies collected by the County Collector totaled approximately \$18,200,000 during the year ended February 28, 2018.

3.1 Annual Settlements

The County Collector is consistently not performing one of her main responsibilities, which also violates state law. The County Collector has not prepared and filed an annual settlement for the years ended February 28 (29), 2016, 2017, and 2018.

Because the County Collector does not file annual settlements, the County Clerk cannot ensure taxes charged and credited to the County Collector each year are accounted for properly, and the County Clerk and County Commission cannot verify the County Collector's accounts.

To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file annual settlements. Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources. In addition, Section 139.190, RSMo, requires the County Commission to carefully and fully examine the annual settlement of the County Collector and the County Clerk to certify the amounts to the state. Such procedures are intended to establish checks and balances related to the collection of property taxes.

A similar condition was noted in our prior audit report, *Clinton County Collector and Property Tax System*, Report No. 2015-009, issued in February 2015. In addition, Report No. 2015-075, *Follow-Up Report on Audit Findings - Clinton County Collector and Property Tax System*, issued in September 2015, reported the status as in progress.

Clinton County Management Advisory Report - State Auditor's Findings

3.2 Commissions

The County Collector did not distribute the late payment penalties on delinquent city taxes in accordance with state law. In addition, the County Collector did not correctly distribute city commissions withheld from the collection of December 2017 city taxes.

Late payment penalties on delinquent city taxes were correctly assessed and collected but were distributed to the County Collector instead of to the General Revenue Fund, Tax Maintenance Fund, and the County Employees' Retirement Fund in accordance with state law. For the year ended February 28, 2018, the County Collector was overpaid \$10,030, the County Employees' Retirement Fund was underpaid \$4,298, and the Tax Maintenance Fund and General Revenue Fund were each underpaid \$2,866.

In addition, we determined the County Collector was underpaid \$11,634 in commissions for December 2017 city tax collections. We recalculated city commissions for each month during the year ended February 28, 2018, and noted the County Collector should have personally received \$14,767 in commissions for December 2017 collection of city taxes. However, the County Collector was only paid \$3,133. The County Collector manually calculates the withholding and distribution of all commissions on city tax collections. We reviewed the County Collector's calculation and distribution of city commissions for December 2017 and noted the General Revenue Fund was overpaid \$6,024 and the Assessment Fund was overpaid \$5,524, leaving an unknown difference of \$86 between the amount the County Collector was underpaid and amounts overpaid to other entities.

Section 50.332, RSMo, allows county officials, with the approval of the County Commission, to perform certain tax collection services for cities and charge for such services. In addition, Section 52.290.1, RSMo, allows for the collection of the 7 percent (9 percent effective January 1, 2018) penalty on delinquent taxes and provides for the penalty to be distributed as follows: two-sevenths to the General Revenue Fund (two-ninths effective January 1, 2018), two-sevenths to the Tax Maintenance Fund (two-ninths effective January 1, 2018), and three-sevenths to the County Employees' Retirement Fund (five-ninths effective January 1, 2018).

Recommendations

The County Collector:

- 3.1 Prepare and file annual settlements in accordance with state law. In addition, the County Commission should ensure the annual settlements are filed and are carefully and fully examined to ensure tax book charges and credits are accurately reported.
- 3.2 Adopt procedures to ensure the penalty on delinquent city taxes are distributed in accordance with state law and city commissions are calculated and distributed as provided in the city agreements. In

Clinton County
Management Advisory Report - State Auditor's Findings

addition, return the late payment penalties improperly distributed and distribute them in accordance with state law. Also, seek reimbursement from the county for the County Collector's city commissions that were improperly distributed and distribute them as provided in the city agreements.

Auditee's Response

The County Collector provided the following responses:

- 3.1 *The annual reports were not done timely, as I felt it was more important to get what little money that was left in various accounts from the previous collector along with payouts of interest, Missouri Department of Conservations payments, bankruptcy accounts, and in-lieu monies that have not been distributed for numerous years to the various entities. Also while correcting numerous deficiencies identified in the last two audits. The annual reports will be completed by the end of fiscal year 2018.*
- 3.2 *I came into the office on March 2, 2015 with many deficiencies noted in the prior audits (August 2010 Report No. 2010-104 (MO State Auditor Susan Montee), February 2015 Report No. 2015-009 (MO State Auditor Thomas Schweich) and September 2015 Report No. 2015-075 (Follow-Up - MO State Auditor Nicole Galloway). I read through each audit and have managed to address and correct each item that was lacking, according to the auditors findings. The city collections were not addressed in any of the above audits, therefore I concluded since there was no reference to the collection and/or disbursements that portion of the office duties were being performed correctly. After being informed that I was incorrectly distributing the funds, I will be reimbursed the amount that the auditors have stated was lacking to each entity.*

The County Commission provided the following response:

- 3.1 *We will consult legal counsel to determine the statutory authority granted to us under Chapter 139 to ensure the County Collector files annual settlements. In addition, we will fully examine any annual settlements the County Collector files with the County Commission.*

Auditor's Comment

- 3.1 The County Collector's response indicates she will implement the recommendation by the end of fiscal year 2018 which was February 28, 2018. We discussed this discrepancy with her, but she declined to change her response.
- 3.2 The County Collector did not clearly address our recommendation to return the late payment penalties that were improperly distributed and distribute them in accordance with state law and to distribute city

Clinton County
Management Advisory Report - State Auditor's Findings

commission as provided in the city agreements. We discussed this problem with her, but she declined to address these recommendations.

4. Senate Bill 40 Board's Payroll

4.1 Payroll disbursements

Improvement over payroll controls and procedures for the Senate Bill 40 (SB40) Board is needed. The Board paid payroll expenses of approximately \$143,000 for the year ended December 31, 2017.

The SB40 Board made payments to employees totaling \$5,714, before payroll taxes, during the year ended December 31, 2017, that were not supported by adequate documentation.

In January 2017, employee pay was changed from salary to hourly. However, hourly pay rates, a pay raise, paid time off (PTO) rates, and tax withholdings were not calculated correctly when this change occurred. In October 2017, 3 of the Board's 4 employees received a separate paycheck of \$500 after payroll taxes. Board members indicated these checks were a "good faith" payment to let the employees know the Board was "working to correct all payroll issues." These payments before payroll taxes totaled \$1,698. The fourth employee did not receive the \$500 "good faith" payment because she was not employed with the Board during the period the payroll issues occurred.

In addition, in November 2017, 3 of the Board's 4 employees also received a PTO payout on their regular paycheck. The total amount paid was \$4,016 before payroll taxes. Each of these employees signed an agreement that by accepting the check, the employee agreed that this was the final adjustment to be made to past payroll issues and the employee would not expect any further compensation. The fourth employee did not sign the agreement and instead was allowed to use the 45 hours of PTO owed to her by the end of 2017. The agreement also indicated the Board's payroll service provider had documentation of all pay with a reasonable explanation of errors and adjustments made. We requested this documentation or any other documentation to support the \$500 "good faith" payments and the PTO payout, but neither was provided to us.

Adequate documentation is essential to ensure all payments to employees are proper and necessary expenditures of the Board.

4.2 Incentive payments

The SB40 Board approved "an incentive to the staff for the quality of their work and the hardship of the payroll difficulties of 2017" totaling \$3,300 on December 22, 2017. The 3 full-time employees received \$1,000 each and a part-time employee received \$300.

These payments are likely bonuses and in violation of Article III, Section 39, of the Missouri Constitution, because they were not part of a formal pay plan and seem to represent additional payments for services previously rendered.

Clinton County Management Advisory Report - State Auditor's Findings

In addition, Attorney General's Opinion 72-1955 (June 14, 1955), states, ". . . a government agency which derives its power and authority from the Constitution and laws of this state would be prohibited from granting extra compensation in the form of bonuses to public officers or servants after the service has been rendered."

4.3 Time and leave records

The SB40 Board does not require timesheets or other documentation for hours worked. In November 2017, the Board determined timesheets are unnecessary because all employees are classified as exempt employees and were not entitled to overtime pay as allowed by the Fair Labor Standards Act (FLSA). In addition, neither the Board nor its payroll service provider maintain records of employee leave balances. Employees are responsible for maintaining records of their own leave balances. As a result, the Board cannot substantiate compliance with FLSA requirements for these employees and there is no documentation to support or justify paid time off.

Detailed timesheets and leave records would document hours actually worked and support leave taken and are beneficial in demonstrating compliance with the Board policies and FLSA requirements.

Recommendations

The Senate Bill 40 Board:

- 4.1 Ensure all payroll disbursements are supported by adequate documentation.
- 4.2 Ensure all employee compensation is documented in a formal pay plan as appropriate, and in compliance with state law.
- 4.3 Require all employees to prepare detailed timesheets or other documentation for time worked and maintain records of leave balances for all employees.

Auditee's Response

- 4.1 *We understand and agree with the finding as presented. We will take appropriate steps to ensure all payroll disbursements are supported by adequate documentation, and we are currently in the process of engaging a new accounting firm to ensure compliance with the auditor's recommendation. The recommendation will be fully implemented by January 1, 2019.*
- 4.2 *We understand and agree with the finding as presented. We will take appropriate steps to ensure all employee compensation is documented in a formal pay plan in compliance with Article III, Section 39 of the Missouri Constitution. Specifically, we will ensure that any incentive payments to employees are part of a documented, formal pay plan, and not paid in the form of bonuses for services*

Clinton County
Management Advisory Report - State Auditor's Findings

previously rendered. The auditor's recommendation was implemented on December 3, 2018.

4.3 *We understand and agree with the finding as presented. We will take steps to ensure all employees prepare detailed timesheets for time worked, and we will maintain records of leave balances for all employees. The auditor's recommendation was implemented on December 3, 2018.*

5. Capital Asset Dispositions

The county has not established adequate controls and procedures for the disposition of capital assets. The County Clerk's capital asset listing totaled approximately \$3 million at December 31, 2017.

In April 2017, the former County Assessor, disposed of a county vehicle by selling it to an employee of his office for \$1,200. According to the legal affidavit signed by the County Commissioners and filed with the Forty-Third Judicial Circuit, Clinton County, the Kelly Blue Book¹ value of a similar vehicle at the time of the sale was at least \$4,736. The affidavit also indicates the former County Assessor did not obtain approval from the County Commission to dispose of the vehicle and did not solicit or advertise for bids.

The County Clerk indicated the county does not have a formal policy in place for the disposal of capital assets; however, she indicated it is the County Commission's procedure to require officials seek the County Commission's approval before the asset is disposed.

Procedures for capital asset dispositions, including obtaining prior written approval of the County Commission, would enhance the county's ability to account for capital assets and deter and detect theft of assets.

Recommendation

The County Commission and the County Clerk establish a formal policy for the disposal of county property and require written approval be obtained prior to the disposal of county property.

Auditee's Response

We will take this recommendation under advisement.

6. Disbursements

Controls and procedures related to disbursements made for the Sheriff's office need improvement.

6.1 Credit cards

The county did not maintain adequate documentation to support some disbursements made with the 4 credit cards used by the Sheriff's office. Office personnel spent approximately \$22,700 using these cards between February 2017 and March 2018.

¹ The Kelly Blue Book is a vehicle valuation and automotive research company.

Clinton County Management Advisory Report - State Auditor's Findings

Our review of 45 credit card transactions made between February 2017 and March 2018 identified 19 transactions totaling \$1,170 that did not have any receipt submitted to support the purchase. In addition, we noted 4 transactions totaling approximately \$140 where the receipt was not sufficiently detailed to support the transaction.

All credit card disbursements should include proper supporting documentation that is reconciled to billing statements to ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds.

6.2 Local meals

The county has not established a policy for providing employee meals while not on travel status. Our review of 45 credit card transactions made between February 2017 and March 2018 identified 24 transactions totaling \$1,135 for food and drink purchases at local restaurants for the Sheriff and his employees when they were not in continuous travel status for 12 hours or more and these payments were not added to their W-2 forms as a taxable benefit. None of these transactions were supported by information demonstrating how the purchase related to the operation of the Sheriff's office or detailed the persons in attendance to ensure the transaction was a reasonable and prudent use of public funds.

According to Internal Revenue Service (IRS) Publication 463, Travel, Entertainment, Gift, and Car Expenses, the cost of business meals that does not involve overnight travel or travel long enough for the employees to stop for sleep or rest to properly perform their duties is a personal expense, and therefore is not deductible as a business expense. In addition, IRS Publication 15-B states that any fringe benefit provided by an employer is taxable and must be included in the employee's pay unless excluded by law.

6.3 Late fees and finance charges

The county has not established adequate procedures to ensure Sheriff's office credit card bills are paid timely. Our review of that office's credit card statements from February 2017 to March 2018 showed assessment of late fees of \$234 and finance charges of \$905. The Sheriff indicated personnel in his office struggled to reconcile the receipts and other supporting documentation to the monthly statements which led to significant delays in submitting the statements to the County Clerk's office for payment.

To prevent unnecessary late fees and finance charges, procedures should be in place to ensure the Sheriff's office credit card bills are paid timely.

Recommendations

The County Commission and the Sheriff:

- 6.1 Ensure all credit card purchases are supported by appropriate documentation and are reconciled to the billing statements.

Clinton County
Management Advisory Report - State Auditor's Findings

- 6.2 Discontinue purchasing food when not on travel status and develop a comprehensive policy regarding food purchases that is in compliance with IRS regulations.
- 6.3 Implement procedures to ensure credit card bills are paid timely to avoid late fees and finance charges.

Auditee's Response

The County Commission provided the following responses:

- 6.1 *We will take this recommendation under advisement for all credit card purchases made from the General Revenue Fund. However, we have extreme frustrations with how the Sheriff is spending the money from his discretionary funds, but we have no statutory authority to tell the Sheriff what he can and cannot spend his discretionary funds on.*
- 6.2 *We will take this recommendation under advisement.*
- 6.3 *We will take this recommendation under advisement.*

The Sheriff provided the following responses:

- 6.1 *We agree with the auditor's finding and have already taken steps to implement the recommendation.*
- 6.2 *We agree with the auditor's finding. Policy will be enacted to cover local expenses for meals when needed.*
- 6.3 *We agree with the auditor's finding and have already taken steps to implement the recommendation.*

7. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. Office personnel processed receipts for civil paper service fees, bonds, inmate monies, and other miscellaneous receipts totaling approximately \$239,000 for the year ended December 31, 2017.

7.1 Bank reconciliations and liabilities

The Sheriff's office does not prepare adequate bank reconciliations for the inmate/commissary account. In addition, a monthly list of liabilities is not prepared to reconcile to the inmate/commissary account balance. A Statement Reconciliation Report is prepared using the computerized accounting system each month and includes individual checks and deposits that have cleared the bank during the month; however, outstanding checks, deposits in transit, and other reconciling items are not determined. As of May 31, 2018, we determined the reconciled bank balance was \$4,134. In addition, we identified liabilities totaling \$4,825, consisting of inmate monies held in the account and amounts due to vendors, which agreed with the available cash balance.

Clinton County Management Advisory Report - State Auditor's Findings

Performing adequate monthly bank reconciliations helps ensure accurate records are kept and increases the likelihood errors will be identified. Regular identification and comparison of liabilities to the reconciled cash balance is necessary to ensure records are in balance and monies are available to satisfy all liabilities.

7.2 Checks

The Sheriff's office does not record all checks issued from the inmate/commissary account in numerical sequence. We reviewed checks issued between October 2017 and May 2018 and noted 21 of the 145 checks issued (14 percent) were recorded out of numerical sequence. Each of these checks was issued to the commissary vendor and dated as of the vendor's invoice date and not the check issuance date.

To ensure accurate records, checks should be dated as of the issuance date and recorded in numerical order on the checkbook register.

7.3 Commissary net proceeds

The Sheriff's office has not disbursed commissary net proceeds remaining in an inactive inmate/commissary bank account to the county Inmate Prisoner Detainee Security Fund as required by state law. The account balance was \$3,107 as of April 30, 2018. The account became inactive in October 2017 when the Sheriff's office contracted with a new commissary vendor and opened a new bank account.

Section 221.102, RSMo, requires each county jail to keep revenues from its commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (net proceeds) into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer.

A similar condition was noted in our prior 3 audit reports.

Recommendations

The Sheriff:

- 7.1 Ensure adequate monthly bank reconciliations are prepared using outstanding checks, deposits in transit, and other reconciling items. In addition, the Sheriff should prepare a monthly list of liabilities and reconcile the listing to the available cash balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved.
- 7.2 Ensure checks are dated as of the issuance date and recorded in numerical order in the checkbook register.

Clinton County
Management Advisory Report - State Auditor's Findings

Auditee's Response

7.3 Disburse commissary net proceeds held in the inactive bank account to the County Treasurer for deposit in the Inmate Prisoner Detainee Security Fund and close the account.

7.1 *We prepare monthly bank reconciliations as trained by our commissary provider, Turnkey. A list of liabilities will be prepared moving forward. Outstanding checks will be handled according to policy and state statutes. We will work with Turnkey to ensure bank reconciliations are more in-line with the recommendations.*

7.2 *Checks are sometimes back dated to reflect invoices paid. This is how our commissary provider, Turnkey, trained us to pay vendors so numbers match when vendors are paid. We are currently working with Turnkey to improve this process to cause less confusion and be more in-line with these recommendations.*

7.3 *After unclaimed property was identified and sent off to the state, we have closed this account, effective November 2018, and transferred net proceeds to the Inmate Prisoner Detainee Security Fund.*

8. Prosecuting Attorney's Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need improvement. The office collected approximately \$34,000 in bad check and court-order restitution and fees during the year ended December 31, 2017.

8.1 Bank reconciliations and liabilities

The Prosecuting Attorney's office does not maintain a book balance or prepare adequate bank reconciliations. In addition, a monthly list of liabilities is not prepared to reconcile to the bank reconciliation.

The Prosecuting Attorney's office prepares a bank statement balance worksheet that lists the beginning bank statement balance, bank activity for the month, and the ending bank statement balance. In addition, outstanding checks are listed and totaled on the worksheet but are not used because a reconciled bank statement balance is not calculated. We determined the account had a negative reconciled bank balance of \$44 at December 31, 2017, (bank balance of \$1,941 less outstanding checks totaling \$1,964 and \$21 accumulated interest). Office personnel could not explain why the account has a negative reconciled bank balance.

A book balance is necessary to reconcile the bank account and adequately monitor account balances. Monthly bank reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected and resolved timely. Regular identification and comparison of liabilities to the available cash balance is

Clinton County Management Advisory Report - State Auditor's Findings

necessary to ensure records are in balance and monies are available to satisfy all liabilities.

8.2 Deposits

The Prosecuting Attorney's office does not deposit receipts timely. Deposits are typically made once a month, at month-end. For example, March 2018 receipts totaling \$4,704, were not deposited until March 30, 2018.

To safeguard receipts and to reduce the risk of loss, theft, or misuse of monies received, procedures should be established to ensure all monies received are deposited timely.

A similar condition was noted in our prior report.

8.3 Administrative fees

The Prosecuting Attorney's office does not always assess the statutorily required fees from defendants who owe court-ordered restitution. We noted the administrative handling cost fee was not assessed for 5 of 14 (36 percent) cases reviewed. If assessed, these fees would have totaled \$375. Office personnel indicated the fee is not assessed unless the court order includes the fee.

Section 559.100.3, RSMo, requires the Prosecuting Attorney to collect an administrative handling cost fee on cases of court-ordered restitution.

Recommendations

The Prosecuting Attorney:

- 8.1 Maintain a book balance and perform monthly bank reconciliations. In addition, prepare monthly lists of liabilities and reconcile the list to the available cash balance. Any differences should be promptly investigated and resolved.
- 8.2 Ensure monies received are deposited timely.
- 8.3 Assess and collect fees on all restitution cases as required by state law.

Auditee's Response

- 8.1 *We will implement policy changes to allow for more timely reconciliations, taking into account the workload demands on current staff. We are understaffed, and requests to the County Commission to increase funding for additional staff have not been acted upon.*
- 8.2 *We will implement policy changes to allow for more timely bank deposits.*
- 8.3 *We will collect fees and restitution only as allowed by law. Moreover, we maintain a policy that victims are to be paid from collected*

Clinton County
Management Advisory Report - State Auditor's Findings

amounts in full before any administrative fees are collected. Thus, for amounts that are only partially collected, we will not see any fees until the victims are paid in full.

9. Passwords

The County Clerk and Ex Officio Recorder of Deeds have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to be periodically changed, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

A similar condition was noted in our prior audit report.

Recommendation

The County Clerk and Ex Officio Recorder of Deeds require employees maintain confidential passwords that must be periodically changed.

Auditee's Response

The Ex Officio Recorder of Deeds provided the following response:

I will work toward the recommendation.

The County Clerk provided the following response:

I will be retiring at the end of December. There will be a new County Clerk at that time and the decision to change anything will be left up to him.

Clinton County

Organization and Statistical Information

Clinton County is a county-organized, third-class county. The county seat is Plattsburg.

Clinton County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 74 full-time employees and 24 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board and the Law Enforcement Restitution Fund Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Wade Wilken Jr., Presiding Commissioner	\$	30,566
Gary McCrea, Associate Commissioner		28,486
Larry King, Associate Commissioner		28,486
Molly Livingston, Circuit Clerk and Ex Officio Recorder of Deeds (1)		56,760
Mary Blanton, County Clerk (2)		46,892
Joe Gagnon, Prosecuting Attorney		53,040
Larry Fish, Sheriff		47,840
Leann Gump, County Treasurer		43,160
Lee Hanks, County Coroner		15,000
Nancy D. Wingate, Public Administrator		43,160
Michele Wells, County Collector (3), year ended February 28,	61,660	
Cindy Carter, County Assessor, year ended August 31,		43,160

- (1) Compensation is paid by the state.
- (2) Includes \$3,732 of commissions from preparing city property tax books.
- (3) Includes \$18,500 of commissions earned for collecting city property taxes.

Office of Missouri State Auditor
Nicole Galloway, CPA

Washington County

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Washington County

Sheriff's Controls and Procedures	The Sheriff's Administrative Assistant does not prepare adequate bank reconciliations for the bond and inactive commissary bank accounts, and monthly lists of liabilities are not prepared to reconcile to the account balances. The Sheriff does not disburse commissary net proceeds to the county Inmate Prisoner Detainee Security Fund as required by state law. The Sheriff has not established adequate controls and procedures over seized property.
County Assessor's Controls and Procedures	The County Assessor does not issue receipt slips for all monies received. The County Assessor's review of the accounting records is not documented and does not effectively ensure monies received have been properly recorded, and the County Assessor does not account for the numerical sequence of receipt slips. The method of payment is not always indicated on receipt slips and checks are not restrictively endorsed immediately upon receipt.
Board for the Handicapped	The Washington County Board for the Handicapped purchased flooring material and a building from the Board Treasurer, creating a conflict of interest.
Electronic Data Security	Controls over county computers are not sufficient to prevent unauthorized access. As a result, county records are not adequately protected and are susceptible to unauthorized access.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Washington County

We have audited certain operations of Washington County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Washington County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

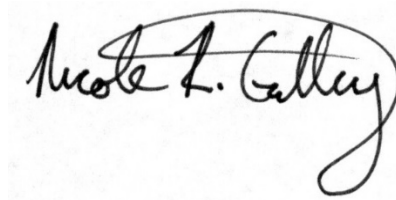

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Washington County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Washington County Management Advisory Report State Auditor's Findings

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The Sheriff's office processed receipts for civil paper service fees and mileage, bonds, inmate monies, prisoner board, and other miscellaneous receipts totaling approximately \$538,000 for the year ended December 31, 2017.

1.1 Bank reconciliations and liabilities

The Sheriff's Administrative Assistant does not prepare adequate bank reconciliations for the bond and inactive commissary bank accounts. In addition, monthly lists of liabilities are not prepared to reconcile to the account balances.

The reconciliation process includes documenting the transactions that have cleared the bank; however, reports of outstanding checks, deposits in transit, and other reconciling items are not prepared or reviewed. We determined the bond account's reconciled balance was \$260 as of December 31, 2017. In addition, the Sheriff's office did not maintain records from the prior commissary system to perform bank reconciliations. This account had a bank balance of \$37,548 as of December 31, 2017. Office personnel did not maintain a list of liabilities but indicated the balance consists of commissary net proceeds that have not been turned over to the Inmate Prisoner Detainee Security Fund (see section 1.2).

Performing adequate monthly bank reconciliations helps ensure receipts and disbursements have been properly handled and recorded, and increases the likelihood errors will be identified and corrected timely. Regular identification and comparison of liabilities to the available cash balance is necessary to ensure records are in balance and monies are available to satisfy all liabilities.

A similar condition was noted in our prior audit report.

1.2 Inmate Prisoner Detainee Security Fund

The Sheriff does not disburse commissary net proceeds to the county Inmate Prisoner Detainee Security Fund as required by state law. All net proceeds from commissary sales, and commissions received from commissary vendors for purchases made by inmates are retained with the inmate monies in the commissary bank accounts. Any amount in the bank accounts exceeding the inmate monies is considered commissary net proceeds.

Section 221.102, RSMo, requires each county jail to keep revenues from its commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (net proceeds) of the commissary account into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer.

1.3 Seized property

The Sheriff has not established adequate controls and procedures over seized property. The electronic seized property evidence log maintained is not

Washington County Management Advisory Report - State Auditor's Findings

complete and only includes items seized starting in 2001. Items obtained prior to 2001 are recorded on manual logs. We tested 10 items and identified errors for 5 items. Two test items were listed in the system with an inaccurate location and one test item was labeled with a case number that did not match the case number on the log. Two other test items were located in the seized property room but could not be initially found on the log. The Sheriff subsequently located both items in the system and determined the initial case number had not been properly recorded in the system. In addition, the Sheriff does not periodically reconcile the physical inventory to the log. Per the Sheriff's seized property deputy, the last physical inventory was performed in 2001.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the property. Complete and accurate inventory records including information such as description, current location, case number, date of seizure, and disposition of such property should be maintained, and periodic physical inventories should be performed and the results compared to inventory records to ensure seized property is accounted for properly.

Recommendations

The Sheriff:

- 1.1 Ensure adequate monthly bank reconciliations are prepared for all bank accounts, and lists of outstanding checks and deposits in transit are prepared. In addition, prepare monthly lists of liabilities and reconcile the lists to the available cash balances. Any differences between accounting records and reconciliations should be promptly investigated and resolved.
- 1.2 Ensure existing and future commissary net proceeds not necessary to meet cash flow needs or current operating expenses are disbursed to the County Treasurer for deposit in the Inmate Prisoner Detainee Security Fund.
- 1.3 Maintain a complete and accurate seized property evidence log, and ensure a periodic inventory is conducted and reconciled to the seized property evidence log, and investigate any differences.

Auditee's Response

- 1.1 *The Sheriff's office is and has been doing bank reconciliations; however, we will follow the Auditor's recommendations and start using new forms. Each month, preparation of monthly lists of liabilities and reconciliation to cash balances will be done, and differences will be investigated and resolved. The bond account had an unreconciled balance as of December 31, 2017. After investigation and review it was determined the money came from the reimbursement of bank fees from our previous bank.*

Washington County
Management Advisory Report - State Auditor's Findings

- 1.2 *With regards to commissary net proceeds, the company we use (Tiger Commissary), breaks down money automatically for us between inmate money and proceeds. The revenue from this, is now placed into a separate account and transferred quarterly to the County Treasurer to be deposited into the Inmate Prisoner Detainee Security Fund. The Sheriff's office maintains a minimal amount in the account for cash flow purposes as defined by Section 221.102, RSMo. Missouri law allows the Sheriff to maintain a minimal amount of cash; however, it does not define that further. When the Auditor's office was asked who defined the minimal amount, the auditor advised that the Sheriff determines this amount.*
- 1.3 *The Sheriff's office has been working with the County Commission on a more suitable means to hold seized property and we are nearing a solution to this issue. The seized property encompasses approximately 30 years and several different administrations. The Sheriff's office is working to employ a full-time property clerk who can perform annual audits and convert paper files to digital files. Previous Sheriffs used a different numbering system that my current staff was not familiar with, and that problem has been corrected.*

Auditor's Comment

- 1.2 Section 221.102, RSMo, requires net proceeds from the commissary, other than a minimum amount for cash flow purposes and current expenses, to be deposited into the Inmate Prisoner Detainee Security Fund held by the County Treasurer. Considering the Sheriff's office does not maintain any commissary inventory, it is unreasonable to consider the Sheriff's large balance of accumulated net proceeds (as indicated in section 1.1) as a minimal cash balance necessary for the operation of the commissary.

2. County Assessor's Controls and Procedures

Controls and procedures in the County Assessor's office need improvement. The office transmitted \$13,951 to the County Treasurer for the collection of maps, copies, and electronic data access during the year ended December 31, 2017.

A cash count performed on June 19, 2018, and a review of the County Assessor's office receipt slips, transmittal reports, and County Treasurer receipt slips identified various concerns.

- Office personnel do not issue receipt slips for all monies received. For the year ended December 31, 2017, receipts totaling \$13,951 were transmitted to the County Treasurer. However, only \$902 (approximately 6 percent) was recorded on receipt slips issued by the County Assessor's office.
- The County Assessor's review of the accounting records is not documented and does not effectively ensure monies received have been

Washington County Management Advisory Report - State Auditor's Findings

properly recorded. In addition, the County Assessor does not account for the numerical sequence of receipt slips. For the 97 receipt slips issued during 2017, we noted 3 skipped receipt slips (not used), 6 receipt slips improperly voided (top copy of receipt slips not retained), and receipt slips issued out of sequence.

- The method of payment (cash or check) is not always indicated on receipt slips. We noted 66 out of 97 (68 percent) receipt slips issued did not indicate the method of payment.
- Checks are not restrictively endorsed immediately upon receipt. Endorsement is applied by the County Treasurer after the monthly transmittal.

To reduce the risk of loss, theft, or misuse of monies received going undetected, procedures should be established to ensure all monies received are properly receipted and transmitted.

A similar condition was noted in our prior audit report.

Recommendation

The County Assessor issue prenumbered receipt slips for all monies received, indicate the method of payment on all receipt slips, and restrictively endorse checks immediately upon receipt. In addition, perform a documented review of the accounting records ensuring the numerical sequence of receipt slips is accounted for and the composition of receipts is reconciled to the composition of amounts transmitted.

Auditee's Response

The County Assessor agrees and will implement the recommendation.

3. Board for the Handicapped

The Washington County Board for the Handicapped (Board) purchased flooring material and a building from the Board Treasurer, creating a conflict of interest. On March 29, 2017, the Board executed a contract with the Board Treasurer to purchase a building for \$96,000 (appraised at \$110,000) in Potosi to increase office space. The purchase was to be paid in 96 monthly installments of \$1,000 starting January 1, 2018. The Board failed to provide public notice prior to the execution of the contract as required by state law. In addition, the Board also purchased \$5,600 in flooring material to renovate the building from the Board Treasurer without soliciting bids.

Board members serve in a fiduciary capacity. Personal interests in business matters of the Board could create actual and the appearance of conflicts of interest. In addition, Section 105.454, RSMo, prohibits financial transactions between the board and elected or appointed officials or employees that involve more than \$500 per transaction or \$5,000 per annum unless there has been public notice to solicit proposals, and also requires competitive bidding

Washington County
Management Advisory Report - State Auditor's Findings

for property other than real property, provided the bid or offer accepted is the lowest received.

Recommendation

The Washington County Board for the Handicapped refrain from entering into business transactions that could result in the appearance of or actual conflict of interest and ensure all transactions are made in accordance with state law.

Auditee's Response

The Washington County Board for the Handicapped (WCBH) recognizes our error in the processes around the purchase of the property purchased for new office space to be used by Washington County Handicapped Services/The Pam Dudley Center. In response to the questions which arose from the handling of this purchase the Board sought and followed legal advice to remedy the situation.

The following was posted at the Washington County Courthouse, the WCBH building, and in the local newspaper on May 10, 2018.

On January 1, 2018 the Washington County SB 40 Board (the "Board") entered into a contract to purchase the building adjacent to its current TCM building, at a below-market price, from an appointed member of the Board. In connection with that sale, the Board acquired carpeting, also at a below-market price, from the same member to renovate the building. The purchased building is currently being used to further the Board's mission of providing for the unmet specialized needs of those with developmental disabilities in Washington County.

Under Chapter 105 of the Missouri Revised Statutes, certain sales of real and/or personal property by a public official to a related political subdivision may require public notice and competitive bidding. The Board will address the above transactions at its meeting from 5:00 PM – 6:00 PM on May 22, 2018 at 10558 West State Hwy E, Potosi, MO 63664, and seeks public comment from Washington County residents at such time and place. The Board intends to carefully consider all reasonable input and determine whether to rescind or ratify the contracts with respect to the above transactions.

On May 22, 2018, the Board met as posted and was available for public comment. At that time the Board ratified the decision to purchase the building and flooring. Further, on August 28, 2018, in conjunction with our Board meeting, the Board underwent training in relation to Section 105.458, RSMo, and the Missouri Sunshine Law to ensure future actions are conducted within the rules and guidelines of which we are bound.

Washington County
Management Advisory Report - State Auditor's Findings

Though the mistakes which were made in the purchase of these items were unintentional, the Board recognizes our responsibility to follow the guidelines and rules under which we operate. It is our desire to have the respect and faith of the taxpayers and community we serve.

4. Electronic Data Security

4.1 Passwords

Controls over county computers are not sufficient to prevent unauthorized access. As a result, county records are not adequately protected and are susceptible to unauthorized access.

The Recorder of Deeds has not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in the Recorder of Deeds' office are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to be periodically changed by employees, there is less assurance access to computers and data files is effectively limited to only those individuals who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

4.2 Security controls

Security controls are not in place to lock computers in the offices of the Sheriff and Recorder of Deeds after a specified number of incorrect logon attempts or after a certain period of inactivity.

Logon attempt controls lock the capability to access a computer after a specified number of consecutive unsuccessful logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission work with other county officials to:

- 4.1 Require confidential passwords that are periodically changed to prevent unauthorized access to county computers and data.
- 4.2 Require each county computer to have security controls in place to lock it after a specified number of incorrect logon attempts and after a certain period of inactivity.

Washington County
Management Advisory Report - State Auditor's Findings

Auditee's Response

The County Commission is working with our IT contractor/consultant to implement a policy related to IT Security Controls. The County Commission expects to implement this policy prior to December 31, 2018.

Washington County

Organization and Statistical Information

Washington County is a county-organized, third-class county. The county seat is Potosi.

Washington County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 97 full-time employees and 9 part-time employees on December 31, 2017.

In addition, county operations include a Board for the Handicapped and a Senior Citizens' Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Marvin Wright, Presiding Commissioner	\$	31,370
Cody Brinley, Associate Commissioner		29,370
Doug Short, Associate Commissioner		28,380
Pamela Blair, Recorder of Deeds		43,000
Jeanette Allen, County Clerk		44,500
Joshua E. Hedgecorth, Prosecuting Attorney		137,084
Zach Jacobsen, Sheriff		48,000
Phyllis Long, County Treasurer		44,500
Brian DeClue, County Coroner		16,000
Beverly Boyer, Public Administrator		43,000
Carla Zettler, County Collector (1), year ended February 28,	45,401	
Tina Litton, County Assessor, year ended August 31,		45,635
R. Timothy Daughtery, County Surveyor (2)		

(1) Includes \$2,401 of commissions earned for collecting city property taxes.

(2) Not compensated by the county.

NICOLE GALLOWAY, CPA

Missouri State Auditor

The Citizens of Missouri

This report was compiled from follow-up reports issued in 2018. The State Auditor's office conducted 7 follow-up reviews pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program¹. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the auditee about the follow-up review on those findings.
2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

Auditors conduct follow-up work for audits with significant or serious findings when determined necessary.

Of the 78 recommendations included in the follow-up reports, 28 (36 percent) had a status of implemented, 15 (19 percent) had a status of in progress, 22 (28 percent) had a status of partially implemented, and 13 (17 percent) had a status of not implemented.

Nicole R. Galloway, CPA
State Auditor

¹ The State Auditor's office also issued 21 follow-up reports as part of the ongoing audit of the City of St. Louis. Those reports were compilations of the auditee's assessment of the status of recommendations and were not conducted pursuant to the AFTER program. Thus, they are not included in this report.

Summary of 2018 Follow-up Reports

Status of Recommendations

1.	City of Wellston	City of Wellston received a "Poor" overall audit rating. The follow-up report focused on 19 recommendations.
	Report Number 2018-011	Status determined: Implemented 3 In Progress 2 Partially Implemented 7 Not Implemented 7
2.	Montgomery County	Montgomery County received a "Poor" overall audit rating. The follow-up report focused on 11 recommendations.
	Report Number 2018-015	Status determined: Implemented 6 In Progress 3 Partially Implemented 2
3.	University of Missouri System Administration	University of Missouri System Administration received a "Fair" overall audit rating. The follow-up report focused on 3 recommendations.
	Report Number 2018-026	Status determined: Implemented 2 Partially Implemented 1
4.	Putnam County Memorial Hospital	Putnam County Memorial Hospital received a "Poor" overall audit rating. The follow-up report focused on 4 recommendations.
	Report Number 2018-045	Status determined: In Progress 3 Partially Implemented 1
5.	Twenty-First Judicial Circuit, City of Ferguson Municipal Division	Twenty-First Judicial Circuit, City of Ferguson Municipal Division received a "Poor" overall audit rating. The follow-up report focused on 13 recommendations.
	Report Number 2018-050	Status determined: Implemented 5 In Progress 2 Partially Implemented 5 Not Implemented 1

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by November 30, 2018, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 3 cities and 3 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in November 2018, after their filing deadline. The filing status for these 11 cities and 7 villages is presented in summary on pages 4 and by individual entity in Appendixes B to F.

Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Municipal Court and Revenue Filings

November 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities operating a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that operates a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 3 cities and 3 villages with a fiscal year end of May 31, 2018, whose financial reports, addendums, or certifications were due by November 30, 2018. Of the 6 cities and villages required to file an annual financial report, 5 filed the report timely. Of the 4 entities required to file an addendum, 1 filed an addendum timely. Of the 2 entities required to file a certification, 1 filed a certification timely.

Monthly Report on Municipal Court and Revenue Filings
November 2018
Executive Summary

This report includes the filing status for 11 cities and 7 villages that filed at least one of the items (financial report, addendum, or certification) in November 2018, after their filing deadline. Of these entities, 16 filed an annual financial report and 2 filed an addendum.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 11 political subdivisions required to file a financial report by November 30, 2018, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in November 2018, after their filing deadline. The filing status for these 14 entities is presented in summary on page 3 and by individual entity in Appendix B-D.

Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings

November 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 11 political subdivisions, other than cities, towns, and villages, with a fiscal year end of May 31, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 11 political subdivisions, 8 filed an annual financial report by November 30, 2018.

This report also includes the filing status for 14 political subdivisions, other than cities, towns, and villages, that filed their financial report in November 2018, after their filing deadline.

CITIZENS SUMMARY

Findings in the audit of Adair County

Inmate Account Liabilities	The Sheriff's office does not prepare a monthly list of liabilities for the inmate account, and consequently, liabilities are not reconciled to the account's reconciled bank balance.
County Procedures	The county does not reconcile Road and Bridge department fuel use to fuel purchases. The county did not report the amount of city commissions paid to the County Collector or subject the payments to payroll tax withholdings as required.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Information	

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Adair County

We have audited certain operations of Adair County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Adair County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

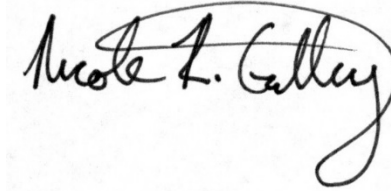

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Adair County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with the first name "Nicole" and last name "Galloway" clearly distinguishable. It is written over a faint, rectangular background that appears to be a stamp or watermark.

Adair County Management Advisory Report State Auditor's Findings

1. Inmate Account Liabilities

The Sheriff's office does not prepare a monthly list of liabilities for the inmate account, and consequently, liabilities are not reconciled to the account's reconciled bank balance. Upon our request, office personnel generated a list of inmate balances totaling \$2,996 as of June 30, 2018. The reconciled bank balance at June 30, 2018 was \$21,375. The Sheriff distributed commissary net proceeds of \$11,500 and paid the commissary vendor \$2,300 in July 2018. The remaining \$7,575 exceeded the identified liabilities (inmate balances) by \$4,579. The Deputy Administrator indicated this balance represents commissary net proceeds and amounts due to the commissary vendor; however, no records were available to support these amounts.

Regular identification and comparison of liabilities to the reconciled cash balance is necessary to ensure accounting records are in balance, all amounts received are disbursed, and monies are available to satisfy all liabilities. Differences must be adequately investigated and explained.

Recommendation

The Sheriff prepare a monthly list of liabilities for the inmate account and reconcile it to the reconciled bank balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved.

Auditee's Response

The inmate bank account is reconciled on a monthly basis and checks are issued to the appropriate vendors, i.e., Swanson Services Corporation and Tele-Connect Inc. The remaining cash balance either belongs to retained earnings (which is transferred to the Adair County Treasurer on a quarterly basis), Swanson Services Corporation for money still owed for commodities purchased (money in "transit" via invoices), or the inmates themselves in their commissary account, for both commissary and phone purchases--\$4,579. Additionally, the retained earnings account is NEVER completely taken to \$0 to ensure funds are available in an emergency.

The Cobra Banker software is proprietary software owned by Swanson Services Corporation and Trinity Services Group. The Finance Coordinator has access to various types of pre-defined reports with very limited capability to manipulate these reports. Several different reports were produced and provided to the audit staff, even after they had departed. The information requested was also discussed with the representatives of Trinity Services Group. In the future, the Finance Coordinator will reconcile the account's Ledger Balance Sheet—Date Specific to the ending balance of the Midwest Bank statement as agreed to in the audit exit conference.

Adair County
Management Advisory Report - State Auditor's Findings

2. County Procedures

Procedures for monitoring fuel use and reporting commissions paid need improvement.

2.1 Fuel use

The county does not reconcile Road and Bridge department fuel use to fuel purchases. During the year ended December 31, 2017, fuel purchases totaled approximately \$157,000 for the Road and Bridge department.

Fuel purchased by the Road and Bridge department is stored in bulk fuel tanks. Eight of the 12 county bulk fuel tanks are not equipped with fuel meters. Without fuel meters, the amount of fuel dispensed cannot be determined, thus fuel pumped from the tanks is not accounted for properly or monitored by county officials.

In addition, the Road and Bridge department does not use available records to reconcile fuel use with fuel purchases. Even though 4 of the 12 tanks are metered, department personnel do not use fuel pumped information available to reconcile with fuel purchases. Also, the department does not maintain mileage logs for applicable vehicles and equipment.

Procedures for reconciling fuel use to fuel purchases as well as maintaining fuel use and mileage logs are necessary to ensure vehicles and equipment are properly utilized; prevent paying vendors for improper amounts; and decrease the risk of loss, theft, or misuse of fuel occurring and going undetected.

2.2 County Collector's city commissions

The county did not report the amount of city commissions paid to the County Collector or subject the payments to payroll tax withholdings as required. During the year ended December 31, 2017, the county paid the County Collector \$21,956 in city property tax commissions without reporting this amount on her W-2 form or withholding payroll taxes.

The county's current practice of handling city commissions in this manner is in violation of a strict interpretation of payroll tax regulations. The county is at risk of incurring additional payroll liabilities plus interest and penalties by utilizing the current practice. IRS regulations require all compensation paid to employees be subject to payroll tax and reported on W-2 forms. In addition, the County Commission and County Collector should consider these additional costs to the county and reevaluate the existing city tax collection contracts.

Recommendations

The County Commission:

- 2.1 Require fuel meters on all bulk fuel tanks and fuel and mileage logs to be maintained, and ensure logs are reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be promptly investigated.

Adair County
Management Advisory Report - State Auditor's Findings

Auditee's Response

2.2 Ensure commissions paid to the County Collector are subject to payroll taxes and properly reported on W-2 forms. The County Commission and County Collector should consider these additional costs and reevaluate the existing city tax collection contracts.

2.1 *The Road and Bridge supervisor monitors fuel use via electronic fuel tracking on the machines. He does this on a monthly basis. Bulk fuel purchases are recorded in the computer and have paper copies for every purchase and he can go through the logs for the last 4 years. We estimate the cost to upgrade all fuel tanks at approximately \$15,000. We believe this to be cost prohibitive to replace all at this time. We will purchase tanks in the future with fuel gauges as they are replaced due to failure.*

2.2 *The County Commission provided the following response:*

The County Collector is a contractor for the City of Kirksville. Therefore, the City of Kirksville should be providing a 1099 to the Collector. Putting this wage through the county payroll would cost Adair County funds to be used to pay monies the City of Kirksville should be responsible for based on their contract.

The County Collector provided the following response:

The contract language allows for the County Collector to charge and collect the additional 1.5 percent commission. The County Collector reports to the County Clerk the amount of Commission received on the annual report of County officials compensation form. The Collector also reports the amount collected to her personal accountant. I will consider the recommendation of implementing 1099 forms.

Adair County

Organization and Statistical Information

Adair County is a county-organized, third-class county. The county seat is Kirksville.

Adair County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 62 full-time employees and 16 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Stan Pickens, Presiding Commissioner	\$	37,051
William J. King, Associate Commissioner		34,745
Mark Thompson, Associate Commissioner		34,745
Pat Shoush, Recorder of Deeds		51,593
Sandra Collop, County Clerk		51,593
Matt Wilson, Prosecuting Attorney		137,745
Robert T. Hardwick, Sheriff		57,348
Lori J. Smith, County Treasurer		51,593
Brian C. Noe, County Coroner		18,295
Rhonda Noe, Public Administrator		51,593
Sonja Harden, County Collector (1), year ended February 28,	64,769	
Donnie Waybill, County Assessor, year ended August 31,		48,252
David W. Borden, County Surveyor (2)		

(1) Includes \$21,677 of commissions earned for collecting city property taxes.

(2) Compensation on a fee basis.

Office of Missouri State Auditor
Nicole Galloway, CPA

**Department of Social Services
Prescription Drug Oversight**

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the Audit of the Department of Social Services Prescription Drug Oversight

Prescription Drug Cost Trends	The Missouri's Medical Assistance Program (Medicaid), Children's Health Insurance Program (CHIP), and the Missouri Rx (MORx) program processed approximately 33.2 million prescription drug claims totaling \$959 million during calendar year 2016. Missouri's Medicaid and CHIP programs cover the costs of outpatient prescription drugs for participants on a fee-for-service basis. In calendar year 2016, the cost of outpatient prescription drugs for Missouri's Medicaid and CHIP participants totaled over \$953 million and represented 14 percent of all Medicaid and CHIP spending. To respond to increased demand and higher costs for prescription drugs, the Department of Social Services (DSS) has developed several processes to control the costs of drug prescriptions including, but not limited to, providing incentives to pharmacies who dispense generic drugs instead of brand name drugs, implementing processing edits in the claims processing system to require the usage of lower cost drugs before higher cost drugs, and actively seeking supplemental rebate opportunities. After peaking in 2015, prescription drug payments decreased in calendar year 2016 and decreased further in 2017.
Prescription Drug Monitoring Programs	Missouri does not have a comprehensive statewide prescription drug monitoring program (PDMP) to help the Department of Social Services identify Medicaid and CHIP prescription drug fraud and abuse. Prior to July 2017, Missouri was the only state in the nation that did not have a statewide PDMP. St. Louis County, through the County Department of Public Health, established a PDMP in March 2016 due to a lack of a statewide PDMP.
Physician-Administered Drugs	The DSS did not implement system controls to require collection of national drug codes for all physician-administered drug claims, which limits the ability of the DSS to bill the prescription drug manufacturers for rebates for those drug claims.
Excluded Drug Claims	The DSS controls are not sufficient to deny all drug claims for drugs excluded from the Medicaid program.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Steve Corsi, Psy. D., Director
Department of Social Services
Jefferson City, Missouri

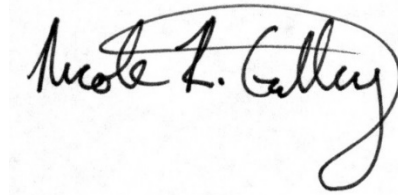

We have audited certain operations of the Department of Social Services, MO HealthNet Division related to prescription drug oversight in fulfillment of our duties under Chapter 29, RSMo. This audit was conducted to evaluate the effectiveness of internal controls over prescription drug payments administered in the Medicaid Assistance Program, Children's Health Insurance Program, and Missouri Rx Plan. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2016. The objectives of our audit were to:

1. Evaluate internal controls over significant management and financial functions as they relate to oversight of prescription drugs.
2. Evaluate compliance with certain legal provisions as they relate to oversight of prescription drugs.
3. Evaluate the economy and efficiency of certain management practices and information system control activities as they relate to oversight of prescription drugs.
4. Analyze prescription drug cost trends and evaluate the effectiveness of cost containment procedures.

Except as discussed in the following paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Government Auditing Standards require us to obtain and report the views of responsible officials of the audited entity concerning the findings, conclusions, and recommendations included in the audit report. Since the Department of Social Services does not have the authority to change state laws, we could not obtain views of responsible officials for part of the finding, conclusion and recommendation outlined in finding 2 of the Management Advisory Report. The views of the department were obtained and included where appropriate.

For the areas audited, we (1) identified deficiencies in internal controls, (2) identified non-compliance with legal provisions, (3) identified no significant deficiencies in management practices and operations, and (4) determined costs have declined in recent years and found cost containment procedures to be generally effective. The accompanying Management Advisory Report presents our findings arising from our audit of prescription drug oversight.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Department of Social Services

Prescription Drug Oversight

Introduction

Background

The Missouri Department of Social Services (DSS) MO HealthNet Division provides medical services to eligible participants within defined programs, including the Medical Assistance Program (Medicaid), Children's Health Insurance Program (CHIP), and the Missouri Rx (MORx) program. Within the MO HealthNet Division, the pharmacy program oversees outpatient prescription drug payments. Prescription drug expenditures for these 3 programs totaled approximately \$959 million in the year ended December 31, 2016. Prescription drugs were available to more than 1 million Medicaid, CHIP, and MORx participants as of December 31, 2016.

Missouri's Medicaid program covers the costs of most brand name and generic prescription drugs for participant outpatient treatment. Brand name drugs are unique, patent-protected products that are usually only available from a single manufacturer. Generic drugs have the same active ingredients as their brand name counterparts and are generally considered by the FDA to be equivalent in dose, strength, route of administration, safety, and intended use. Generic drugs are not protected by patents and are produced and sold by many different manufacturers.

Medicaid program and CHIP

Missouri provides medical services to low income and vulnerable citizens through the federal Medicaid program and CHIP. Medicaid and CHIP are administered at the federal level by the U.S. Department of Health and Human Services (DHHS), Center for Medicare and Medicaid Services (CMS) under Title XIX of the federal Social Security Act, and at the state level by the DSS.

According to federal regulation 42 CFR Section 440 subpart A, state Medicaid programs provide participants certain basic services, including but not limited to inpatient hospital services, outpatient hospital services, rural health clinic services, and nursing facility services for participants ages 21 and older. The Federal Social Security Act also gives states flexibility to provide participants optional services that qualify states for federal matching payments. One optional service offered by all states is coverage of outpatient prescription drugs, which are prescriptions provided to participants outside of a hospital setting. Federal regulation 42 CFR Section 457 subpart D, state CHIP program provide participants certain basic services, including but not limited to inpatient hospital services, outpatient hospital services, physician services, surgical services, clinic services, prescription drugs, and over-the-counter medications.

State Medicaid and CHIP programs allow the state the discretion to determine which prescription drugs are preferred over other drugs for each functional therapeutic class the state would like prescribers to use. The state has a preferred drug listing which is reviewed by two advisory groups, the Drug Prior Authorization Committee and Drug Use Review Board. These groups meet on a quarterly basis to help advise which drugs should be on the list. If

Department of Social Services
Prescription Drug Oversight
Introduction

a prescriber would like to use a different prescription than what is on the preferred drug list, prior authorization is required.

Missouri Rx plan

The DSS administers MORx, a state-funded program, to provide prescription drug assistance to Missourians in need by coordinating benefits with the Medicare Part D Prescription Drug Program. The MORx program pays 50 percent of the participant's out-of-pocket costs on medications covered by the participant's Medicare Part D plan.

Individuals receiving Medicare and Medicaid benefits are eligible for MORx coverage and are automatically enrolled in the program. Prior to August 2017, individuals with Medicare only were eligible for MORx coverage; however, under Section 208.790, RSMo, effective August 28, 2017, eligibility rules changed to cover only individuals who meet both Medicare and Medicaid eligibility guidelines.

Drug rebates

According to federal regulation 42 USC 1396r-8 (a), the federal matching funds are only available to help cover a participant's prescription if the prescription drug meets one of the following conditions: the drug manufacturer participates in the drug rebate program with the U.S. DHHS; the state determines that the drug is essential to the participant's health; the Food and Drug Administration has given the drug a rating of 1-A; or the prior authorization process applies to the prescribing and dispensing of the drug.

The Deficit Reduction Act of 2005 amended section 1927 of the Social Security Act to address rebates for physician-administered drugs, which are medications administered by a physician in an outpatient hospital setting. Effective January 2008, the Social Security Act, 42 U.S.C. Section 1396r-8(a)(7) requires states to capture drug utilization data using National Drug Codes (NDCs), for single-source and top-20 multiple-source drugs from the provider when the claim is submitted to the state. As required by 42 U.S.C. Section 1396r-8, NDCs are used to identify and bill the drug manufacturers for rebates for applicable drug purchases. Federal regulation 42 CFR Section 447.520 prohibits federal reimbursement for physician-administered drugs for which the state has not required the submission of claims using NDCs to identify the drugs. Based on data from manufacturers, the CMS calculates a per-unit rebate amount states can bill for each drug administered. The states are to report the applicable drug utilization information by NDC to the manufacturers and bill the manufacturers quarterly for the drug rebate amounts. States are required by 42 U.S.C. Section 1396r-8 to offset the Medicaid and CHIP prescription drug claims by the rebate amounts.

Scope and Methodology

The scope of audit included, but was not necessarily limited to, the year ended December 31, 2016.

Department of Social Services
Prescription Drug Oversight
Introduction

We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We analyzed outpatient drug payments using the DSS's provided outpatient drug claims paid during the quarter ended December 31, 2016. Our review period was limited to a quarter at the request of the department in an effort to reduce the volume of data being transmitted. Due to the recurring nature of prescription drug data, we determined this information was sufficient to achieve our audit objectives. Outpatient drug claims require NDCs when providers submit drug claims through the Medicaid Management Information System (MMIS) and are run through all the edits within the system. We reviewed and evaluated the DSS's procedures for approving and processing outpatient drug claims, procedures for collecting drug utilization and billing for drug rebates, procedures for addition and exclusion of preferred drug list and clinical edits, and procedures for monitoring of opioid drug claims.

We obtained a listing of deaths recorded in the state for the period 2010 to 2016 from the Missouri Department of Health and Senior Services (DHSS). We matched these records to Medicaid, CHIP and MORx participant drug claims to determine if any deceased participant continued to receive program benefits after the participant's death.¹ In addition, we matched these records to the prescribers of the Medicaid, CHIP and MORx drug claims to determine if any claims were prescribed by deceased prescribers. Although we used computer-processed data from the DHSS for our audit work, we did not rely on the results of any processes performed by the DHSS system in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objective. We determined the deceased participants and providers were appropriately removed from eligibility.

We analyzed all drug claims paid in the quarter ended December 31, 2016, for those participants who had been locked in to designated provider(s). We ensured the edits within the MMIS only allowed drug claims to be paid if the locked in provider(s) had prescribed or fulfilled the prescriptions or if there was a referral form. If the edits did not stop an inappropriate payment, we

Department of Social Services
Prescription Drug Oversight
Introduction

ensured the established procedures identified and corrected the error. We determined the lock-in edit was working or DSS identified and corrected the errors.

Erectile dysfunction (ED) drugs are on the list of excluded drugs unless used to treat a condition other than sexual or erectile dysfunctions. We queried the Medicaid, CHIP, and MORx participant drug claims to obtain a listing of all ED drug claims paid. We then obtained a listing of registered sex offenders from the Missouri State Highway Patrol and compared it to the listing of ED drug claims. We determined 2 registered sex offenders obtained ED drugs. The claims included documentation the drugs were for medical conditions other than sexual or erectile dysfunctions.

We reviewed the geographical data of the prescriber compared to the participants to determine if there was a pattern of a prescriber prescribing an abnormal amount of opioids. In addition, during this review we looked for doctors or pharmacies that pull participants from a wide geographical area, which may indicate abuse. We did not identify any prescribers or pharmacies with prescribing or dispensing patterns indicating abuse.

We obtained a listing of the excluded and non-preferred drugs from the DSS. We matched these records to Medicaid, CHIP, and MORx participant drug claims to determine if the system-required prior authorizations restricting these drugs were working.

We reviewed physician-administered drug claims billed with procedural codes for the year ended December 31, 2016. Physician-administered drug claims do not require the NDCs when providers submit the drug claims through MMIS and are instead billed using a procedural code. The drugs paid for these claims are not eligible for the drug rebate program. Drug claims billed with procedural codes include, but are not limited to, outpatient drug claims in the 340B Drug Pricing program, prescription drug claims in the Gateway to Better Health Medicaid waiver program, and claims for which Medicare part B is the primary payer (also known as Professional Crossover claims).

Department of Social Services

Prescription Drug Oversight

Management Advisory Report - State Auditor's Findings

1. Prescription Drug Cost Trends

Table 1: Medicaid, CHIP, and MORx prescription drug payments for the year ended December 31, 2016

The Missouri's Medical Assistance Program (Medicaid), Children's Health Insurance Program (CHIP), and the Missouri Rx (MORx) program processed approximately 33.2 million prescription drug claims totaling \$959 million during calendar year 2016. Table 1 shows the total Medicaid and CHIP prescription drug payments for the year ended December 31, 2016:

	Medicaid	CHIP	MORx
Prescribed drugs	\$ 933,328,381	19,863,729	5,810,701
Drug rebates - federal	(417,939,354)	(5,639,269)	0
Drug rebates - state	(29,938,147)	0	0
Cost after drug rebate	485,450,880	14,224,460	5,810,701
Federal financial participation ¹	(307,122,244)	(13,838,528)	0
State financial participation	\$ 178,328,636	385,932	5,810,701

¹ Federal financial participation is the portion of the claim reimbursed by the federal government.

Source: Prepared by the SAO using federal reports provided by DSS and SAM II data compiled by SAO.

Prescription drug payment rate

Missouri's Medicaid and CHIP programs cover the costs of outpatient prescription drugs for participants on a fee-for-service basis. The pharmacy filling a prescription for a participant submits a prescription drug claim to the Department of Social Services (DSS) for payment. DSS determines the payment rate for each prescription drug claim and U.S. Department of Health and Human Services, Center for Medicare and Medicaid Services (CMS) approves each state's rate setting methodology. Missouri's rate setting methodology is set forth in 13 CSR 70-20.070.

Prescription drug payment trend

In calendar year 2016, the cost of outpatient prescription drugs for Missouri's Medicaid and CHIP participants totaled over \$953 million and represented 14 percent of all Medicaid and CHIP spending. Spending for prescription drugs is driven by many factors, including the costs of the drug, number of participants, participant's health conditions, the treatment participants need, prescribing practices of health care providers, utilization of prescriptions, and controls for approval and payment.

Total annual Medicaid and CHIP prescription drug spending increased by an average of 6.5 percent per year from calendar year 2010 to 2015, but decreased by 4 percent in 2016, and decreased an additional 8 percent in 2017. Figure 1 shows total prescription drug payments, from calendar year 2010 to 2017, broken down by drug rebate collected and cost after rebate.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

Figure 1: Prescription drug payments, calendar year 2010 to 2017

Source: Prepared by the SAO using federal reports provided by DSS

The number of Medicaid and CHIP participants has fluctuated in recent years; however, the prescription drug payment per participant follows a similar trend to the fluctuation of total prescription drug payments. Payments per participant have decreased by more than \$100 (12 percent) from 2015 to 2017. Figure 2 depicts the trend of the prescription drug payments per participant.

Figure 2: Prescription drug payments per participant, calendar year 2010 to 2017

Source: Prepared by the SAO using federal reports provided by DSS and data published on the DSS website²

DSS determines the Medicaid and CHIP eligibility for each participant in order to provide appropriate services. Figure 3 shows the prescription drug payments in the quarter ended December 31, 2016, by the Medicaid and CHIP eligibility categories.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

Figure 3: Prescription drug payment by Medicaid and CHIP eligibility category

Source: Prepared by the SAO using drug claim data provided by DSS

Total annual MORx plan prescription drug spending has decreased in the most recent years. Per Section 208.788, RSMo, the MORx plan benefits are limited to monies appropriated by the legislature and signed by the governor. Figure 4 shows total prescription drug payments, from calendar year 2010 to 2017 for MORx.

Figure 4: MORx Prescription drug payments, calendar year 2010 to 2017

Source: Prepared by the SAO using state expenditure data for the MORx Fund

A major factor driving the cost of prescription drugs is the drugs being dispensed. Using quarterly data, we estimated in Appendix A the annual amount paid for the 10 prescription drugs making up the largest dollar amount in prescription drug spending for the quarter ended December 31, 2016. The top ten drugs from quarter ended December 31, 2016, accounted for approximately 18 percent of total prescription drug payments in the quarter. Table 2 lists the estimated annualized amount paid and the cost per participant for these 10 prescription drugs.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

Table 2: Top ten drugs by amount paid

Drug Name	Common Treatment	Annualized Amount Paid	Participants	Cost Per Participant
Lurasidone HCL	Mental disorder	\$ 34,448,156	37,162	\$ 927
Paliperidone Palmitate	Mental disorder	28,196,848	7,639	3,691
Albuterol Sulfate	Lung disease	27,096,120	208,310	130
Insulin Glargine	Diabetes	26,026,544	40,097	649

Source: Prepared by the SAO using drug claim data provided by DSS

Cost control measures

To respond to increased demand and higher costs for prescription drugs, the DSS has developed several processes to control the costs of drug prescriptions including, but not limited to, providing incentives to pharmacies who dispense generic drugs instead of brand name drugs, implementing processing edits in the claims processing system to require the usage of lower cost drugs before higher cost drugs, and actively seeking supplemental rebate opportunities.

To reduce misuse of opioid drugs, the DSS implemented the Opioid Pharmacy Intervention (OPI) Program in 2010. The program's goals are to target and reduce opioid misuse, reduce adverse effects on participants, and identify prevention opportunities. Prescribers of opioids in Missouri receive packets of educational information identifying patients who are at potential risk for abuse, dependence, or adverse side-effects. The information highlights prescribing practices that are potentially at odds with the program's goals. If a malpractice behavior is not corrected by a provider, DSS can escalate the case. If educational attempts are not successful and prescription malpractice is still taking place, DSS will make a referral to the Bureau of Narcotics and Dangerous Drugs and submit supporting documentation. In such cases, claims submitted by this provider may be denied until the case is resolved. DSS also monitors participants' drug claims to determine if opioid abuse may be occurring. If DSS personnel believe a participant is misusing opioids, they can limit when and where the participant can obtain such drugs.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

Using quarterly data, we estimated in Appendix B the annual amount paid, and number of participants for the 10 prescription opioid drugs with the most expenditures for the quarter ended December 31, 2016. The top ten opioid drugs from the quarter ended December 31, 2016, accounted for approximately 2 percent of the total prescription drug payments. Table 3 lists the estimated annualized amount paid and the costs per participant for these 10 opioid drugs.

Table 3: Top ten opioid drugs by amount paid in quarter ended December 31, 2016

Drug Name	Annualized Amount Paid	Cost Per Participant
Oxycodone HCL	\$ 15,997,492	\$ 327
Hydrocodone/Acetaminophen	6,720,776	30
Oxycodone HCL/Acetaminophen	5,502,920	64
Morphine Sulfate	1,982,276	96
Buprenorphine	1,773,080	770
Tramadol HCL	1,663,504	18
Fentanyl	1,570,124	159
Hydrocodone Bitartrate	1,183,656	771

Acetaminophen with Codeine	570,660	18
Total	\$ 37,602,164	

Source: Prepared by the SAO using drug claim data provided by DSS

Conclusion

After peaking in 2015, prescription drug payments decreased in calendar year 2016 and decreased further in 2017. DSS has implemented multiple measures to reduce the cost of reimbursing prescription drugs. The department continues to innovate and identify cost-reducing solutions.

2. Prescription Drug Monitoring Programs

Missouri does not have a comprehensive statewide prescription drug monitoring program (PDMP) to help the DSS identify Medicaid and CHIP prescription drug fraud and abuse. While the state has recently begun to implement a PDMP, the system does not capture all activity necessary to be of use to the DSS. In addition, St. Louis County has implemented a regional PDMP that can provide some benefit to the DSS, however, the St. Louis County PDMP is not statewide and the department has not utilized the data available.

PDMPs typically collect data from pharmacies on dispensed prescriptions for controlled substances, including information on the prescriber, patient and pharmacy, and make the data available to authorized users through an electronically-accessible database. This data allows prescribers and pharmacies access to patient history in the PDMP database prior to prescribing and dispensing controlled substances. In addition, DSS could access the patient history in the PDMP to ensure participants in the Medicaid

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

and CHIP programs are not prescribed controlled substances outside of the program.

CMS issued an informational bulletin on January 28, 2016, highlighting best practices for addressing prescription opioid overdoses, misuse and addiction. The bulletin suggested Medicaid agencies use PDMPs as they have been shown to be effective in addressing these concerns. CMS bulletins suggest Medicaid agencies require prescribers and pharmacies access patient history in the PDMP database prior to prescribing and dispensing controlled substances, thereby enhancing the drug utilization review program oversight activities.

State PDMP is not useful for detection of fraud and abuse

Prior to July 2017, Missouri was the only state in the nation that did not have a statewide PDMP. Executive order 17-18 required the Department of Health and Senior Services to create and oversee a PDMP. The DHSS program is a voluntary program where dispensers of controlled substances, pharmacy benefit management organizations, and other health care entities can provide data about the prescriber, pharmacy and drug prescribed. However, the dispenser must remove individual patients' information before sending the data. Without information on specific patients, this program is of limited use to the DSS for the purposes of detecting prescription drug fraud and abuse. Without the individual patient information, the DSS cannot determine if a participant was prescribed controlled substances outside of the program and doctors and pharmacies cannot use the data effectively. Additionally, since the program is voluntary, the data is likely not complete. Complete PDMP data could assist DSS to enhance their drug utilization review program oversight activities.

St. Louis County PDMP contains necessary information, but does not contain statewide data

St. Louis County, through the County Department of Public Health, established a PDMP in March 2016 due to the lack of a statewide PDMP. As of August 2018, 10 cities and 48 of the 114 (42 percent) counties in Missouri, participate in the St. Louis County PDMP database. The St. Louis County PDMP requires dispensers within the participating jurisdictions to report all controlled substances dispensed, regardless of patient location. Dispensers not located within one of the participating jurisdictions are under no obligation or requirement to submit information to the PDMP.

The data collected by the St. Louis County PDMP includes information about the prescriber, the pharmacy, the patient, and the drug prescribed. The information is consistent with what is recommended by CMS bulletins for use in detecting prescription drug fraud and abuse in the Medicaid program. The St. Louis County PDMP requires prescribers and pharmacies access a patient's history in the PDMP database prior to prescribing and dispensing controlled substances.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

According to DSS officials, the agency has not tried to obtain access to data for either of these monitoring programs. Although it does not contain statewide data, the St. Louis County PDMP can help the state program better identify potential inappropriate prescribing and use of controlled prescription drugs. Requiring prescribers and pharmacies to access a patient's history in the St. Louis County PDMP database prior to prescribing and dispensing controlled substances would enhance the drug utilization review program oversight activities. Agency officials provided no reasoning for not utilizing the St. Louis County PDMP data, but stated they could use it to make inquiries on participants that the DSS Missouri Medicaid Audit and Compliance Lock-In Unit is reviewing to determine if participants are filling prescriptions outside of the Medicaid or CHIP benefit and/or are using multiple pharmacies.

Recommendation

The General Assembly take action to improve the state's PDMP and create a comprehensive PDMP that meets the needs of the Medicaid and CHIP programs.

The DSS create procedures to utilize the St. Louis County PDMP until a more comprehensive statewide system becomes available to enhance the state's program oversight.

Auditee's Response

The department's written response is included at Appendix C.

3. Physician-Administered Drugs

The DSS did not implement system controls to require collection of NDCs for all physician-administered drug claims, which limits the ability of the DSS to bill the prescription drug manufacturers for rebates for those drug claims. As a result, approximately \$170,000 was paid for drug claims for which no manufacturer rebates could be collected. By not collecting NDCs on these claims the DSS did not comply with federal requirements related to drug rebates, and the drug claims for which rebates were not billed are not allowable for federal reimbursement. A similar finding was noted in a prior audit report.³

The DSS has controls in the claims processing system to deny claims that lack the NDC. However, our testing found the DSS allowed payment for physician-administered drug claims totaling \$170,343 incorrectly submitted as procedural claims (which do not include NDCs) from April through October 2016. Because these claims lacked the required NDCs, the DSS could not bill the prescription drug manufacturers for rebates as required by federal regulations. The DSS identified the erroneous claims and modified the claims processing system to prevent the submission of physician-administered drug claims as procedural claims, thereby ensuring NDCs are

³ SAO, *State of Missouri Single Audit*, report number 2018-016, finding number 2017-015.

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

submitted as required in the future. However, the DSS did not recoup these identified improper payments from the providers or reimburse the DHHS for the unallowable costs.

Federal regulation 2 CFR Section 200.303 requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award." Such controls should ensure NDCs are collected for all physician-administered drug claims, prescription drug manufacturers are billed for rebates, and only allowable costs are claimed for federal reimbursement. In addition, controls should be established to recoup and reimburse the DHHS for claims identified as noncompliant.

Recommendation

The DSS continue to establish controls to ensure the required drug utilization data is obtained for all physician-administered drug claims and claim only allowable costs for federal reimbursement. These controls should include procedures to recoup and reimburse the DHHS for claims identified as non-compliant.

Auditee's Response

The department's written response is included at Appendix C.

4. Excluded Drug Claims

The DSS controls are not sufficient to deny all drug claims for drugs excluded from the Medicaid program. As a result, 56 drug claims totaling \$5,170 for excluded drugs were paid in error during the 4th quarter of 2016.

Federal regulation 42 USC 1396r-8 (d) (2) provides a list of drugs that may be excluded from coverage of Medicaid programs. DSS established the following drugs to be excluded from the Medicaid program:

- Drugs used to promoted fertility
- Drugs used to treat sexual dysfunction
- Drugs used to promoted weight loss
- Drugs used to promote hair growth
- Drugs used for cosmetic purposes
- Quazepam commonly used to treat insomnia symptoms
- Drugs without a prescription

DSS utilizes the Medicaid Management Information System (MMIS) to process all Medicaid claims, including outpatient prescription drug claims. Excluded drugs can be allowable if the physician prescribes the drugs for a purpose different from excluded treatment, and the drug must be approved by prior authorization, according to DSS personnel. DSS established various edits on MMIS to identify and deny drug claims for drugs excluded from coverage. In addition, DSS has a manual process to turn off the National Drug Code (NDC) associated with the excluded drugs. However, this process failed

Department of Social Services
Prescription Drug Oversight
Management Advisory Report - State Auditor's Finding

for 13 drugs. The DSS paid 56 drug claims totaling \$5,170 from October through December 2016 for drugs excluded from the Medicaid program. The prescription drugs associated with the 56 drug claims were for the treatment of sexual dysfunction or fertility, promoting weight loss, or promoting hair growth. DSS has a manual process in place to update the MMIS to exclude drugs for payment and DSS personnel stated they might have missed these drugs. The questioned claims were not prior authorized for a different purpose. Since these drugs were not allowable expenditures of the Medicaid program, the federal program should not be charged for payments made and the state should reimburse the DHHS for claims identified as noncompliant.

Recommendation

The DSS evaluate existing procedures to ensure the claim processing system identifies and prevents payments for unallowable claims. These controls should include procedures to recoup and reimburse the DHHS for claims identified as non-compliant.

Auditee's Response

The department's written response is included at Appendix C.

November 30, 2018

Honorable Nicole R. Galloway, CPA
Missouri State Auditor
P.O. Box 869
Jefferson City, MO 65102

Dear State Auditor Galloway:

Please find below the Department of Social Services' (DSS) responses to the recommendations from the audit of DSS prescription drug oversight.

2. Prescription Drug Monitoring Programs Audit Recommendation:

The General Assembly takes action to improve the state PDMP and create a comprehensive PDMP that meets the needs of the Medicaid program.

The DSS create procedures to utilize the St. Louis County PDMP until such time a statewide system becomes available to enhance the state's program oversight.

DSS Response:

Missouri Medicaid Audit and Compliance (MMAC) initiated steps to gain access to the St. Louis County PDMP data. As of September 22, 2018, MO HealthNet and MMAC are authorized users of the St. Louis County PDMP.

3. Physician-Administered Drugs Audit Recommendation:

The DSS continue to establish controls to ensure the required drug utilization data is obtained for all physician-administered drug claims and claim only allowable costs for federal reimbursement. These controls should include procedures to recoup and reimburse the DHHS for claims identified as noncompliant.

AUXILIARY AIDS AND SERVICES ARE AVAILABLE UPON REQUEST TO INDIVIDUALS WITH DISABILITIES

Missouri Department of Social Services is an Equal Opportunity Employer/Program.

Appendix C
Department of Social Services - Prescription Drug Oversight
Department of Social Services Response

DSS Response:

MO HealthNet identified claims in September 2016 (JIRA ticket was created on September 30, 2016 with the "fix" put into production November 30, 2016 by WIPRO) and the modification was completed in February 2017 in the Medicaid Management Information System (MMIS) to prevent submission of physician-administered drug claims as procedural claims, thereby ensuring NDCs are submitted when required. Going forward, MO HealthNet has made the necessary system changes to ensure accuracy.

4. Excluded Drug Claims Audit Recommendation:

The DSS evaluate existing procedures to ensure the claim processing system identifies and prevents payments for unallowable claims. These controls should include procedures to recoup and reimburse the DHHS for claims identified as non-compliant.

DSS Response:

DSS has a system in place to prevent overpayments of excluded drug claims. The MO HealthNet Division (MHD) self-identified a number of claims in late calendar year 2016 that constituted excluded drug claims. Once identified, MHD initiated recoupments of those claims to ensure reimbursement to DHHS for the FFP for those excluded claims. At the start of calendar year 2017, MHD started a new process to review and update the system twice monthly with new NDC's so that the system identifies and prevents payments of unallowable claims. DSS is committed to the continual improvement of claims processing regarding payment for excluded drugs.

Thank you for allowing the Department of Social Services the opportunity to prepare and submit this response.

Sincerely,

/s/

Steve Corsi, Psy. D
Director

CITIZENS SUMMARY

Findings in the audit of the Child Abuse and Neglect Hotline Unit

Staffing Levels and Performance

The Child Abuse and Neglect Hotline Unit does not have sufficient staffing to handle the increasing volume of reports, which has led to increased wait times and/or reporters having to call back multiple times. Staffing levels have declined since 2015 and have not kept pace with the growing number of reports. According to Department of Social Services records, the average Child Abuse and Neglect hotline wait time has increased by approximately 47 seconds per year from 2013 to 2017.

Although the Child Abuse and Neglect Hotline Unit is actively monitoring some performance measures, it has not developed and monitored formal and quantifiable operational performance goals or expected levels of performance and, as a result, is unable to compare actual operational performance to expected or desired operational performance.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Dr. Steve Corsi, Psy.D., Director
Department of Social Services
Jefferson City, Missouri

We have audited certain operations of the Department of Social Services, Child Abuse and Neglect Hotline Unit, in fulfillment of our duties under Chapter 29, RSMo. The scope of the audit included, but was not necessarily limited to, the year ended June 30, 2017. The objectives of our audit were to:

1. Evaluate the unit's internal controls over significant management and financial functions.
2. Evaluate the unit's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our finding arising from our audit of Child Abuse and Neglect Hotline Unit.

Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Robert E. Showers, CPA, CGAP
Audit Managers:	Kelly Davis, M.Acct., CPA, CFE
	Travis Owens, MBA, CPA, CFE, CGAP

	Erin Dierksen
Audit Staff:	Albert Borde-Koufie, MBA
	Dovile Zavistauskaite
	Joy Stevens, CFE
	Michaela N. Shaver

Child Abuse and Neglect Hotline Unit

Introduction

Background

The Missouri Department of Social Services - Children's Division (DSS-CD) is responsible for directing and supervising the administration of various child welfare services. The DSS-CD works in partnership with families, communities, the courts, and other governmental entities toward ensuring the safety, permanency, and well-being of children statewide. The DSS-CD operates the Child Abuse and Neglect (CA/N) Hotline Unit as required by state law. Section 210.145.1(4), RSMo, requires the DSS-CD to operate a single, statewide toll-free telephone number¹ at all times for receiving and maintaining reports of child abuse and neglect. The CA/N Hotline Unit has been operating 24 hours a day, 7 days a week since August 1975.

Permissive reporters, such as relatives or neighbors, voluntarily report alleged child abuse and neglect. In addition, Section 210.115.1, RSMo, mandates that certain professionals (mandated reporters) report alleged child abuse and neglect. These professionals include health care professionals, mental health professionals, social workers, child care providers, law enforcement officials, school officials, ministers, and other persons with responsibility for the care of children.

In 2013, the General Assembly revised state law² to require each mandated reporter in the same workplace to make separate³ reports of alleged child abuse and neglect. This law change has led to a continuing increase in the number of annual reports to the CA/N Hotline Unit. See Figure 1 in the Management Advisory Report for reporting data by year.

Structured decision-making protocol

In our prior audit⁴ of the CA/N Hotline Unit, we recommended the department implement a structured decision-making (SDM) tool to increase consistency and accuracy in making intake, screening, risk assessment, service, and placement decisions. In response to our recommendation, the department indicated it had already begun working with a third party in 2000 to explore the adaptability of a specific SDM model to the hotline. The Missouri General Assembly passed legislation in 2004 requiring the division utilize SDM protocols to classify all reports of child abuse and neglect and give priority to ensuring the well-being and safety of the child, as required by Section 210.145.2, RSMo. In response to this requirement, the CA/N Hotline Unit implemented the current SDM intake screening tool during 2005. This

¹ The toll-free number for reporting child abuse or neglect is 1-800-392-3738.

² Section 210.115, RSMo, was revised with the passage of House Bill 505, First Regular Session, 97th General Assembly (2013), and included an emergency provision, making it effective immediately upon passage and approval.

³ There is one exception to this requirement which allows for a single report if certain criteria are met. Section 210.115.2, RSMo, allows two or more members of the same medical institution to submit a single report by a designated member or the medical team.

⁴ Report No. 2000-132, *Audit of Child Abuse and Neglect Reporting and Response System*, issued in December 2000.

Child Abuse and Neglect Hotline Unit Introduction

evidence-based and research-based system uses structured assessments to improve the validity and consistency of each decision. The intake screening tool uses various decision trees to help personnel make key assessments regarding child safety and the necessary or appropriate response time.

Personnel interview the reporter through a three-part interview beginning with initial questions to gather information (i.e., demographics) about the reporter, child, child's family, and the reporter's concerns; followed by a set of key questions for up to 30 different pathways and decision trees (if applicable); and ending with a closing procedure that informs the reporter of the specific call classification.

During the initial part of the interview, personnel ask permissive reporters if they would like to provide their names and/or other identifying information; mandated reporters are required by state law to provide identifying information. The final question during the initial part of the interview asks the reporter for a description of the reporter's abuse and neglect concerns. The reporter's answer guides the interviewer to at least 1 of the following 30 pathways, which requires the interviewer to ask a unique series of questions to gather information and make a determination on what action(s), if any, to take.

1. Abandoned
2. Accident
3. Afraid to go home
4. Beaten/injured
5. Behaving strangely
6. Bruises/visible marks
7. Dirty/inappropriate clothing
8. Domestic violence
9. Drug-exposed infant
10. Drugs/poisoning
11. Educational needs
12. Emotional abuse/rejection
13. Exhibits provocative behavior
14. Exposed to sexual acts/materials
15. Fatality
16. Hungry
17. Kicked out of home/locked in/out
18. Overheard sounds
19. Parents requesting immediate removal/refusing to pick up child
20. Parent's inappropriate behavior
21. Parent's mental illness
22. Restraint
23. Sexual acts/exploitation
24. Shaken baby

Child Abuse and Neglect Hotline Unit Introduction

25. Suspicious injury
26. Threat to seriously harm or kill
27. Unsafe/unsanitary home
28. Unsupervised
29. Untreated illness/injury
30. Utilities

If the information provided by the reporter meets at least one condition for a CA/N report on at least one pathway, the interviewer will have completed two types of decision trees. The 4 types of response-priority decision trees include physical abuse, sexual abuse, neglect, or medical neglect. These help the interviewer determine how quickly the investigation or family assessment must be initiated. The three response levels are 3, 24, and 72 hours. If a 3-hour response is indicated on one tree, it is not necessary to complete the additional decision trees. The track assignment decision tree is used to assess whether a CA/N report should be categorized and assigned to field personnel as an investigation or a family assessment. The CA/N Hotline Unit has protocols in place for supervisors to perform overrides when warranted, which allows additional flexibility.

Classification

The classification of each report is determined by whether the 3 conditions reported meet the criteria to be accepted as a CA/N report pursuant to the definitions in Section 210.110, RSMo, as follows:

- The child is under 18 at the time of the call;
- The alleged perpetrator has care, custody, and control of the child⁵; and
- The allegation of abuse⁶ and/or neglect⁷ meets the legal definition.

If all 3 criteria are met, the report is generally accepted as a CA/N report; however, if any one of these criteria is not met, then the report is classified as a Non-CA/N report.

CA/N report classification

Investigations are performed by local DSS-CD personnel in response to a report of child abuse or neglect when there is an identified need to collect physical and/or verbal evidence. Investigations prompt a visit to the home to

⁵ Per Section 210.110(16), RSMo, care, custody, and control of the child includes, but is not limited to, the parents or legal guardians of a child, other members of the child's household, those exercising supervision over a child for any part of a 24-hour day, any person who has access to the child, or any person who takes control of the child by deception, force, or coercion.

⁶ Per Section 210.110(1), RSMo, abuse is any physical injury, sexual abuse, or emotional abuse inflicted on a child other than by accidental means.

⁷ Per Section 210.110(12), RSMo, neglect is the failure to provide the proper or necessary support; education as required by law; nutrition; or medical, surgical, or any other care necessary for the child's well-being.

Child Abuse and Neglect Hotline Unit Introduction

ensure the safety of the child and, if appropriate, DSS-CD personnel may seek assistance from local law enforcement for possible co-investigation of criminal actions.

Family assessments are performed by local DSS-CD personnel to provide a prompt assessment of a child and his/her family and include provision of community-based services to reduce the risk of child abuse and neglect and support the family. Family assessments prompt a visit to the home to ensure the safety of the child, are designed to connect the family to various services (anger management, drug treatment, counseling, or parenting assistance), and identify factors that may place the child at risk of future abuse and neglect.

Non-CA/N report classification

Non-CA/N reports are reports that do not meet the legal definition of child abuse or neglect, and can be classified into 1 of 3 categories.

1. A non-CA/N referral is classified as one of the following types of referrals:
 - Preventive Service Referral - A referral to a local service provider for intervention with the family.
 - Newborn Crisis Assessment - Medical professionals report concerns about the health and safety of newborns (up to the age of one year), either because of drug exposure or the caregiver is unable to meet the needs of the infant.
 - Non-Caretaker Referral - A referral to local law enforcement or the juvenile office for situations in which a child has been abused by someone who does not have care, custody, and control of the child.
 - Non-CA/N Fatality Referral - A report of the death of a child when no child abuse or neglect is alleged.
2. Documented calls are calls that do not meet the criteria for a CA/N report or a non-CA/N referral. These include concerns relating to children who are 18 and older, reports with insufficient information to locate the family, reports of children who are located out of the state and the reporter is not a Missouri mandated reporter, and reports in which the allegations do not meet the legal definition of child abuse or neglect.
3. Other calls are calls in which the caller makes no attempt to report child abuse or neglect and gives no information leading to a maltreatment type. These calls include instances when the caller called the wrong number, requests the phone number to a local county DSS-CD office, requests to speak with local county DSS-CD personnel or other CA/N Hotline Unit

Child Abuse and Neglect Hotline Unit Introduction

personnel, or an approved caller requests a prior check on a specific perpetrator, child, or case.

Online reporting

In November 2016, the CA/N Hotline Unit increased access for mandated reporters by opening an online reporting site⁸ to be used for making a non-emergency report if the mandated reporter has determined the child is not in imminent danger. The reporter is prompted to answer a series of questions designed to determine if the report should be considered an emergency and thus require a phone call to the CA/N Hotline Unit.

Consulting group's operational review and assessment

The department contracted with a consulting group in June 2017 to review the CA/N Hotline Unit's business processes and the current technology utilized in order to recommend both programmatic and technological improvements. The department determined this review was necessary based on various internal and external concerns regarding hotline operations. The primary internal concerns were the outdated technology used (i.e., the telephone system) and an inadequate number of staff to handle the increasing number of reports. The primary external concern was that reporters were experiencing increasing wait times and could not always contact the hotline promptly.

The consulting group reviewed the procedures handbook, pathway protocols, training documents and exercises, staffing and scheduling, and hotline statistics. The consulting group's recommendations addressed the SDM protocol, staffing levels, training, peer reviews of records, data and reporting, and technological improvements. A cost analysis was completed of each of the viable technology solutions to assess feasibility.

During the course of our audit, we followed up on these recommendations to determine if the issues had been addressed. We noted that the CA/N Hotline Unit had either implemented or was in the process of implementing most recommendations.

Scope and Methodology

To gain an understanding of the CA/N Hotline Unit, we reviewed the unit's written policies and procedures and other pertinent documents, including the final report of a recent CA/N Hotline Unit assessment performed by a consulting group and issued in October 2017; observed live operations of the primary CA/N Hotline Unit office located in Jefferson City, Missouri; tested a selection of 120 phone calls and online reports in all 4 categories (CA/N, non-CA/N referral, documented, and other) to ensure personnel were following the designated SDM protocols and classifying reports as a CA/N report or a non-CA/N report in accordance with state law; and interviewed various personnel of the unit.

⁸ <<https://apps.dss.mo.gov/OnlineCanReporting/default.aspx>>, accessed on August 13, 2018.

Child Abuse and Neglect Hotline Unit Introduction

We obtained an understanding of the internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We obtained an understanding of legal provisions that are significant with the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Child Abuse and Neglect Hotline Unit Management Advisory Report State Auditor's Finding

Staffing Levels and Performance

The Child Abuse and Neglect (CA/N) Hotline Unit does not have sufficient staffing to handle the increasing volume of reports, which has led to increased wait times and/or reporters having to call back multiple times. Consequently, the CA/N Hotline Unit may not accept and classify reports timely, which may potentially put some abused and/or neglected children at a higher risk of not receiving timely and critical assistance and protection. During the fiscal year ended June 30, 2017, the CA/N Hotline Unit accepted 138,582 reports (calls and online reports), and had 58 employees as of June 2017.

Figure 1: Total number of reports taken by the CA/N Hotline Unit and number of staff, fiscal years 2013-2017

Source: CA/N Hotline Unit records and organizational charts⁹

As illustrated in Figure 1, the number of reports received since fiscal year 2013 has increased by an average of about 4,500 reports annually (4 percent increase). As previously noted, the continuing increase in the number of reports is at least partially a result of the General Assembly revising state law in 2013 that increased reporting requirements for mandated reporters.

Number of staff and staffing requirements

As illustrated in Figure 1, staffing levels have declined since 2015 and have not kept pace with the growing number of reports. Total staffing gradually increased from 49 in fiscal year 2013 to 62 in fiscal year 2015, but then fell to 57 in fiscal year 2016 and remained almost static (58) for fiscal year 2017.

The 58 employees reported for fiscal year 2017 consisted of 1 unit manager, 6 supervisors, 1 trainer, 40 full-time Children's Service Workers (CSWs), and 10 part-time/hourly CSWs. All 58 employees can take phone calls; however, generally the CA/N Hotline Unit has between 2 and 22 CSWs answering calls at any given time. All employees must have at least a bachelor's degree in social work or a related field; this is the same requirement as county DSS-CD field personnel. Management indicated there has traditionally been a high

⁹ The organizational charts provided by management were the last available charts prepared for each fiscal year. Some charts were prepared in May and others were prepared in June.

Child Abuse and Neglect Hotline Unit Management Advisory Report - State Auditor's Findings

level of employee turnover in the CA/N Hotline Unit due to various factors including low salaries and the nature of the position.

To handle the call volume and meet standard minimum service levels,¹⁰ the consulting group hired by the agency to review the CA/N Hotline Unit's business processes and the current technology recommended the unit hire an additional 14 to 20 employees. CA/N Hotline Unit management also indicated the hotline unit had been understaffed in previous years. During fiscal year 2018, the unit increased staffing levels by 7 employees, to a total of 65 employees. The 7 new employees consisted of 4 full-time employees (1 supervisor and 3 CSWs) and 3 part-time/hourly CSWs. In conjunction with the new hires, the CA/N Hotline Unit created several new positions that included a specialist (collects and analyzes data including call/report volume and type, employee attendance, and wait times in order to project staffing needs), an additional trainer, and three additional supervisors. In addition, the hotline opened a new field office in Springfield, Missouri.

Hotline wait times have increased

According to DSS records, the average CA/N hotline wait time has increased by approximately 47 seconds per year (a 39 percent increase) from 2013 to 2017. From fiscal year 2013 to fiscal year 2017, the average wait time of a reporter has more than tripled from 1 minute, 18 seconds to 4 minutes, 28 seconds.

Figure 2: Average CA/N Hotline Unit call center wait times, in minutes, fiscal years 2013-2017

Source: CA/N Hotline Unit records.

As illustrated in Figure 2, reporters have been experiencing a significant increase in wait times over the last five years.

¹⁰ Service level measures the percentage of incoming calls that are answered within an established amount of time. The consulting group's analysis is based on a minimum service level of 95 percent, though it acknowledged an industry standard for this type of call center is hard to estimate.

Child Abuse and Neglect Hotline Unit Management Advisory Report - State Auditor's Findings

Management efforts to improve wait times

DSS management has made various efforts to improve wait times. In an effort to increase hotline access for mandated reporters and reduce the wait time for other callers, the CA/N Hotline Unit implemented an online reporting system during fiscal year 2017. During the first year of implementation the CA/N Hotline Unit received 6,614 online reports (included in the total of 138,582 reports received that year). Personnel indicated online reports take approximately half the amount of time to process as compared to phone calls, and they project the number of online reports will continue to increase as awareness of this option increases. In addition, a single telephone platform (system) was installed statewide. Prior to this implementation, central office staff had to manually route calls to the other field office (located in Kansas City, Missouri) as needed because the offices had different phone systems. As a result, this implementation has freed up staff to answer more calls and operate more efficiently. In addition, based on the volume and timing of reports, management has increased staffing levels during peak times, which include day and evening hours Monday through Friday.

Failure to establish performance goals or expected levels of performance

Although the CA/N Hotline Unit is actively monitoring some performance measures, it has not developed and monitored formal and quantifiable operational performance goals or expected levels of performance and, as a result, is unable to compare actual operational performance to expected or desired operational performance.

The consulting group recommended the CA/N Hotline Unit gather and apply historical data; develop and implement data-driven, standardized, performance expectations and service levels; and train leadership, supervisors, and staff in reporting tools and measures. In response to the consulting group's recommendations, the department purchased a workforce management software (WFM) system that collects and analyzes data including call/report volume and type, employee attendance, and wait times in order to project staffing needs. The department implemented this system in May 2018, and, as recommended by the consulting group, is tracking certain call center metrics including the average call handling time, service level, average speed of answering calls, and specific times that employees are available to take calls. This information is used to determine staffing schedules based on projected call volume, and to alert management of the need for corrective action for employees who are not adhering to their assigned schedule or are unable to handle the expected number of calls per day. While management previously tracked certain individual performance measures for the purpose of evaluating employees, no individual or unit-wide performance goals or expectations have been established under the new management system. Officials indicated they are waiting until the new WFM system collects a full year of data before establishing new performance goals.

Child Abuse and Neglect Hotline Unit Management Advisory Report - State Auditor's Findings

According to Government Finance Officers Association (GFOA) guidance,¹¹ goals should be specific, measurable, attainable, results-oriented, and time-limited. A specific goal is one that considers what is to be accomplished, why the goal is important, who is involved, and what are the resource requirements and constraints. For example, a goal for the CA/N Hotline Unit might be to reduce the average wait time for calls by 50 percent over the next year, or below a specific time, which is an outcome that is both measurable and specific and would allow the department to track progress toward meeting the specified goal. The establishment of reasonable performance goals or expected levels of performance for both the hotline as a whole and individual staff will allow CA/N management to periodically measure current performance against expectations and make necessary adjustments.

Conclusion

Without adequate staffing levels, the CA/N Hotline Unit is less likely to achieve its mission of protecting children, including ensuring the safety and well-being of children, and is unable to provide a high customer service level that would be expected in other highly sensitive call centers. Increased staffing levels would allow the unit to provide employees with increased training opportunities, efficiently perform quality control reviews of reports, ensure each work shift is adequately staffed, and reduce wait times.

The department has made significant efforts to improve performance, including a new telephone system, an online reporting system, and increased staffing levels from fiscal year 2017 to 2018. However, the CA/N Hotline Unit should continue to increase staffing levels to address the increasing number of child abuse and neglect reports as noted in Figure 1. In addition, increased staffing levels will help to reduce the average wait time for reporters and should provide a quicker response time to reports of potential child abuse or neglect.

The use of reasonable performance goals or expected levels of performance would help management ensure the CA/N Hotline Unit is performing in an efficient and effective manner and alert management to problem areas.

Recommendation

The DSS-CD, through the CA/N Hotline Unit, continue to explore opportunities to increase staffing levels. In addition, management should establish performance goals and monitor the unit's performance in an ongoing manner to ensure the goals, objectives, and mission of the unit are met.

Auditee's Response

The DSS-CD's written response is included in the Appendix.

¹¹ S.M.A.R.T. Goals, Government Finance Officers Association, 2018, <<https://gfoa.org/smart-goals>>, accessed on October 10, 2018.

November 15, 2018

Honorable Nicole R. Galloway, CPA
Missouri State Auditor
P.O. Box 869
Jefferson City, MO 65102

Dear State Auditor Galloway:

Please find below the Department of Social Services' (DSS) response to the recommendation from the audit of the Child Abuse and Neglect Hotline Unit.

Staffing Levels and Performance Audit Recommendation:

The DSS-CD, through the CA/N Hotline Unit, continue to explore opportunities to increase staffing levels. In addition, management should establish performance goals and monitor the unit's performance in an ongoing manner to ensure the goals, objectives, and mission of the unit are met.

DSS Response:

The DSS continues to explore opportunities to increase the Child Abuse and Neglect Hotline Unit (CANHU) performance. This includes ensuring the unit remains fully staffed and all vacancies are filled timely. Options to 1) increase the use of online reporting in appropriate situations; 2) make changes to structured decision making to make the call experience more efficient, and 3) allocate existing staff based on call data are all potential opportunities to increase unit performance without adding staff.

Additionally, the DSS will continue to enhance performance monitoring and reporting to measure the expectations of Children's Service Workers answering and correctly classifying concerns of child abuse and neglect. These goals will balance both the quality and quantity of calls with DSS' efforts to answer timely all calls made to the CANHU and provide exceptional customer service. The DSS strives to provide reporters a quick and efficient reporting process; however, DSS recognizes and promotes emergency calls to be handled by calling 9-1-1.

Appendix
Child Abuse and Neglect Hotline Unit
Department of Social Services Response

There are CANHU performance goals established. These measures were provided to the SAO audit team. DSS is in the process of reevaluating the performance goals based on new technology implemented earlier this year. Performance goals surrounding the quantity of calls will be set based on data received through the Workforce Management System (WFM). The WFM builds upon call trends to forecast staffing levels. Data will be available in the spring of 2019 when the WFM will have been in operation for one (1) year. The WFM data will allow the DSS to confidently set accurate and relevant goals.

Thank you for allowing the DSS the opportunity to prepare and submit this response.

Sincerely,

/s/

Steve Corsi, Psy. D
Director

2018 Property Tax Rates

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the review of 2018 Property Tax Rates

Background	Property taxes largely fund public schools and are the main source of revenue for many of Missouri's special purpose political subdivisions and county boards. The State Auditor's Office and county officials assist local government officials in determining the data necessary to complete the tax rate computations. Taxing authorities are required to file final proposed tax rates and data supporting the proposed property tax rates with the county, using forms prescribed by the State Auditor. The counties submit the supporting data received to the State Auditor for review. The data is reviewed and a finding is returned to both the county and the taxing authority advising whether the proposed rates comply with Missouri law.
Rate Calculations	Rate ceilings set the limit for the amount of taxes that can be levied. Each tax rate ceiling is determined annually and is adjusted to ensure revenue neutrality. The review of each tax rate ceiling is based on the assessed valuation for the entire political subdivision and is not calculated on an individual taxpayer basis. The 2018 tax rate ceilings were determined based on the requirements of Section 137.073, RSMo, and Missouri Constitution, Article X, Section 22, commonly referred to as the Hancock Amendment, which limits taxation by the state and local governments.
Results	In 2018, the State Auditor received supporting data and reviewed 4,814 property tax rates for 2,798 taxing authorities. Of the rates reviewed, 495 are debt service tax rates, 106 are new property tax rates approved by voters, and 52 are existing property tax rates that were increased by voter approval. We reviewed the remaining 4,161 tax rates for revenue neutrality. This is the fourth year since the review of property tax rates started in 1985 that no taxing authorities levied a tax rate that exceeded the tax rate certified.
Additional Comments	The State Auditor's Office has no authority to determine or review individual tax assessments. All individual tax assessment matters are the responsibility of the county assessor and board of equalization. Appeals to the state on tax assessment matters are handled by the Missouri State Tax Commission.

Because of the limited objectives of this review, no overall rating is provided.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The State Auditor's Office is required by Section 137.073, RSMo, to annually review local property tax rates of all taxing authorities in the state. The primary objectives of this review were to determine whether:

1. Local governing boards levied taxes in accordance with the Missouri Constitution and state law.
2. Local property tax rates were adjusted to ensure property reassessments were revenue neutral.

Reassessments of existing property are not intended to increase property tax revenue but to equitably reallocate the existing tax burden based on the relative value of property owned by taxpayers.

For 2018, we received supporting data on 4,814 property tax rates of 2,798 taxing authorities. This is the fourth year since the State Auditor's Office started reviewing property tax rates that no taxing authorities levied a tax rate that exceeded the tax rate certified.

Property taxes are the main source of revenue for many of Missouri's special purpose political subdivisions and county boards. The bulk of property taxes, however, fund public schools. General acceptance of these taxes is dependent on fair and equitable assessment practices and public understanding and input regarding the setting of rates. If the tax burden is increased without voter approval, confidence in the fairness and assessment practices can be eroded.

Nicole R. Galloway, CPA
State Auditor

This is the fourth year since the review of property tax rates started in 1985 that no taxing authorities levied a tax rate that exceeded the tax rate certified.

Methodology

The State Auditor's Office and county officials assist local government officials in determining the data necessary to complete the tax rate computations. Taxing authorities are required to file final proposed tax rates and data supporting the proposed property tax rates with the county, using forms prescribed by the State Auditor. The counties submit the supporting data received to the State Auditor for review. The data is reviewed and a finding is returned to both the county and the taxing authority advising whether the proposed rates comply with Missouri law.

The 2018 tax rate ceilings were determined based on the requirements of Section 137.073, RSMo, and Missouri Constitution, Article X, Section 22 (commonly referred to as the Hancock Amendment). Each tax rate ceiling is determined annually and is adjusted to ensure revenue neutrality. The review of each tax rate ceiling is based on the assessed valuation for the entire political subdivision and is not calculated on an individual taxpayer basis.

To ensure taxing authorities do not receive a windfall from reassessment, the review of property tax rates begins with the prior year allowed revenue. Current year tax rate ceilings must be set to yield the same gross revenue as allowed in the prior year. In addition, an adjustment is made for additional revenue permitted for assessment growth. That adjustment is the lower of (1) the actual growth rate, (2) the inflation rate as determined by the consumer price index, or (3) 5 percent. Factors such as new construction and improvements, newly added territory, newly separated territory, and changes from locally assessed to state assessed property also affect the tax rate ceiling calculation. Counties and the City of St. Louis use the tax rates set by each taxing authority to assess taxes on all property including new construction and improvements.

Voters may authorize increases beyond the annual revenue neutral tax rate ceiling. Voter-approved increases are reviewed for compliance with applicable laws and stated ballot restrictions. In addition to reviewing new and existing property tax levies for revenue neutrality, the State Auditor's Office also reviews debt service tax rates. A tax levied to meet the annual debt service requirement is compliant if the revenue to be generated plus the existing fund balance does not exceed the current payment requirements plus a reserve for the following year's payments.

2018 Property Tax Rates Results

Sections 137.073.5(3) and 137.073.5(4), RSMo, provide that a voluntary reduction taken in a non-reassessment year (even numbered year) results in a reduced tax rate ceiling during the following reassessment year (odd numbered year). These provisions also allow taxing authorities that voluntarily reduce a tax rate in a previous even numbered year to reverse the impact of the voluntary reduction to reinstate a higher tax rate ceiling in the following even numbered year. To increase the tax rate in the following even numbered year, the taxing authority must conduct a public hearing, and adopt an ordinance, a resolution, or a policy statement justifying its action before setting and certifying its tax rate.

Section 137.073.6(3), RSMo, allows a taxing authority to submit amended tax rate forms to the State Auditor's Office in the event the taxing authority incorrectly completed the forms or made clerical errors. These changes are factored into the current year's tax rate ceiling calculation.

A taxing authority's total assessed valuation submitted by the county clerk or a representative of the taxing authority is used in the State Auditor's Office review of property taxes. The State Auditor's Office does not review the assessed valuation of individual pieces of property. Chapter 138, RSMo, governs the appeals process for assessed valuations. Citizens may appeal their individual assessed valuations calculated by the county assessor to the local Board of Equalization. Citizens not satisfied with the resolution by the Board of Equalization may appeal the decision to the Missouri State Tax Commission. Any decision of the Missouri State Tax Commission may be reviewed by a court of law.

As assessed valuations increase, tax rate ceilings generally decrease, depending on the amount of the increase, to produce substantially the same amount of revenue as allowed in the prior year. As assessed valuations decrease, tax rate ceilings may increase to produce substantially the same revenue as allowed in the prior year from existing property, limited by voter authorization. See Appendixes I and II for a summary of the changes in assessed valuation by type of taxing authority, and Appendixes III and IV for a summary of changes in tax rate ceilings by type of taxing authority. In addition, Appendix V is a map that provides a statewide geographical perspective of total county valuation changes prior to adjustments for new construction and reassessment. The total assessed valuation is the value used to bill the property tax rates. Appendix VI is a map of the adjusted assessed valuation by county. The adjusted assessed valuation is the value of last year's property in the current year. This map reflects the inflationary change in each county's valuation from the previous year. A significant inflationary change generally indicates a major reassessment occurred. However, 2018 assessed valuations indicate the majority of county adjusted assessed valuation changes were less than the consumer price index, which does not indicate a major reassessment increase. The comparison of assessed valuations and tax rate ceilings from 2017 to 2018 for Appendixes I through

2018 Property Tax Rates Results

VI give consideration to revisions submitted by taxing authorities to the State Auditor's Office for changes to assessments occurring after setting the 2017 property tax rate.

Taxing authorities are listed by primary county (as designated by the taxing authority when established) in Appendixes VII and VIII and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). A taxing authority located in more than one county is listed under the primary county only. The assessed valuations presented for taxing authorities in Appendixes VII and VIII, except school districts, include all taxable locally assessed and state assessed property. The assessed valuations presented for school districts include only taxable locally assessed property. The abated portions of property valuations that are not taxable under various economic development programs are omitted from the taxable assessed valuations used to compute the annual tax rate ceiling. Prior years' tax rate reports are available on the State Auditor's website at auditor.mo.gov.

We do not review sales tax rollbacks required by law for some county levies as part of this report. Any concerns in that area would be addressed in audit reports we issue for individual counties. Sales tax (Proposition C) rollbacks for school levies were subjected to a limited review to ensure the district did not waive all or part of the rollback without voter approval in order to generate additional local revenues. A majority of the 516 school districts have obtained voter approved waivers of the required sales tax rollback of their property tax, including 458 with a full waiver and 31 with a partial waiver. Appendixes VII and VIII indicate the 489 school districts that have either full or partial waivers of Proposition C reductions.

Legend:

- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase or decrease to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law. No tax rate levied exceeded the legally permissible tax levy in 2018.
- E School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver allowing the district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Article X, Section 11(g) of the Missouri Constitution allows the Kansas City 33 School District School Board to set its tax levy at a rate that is lower than the court-ordered rate for the 1995 tax year (which was \$4.96). The rate so established may be changed from year to year by the School Board.

Notes:

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). When a taxing authority is in more than one county, it is listed under the primary county only.

This Appendix does not list taxing authorities that levied a separate tax rate for each subclass of property. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Taxing authorities partially in St. Louis County, whether the primary county is St. Louis County or another county, are required to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi-rate calculation. See Appendix VIII for a listing of taxing authorities that calculated separate tax rates for each subclass of property.

All rates in the levied column represent the rate extended and certified to the State Auditor's Office by both the taxing authority and the county or counties in which the tax rate is levied.

The Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue amount shown is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

																	\$	1,481,601,406	

Legend:

- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
B A voter approved increase or decrease to an existing levy.
C Levy includes a recoupment rate authorized by state law.
D Levied a tax rate in excess of the legally permissible tax levy as provided by state law. No tax rate levied exceeded the legally permissible tax levy in 2018.
E School district has a full Proposition C (sales tax) waiver allowing the district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
F School district has a partial Proposition C (sales tax) waiver allowing the district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.

Notes:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi-rate calculation. See Appendix VII for a listing of taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's Office by both the taxing authority and the county or counties in which the tax rate is levied.

The Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue shown is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

Status of Findings*

1.	Sheriff's Inmate Monies and Commissary Controls and Procedures	3
2.	Sheriff's Controls and Procedures	6

*Includes selected findings

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Dade County

We have conducted follow-up work on certain audit report findings contained in Report No. 2018-027, *Dade County* (rated as Poor), issued in May 2018, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the county about the follow-up review on those findings.
2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:
 - **Implemented:** Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - **In Progress:** Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - **Partially Implemented:** Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - **Not Implemented:** Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by county officials and held discussions with officials to verify the status of implementation for the recommendations. Documentation provided by the county included bank statements, reconciliations, financial records, and other pertinent documents. This report is a summary of the results of this follow-up work, which was substantially completed during November 2018.

Nicole R. Galloway, CPA
State Auditor

Dade County

Follow-Up Report on Audit Findings

Status of Findings

1. Sheriff's Inmate Monies and Commissary Controls and Procedures Inmate receipts totaling \$795.99 were received but not deposited into any of the 3 Sheriff's office bank accounts.

- 1.1 Missing monies Inmate monies totaling \$795.99 from 32 receipt slips were received and not deposited into the inmate bank account, and as a result, these monies are missing.

- Inmate receipts totaling \$45, recorded on 4 manual receipt slips were not deposited.
- Inmate receipts totaling \$750.99, recorded on 28 electronic receipt slips in the computerized accounting system were not deposited.

Recommendation

The Sheriff investigate the missing inmate receipts. The Sheriff should also work with law enforcement officials regarding criminal prosecution.

Status

Partially Implemented

The Sheriff investigated the missing receipts and resolved some of them by reviewing additional accounting records that showed \$267.28 of these receipts were either deposited, issued duplicate (manual and electronic) receipt slips for the same monies, or returned to the inmate or payee. However, inmate monies totaling \$528.71 from 12 receipt slips still remain missing as follows:

Type of Receipt Slip	Date Received	Receipt Slip Number	Amount Received and Not Deposited
Computerized	03/21/2016	125	\$ 10.00
Computerized	03/28/2016	132	10.00
Computerized	05/06/2016	144	0.80
Computerized	05/06/2016	146	2.00*
Computerized	05/28/2016	161	1.75
Computerized	10/18/2016	2275	2.50
Computerized	11/11/2016	2289	31.00
Computerized	03/17/2017	2380	10.14
Computerized	04/04/2017	2398	7.00
Computerized	04/10/2017	2407	441.00
Computerized	05/10/2017	2446	10.00
Computerized	06/28/2017	2496	2.52
Total			\$ 528.71

* Receipt slip number 146 was issued for \$2.72. The Sheriff provided documentation to account for the disposition of 72 cents, leaving \$2.00 not deposited.

Dade County
Follow-Up Report on Audit Findings
Status of Findings

The Sheriff indicated he is working with law enforcement officials.

1.2 Segregation of duties
and supervisory reviews

The Sheriff had not adequately segregated accounting duties or performed adequate and timely supervisory reviews of detailed accounting and bank records.

Recommendation

The Sheriff segregate accounting duties or ensure documented independent or supervisory reviews of detailed accounting and bank records are performed.

Status

In Progress

The Administrative Assistant no longer receipts, records, or deposits inmate monies; and does not prepare checks. However, the Sheriff now makes the deposit, prepares and signs the checks, and reconciles the bank account, thus accounting duties are still not properly segregated. The Sheriff indicated he hired a part-time employee and plans for her to assist him with reconciliations in the future.

1.3 Receipting, recording,
and depositing

Procedures for receipting, recording, and depositing inmate monies needed improvement.

- Manual receipt slips for inmate monies were not always issued in numerical sequence.
- Some cash refunded to inmates was not recorded in the computerized accounting system, resulting in the overstatement of inmates' balances. In addition, the Sheriff made duplicate payments by refunding monies by check to inmates who had already received their refunds in cash.
- The Sheriff's office did not document the transmittal of monies from the jailers to the Administrative Assistant, and the Administrative Assistant did not reconcile the composition of the receipt slips issued to the monies transmitted and deposited.
- Inmate monies were not deposited intact or timely.
- Checks received were not restrictively endorsed at the time of receipt and were only endorsed when deposits were prepared.

Recommendation

The Sheriff establish procedures to issue manual receipt slips in numerical sequence, only issue refunds to inmates by check, document the transmittal of inmate monies between office personnel and reconcile the composition of receipts to the composition of amounts transmitted, deposit monies intact and timely, and restrictively endorse checks at the time of receipt.

Dade County
Follow-Up Report on Audit Findings
Status of Findings

Status

Partially Implemented

The Sheriff discontinued issuing manual receipt slips for inmate monies in May 2018. No cash refunds were made during the month we reviewed (August 2018) and the Sheriff indicated all refunds are now made by check and are recorded in the computerized accounting system. The transmittal of monies between the jail and the Administrative Assistant is documented, and the Sheriff reconciles the composition of the receipt slips issued to the composition of monies transmitted and deposited. We noted inmate monies received during August 2018 were deposited intact. However, the Sheriff did not deposit these monies timely. Thirty-two receipt slips issued during August, totaling \$373, were not deposited until October 29, 2018, after our request for copies of receipt and deposit records was made on October 22, 2018. In addition, the Sheriff indicated he restrictively endorses inmate checks at the time of receipt.

1.4 Bank reconciliations
and liabilities

The Sheriff did not prepare timely monthly bank reconciliations and did not prepare a list of liabilities. In addition, accurate accounting records were not maintained, and errors were not corrected timely. As a result, reports generated from the computerized accounting systems used to track both inmate monies and commissary sales and receipts, deposits, and disbursements could not be relied upon by the Sheriff to reconcile the inmate bank account.

Recommendation

The Sheriff ensure monthly bank reconciliations and lists of liabilities are prepared and reconciled timely. Any differences between accounting records and reconciliations should be promptly investigated and resolved. In addition, if any monies remain unidentified, the monies should be disbursed in accordance with state law.

Status

Not Implemented

The Sheriff did not prepare the August 2018 bank reconciliation until October 27, 2018, after our request for a copy of the bank reconciliation was made on October 22, 2018. In addition, the Sheriff did not prepare lists of liabilities, investigate and resolve differences between the accounting records and reconciliations, or disburse unidentified monies in accordance with state law.

1.5 Inmate Prisoner
Detainee Security Fund

The Sheriff did not disburse commissary net proceeds to the county Inmate Prisoner Detainee Security Fund as required by state law.

Recommendation

The Sheriff ensure existing and future commissary net proceeds not necessary to meet cash flow needs or current operating expenses are disbursed to the County Collector-Treasurer for deposit in the Inmate Prisoner Detainee Security Fund.

Dade County
Follow-Up Report on Audit Findings
Status of Findings

Status	Partially Implemented In May and June 2018, the Sheriff disbursed commissary net proceeds and drug testing fees totaling \$9,147 to the County Collector-Treasurer for deposit in the Inmate Prisoner Detainee Security Fund. However, as of November 28, 2018, the Sheriff had not disbursed any commissary net proceeds collected since June 2, 2018.
1.6 Drug testing fees	The Sheriff's office collected a \$10 drug testing fee that was not allowed by state law.
Recommendation	The Sheriff discontinue charging and collecting drug testing fees.
Status	Not Implemented The Sheriff indicated his office no longer administers drug tests to the general public and only administers a drug test when ordered by the court. However, the Sheriff still collects a \$10 drug testing fee although the court order does not authorize a drug testing fee to be charged and collected.
2. Sheriff's Controls and Procedures	Controls and procedures over civil and criminal process fees, bonds, and other miscellaneous fees in the Sheriff's office needed improvement.
2.1 Segregation of duties and supervisory reviews	The Sheriff had not adequately segregated accounting duties or performed adequate and timely supervisory reviews of detailed accounting and bank records.
Recommendation	The Sheriff segregate accounting duties or ensure documented independent or supervisory reviews of detailed accounting and bank records are performed.
Status	Not Implemented The Sheriff did not segregate accounting duties or perform an adequate and timely review of detailed accounting and bank records. The Administrative Assistant continues to be responsible for receipting, recording, and depositing monies. As noted in section 2.4, the Sheriff still does not perform timely supervisory reviews of detailed accounting and bank records. In addition, the Sheriff provided no documentation to indicate a review of the monies received, recorded, deposited, and disbursed is being performed.
2.2 Depositing and recording	Bond monies and civil and criminal process fees were not deposited intact or timely and were not timely recorded in the computerized accounting system.
Recommendation	The Sheriff ensure monies received are deposited intact and are recorded and deposited timely.

Dade County
Follow-Up Report on Audit Findings
Status of Findings

Status

Partially Implemented

The Sheriff recorded and deposited bond monies timely during August 2018. However, civil and criminal process fees totaling \$699 collected in August 2018, were not deposited timely or intact. These fees were not deposited until October 26 through October 30, 2018, after our request for copies of receipt and deposit records was made on October 22, 2018. These deposits included fees received dating back to May 2018. In addition, some civil and criminal process fees received in November 2018 were recorded in the computerized accounting system at the time of receipt; however, some manual receipt slips dating back to November 2, 2018, still had not been recorded as of December 5, 2018.

2.3 Disbursements

The Sheriff did not disburse some civil and criminal process fees and bond monies timely.

Recommendation

The Sheriff ensure receipts are disbursed timely.

Status

Partially Implemented

The Sheriff disbursed bond monies received in August 2018 timely. However, the Sheriff did not disburse any civil or criminal process fees collected from June 19, 2018, through November 12, 2018, until November 13, 2018, when he disbursed \$5,517 to the County Collector-Treasurer.

2.4 Bank reconciliations
and liabilities

The Sheriff did not prepare accurate timely monthly bank reconciliations and did not prepare lists of liabilities.

Recommendation

The Sheriff ensure monthly bank reconciliations and lists of liabilities are prepared and reconciled timely. Any differences between accounting records and reconciliations should be promptly investigated and resolved. In addition, if any monies remain unidentified, the monies should be disbursed in accordance with state law.

Status

Not Implemented

The Sheriff did not prepare the August 2018 fee and bond bank account reconciliations until November 6, 2018, after our request for copies of the bank reconciliations was made on October 22, 2018. In addition, the Sheriff did not prepare lists of liabilities, investigate and resolve differences between the account records and reconciliations, or disburse unidentified monies in accordance with state law.

2.5 Seized property

Access was not adequately restricted to seized cash. Seized cash was stored in a lock box with other receipts collected in the Sheriff's office, and as a result, the Administrative Assistant had access to the seized cash.

Dade County
Follow-Up Report on Audit Findings
Status of Findings

Recommendation

The Sheriff restrict access to all seized cash.

Status

Implemented

The Sheriff indicated seized cash is now being stored in the seized property and evidence room and access to this room is restricted to the evidence officer and the Sheriff.

Office of Missouri State Auditor
Nicole Galloway, CPA

Lewis County

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Lewis County

Sheriff's Controls and Procedures	Controls and procedures for receipting and recording bond monies are not sufficient. The Sheriff has not established adequate controls over seized property.
Prosecuting Attorney's Controls and Procedures	The Prosecuting Attorney reduced charges filed on traffic tickets by requiring defendants to perform community service and/or make a contribution to a not-for-profit organization, including an organization he founded. In addition, the Prosecuting Attorney does not disclose to the court the terms of the plea agreement. The Prosecuting Attorney has not established proper controls or procedures for receipting and transmitting monies.
Public Administrator's Controls and Procedures	The Public Administrator does not assess and collect fees from the accounts of some wards and estates and has not filed annual settlements in compliance with state law. Additionally, the Circuit Court, Probate Division does not timely notify the Public Administrator of the annual settlement filing requirement and does not sufficiently review the activity of cases assigned to the Public Administrator.
County Procedures	The county lacks adequate procedures to account for bulk fuel used by the road and bridge department. Procedures and records to account for county property are not adequate. The General Revenue Fund budgets do not reasonably reflect the anticipated financial activity and cash balances reducing the effectiveness of the budget as a tool for monitoring or controlling disbursements.
Electronic Data Security	The Prosecuting Attorney, the County Assessor, and the Recorder of Deeds have not established adequate password controls to reduce the risk of unauthorized access to computers and data. The County Collector does not have security controls in place to lock computers after a certain number of incorrect logon attempts.
Sunshine Law	The County Commission has not adopted a written policy regarding public access to county records as required by state law.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information	16
---	----

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Lewis County

We have audited certain operations of Lewis County in fulfillment of our duties under Section 29.230, RSMo. In addition, Stopp & Vanhoy, LLC, Certified Public Accountants, was engaged to audit the financial statements of Lewis County for the year ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

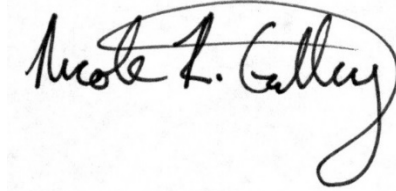

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Lewis County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with the first name "Nicole" and last name "Galloway" clearly legible. The signature is written over a faint, rectangular background that appears to be a stamp or watermark.

Lewis County

Management Advisory Report

State Auditor's Findings

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. During the year ended December 31, 2017, office personnel deposited approximately \$202,500 into the Sheriff's fee bank account, including \$132,500 for bonds and \$70,000 for civil and criminal process fees, prisoner board billings, concealed carry weapon permits, and other miscellaneous receipts.

1.1 Bonds

Controls and procedures for receipting and recording bond monies are not sufficient. Jail personnel collect bond monies and transmit these monies to the Office Administrator for processing. However, jail personnel do not use prenumbered bond forms, do not issue receipt slips for bond monies received, and do not record all bond monies received in the records management system. As a result, neither the Office Administrator nor the Sheriff can account for all bonds received and ensure bonds are handled properly. In addition, while bond monies are placed in a locked box until processed by the Office Administrator, access to this box is not restricted and there is no documentation of the transmittal of this money to the Office Administrator.

For the month of October 2017, we compared records of bonds posted in the records management system to records of bonds receipted by the Office Administrator and identified 3 bonds that were receipted by the Office Administrator but not posted in the records management system.

To reduce the risk of loss, theft, or misuse of bond monies, and provide assurance all bond monies are accounted for properly, procedures for receipting and recording bonds should be improved, access to the locked box should be restricted, and transmittal of bond monies to the Office Administrator should be documented.

A similar condition was noted in our prior audit report. Additionally, Report No. 2015-039, *Follow-Up Report on Audit Findings - Lewis County*, (section 1.3), issued in June 2015, reported the status as partially implemented.

1.2 Seized property

The Sheriff has not established adequate controls over seized property. A comprehensive listing(s) of all seized property is not maintained and the Sheriff's office does not conduct periodic inventories of seized property. The Sheriff indicated his office maintains a log of seized evidence only and does not maintain a separate log documenting property seized for any other reason. The Sheriff indicated an inventory of seized evidence was performed in October 2017 when evidence room personnel changed; however, it was not documented and was limited to a visual review of seized evidence rather than a physical inventory comparing items on hand to the seized evidence log. The Sheriff did not know the last time a physical inventory was performed. In addition, since a comprehensive listing of all seized property is not maintained, any physical inventory performed would not identify other missing property not considered seized evidence.

Lewis County
Management Advisory Report - State Auditor's Findings

During our review of the seized evidence log and items on hand as of June 2018, we noted 1 of 9 items selected for review from the seized evidence log was not on hand. The Sheriff indicated this item was disposed of in October 2017; however, the evidence log was not updated to reflect the disposition. In addition, we noted 1 of 5 items selected for review from the seized evidence room was not recorded on the seized evidence log. According to the Sheriff, this property was seized for safekeeping and not as evidence so it was not included on the seized evidence log.

Considering the often sensitive nature of all seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of seized property. Complete and accurate records of all seized property should be maintained and periodic physical inventories should be performed and the results compared to the inventory records to ensure seized property is accounted for properly.

Recommendations

The Sheriff:

- 1.1 Issue prenumbered receipt slips or prenumbered bond forms for bond monies received and account for the numerical sequence. In addition, the Sheriff should ensure that access to the locked box is restricted and the transmittal of bond monies between staff is documented.
- 1.2 Maintain a comprehensive listing of all seized property, and ensure a periodic inventory is conducted and reconciled to the seized property log and any differences are investigated.

Auditee's Response

- 1.1 *I disagree that controls and procedures for receipting and recording bond monies are not sufficient. Your finding fails to acknowledge that all defendants who post bond are in fact given a receipt. My office uses an Office of the State Courts Administrator (OSCA) bond form OSCA (01-05) CR40. (This form is not numbered.) On this bond form it explains to the defendant the court's rules and also explains the procedures followed by the court in later dispersal of the funds. More importantly from an accounting standpoint, the form also includes the amount of money posted as the bond. The jailer and the defendant both sign the form as well as any other signer.*

Once the money is accepted, and if the Office Administrator is unavailable, the money is placed in a lock box within my office. I dispute your finding that the lock box is not in a restricted area. Members of the general public are not allowed into the office without a member of the Sheriff's office being present. Therefore, the locked box is only at risk of being raided by a member of my own staff.

A person posting bond at my facility will have at minimum a booking incident number and a jail number. Both numbers are in the jail

Lewis County
Management Advisory Report - State Auditor's Findings

records management system. Our software vendor is Lawman. This system is encrypted and also backed up to an off-site server. In addition to the Lawman booking incident number and the jail number, the defendant is assigned an Offense Cycle Number. In some cases there will also be a court case number, a ticket number, and/or another agency's case number. These numbers are also placed on the OSCA provided form. Once the Office Administrator receives the money for the bond she completes a receipt in a one write receipt book and also enters the transaction into a QuickBooks accounting software system. This bond has two more numbers assigned to it. Potentially, a person who posts bond will have up to six different numbers attached to the bond.

Therefore, I do not believe placing a handwritten number on the OSCA provided form will enhance our ability to adequately control and account for monies received for bond.

- 1.2 *Your usage of the words seized property indicates that I currently keep a "seized property log." As I explained to your staff, for the past eighteen years we have kept an evidence inventory log sheet. This does not include items collected for safekeeping such as weapons at the request of the court, found property, or discarded medications. You indicate that items collected are not properly documented. Once again you fail to recognize that deputies are required to document items collected as found property, evidence, and items kept for safe keeping in the Lawman records management software. This includes the name of the person the item is collected from, what type of item is taken, and also any potential owner. This documentation includes the date it was collected, by whom and for what purpose. A separate property form is completed and kept with the file. This collection process also is assigned an incident number through the Lawman software system. The item is required to be properly marked and/or tagged with the incident number, date collected, and other pertinent information.*

In regards to the item "not on hand." I provided your staff with the court order for the destruction of this item, which occurred in October 2017. This court order was kept in the evidence room and I also provided a copy of the case file. This item was then destroyed and the evidence officer and another deputy both signed off that the item had been destroyed. I agree that the evidence officer's initials were not on the evidence log indicating it had been removed. But in October 2017, as we do every year, an entire year's worth of items are destroyed after receiving the proper court order. This is done every year due to the lack of space in our evidence room. But the

Lewis County
Management Advisory Report - State Auditor's Findings

supporting documentation is more important than just the initials of one officer.

In regards to the one item not being listed on the evidence log, this shotgun was seized in 2016 from a suicidal person and the shotgun was kept to prevent possible further harm to the person and/or someone else. The shotgun was properly marked, tagged and assigned an incident number. Upon review of the Lawman database computer software, I provided a copy of the report for your staff to review. My staff generally did not include other property on our evidence log sheet. This does not reflect that any item seized by my staff is not documented. It should also be noted in this case, this item was seized two years ago, and we were able to present proper documentation as well as the item. I believe this demonstrates we have successfully collected the item and kept it in a safe manner.

Auditor's Comments

- 1.1 The Sheriff's response indicates all bonds are entered into the Lawman system. However, as discussed in the finding, our review noted 3 bonds received that were not recorded in this system. Because all bonds may not be in this system or otherwise recorded, a process to account for all bonds, including the use of prenumbered (by a printer) bond forms are necessary to ensure all bond monies received are transmitted to the Office Administrator to be recorded and deposited.
- 1.2 Non-evidence items held at the Sheriff's office may include weapons and other items of a sensitive nature. Records of these items are kept in individual case files and in the Lawman system. Sheriff's office personnel indicated the system does not allow for a report to be generated that lists all property held and, as noted in the finding, no other listing is kept. Without a comprehensive listing of all property, it would be difficult to inventory all items held and ensure all items are accounted for properly.

2. Prosecuting Attorney's Controls and Procedures

The Prosecuting Attorney's office accounting controls and procedures need improvement. Office personnel receipted approximately \$39,700 in bad check, court-ordered restitution, and associated fees during the year ended December 31, 2017. They also processed approximately \$44,000 in contributions to a local not-for-profit organization.

2.1 Unallowable contributions

The Prosecuting Attorney frequently reduced charges filed on traffic tickets by requiring defendants perform community service and/or make a contribution to a not-for-profit organization in Lewis County, as a condition of reducing the charges. Until 2018, the list of suggested not-for-profit organizations provided by the Prosecuting Attorney's office included an organization founded by the Prosecuting Attorney. The Prosecuting Attorney's office did not require defendants submit documentation of

Lewis County Management Advisory Report - State Auditor's Findings

contributions made to this organization like it required for other organizations, thus making it a more convenient and potentially more likely choice for defendants. Beginning in 2018, the Prosecuting Attorney limited the list of possible organizations for contributions to only school booster clubs located in Lewis County (the organization founded by the Prosecuting Attorney is no longer an option).

During the year ended December 31, 2017, the Prosecuting Attorney reduced charges on more than 400 traffic tickets after contributions totaling approximately \$52,000 were made to not-for-profit organizations, including more than \$44,000 to the not-for-profit he founded. While well intentioned, the inclusion of the not-for-profit organization founded by the Prosecuting Attorney as a suggested organization in which a contribution could be made as a condition for a plea deal gives the appearance of a conflict of interest and should be reexamined.

There is also no authority for the Prosecuting Attorney to require a contribution to reduce charges filed on traffic tickets as a term of a plea agreement. Article IX, Section 7, Missouri Constitution, states the proceeds of all penalties, forfeitures, and fines are to be distributed to the County School Fund.

In addition, the Prosecuting Attorney does not disclose to the court the terms of the plea agreement, including the requirement to contribute to a local not-for-profit organization. Supreme Court Rule 24.02 states that if a plea agreement has been reached by the parties, the court shall require the disclosure of the agreement on the record and a determination that there are no promises apart from the plea agreement.

2.2 Receipting and transmitting

The Prosecuting Attorney has not established proper controls or procedures for receipting and transmitting monies. The Prosecuting Attorney's office does not issue a receipt slip for amended ticket fines and costs when the monies are received. These monies are mailed to the Prosecuting Attorney's office and held by his office until all terms of the plea agreement have been met. At that time, the monies are transmitted to the Circuit Clerk's office, but no documentation of the transmittal is obtained.

During a cash count performed on May 14, 2018, we identified 6 checks, totaling \$793, for fines and court costs related to amended traffic tickets that had not been receipted. One of the 6 checks was not transmitted to the Circuit Clerk's office until June 15, 2018.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds or errors occurring and going undetected, proper receipting and transmitting procedures are necessary.

Lewis County
Management Advisory Report - State Auditor's Findings

Recommendations

The Prosecuting Attorney:

- 2.1 Reevaluate the practice of requiring contributions to local not-for-profit organizations as part of reducing charges filed and ensure all terms of plea agreements related to amended tickets are filed with the court.
- 2.2 Issue prenumbered receipt slips for all monies received, and ensure monies are transmitted timely and adequately documented.

Auditee's Response

- 2.1 *My office has already taken significant steps to address your concerns with "unallowable contributions." First of all, based at least partially on a prior audit, my office discontinued the practice of allowing contributions for traffic ticket amendments to the Lewis County Law Enforcement Soccer League in 2017. That organization existed for many years prior to being the recipient of contributions based on the amendment of tickets. I understand the concerns and in order to avoid even the appearance of impropriety I do not intend to allow such contributions in the future.*

As your report suggests, in 2018 my office limited the list of possible organizations to only school booster clubs located in Lewis County. Based on your initial review in this audit and the concerns of the Associate Circuit Judge, Fred Westhoff, that practice was terminated in August 2018. This is a permanent change and allowance of those contributions will not be reinstated.

Finally, my office policy on ticket amendments at this time is simply on those tickets that we agree to amend to do so at the request of the defendant or his/her attorney and not to make any additional requirements. The fine and costs remain the same as they would have been for the speeding ticket. This plan is in effect and has been since August 2018. The court is made aware as each ticket is processed that there are no promises or requirements apart from this agreement. I do not anticipate changing this policy at this time.

- 2.2 *I believe this recommendation has largely been addressed by the modification of our amendment policy. Money orders made payable to the Circuit Clerk's office were sometimes held by our office until the remainder of the plea agreement had been met. This was done at the request of personnel in the Circuit Clerk's office. At this time, we are amending the tickets immediately, therefore, money orders that are delivered to our office are immediately delivered to the Circuit Clerk's office and moving forward, documentation of these transmittals to the court will be obtained. Any monies directed to my office have been and will continue to be timely receipted and adequately documented.*

Lewis County
Management Advisory Report - State Auditor's Findings

3. Public Administrator's Controls and Procedures

Public Administrator controls and procedures need improvement. The Public Administrator is the court appointed personal representative for wards or decedent estates of the Circuit Court, Probate Division, and was responsible for the financial activity of approximately 40 wards and estates during the year ended December 31, 2017.

3.1 Fees

The Public Administrator does not assess and collect fees from the accounts of some wards and estates. During the year ended December 31, 2017, fees totaling \$1,596 were assessed and paid to the county treasury for only 3 wards and/or estates. Section 473.742, RSMo, provides all fees collected by the Public Administrator who elects to be salaried are to be deposited into the county treasury.

To ensure fees are consistently assessed against the accounts of the wards and estates and remitted to the county treasury, the Public Administrator should work with the court to establish a policy for fees to be assessed.

3.2 Annual settlements

The Public Administrator has not filed annual settlements in compliance with state law. In addition, the Circuit Court, Probate Division does not timely notify the Public Administrator prior to the deadline for the annual settlement or follow up on annual settlements not filed by the required date.

For each ward or estate, the Public Administrator is required to file an annual settlement with the Circuit Court, Probate Division on the anniversary date of the date of letters, which reflects a detailed list of assets held, as well as financial activity for the previous year. As of June 30, 2018, of the 30 wards and estates requiring filing of annual settlements during the year ended December 31, 2017, 9 had not been filed and 3 were filed more than 7 months late.

Additionally, the Circuit Court, Probate Division did not notify the Public Administrator of the annual settlement filing requirement 40 days before the settlement due date for 21 of the 30 wards and estates requiring filing during the year ended December 31, 2017.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely filing of settlements is necessary for the court to properly oversee the administration of cases and reduce the possibility that errors, loss, theft, or misuse of funds will go undetected. In addition, Sections 473.557 and 475.280, RSMo, require the clerk of the court to notify the conservator or guardian (Public Administrator) of the deadline for the annual settlement; however, failure to receive the notice does not excuse the conservator or guardian from filing the settlements as required by law.

Lewis County
Management Advisory Report - State Auditor's Findings

3.3 Supporting documentation

The Circuit Court, Probate Division does not sufficiently review the activity of cases assigned to the Public Administrator. The court's review of disbursements on annual settlements is limited to verifying the accuracy of amounts reported by reviewing copies of canceled checks included as part of the bank statements. The court does not require and the Public Administrator submit supporting documentation, such as invoices, when filing annual settlements. Without additional supporting documentation, it is difficult for the court to assess the validity and reasonableness of costs charged to and paid by wards of the Public Administrator. Consideration should be given to requiring supporting documentation be filed with the court and reviewed in conjunction with the annual settlements.

Similar conditions previously reported

Similar conditions to sections 3.2 and 3.3 were noted in our prior audit report.

Recommendations

- 3.1 The Public Administrator work with the court to establish a policy outlining the fee amount to assess wards and estates and ensure fees are assessed and paid to the county for all applicable wards and estates.
- 3.2 The Public Administrator ensure annual settlements are filed timely for all wards and estates. In addition, the Circuit Court, Probate Division should notify the Public Administrator of annual settlement deadlines timely and follow up on settlements not filed by the required date.
- 3.3 The Circuit Court, Probate Division, establish procedures to adequately monitor the activity of all cases assigned to the Public Administrator, and require supporting documentation such as invoices be filed with the court for the annual settlement.

Auditee's Response

The Public Administrator provided the following responses:

- 3.1 *I will work with the court to establish a fee schedule and ensure fees are assessed and paid to the county once approved for all applicable wards and estates based on this schedule.*
- 3.2 *I have established a calendar to track and notify me 30 days prior to the date each annual settlement is due so I can ensure these settlements are prepared and filed timely with the court. Seven of the nine estates noted for which an annual settlement had not been filed as of June 30, 2018, did not have any financial activity occurring during the audit period. However, I understand an annual settlement was still required to be filed for each of these cases and will ensure these are filed timely moving forward.*

Lewis County
Management Advisory Report - State Auditor's Findings

The Circuit Clerk provided the following response:

- 3.2 *I agree with this recommendation and will work to ensure the Public Administrator is notified of annual settlement deadlines timely and will follow up with the Public Administrator if settlements are not filed timely.*

The Associate Circuit Judge, Probate Division provided the following response:

- 3.3 *In appropriate circumstances, the court will require supporting documentation of disbursements over \$75 be filed with the court.*

4. County Procedures

Controls and procedures over fuel usage and capital assets need improvement. In addition, budgets need to reflect realistic disbursement estimates.

4.1 Fuel use

The county lacks adequate procedures to account for bulk fuel used by the road and bridge department. The county uses 2 bulk fuel tanks to store fuel purchased and 1 mobile fuel tank to haul fuel from the road and bridge department to vehicles and equipment. During the year ended December 31, 2017, bulk fuel purchases totaled approximately \$84,000 for the road and bridge department.

Logs of fuel pumped from bulk fuel tanks are not maintained. One bulk fuel tank and the mobile fuel tank are not equipped with a fuel meter. Without fuel meters the amount of fuel dispensed from these tanks cannot be determined. In addition, mileage and usage logs are not maintained for road and bridge department vehicles and equipment.

Procedures for reconciling fuel use to fuel purchases are necessary to ensure vehicles and equipment are properly utilized; prevent paying vendors for improper amounts; and decrease the risk of loss, theft, or misuse of fuel occurring and going undetected. Mileage and usage logs are necessary to document the appropriate use of vehicles and equipment and to support fuel purchases.

A similar condition was noted in our prior audit report.

4.2 Capital assets

Procedures and records to account for county property are not adequate. The county does not have procedures in place to identify capital asset purchases and dispositions throughout the year. In addition, county officials have not conducted annual physical inventories or provided inventory lists to the County Clerk as required. As a result, the county's capital asset records are not complete and up to date.

Lewis County Management Advisory Report - State Auditor's Findings

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital asset purchases and dispositions throughout the year and compare to physical inventory results would enhance the county's ability to account for capital assets and potentially identify unrecorded additions and dispositions, identify obsolete assets, and deter and detect theft of assets. Section 49.093, RSMo, provides that the officer or his/her designee of each county department is responsible for performing annual inspections and inventories of county property used by his/her department and for submitting an inventory report to the County Clerk.

4.3 Budgets

The General Revenue Fund budgets do not reasonably reflect the anticipated financial activity and cash balances reducing the effectiveness of the budget as a tool for monitoring or controlling disbursements. As noted in the following table, the County Commission significantly overestimated disbursements for the General Revenue Fund for the 2015, 2016, and 2017 budgets, and as a result the actual ending cash balances each year were significantly higher than the projected ending cash balances.

		Year Ended December 31,		
		2017	2016	2015
Budgeted disbursements	\$	2,363,334	2,288,745	2,144,125
Actual disbursements		1,632,893	1,781,972	1,623,744
Budgeted over actual disbursements	\$	730,441	506,773	520,381
Projected ending cash balance	\$	3,565	14,545	111,869
Actual ending cash balance		880,470	672,136	738,266
Actual over projected ending cash balance	\$	876,905	657,591	626,397

Realistic projections of the county's uses of funds are essential for the efficient management of finances and for communicating accurate financial data to county residents. Significantly overestimating anticipated disbursements is misleading to the public and prevents an accurate estimate of the county's financial condition.

Recommendations

The County Commission:

- 4.1 Require fuel meters on all bulk fuel tanks and fuel logs to be maintained, and ensure logs are reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be promptly investigated. In addition, the County Commission should require mileage and usage logs be maintained for all road and bridge vehicles and equipment.

Lewis County
Management Advisory Report - State Auditor's Findings

- 4.2 And the County Clerk work with the other county officials to ensure complete and accurate inventory records are maintained, annual physical inventories are conducted, and implement procedures for tracking capital asset purchases and dispositions throughout the year.
- 4.3 Ensure budgets provide reasonable estimates of anticipated disbursements and ending cash balances.

Auditee's Response

- 4.1 *We will look into placing meters on all bulk fuel tanks and ensure fuel logs are maintained for each tank, reviewed for accuracy, and reconciled, if possible, to fuel purchases. Additionally, we will ensure mileage and usage logs are maintained for all road and bridge vehicles and equipment, submitted to the road and bridge department on a periodic basis, and reviewed for reasonableness.*
- 4.2 *We agree with your recommendation and will work with the County Clerk and the other county officials to implement this recommendation.*
- 4.3 *We have revised our budget process for the upcoming fiscal year to ensure budgets provide a more reasonable estimate of anticipated disbursements and ending cash balances.*

5. Electronic Data Security

County officials have not established adequate controls over county computers. As a result, county records are not adequately protected and are susceptible to unauthorized access or loss of data.

5.1 Passwords

The Prosecuting Attorney and the County Assessor have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to change passwords periodically to help ensure passwords remain known only to the assigned user. In addition, employees in the offices of the Prosecuting Attorney and Recorder of Deeds share passwords.

Passwords are necessary to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to be periodically changed by employees in certain offices, and are shared in two offices, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique, confidential, and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

5.2 Security controls

The County Collector does not have security controls in place to lock computers after a certain number of incorrect logon attempts. Logon attempt controls lock the capability to access a computer after a specified number of

Lewis County
Management Advisory Report - State Auditor's Findings

consecutive invalid logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission work with the other county officials to:

- 5.1 Require confidential passwords for each employee that are periodically changed.
- 5.2 Ensure county computers have security controls in place to lock each computer after a specified number of incorrect logon attempts.

Auditee's Response

- 5.1 *We will work with the other county officials to ensure employee passwords are kept confidential and changed on a periodic basis, as systems will allow.*
- 5.2 *We will work with the other county officials to ensure county computers have proper security controls in place.*

6. Sunshine Law

The County Commission has not adopted a written policy regarding public access to county records as required by state law. A written policy regarding public access to county records would establish guidelines for the county to make records available to the public. This policy should identify a person to contact, provide an address to mail such requests, and establish fees that may be assessed for providing copies of public records.

Section 610.023, RSMo, lists requirements for making records available to the public. Section 610.026, RSMo, allows the county to charge fees for providing access to and/or copies of public records and provides requirements related to fees. Section 610.028, RSMo, requires a written policy regarding release of information under the Sunshine Law.

A similar condition was noted in our prior audit report.

Recommendation

The County Commission develop a written policy for access to public records.

Auditee's Response

We have already implemented this recommendation. A written policy addressing public access to county records was adopted in June 2018.

Lewis County

Organization and Statistical Information

Lewis County is a county-organized, third-class county. The county seat is Monticello.

Lewis County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 30 full-time employees and 13 part-time employees on December 31, 2017.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Wayne Murphy, Jr., Presiding Commissioner	\$	33,032
Deanne Whiston, Associate Commissioner		30,601
Travis Fleer, Associate Commissioner		30,601
Amy Parrish, Recorder of Deeds		46,365
Chris Flanagan, County Clerk		46,365
Jules V. (Jake) DeCoster, Prosecuting Attorney		54,922
David T. Parrish, Sheriff		51,255
Bonnie Roberson, County Treasurer		46,365
Larry Arnold, County Coroner		13,403
Luke Barton, Public Administrator		46,365
Denise M. Goodwin, County Collector (1), year ended February 28,	50,900	
Craig Myers, County Assessor, year ended August 31,		46,365
Carson W. Lay, County Surveyor (2)		

(1) Includes \$4,463 of commissions earned for collecting drainage district property taxes.

(2) Compensation on a fee basis.

Other Information

The county has entered into 2 lease-purchase agreements for road and bridge equipment (two motor graders). Principal and interest payments are made from the Special Road and Bridge Fund. The final payments for the lease-purchases are scheduled to occur in 2021. The remaining principal outstanding at December 31, 2017, was \$182,378. Interest remaining to be paid over the life of the agreements totals \$13,296.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Vernon Betts, Sheriff
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2010-35, *City of St. Louis, Office of Sheriff*, issued in March 2010, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Office of Sheriff. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Office of Sheriff that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in July and October 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Office of Sheriff

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Personnel Policies and Procedures

Finding Number: 1.A.

Finding: Outside service deputies regularly worked less than 40-hour weeks and were considered full-time employees; however, the Sheriff's written personnel policies did not define any exceptions which allowed these deputies to work less than 40-hour weeks. Records of outside service deputy time were recorded on service logs and sign-in sheets; however, these records were not routinely reviewed for the number of hours worked, leave and pay were not adjusted if total hours recorded were less than 40 per week, and disciplinary action was not taken if deputies did not adequately account for 40 hours per week.

Recommendation: The Sheriff review the required working hours for outside service deputies to ensure compliance with the 40-hour work week or revise the personnel policy as applicable. The personnel policy should address any meal time to be included as normal work time for all employees. In addition, accurate time and leave records should be maintained for all outside service deputies and the records should be reviewed by the deputies' supervisors.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The outside service department has fully implemented the recommendations. A sergeant reviews the worksheets daily to track and analyze the documented meal and personal breaks. The deputy has the option to serve papers in his district that give him the best result as respondents may have to be served after hours or on weekends. With the installation of the current timekeeping system, the supervisors can review, control, and maintain accurate hourly recordkeeping.

Contact Person: Lieutenant Michael Hudson and Sergeant Neil Hogan

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Personnel Policies and Procedures

Finding Number: 1.B.

Finding: Some Sheriff's employees distributed campaign materials at local polling places while scheduled for election service vacation; however, the applicable time was not charged to their vacation leave balances. It appeared no other leave balances were adjusted for the election service, and employees' pay was not docked for these time periods, resulting in regular salary payments while performing election campaign services.

Recommendation: The Sheriff ensure time spent for distributing campaign materials is charged to the applicable employees' vacation leave balances.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The office now employs a timekeeping system (NovaTime) that requires fingerprint scanning to track hours worked. Hours worked are automatically calculated by this system as well as any time off work, including compensatory, medical, and vacation time. All time worked is automatically logged and recorded by the system. Additionally, supervisors review timesheets for discrepancies, all of which must be noted in the system and are reviewed by command staff.

If an employee is performing election-related activities, he/she is required to enter a leave request using either vacation or compensatory time.

Contact Person: Lieutenant Tammy R. Hogan
Contact Phone Number: (314) 622-3713

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Personnel Policies and Procedures

Finding Number: 1.C.

Finding: The Sheriff had not established a formal written policy regarding his leave benefits, and it appeared the Sheriff was not tracking or recording any sick leave used. No sick leave usage had been recorded against his leave balance for several years. The Sheriff had not determined whether he would be paid a sick leave benefit upon retirement similar to other employees.

Recommendation: The Sheriff develop a policy regarding the Sheriff's accrual of leave, potential payout of accumulated sick leave upon retirement, and the reporting of leave usage.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The city discontinued the practice of paying out lump sums for accumulation of unused sick leave for all city personnel effective August 17, 2013. Any personnel who have any "frozen" sick leave time accumulated from service in years prior to 2012 may receive a payout equal to 25 percent of any accumulated sick leave time, with the payouts limited to a maximum of 30 days.

The Sheriff was not a city employee under the previous policy, and thus he has no frozen sick leave. The Sheriff's leave policy is identical to that of every other deputy and his sick and vacation days are currently tracked through our NovaTime system.

Contact Person: Lieutenant Tammy R. Hogan
Contact Phone Number: (314) 622-3713

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Personnel Policies and Procedures

Finding Number: 1.D.

Finding: Leave accruals were computed manually by the Office of Sheriff, and there was no independent or supervisory review of the leave accrual records. Our review of vacation, sick, and compensatory time leave accrual records for calendar year 2008 noted leave accruals were not calculated correctly for 4 of the 20 employee records reviewed. In addition, accrued leave was not always reduced or pay was not docked when time recorded for a work day was less than 8 hours.

Recommendation: The Sheriff maintain centralized records for all types of leave, ensure leave and compensatory time accrual is calculated accurately, and require independent reviews of leave calculations.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The office has a timekeeping system that requires fingerprint scans to clock in and out. The time and hours are automatically recorded and computed. If there is a discrepancy, a supervisor has to review and note any changes.

The system tracks leave accruals, usage, and balances. When an employee is requesting leave, he/she enters the leave request into the system. The request is submitted to his/her supervisor who either approves or denies the request. If the request is approved the system will update accordingly. At the end of each pay period, supervisors verify each employee's time and leave records are correct. There are three designated timekeepers who ensure all employees have entered the correct time and are responsible for payroll closing duties.

Contact Phone Number: (314) 622-3713

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Property Room

Finding Number: 2.A.

Finding: The Sheriff's office held monies, evidence, and eviction property, some of which had been held for a few years and could have been disposed in accordance with state law.

Recommendation: The Sheriff establish procedures to periodically review the status of old monies, evidence, and eviction property. The Sheriff should work with the Circuit Attorney and request items no longer needed for evidentiary purposes be disposed in accordance with state law.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

All property and evidence must be stored until the Sheriff's office receives confirmation from the Circuit Attorney's office (CAO) that the items in question are no longer necessary to keep. There is new supervision in the property unit as well as new leadership in the CAO. We have made progress by depositing cash evidence into a bank account. With the CAO's new leadership, we anticipate increased cooperation in the future.

Contact Phone Number: (314) 622-3713

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Property Room

Finding Number: 2.B.

Finding: Information recorded on evidence item tags and bags did not always correspond to information recorded in the property room database or on property receipts. In addition, periodic physical inventories were not conducted.

Recommendation: The Sheriff establish procedures to ensure accurate information is recorded on the property room database and property tags and bags. Periodic physical inventories of the property room should be conducted or reviewed by personnel independent of property custody and the results of the inventories should be reconciled to the property room database.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Physical inventories are being conducted, and all evidence has been entered into a database. The most recent property received is the most organized and accounted for. New shelving units and cabinets have been installed. They are clearly marked and labeled.

Contact Phone Number: (314) 622-3713

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Tax Sales

Finding Number: 3.A.

Finding: The Sheriff's office did not prepare lists of liabilities for funds held in trust pending distribution to the responsible party and did not attempt to reconcile liabilities to the balances in the Land Auction Sales Fund. Receipts of \$678,195 from a sale in 2003 were incorrectly posted to the pre-2003 Land Auction Sales Fund, and three 2006 distributions of pre-2003 sale proceeds totaling \$408,652 were incorrectly posted to the current Land Auction Sales Fund. In addition, we noted some duplicate payments, errors in calculations, and fees which were refunded but not recovered from applicable city officials which resulted in overpayments and underpayments. The Sheriff's office has not attempted to identify the liabilities for this account.

Recommendation: The Sheriff ensure liabilities lists for the Land Auction Sales Fund are prepared monthly and reconciled to the fund balance. The Sheriff should correct identified errors and attempt to recover overpayments. In addition, the Sheriff should work with the City Comptroller to determine the proper disposition of unclaimed and unidentified monies in both the current and pre-2003 Land Auction Sales Fund.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department's general ledger is used to verify fund distributions and is checked within the land tax department for accuracy against items such as:

- Disbursement vouchers
- Spreadsheets
- Monies held pending distribution
- List of parcels being sold, which includes the pending trust amount totals

After each sale, a final list of properties is created to verify against funds being held for distribution. Then, the checking account is reconciled against the log sheet to verify distributions from the Land Auction Sales Fund on a monthly basis. Reconciliation reports are reviewed by the supervisor of the department.

Contact Phone Number: (314) 622-4581

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Tax Sales

Finding Number: 3.B.

Finding: The Sheriff's spreadsheets used to track collections and distributions of land tax sale proceeds needed improvement. The spreadsheets did not have separate columns to designate when monies were paid to the Collector of Revenue, Recorder of Deeds, and City Treasurer (Sheriff's fees), even though these payments occurred at different times. Corrections and adjustments of land tax sale distributions calculated by the Collector of Revenue were not always recorded on the Sheriff's spreadsheets, which resulted in distribution errors made by the Sheriff's office.

Recommendation: The Sheriff work with information technology staff to revise the tracking spreadsheets to ensure all land tax sale receipt and disbursement information is accurately recorded, including all adjustments made by the Collector of Revenue. In addition, the Sheriff's office should correct all calculation errors and make the necessary adjustments to tax sale distributions.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A tracking spreadsheet is used within the office which lists all distributions for each parcel of land being sold, making the distributions more accurate.

Contact Person: Ken Jennings/Liz Hudson

Contact Phone Number: (314) 622-4581

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Tax Sales

Finding Number: 3.C.

Finding: The Sheriff's office did not recover fees received and turned over to the City Treasurer and Recorder of Deeds when properties were set aside and the sale proceeds were refunded to the purchaser.

Recommendation: The Sheriff recover all funds previously disbursed prior to refunding the sale proceeds to the purchaser when a parcel is set aside.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The office does not control the funds used to account for these monies; therefore, we do not feel that we have responsibility to recover fees paid to elected officials because they provided a service.

Contact Person: Ken Jennings/Liz Hudson

Contact Phone Number: (314) 622-4581

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Tax Sales

Finding Number: 3.D.

Finding: The Sheriff's office did not adequately follow up on notification fees due from land tax sales, and as a result, it appeared some fees had not been collected.

Recommendation: The Sheriff establish and implement a method of tracking notification fees due from the Collector of Revenue and follow up on outstanding amounts due.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The office utilizes the tax lawsuit payment document which contains payment information that can be checked and verified against the general ledger as well as internal spreadsheets.

Contact Person: Ken Jennings/Liz Hudson

Contact Phone Number: (314) 622-4581

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Tax Sales

Finding Number: 3.E.

Finding: The Land Auction Sales Fund balance included funds from tax sales conducted between 2003 and 2005 which had not been confirmed by the courts in a timely manner. According to the Sheriff's records, no court hearings were conducted for these sales.

Recommendation: The Sheriff establish and implement a formal process and timeline for reporting and following up on properties for which additional actions are required to complete the land tax sale.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Office of Sheriff has implemented actions such as:

- Sending out acknowledgment letters
- Sending out letters when deeds are ready for pick up
- Sending out reminder acknowledgment letters
- Sending out reminder pick-up letters

In the event of no response after 2 years, we will send a list of parcels for which the sale has not been completed to the Collector of Revenue.

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Accounting Controls and Procedures

Finding Number: 4.A.

Finding: The Sheriff's office did not prepare an initial record of monies received. In addition, some of the monies received by the Sheriff's office remained in unsecure locations after work hours, including various individuals' desks.

Recommendation: The Sheriff prepare and maintain an initial record or mail log for all monies immediately upon receipt, and ensure all receipts are maintained in a secure location prior to deposit or transmittal.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Office of Sheriff has implemented the following policies and procedures for the garnishments, foreign, city service, execution, and adult abuse departments:

- Each above listed department in the Office of Sheriff creates a daily log sheet(s) either by computer or hand for the money that is received that day.
- If a daily log sheet(s) is done by computer, a copy of the report is then e-mailed to the Lieutenant.
- The incoming checks are attached to the log sheet(s) and the person in the specific department will bring them to the inventory room (inside the cashier's office) for security purposes.
- The first door to the cashier's office is secure and made of thick wood and is locked on a nightly basis.
- The second door (inventory door) to the inventory room is secure and made of metal and locked on a nightly basis.
- The only people with keys to these two doors are the cashier, the backup cashier, and management in that department.
- The above listed departments have baskets they put their next day's work in that are secured in the conceal and carry weapon (CCW) room; this room has two thick wooden doors that are locked nightly.
- The only people with keys to the CCW room are the two administrative deputies and management.

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Accounting Controls and Procedures
Finding Number:	4.B.
Finding:	Procedures had not been established to resolve outstanding checks.
Recommendation:	The Sheriff establish procedures to periodically contact the payees and attempt to resolve outstanding checks. If payees cannot be located, the amounts should be turned over to the State Treasurer's Unclaimed Property Division.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Office of Sheriff has implemented the following policies and procedures:

- We have an Excel reconciliation sheet(s) for the Office of Sheriff's bank accounts.
- This reconciliation sheet(s) is prepared by the cashier and lists all outstanding checks and any voided checks, along with the reconciliation numbers.
- The reconciliation sheet is put in a large envelope with other paperwork for the bank for the month that has been reconciled.
- This large envelope is then given to a deputy designated by management to review the reconciliation information which is done every month for a double check.
- This large envelope is then given to the Lieutenant for review; this is done every month for a triple check.
- After three years from when the outstanding check was written, the cashier will download the State Treasurer's Unclaimed Property Division forms, fill them out with the outstanding check information, and write up a check request that will be approved by management. Once the cashier receives the approval back from management a check will be cut and sent to the State Treasurer's Unclaimed Property Division.

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Accounting Controls and Procedures
Finding Number:	4.C.
Finding:	Monthly lists of liabilities were prepared but were not reconciled to the balance of the Sheriff's bank account.
Recommendation:	The Sheriff reconcile liabilities to the reconciled cash balance on a monthly basis and correct and resolve differences in a timely manner.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The office's cashier department has implemented the following policies and procedures:

- The cashier department will log all deposits on the daily deposit Excel worksheet, and will log all disbursements in the daily disbursement Excel worksheet. Data input is transmitted through Excel formulas to the month being reconciled.
- The cashier will review the above forms with the bank statement to ensure the information is correct on both documents, and the reconciliation totals match.
- The cashier will reconcile the account using the QuickBooks program for the month, review the report, and print the report as long as it matches to the bank statement and the Excel spreadsheets.
- All the paperwork is put in a large envelope, along with the daily small envelope, and passed on to the designated deputy by management to review the reconciliation information every month for a double check. The designated deputy will fill out a form if the reconciliation is okay or if there are corrections needed.
- The large envelope is then passed on to the Lieutenant for the triple check and his notes, which are placed on the supervisory oversight form, regarding his findings about the reconciliation. If there are errors, then the large envelope is given to the cashier to find the errors and fix them, and we repeat steps 4 and 5.

There are no longer liabilities to account for because we no longer handle garnishment sequestrations. All current monies collected, with the exception of fees for serving papers, are turned over to the Treasurer's office.

City of St. Louis - Office of Sheriff
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Vehicle Usage

Finding Number: 5.

Finding: Vehicle usage logs were not maintained for the seven Sheriff's office vehicles not used for prisoner transport, including the vehicle assigned to the Sheriff. While non-commuting personal use was prohibited for all other vehicles, the Sheriff was allowed to use his city-owned vehicle for personal use but did not maintain vehicle usage logs to document commuting and personal use of the vehicle.

Recommendation: The Sheriff prepare a usage log for the vehicle assigned to him that documents personal and commuting use. In addition, usage logs should be prepared for all Sheriff's vehicles and the logs should be periodically reviewed for reasonableness and propriety.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The deputies and the Sheriff complete and sign an annual verification of compliance with city vehicle policy form. The Sheriff signs a personal use form from the city that details his personal mileage.

CITIZENS SUMMARY

Findings in the audit of Audrain County

Sheriff's Inmate Account	The Sheriff's office does not prepare monthly bank reconciliations for the inmate bank account. In addition, a monthly list of liabilities is not prepared to reconcile to the inmate account balance.
Prosecuting Attorney's Restitution Procedures	The Prosecuting Attorney has not established adequate procedures to ensure restitution amounts owed by defendants are accurately entered into the computer system.
County Collector's City Commissions	The county did not properly report the amount of city commissions paid to the County Collector or withhold payroll taxes from these commissions as required.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Audrain County

We have audited certain operations of Audrain County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, LLC, Certified Public Accountants, was engaged to audit the financial statements of Audrain County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

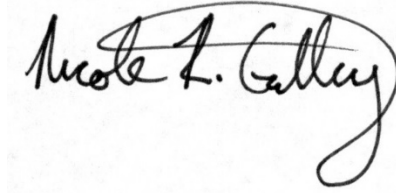

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with a legal provision, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Audrain County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with the first name "Nicole" and last name "Galloway" clearly distinguishable. It is written over a faint, rectangular background.

Audrain County Management Advisory Report State Auditor's Findings

1. Sheriff's Inmate Account

The Sheriff's office does not prepare monthly bank reconciliations for the inmate bank account. In addition, a monthly list of liabilities is not prepared to reconcile to the inmate account balance. Deposits into the inmate account totaled approximately \$109,000 for the year ended December 31, 2017.

Each month, Sheriff's office personnel document the transactions that have cleared the bank in the commissary system; however, a report of outstanding checks, deposits in transit, and other reconciling items is not prepared or reviewed. As a result, the inmate account's bank balance is not reconciled to the book balance. As of April 30, 2018, the bank balance of the inmate account was \$29,268, while the book balance reported in the commissary system was \$24,686. In addition, the available cash balance is not reconciled to a monthly list of liabilities, such as inmate monies held in the account and amounts due to the commissary vendor.

Performing monthly bank reconciliations helps ensure records are accurate and increases the likelihood errors will be identified. Regular identification and comparison of liabilities to the available cash balance is necessary to ensure records are in balance and monies are available to satisfy all liabilities.

Recommendation

The Sheriff ensure monthly bank reconciliations, which include outstanding checks and deposits in transit, are prepared for the inmate bank account. In addition, prepare a monthly list of liabilities and reconcile the list to the available cash balance. Any differences should be promptly investigated and resolved.

Auditee's Response

The portion of the commissary monies that are actually monies belonging to the county are reconciled monthly. That reconciliation is based on monies received from the commissary vendor that are due the county from commissary transactions.

In addition, that reconciliation did not include monies in transit, outstanding checks, and other miscellaneous items that are not actually part of transactions directly involving the county (Sheriff's office), or county-owned monies.

After speaking with audit staff during the exit meeting and reviewing the suggested recommendation(s), I have opted to follow the recommendation in part, and periodically (at undetermined times and intervals throughout the calendar year) include monies in transit, outstanding checks, and other miscellaneous items, as reported by the vendor, in reconciliations to aid in ensuring the vendor's disbursements to the county (Sheriff's office) are accurate.

Audrain County
Management Advisory Report - State Auditor's Findings

2. Prosecuting Attorney's Restitution Procedures

The Prosecuting Attorney has not established adequate procedures to ensure restitution amounts owed by defendants are accurately entered into the computer system. The office collected approximately \$95,200 in restitution during the year ended December 31, 2017.

During our test of restitution receipts, we noted the total restitution amount owed by the defendant per the computer system did not agree to documentation from the court for 2 of the 15 receipts reviewed. For example, court documentation indicated a defendant owed \$9,350; however \$9,450 was entered into the computer system and subsequently paid by the defendant, resulting in an overpayment of \$100.

To ensure the accuracy of all amounts owed, and subsequently paid by defendants, restitution amounts entered into the computer system should be reviewed and compared with court documentation. Any differences should be promptly investigated and resolved to ensure the proper amount of restitution is collected.

Recommendation

The Prosecuting Attorney establish procedures to review restitution amounts entered into the computer system to ensure amounts agree with court documentation. Any differences should be promptly investigated and resolved.

Auditee's Response

The Office of the Prosecuting Attorney has developed a process using its Karpel Case Management System software to increase the accuracy of restitution amount tracking in individual cases. The use of the "requested" restitution amount will be used until the case is closed, at which time the "ordered" restitution amount will be verified by the Restitution Coordinator and compared with the court's probation order, also stored in the electronic file, to ensure the two amounts (court-ordered and the amount of restitution in the case management system) match. This document review and cross-checking between court orders and the case management system will occur within 2 business days of the case closing and the court's restitution order being finalized.

To accomplish this, our office will rely on the case information to be entered from live data entry during court proceedings and probation orders as entered in PDF form in case.net, the Missouri state courts automated case management system, and the electronic copies provided to our office through the Missouri Electronic Filing (eFiling) System. The restitution amount requested will be entered promptly upon receipt of documentation supporting the restitution amount such as a damage estimate or an itemized receipt. Support staff, including but not limited to the Restitution Coordinator and the Victim Advocate, will have the responsibility to input requested restitution amounts. We will use existing receipt processing procedures, providing the receipt to defendants promptly upon their receipt of payment.

Audrain County
Management Advisory Report - State Auditor's Findings

3. County Collector's City Commissions

The county did not properly report the amount of city commissions paid to the County Collector or withhold payroll taxes from these commissions as required. The county contracts with 7 cities for the County Collector to collect city property taxes. The county bills these cities for the commissions amount and subsequently pays the commissions to the County Collector. In March 2017, the county paid the County Collector \$5,050 in city property tax commissions without reporting this amount on her W-2 form or withholding payroll taxes. The county reported this payment to the Internal Revenue Service (IRS) on a 1099-MISC form.

IRS regulations require all compensation paid to employees be subject to payroll tax and reported on W-2 forms. The county's current practice of handling city commissions is in violation of a strict interpretation of these payroll tax regulations. The county is at risk of incurring additional payroll liabilities plus interest and penalties by utilizing the current practice.

Recommendation

The County Commission ensure commissions paid to the County Collector are subject to payroll taxes and properly reported on W-2 forms.

Auditee's Response

We have discussed the audit finding concerning the County Collector's city commissions. The city contracts are due for renewal in 2019, and at that time we will explore our options to determine the best method to handle any commissions paid by cities for tax collections.

Audrain County

Organization and Statistical Information

Audrain County is a county-organized, third-class county. The county seat is Mexico.

Audrain County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 93 full-time employees and 14 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Steve Hobbs, Presiding Commissioner	\$	42,508
Alan Winders, Associate Commissioner		40,508
Tracy Graham, Associate Commissioner		40,508
Janis Deimeke, Recorder of Deeds		59,944
Shelley Harvey, County Clerk		59,944
Jacob Shellabarger, Prosecuting Attorney		137,072
Matt Oller, Sheriff		66,568
Patty Meyers, County Treasurer		59,944
Todd Yager, County Coroner		21,491
Connie J. Hagan, Public Administrator		59,944
Kate Becker, County Collector (1), year ended February 28,	65,194	
Melissa Maupin, County Assessor, year ended August 31,		59,553

(1) Includes \$5,050 of commissions earned for collecting city property taxes.

Other Information

The county entered into a lease-purchase agreement with Bank of Oklahoma Financial, N.A. (the trustee) on June 15, 2017. The terms of the agreement called for the trustee to sell certificates of participation totaling \$5,470,000 for the purpose of constructing, expanding, renovating, improving, furnishing, and equipping the county jail. The certificates are to be paid off in full with interest in 2034. The remaining principal and interest due on the

Audrain County Organization and Statistical Information

certificates at December 31, 2017, was \$5,470,000 and \$1,664,755, respectively.

On April 5, 2016, Audrain County voters approved a new 1/4-cent capital improvement sales tax for a period of five years for the purpose of replacing small road structures and maintenance of bridges and related purposes.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 70 political subdivisions required to file a financial report by October 31, 2018, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in October 2018, after their filing deadline. The filing status for these 8 entities is presented in summary on page 3 and by individual entity in Appendix B-C.

Nicole R. Galloway, CPA
State Auditor

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings

October 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the State Auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 70 political subdivisions, other than cities, towns, and villages, with a fiscal year end of April 30, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 70 political subdivisions, 56 filed an annual financial report by October 31, 2018.

This report also includes the filing status for 8 political subdivisions, other than cities, towns, and villages, that filed their financial report in October 2018, after their filing deadline.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by October 31, 2018, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 19 cities, 1 town, and 4 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in October 2018, after their filing deadline. The filing status for these 22 cities and 7 villages is presented in summary on pages 4 and by individual entity in Appendixes B to E.

Nicole R. Galloway, CPA
State Auditor

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Municipal Court and Revenue Filings

October 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities operating a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that operates a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 19 cities, 1 town, and 4 villages with a fiscal year end of April 30, 2018, whose financial reports, addendums, or certifications were due by October 31, 2018. Of the 24 cities, town, and villages required to file an annual financial report, 16 filed the annual financial report timely. Of the 9 cities required to file an addendum, 4 filed an addendum timely. Of the 8 cities required to file a certification, 3 filed a certification timely.

Monthly Report on Municipal Court and Revenue Filings
October 2018
Executive Summary

This report includes the filing status for 22 cities and 7 villages that filed at least one of the items (financial report, addendum, or certification) in October 2018, after their filing deadline. Of these entities, 18 filed an annual financial report, 12 filed an addendum, and 1 filed a certification.

Home and Community Based Services

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the Review of Home and Community Based Services

Trends in Expenditures and Assessments and Reassessments	Average annual costs per participant have increased every year from fiscal year 2014 to 2017 as expenditure growth has outpaced caseload growth. The numbers of assessments and reassessments performed annually has increased, and providers are performing an increasing share of reassessments.
Budgetary Estimates	Department of Health and Senior Services budgetary estimates of proposed program eligibility changes were not reasonable and resulted in overestimated cost savings projections for the Level of Care threshold change.
Level of Care Scores and Authorized Services	The Department of Health and Senior Services lacks an effective system to identify individuals most in need of services for eligibility purposes and to score the severity of need among participants when determining the appropriate amount of services authorized.
Provider Overpayments	Weaknesses in the Department of Health and Senior Services and MO Healthnet Division systems prevent the proper execution of MO Healthnet Division system edits to timely detect and prevent overpayments to some providers.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Dr. Randall W. Williams, MD, FACOG, Director
Department of Health and Senior Services
and
Dr. Steve Corsi, Psy.D., Director
Department of Social Services
Jefferson City, Missouri

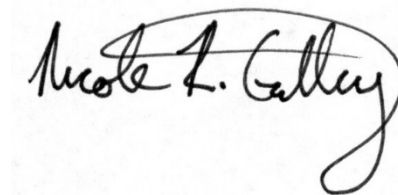

We have audited certain operations of the Department of Social Services and Department of Health and Senior Services related to the administration of in home, consumer directed, and adult day care services. These services, collectively referred to as home and community based services (HCBS), provide assistance to disabled and elderly Medicaid-eligible citizens in their home or community based setting to help the participant remain living in the least restrictive setting possible. Participants are eligible for HCBS when they have been assessed to need a threshold nursing facility level of care (LOC) and are Medicaid-eligible. Beginning July 1, 2017, the state increased the LOC threshold to reduce the number of participants and reduce costs. The objectives of our audit were to:

1. Analyze data on HCBS authorized and paid, and evaluate the key factors influencing the data.
2. Determine the factors that have caused growth in participation and costs related to HCBS.
3. Determine whether the change in LOC is having the intended effect.
4. Evaluate the economy and efficiency of certain management practices and operations as it relates to HCBS.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) the LOC score does not effectively capture some aspects affecting participants' needs limiting its usefulness as an eligibility threshold and management tool, units of authorized services differ regionally for participants with similar LOC scores, providers have become increasingly involved in reassessments of participants, and some providers billed and received payments for more unit of service than authorized, (2) expenditures have grown due to increases in the number of participants, provider reimbursement rates, and units of authorized services in participant care plans, (3) the LOC threshold increase resulted in less cost savings than expected because the DHSS budget estimates did not consider the historical reassessment inflation rates in LOC score, and most of the participants with low LOC scores before the threshold change were reassessed at higher LOC scores after the threshold change and remained eligible for the HCBS, and (4) budget estimates of fiscal year 2018 cost savings did not consider historical increases in LOC scores and were overestimated, and the DHSS has made recent efforts to improve the processes for assessments and reassessments and care plans.

The accompanying Management Advisory Report presents our findings arising from our audit of the administration of the HCBS program.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Home and Community Based Services

Introduction

Background

In home services (IHS),¹ consumer directed (CD) services, and adult day care (ADC) services, collectively referred to as home and community based services (HCBS), assist in meeting the unmet needs of participants to allow them to remain in the least restrictive environment.

Medicaid

HCBS services are Medicaid funded and participants must meet the income limits requirements of that program. Medicaid is a joint federal and state program. The state share of Medicaid expenditures ranged from about 36 percent to about 38 percent during the period from fiscal year 2014 through fiscal year 2018. Most HCBS are authorized through the state's Medicaid plan, which is approved by the Centers for Medicare and Medicaid Services (CMS), the federal agency responsible for the Medicaid program. Certain HCBS, including adult day care and homemaker services, are authorized through Medicaid waivers, which allow the state to target those services at certain populations. Medicaid waivers are approved by CMS.

Services

The primary HCBS available to participants are as follows:

- Personal care (PC) services are generally medically oriented tasks to meet the maintenance needs of persons with chronic health conditions. PC services may include tasks related to dietary, dressing/grooming, bathing, toileting, mobility/transfer, self-administration of medication, and medically related household tasks.
- CD services provide assistance with activities of daily living to individuals with disabilities who are able to direct their own care. Examples of CD services include bathing, cleaning, and meal preparation.
- Homemaker services are short-term tasks to help maintain a clean, safe home environment and include cleaning, laundry, meals, and shopping.
- Respite services are maintenance and supervisory tasks provided to a participant to provide temporary relief for the caregiver of the participant.
- Home delivered meals provide participants with up to 2 prepared meals per day delivered to their home.
- Adult day care (ADC) provides participants with continuous care and supervision in a licensed adult day care setting. Services include but are not limited to assistance with activities of daily living, planned group

¹ IHS administered by the Department of Health and Senior Services Division of Community and Public Health are excluded from this report as noted in the Scope and Methodology section.

Home and Community Based Services Introduction

activities, food services, client observation, skilled nursing services as specified in the plan of care, and transportation.

- Registered nurse (RN) services are for enhanced supervision of the personal care aide and maintenance or preventative services.

All HCBS other than CD services and ADC services are considered IHS. IHS and ADC services are delivered by staff of provider agencies contracted to provide services through the Missouri Medicaid Audit and Compliance (MMAC) unit. Staff members providing the services must meet certain training and experience requirements and cannot be related to the participant. For CD services, the participant selects and trains the individual (cannot be the individual's spouse) to provide the authorized services, and a vendor contracted with the MMAC acts as a conduit to process billings and payments and oversee the provider. To be eligible for CD services, the Department of Health and Senior Services (DHSS) must determine as part of the assessment process that the participant is capable of self-directing his/her care. Recipients of homemaker, chore, respite, and home delivered meals must be 63 years or older.

Services received by participants vary. Most participants receive either PC or CD services, but not both. Many IHS participants also receive RN services. Some participants may receive ADC services rather than, or in addition to, PC or CD services. Some PC participants may also receive homemaker, respite, and/or delivered meals. Table 1 shows fiscal year 2017 authorization information for the most popular services received by participants.

Table 1: Monthly authorized units, participants, and average units per participant, by service during fiscal year 2017

Service	Unit basis	Total monthly authorized units	Total participants receiving authorization	Average monthly units authorized per participant
Adult day care	15 minutes	1,646,952	2,727	604
Delivered meal	1 meal	316,750	10,246	31
Homemaker	15 minutes	306,184	3,785	81
Consumer directed	15 minutes	14,016,380	35,468	395
Personal care	15 minutes	5,668,858	25,869	219
Respite	15 minutes	1,080,905	4,689	231
Registered nurse	1 visit	98,768	30,868	3

Source: Number of units and participants based on SAO analysis of DHSS participant database

CD and PC services comprise most of the cost of HCBS. For example, payments for CD and PC services delivered during December 2017 represented 60 percent and 23 percent, respectively, of total HCBS payments. During fiscal year 2018, payments for CD services totaled about \$469 million, and payments for IHS and ADC services totaled about \$336 million.

Home and Community Based Services Introduction

The total cost of services rendered to any participant² cannot exceed the average annual Medicaid nursing facility cost per resident. Reimbursement rates for each service are determined annually as part of the process for determining the state appropriations to pay for the services. In addition, other limits are placed on the number of authorized services for some services. For fiscal year 2017, the reimbursement rates and limits for the most popular services were as follows:

Table 2: Unit reimbursement rates and limits, by service, fiscal year 2017

Service	Unit reimbursement rate	Unit limits
Adult day care	\$2.33	200 units per week
Delivered meal	\$5.91	2 meals per day
Homemaker	\$4.60	690 units per month
Consumer directed	\$4.01	791 units per month
Personal care	\$4.60	414 units per month
Respite	\$4.10	32 units per day
Registered nurse	\$44.35	1 visit per day

Source: DHSS HCBS Policy Manual

Level of care

DHSS staff perform assessments of potential participants to determine the person's care needs and calculate a level of care (LOC) score. The LOC score is used to determine eligibility for HCBS or alternatively, if the participant chooses, for nursing facility residency. Prior to fiscal year 2018, individuals receiving LOC scores of 21 or higher were eligible for HCBS. The DHSS established 9 categories over which to evaluate the needs of the client and determine the overall LOC score. The categories are:

- Monitoring
- Medications
- Treatments
- Restorative
- Rehabilitative
- Personal care
- Dietary
- Mobility
- Behavior and mental condition

Based on the severity of the individual's needs, the individual receives a score of 0, 3, 6, or 9 on each of these categories, so the potential overall LOC scores range from 0 to 81. For fiscal year 2017, about 87 percent of CD services participants received scores between 21 and 39.

² Average costs for all waiver participants may not exceed the average nursing facility cost per resident, but total costs for individual waiver participants may exceed the average nursing facility resident cost.

Home and Community Based Services Introduction

Assessments and care plans

DHSS staff generally meet with the potential participant in his/her home to assess needed services. The DHSS utilizes an assessment form and system developed by a not-for-profit organization and modified to fit DHSS's 9 categories of need. The form requires the DHSS obtain information about the person's condition and make judgments about the severity of his/her disability. Much of the form requires the assessor enter numeric values to code the assessed degree of impairment of the individual currently and over the 3 days preceding the assessment. The form is divided into sections on cognition, communication and vision, mood and behavior, psychosocial well-being, functional status, continence, disease diagnosis, health conditions, oral and nutritional status, skin condition, medications, treatment and procedures, responsibility, social supports, environmental assessment, discharge potential, and overall status. Much of the information to complete the form is obtained from questions to, and observations of, the potential participant. Information can also be obtained from the person's family or other care providers. After the assessor completes the electronic assessment form, the system uses the data to calculate the LOC score for each category and the overall LOC score.

For those potential participants with overall LOC scores meeting or exceeding the LOC threshold and choosing to receive HCBS, the DHSS works with the participant to determine the types of services needed, the amount of time needed for the services, and their frequency. Those considerations are used to determine a plan of care for the participant detailing the monthly units of authorized services. The authorized services are generally effective for one year after authorization. The participant may choose the provider of the services. In developing the plan for authorized services, DHSS policy provides guidance to the assessor including the following:

- Consider the unmet needs of the participant.
- CD services cannot be authorized for services that members of a household may reasonably be expected to share or do for one another.
- When determining authorized services and tasks, consider formal/informal supports (authorized HCBS should not replace or duplicate existing supports) and costs of care.
- When determining the amount of time and frequency required for authorized tasks, consider the size of the home, geographic location, specific participant limitations, and formal/informal supports.
- Care plans among participants should generally reflect standard responses to similar problems.
- Suggested ranges of minutes needed and frequencies for common services tasks for typical participants.

At least annually a reassessment must be performed of each participant using the same process and form as the initial assessment. DHSS staff and provider agency staff share in the reassessment workload. DHSS personnel assign

Home and Community Based Services

Introduction

reassessments to providers, and they review these reassessments and care plans for approval. DHSS personnel provide one-time training to designated individuals of certain provider agencies who are then responsible for training other staff of provider agencies involved in performing reassessments. Currently, DHSS has certified 550 individuals from 363 agencies as reassessment trainers. Provider agencies receive \$75 per completed reassessment. Providers began performing reassessments in fiscal year 2011 to help alleviate a backlog of overdue reassessments. The backlog was eliminated in fiscal year 2016. DHSS personnel may complete certain reassessments by telephone call to the participant rather than an in-person visit.

Agencies involved

The DHSS, Department of Social Services (DSS), and provider agencies are involved in the process of determining eligible participants and authorizing, delivering, and paying for services to participants.

The Division of Senior and Disability Services (DSDS) within the DHSS is responsible for determining whether potential and current participants meet the LOC standard and authorizing services for the participants. Participants are assigned to one of 5 geographic regions based on the location of their residence, and DSDS maintains an office in each region. The DSDS has 112 employees in the regional offices who perform assessments and reassessments and 18 employees in the regions who review reassessments performed by provider agencies. The DSDS uses an electronic case management system, and authorized units recorded on the system are transferred to the electronic payment system used by the DSS.

The MO Healthnet Division (MHD), a division within the DSS, processes and pays Medicaid claims submitted by HCBS providers and vendors. The payments are made from appropriations to the DHSS.

The MMAC unit, a unit within the DSS, contracts with provider agencies and vendors and investigates instances of noncompliance by providers or vendors with Medicaid policies, procedures, or regulations.

The Family Services Division within the DSS determines Medicaid eligibility of HCBS participants.

Provider agencies are responsible for delivering authorized IHS and ADC to participants. Much of the IHS are performed by an aide overseen by a registered nurse. About 500 providers are currently enrolled to provide IHS. Provider agencies delivered about 81 percent of total PC services authorized during December 2016.

Vendors and aides hired by the participant are responsible for delivering authorized CD services to participants. The aide delivers the services and

Home and Community Based Services Introduction

processes the billings through the vendor. About 722 vendors are enrolled to facilitate the delivery of CD services. During December 2016, about 90 percent of total authorized CD services were delivered.

Providers or vendors of IHS, CD services, and ADC services may only bill for services on the participant's authorized care plan.

Scope and Methodology

The scope of our audit included, but was not necessarily limited to, HCBS administered by the DSDS³ during the four years ended June 30, 2017 and the 6 months ended December 31, 2017.

We obtained and analyzed data from the DHSS system containing participant assessments, LOC scores, and authorized services.

We obtained and analyzed data from the MHD system containing payments for HCBS services delivered in December 2017, 2016, and 2015. We used the data to compare units paid to units authorized and for other analyses.

For a sample of 25 participants assessed at the lowest eligible LOC score (21) in fiscal year 2017, we reviewed the assessment forms, care plans, and case notes for fiscal year 2017 and fiscal year 2018 assessments and or reassessments.

For 24 participants with relatively high or relatively low units of current authorized CD services and the same assessed needs level (LOC score 30), we compared the assessment forms, care plans, and case notes.

We reviewed budgets, budget estimates, appropriations, and DHSS correspondence and projections related to cost saving measures for fiscal year 2018.

We analyzed total annual HCBS expenditures using records of the state's accounting system (SAM II).

We analyzed trends in expenditures and participants.

We reviewed the DHSS HCBS manual and provider memos.

We reviewed the standard assessment form and accompanying manual.

³ Other HCBS are administered by the DHSS Division of Community and Public Health. Those services include the Healthy Children and Families, AIDS waiver, and Medically Fragile Adults Waiver programs. Expenditures for those programs totaled about \$80 million during fiscal year 2018.

Home and Community Based Services Introduction

Our methodology also included reviewing written policies and procedures, and interviewing various DSS and DHSS personnel. We obtained an understanding of the applicable controls that are significant within the context of the audit objective and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violation of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Home and Community Based Services Management Advisory Report State Auditor's Findings

1. Trends in Expenditures and Assessments and Reassessments

Average annual costs per participant have increased every year from fiscal year 2014 to 2017 as expenditure growth has outpaced caseload growth. Increases in the provider reimbursement rates and number of units of service authorized has driven much of the expenditure growth. The increases in authorized units has occurred despite relatively constant average level of care (LOC) scores. The Department of Health and Senior Services (DHSS), Governor's Office, and General Assembly made changes in fiscal year 2018 to slow the growth of the program costs by reducing reimbursement rates, number of participants, and amounts of allowable authorized units of consumer directed (CD) services. The numbers of assessments and reassessments performed annually has increased, and providers are performing an increasing share of reassessments.

Expenditures

The annual average rate of growth in total expenditures (11 percent) has outpaced the growth in participants (3 percent) leading to an increasing average annual cost per participant. Total annual expenditures to home and community based services (HCBS) providers and vendors, unduplicated HCBS participants receiving services during the year, and the average annual HCBS cost per participant for fiscal years 2014 through 2017 are presented in Table 3.

Table 3: Total expenditures, unduplicated participants, and average annual cost per participant, fiscal years 2014 through 2017

Fiscal Year	Total expenditures	Unduplicated participants	Average annual cost per participant
2014	\$ 620,167,843	61,101	\$ 10,150
2015	675,873,729	61,697	10,955
2016	725,061,720	65,290	11,105
2017	816,114,889	66,332	12,203

Source: Prepared by the SAO from SAM II expenditures and DHSS budget documents

Total expenditures for fiscal year 2018 (\$805 million) were lower than fiscal year 2017 due to cost saving measures.⁴ The growth in expenditures has been driven by the increase in the number of participants and an increase in the average cost per participant. According to DHSS officials, the growth in participants is primarily related to an aging population. The average cost per participant has increased as the state has increased the reimbursement rate for popular services, and the average number of units authorized for those services has also increased. For example for participants authorized CD or personal care (PC) services, the average number of monthly units authorized has increased in recent years (average annual increases of 6 percent and 9 percent for CD and PC service, respectively), and the reimbursement rate for

⁴ Cost savings measures are discussed in more detail in MAR finding number 2. The number of participants for fiscal year 2018 was not available as of July 3, 2018.

Home and Community Based Services Management Advisory Report - State Auditor's Findings

those services has also increased (average annual increases of 3 percent) as noted in Table 4.

Table 4: Average monthly units authorized and unit reimbursement rates, CD and PC services, fiscal years 2014 through 2017

Fiscal Year	Unit reimbursement rate		Average monthly units authorized	
	CD	PC	CD	PC
2014	\$ 3.69	\$ 4.24	335	171
2015	3.89	4.47	355	199
2016	3.93	4.51	381	214
2017	4.01	4.60	395	219

Source: SAO analysis of DHSS participant database

Additionally, the average annual Medicaid cost per nursing facility (NF) resident trended upward during the period as noted in Table 5.

Table 5: Average annual Medicaid cost per nursing facility resident, fiscal years 2014 through 2017

Fiscal Year	Average annual Medicaid cost per nursing facility resident
2014	\$ 36,132
2015	37,584
2016	38,160
2017	38,088

Source: DHSS budget requests

Although average HCBS costs have increased as noted in Table 3, those costs continue to remain much below average nursing facility costs.

LOC score and authorized services

Overall units of services authorized for a year generally tend to increase with increases in LOC score. For example, for CD services authorized in fiscal year 2016, average monthly authorized services increased as the LOC score increased as follows:

Table 6: CD services participants and average monthly units authorized, by LOC score for fiscal year 2016

LOC score	Number of participants	Average units of service authorized
21	4,588	302
24	4,430	328
27	4,382	351
30	4,346	369
33	4,267	388
36	3,528	413
39	2,808	431
42 and higher	4,406	496

Source: SAO analysis of DHSS participant database

Home and Community Based Services Management Advisory Report - State Auditor's Findings

However, when making comparisons from year-to-year of average authorized services and average LOC score, units and LOC score do not always trend directly. For example, the average LOC score for participants receiving PC or CD services stayed relatively constant during the period from fiscal year 2014 through fiscal year 2017 as noted in Table 7, but average units of service authorized increased throughout that period as noted in Table 4.

Table 7: Average LOC scores for PC and CD participants, fiscal years 2014 through 2017

Fiscal Year	Average LOC score for PC participants	Average LOC score for CD participants
2014	32	31
2015	32	31
2016	32	31
2017	32	32

Source: SAO analysis of DHSS participant database

Other variances between units of service and LOC score are noted in MAR finding number 3.

Fiscal year 2018 cost reductions

The DHSS, Governor's Office, and General Assembly made changes beginning in fiscal year 2018 to reduce the rate of growth of expenditures for budgetary reasons. As part of developing the appropriations for HCBS for fiscal year 2018, they decided to increase the LOC eligibility threshold, reduce the cap in allowable CD services, and reduce the provider reimbursement rates.

The LOC eligibility threshold was increased from 21 to 24. This change was expected to reduce the number of projected future participants in the HCBS program as noted in MAR finding number 2. The LOC threshold was last changed in fiscal year 2006 when it was increased from 18 to 21. Additionally, the cap on allowable CD service units was reduced for the first time from 100 percent to 60 percent of average annual Medicaid expenditures per NF resident (changed from 791 to 511 units per month). This change was expected to require reductions in the amount of authorized services for about 8,800 current participants. The reduction made the CD maximum comparable to the PC maximum, which had been at 60 percent of average NF resident costs for many years. Also, provider reimbursement rates were decreased by 3 percent. Provider reimbursement rates had generally increased each year in recent years. The changes seem to have been responsible for decreased expenditures in fiscal year 2018. Expenditures for fiscal year 2018 totaled approximately \$805 million, about \$11 million less than fiscal year 2017 expenditures, but more than \$100 million less than projected costs if no benefit reductions had been made.

Assessments and reassessments

The total number of assessments and reassessments has increased in recent years due to the growth in the number of participants and the elimination of

Home and Community Based Services Management Advisory Report - State Auditor's Findings

the backlog of unperformed reassessments. Additionally, the number of reassessments performed by providers has especially increased in recent years. Assessments and reassessments completed during fiscal years 2014 through 2017 are noted in Table 8.

Table 8: Numbers of assessments and reassessments completed, fiscal years 2014 through 2017

	Fiscal Year			
	2014	2015	2016	2017
Initial assessments	18,228	19,137	18,563	18,418
Reassessments:				
DHSS	21,842	27,255	30,359	26,608
Providers	11,936	19,840	26,603	32,503
Total	52,006	66,232	75,525	77,529

Note: Total assessments often exceed the count of unduplicated participants in Table 3 because some participants receive more than 1 assessment per year, and some assessments result in no services as the potential participants were assessed at an LOC below the eligibility threshold.

Source: SAO analysis of DHSS participant database

Conclusion

Growth in expenditures and caseload and the increasing utilization of contracted providers to perform reassessments tends to generally create additional challenges in monitoring and controlling the HCBS program. While measures to reduce expenditure may help reduce growth to more manageable levels, such restrictions may also tend to make it more difficult to achieve program objectives due to reductions in service amounts and/or participation levels. Additionally, indirect relationships between average units authorized and average LOC scores further complicates efforts to manage and control the program. As noted in the following findings, improvements could be made to manage and control the HCBS program.

2. Budgetary Estimates

DHSS budgetary estimates of proposed program eligibility changes were not reasonable and resulted in overestimated cost savings projections for the LOC threshold change. DHSS estimated cost savings for fiscal year 2018 of about \$43 million due to increasing the LOC threshold score from 21 to 24. However, the assumptions used to estimate the savings were not reasonable. The estimation was overstated because it assumed all 8,000 participants at the LOC 21 level would remain at that level (or lower) upon the next reassessment. DHSS data indicates historically many LOC 21 participants receive higher LOC scores when next reassessed. As noted in Table 9, the rates of LOC 21 participants receiving higher LOC scores at their next reassessment were about 18 percent, 29 percent, and 36 percent, for participants reassessed during fiscal years 2014, 2015, and 2016, respectively. Had DHSS officials considered these past results, their projected cost savings would have been significantly lower.

Home and Community Based Services Management Advisory Report - State Auditor's Findings

For example, using the 36 percent rate from fiscal year 2016 (the most recently completed fiscal year when DHSS fiscal year 2018 estimates were developed in January 2017), the estimated savings for the LOC threshold change would total about \$28 million, or about \$15 million lower than estimated by the DHSS. Additionally, as noted in MAR finding number 3, the rate of increased LOC scores for LOC 21 participants during fiscal year 2018 significantly exceeded the historical rates.

Underestimated program expenditures can lead to the need for supplemental appropriations. As a result, funding may have to shift from other priorities and not be available for those purposes. To improve the integrity of the budget process, it is essential the DHSS develop reasonable estimates of expected HCBS expenditures.

Recommendation

The DHSS develop more accurate budget estimates for HCBS services. When making program changes to produce costs savings, expenditure projections should consider any applicable historical rates.

Auditee's Response

The DHSS provided a written response. See Appendix A.

3. Level of Care Scores and Authorized Services

The DHSS lacks an effective system to identify individuals most in need of services for eligibility purposes and to score the severity of need among participants when determining the appropriate amount of services authorized. As a result, when the recent eligibility threshold increased from a LOC score of 21 to 24, unusually large numbers of participants with scores of 21 received new scores at or above the new threshold. Additionally, our review of 25 of those cases determined the new LOC scores and amount of authorized units were often not directly related. Similarly, the DHSS has significant long-standing differences in authorized units for participants assessed at the same LOC score among the state's regions that have not been sufficiently evaluated and addressed. The DHSS has begun efforts to improve the processes for assessments and reassessments of needs and development of plans of care to achieve better eligibility determinations and more uniformity and consistency in authorized services.

Implementation of the LOC threshold increase

Reassessments in fiscal year 2018 of participants with LOC scores of 21 from fiscal year 2017 resulted in disproportionately larger numbers of increased LOC scores compared to historical averages. Of the 5,497 reassessments completed July 2017 through May 7, 2018, of participants with LOC scores of 21, 4,081, or 74 percent, received higher LOC scores and remained eligible for services. In the previous 4 years when the LOC threshold was not changed, the percentage of participants with scores of 21 subsequently reassessed at higher scores were much lower, averaging about 30 percent per year. See Table 9.

Home and Community Based Services
Management Advisory Report - State Auditor's Findings

Table 9: Reassessment results for participants with LOC scores of 21, fiscal years 2014 through 2018

	Fiscal Year				
	2014	2015	2016	2017	2018 ¹
Number of participants with LOC score of 21 at beginning of fiscal year	11,880	10,597	9,521	7,978	5,497
Number of those participants subsequently reassessed at a higher LOC:					
- number	2,099	3,069	3,391	3,291	4,081
- percentage	18%	29%	36%	41%	74%

¹ Only includes reassessments from July 1, 2017 to May 7, 2018.

Source: DHSS analysis

The unusually large percentage of reassessments in fiscal year 2018 resulting in higher LOC scores creates questions as to whether some participants were improperly found to remain eligible for services under the higher LOC threshold. The unexpected results occurred despite refresher training provided by the DHSS personnel to department assessors in spring 2017 prior to implementation of the new threshold. No refresher training was given to provider reassessors.

The LOC score does not effectively reflect some circumstances affecting the need for HCBS of participants and potential participants and consequently has weaknesses as a tool to determine those most in need of services. Additionally, those weaknesses in the LOC score limits the ability of DHSS to compare needs assessments and authorized services and understand causes for unusual changes. For the 25 cases sampled of participants assessed at LOC 21 in fiscal year 2017 and reassessed at a higher LOC score in fiscal year 2018, many of the new LOC scores differ from previous LOC scores, but the authorized units of service did not correlate with the score change as noted below.

- For the 16 cases containing one or more assessments prior to the fiscal year 2017 assessment, 9 cases had assessment scores of 21 in all previous annual assessments.
- In 9 cases, the types and units of services authorized in fiscal year 2018 were the same as those in fiscal year 2017, and the number of units authorized either decreased or remained unchanged despite the increased LOC score (excluding those cases where the units authorized for fiscal year 2018 were lowered from the previous year to comply with the reduced maximum for CD services).
- For 6 cases, the participants received higher LOC scores in fiscal year 2018, but were authorized fewer units of service than in the previous year

Home and Community Based Services Management Advisory Report - State Auditor's Findings

to comply with the lowered maximum on CD services. These participants had been authorized many units of service for fiscal year 2017, despite being assessed at the lowest possible LOC score to receive services. The fiscal year 2018 LOC scores on these cases ranged from 24 to 45.

DHSS officials indicated the LOC score cannot always be related to units of service authorized because some issues affecting need are not proportionately reflected in the LOC score. For example, a participant receiving continuous oxygen typically receives the maximum LOC score of 9 in the treatment category, but participants with that disability may sometimes require relatively little HCBS; and the lack of support from spouse or family will not affect the LOC score, but a participant with few social supports often will receive relatively high units of authorized services.

Regional disparities in authorized services

The DHSS has not taken sufficient actions to evaluate and address inconsistencies in the average amounts of unit of service authorized among the regions. Significant differences exist between the regions, and the St. Louis region leads all regions in the amount of services authorized. For example, the average units of CD services per participant during fiscal year 2016 authorized in region 3 (St. Louis area), 457 units, exceeded all other regions and was about 61 percent more than the lowest-average region (2), 283 units, while average LOC scores among the regions was less variable, as noted in Table 10.

Table 10: Average CD services units and LOC score per participant by region, Fiscal Year 2016

Region	Geographic area	Average authorized units of CD services per participant	Average LOC score	Average units per LOC score
1	Southwest MO including Springfield	304	32	9.5
2	Southeast MO	283	29	9.8
3	St. Louis area	457	31	14.7
4	Northwest MO including Kansas City	427	33	12.9
5	Northeast MO and central MO	303	32	9.5

Source: SAO analysis of DHSS participant database

In previous audits,⁵ we also noted participants were generally authorized more units of service in the St. Louis region than other regions. According to DHSS officials, transportation needs and social supports typically have little effect on LOC scores but these variables affect the amounts of services authorized, and participants in the St. Louis region often are authorized more units of service due to those participants typically having relatively few social

⁵ SAO, Report No. 2006-69, *Health and Senior Services Home and Community-Based Services*, issued in November 2006, and SAO, Report No. 2004-02, *Medicaid Personal Care Services Program*, issued in January 2004.

Home and Community Based Services Management Advisory Report - State Auditor's Findings

supports and generally more access to medical care facilities than participants in other regions.

Based on our review and comparison of case documentation for 24 participants with LOC scores of 30 and relatively high or relatively low numbers of authorized CD services units, after considering social supports, units of service authorized still varied widely among the cases. For the tested cases, the number of authorized monthly units ranged from 186 to 511. Some of the high-authorized unit cases also had hours of informal care and active monitoring from family, friends, and/or neighbors within the last 3 days recorded on the assessment form, and some of the low-authorized unit cases had no hours of informal social support noted on the form. After considering the social supports (projecting the hours of social supports noted on the assessment form to a number of 15 minute monthly units and combining with the authorized DHSS services), the hours of total monthly support ranged from 226 to 871 for the tested cases. Most of the high units cases reviewed were from regions 3 and 4.

Recent efforts by DHSS

DHSS has recently taken actions, and is considering further actions, to improve the system and process for assessments and reassessments and service authorizations.

- In January 2018, the DHSS received a grant to contract with a consultant to study systems used by other states to provide recommendations to DHSS about improved practices for LOC assessments and reassessments and eligibility determinations. Results and recommendations from the consultant are expected in October 2018 with a decision about changes based on that information expected in November 2018.
- In October 2017, DHSS provided additional training to employees in the St. Louis regional office who tended to authorize relatively large amounts of services to help those employees authorize services more comparable to those of other assessors and reassessors.
- In February 2018, the DHSS developed a new form requiring the assessor or reassessor and participant to sign with attestations about the accuracy and truthfulness of the information in the assessment document.
- In fall 2017, the DHSS began requiring DHSS staff reviewing reassessments completed by providers to contact primary care physicians of the participant to verify information on the assessment form and help understand the causes for increases in LOC scores from the previous assessment or reassessment when they have questions about the reasons for increases in the LOC score for participants with previous LOC scores of 21.

Home and Community Based Services Management Advisory Report - State Auditor's Findings

- DHSS officials indicated they are considering purchasing additional decision support tools to assist in the development of individual participant care plans.

Conclusions

An effective system for measuring the needs of participants is necessary to ensure the most needy participants are provided appropriate services and the goals of the program are met. Without an effective system, unusual changes in participant LOC scores from year-to-year, units of service authorized that trend opposite to LOC scores, and disparities in units authorized among the regions for participants with the same LOC score can occur and create doubts about the accuracy of the assessment or reassessment and/or the propriety of the authorized services, and also make less predictable the results from changes to the LOC threshold. Developing a more effective LOC scoring system that better reflects participants needs along with establishing limits on the amounts of authorized services by LOC score in conjunction with other recent DHSS changes may help reduce such inconsistencies, disparities, and unusual results. A more consistent evaluation methodology will provide for more uniformity and fairness in services provided to participants.

Recommendation

The DHSS should continue efforts to improve the systems and processes for LOC assessments and authorizations of service, and consider establishing limits on the amounts of authorized services by LOC score.

Auditee's Response

The DHSS provided a written response. See Appendix A.

4. Provider Overpayments

Weaknesses in the DHSS and MHD systems prevent the proper execution of MHD system edits⁶ to timely detect and prevent overpayments to some providers. Our review of MHD system records for December 2017, 2016, and 2015 indicated the number of monthly units of service billed by providers on behalf of participants and paid by the MHD often exceeded the total monthly number of units authorized by DHSS for those services and participants.

Based on a comparison of MHD system records of all HCBS units authorized and paid for December 2017, 2016, and 2015, we noted about 2,500 records totaling about \$431,000 where units paid exceeded units authorized. For 17 of the records with relatively large units paid in excess of units authorized, we reviewed the authorizations on the DHSS system and noted 13 of the records seem to represent overpayments, or instances where services were billed and paid in excess of services authorized, totaling about \$17,000. The discrepancies occurred during months when recipient care plans were reauthorized by DHSS due to reassessment or other reasons, and the MHD

⁶ An edit, also known as a data validity check, is program code that tests the input for correct and reasonable conditions; such as account numbers falling within a range; numeric data being all digits; dates having a valid day, month, and year; etc.

Home and Community Based Services Management Advisory Report - State Auditor's Findings

system recorded the full amount of monthly authorized units for the participant under both the old and new care plans based on authorization data received from the DHSS system.

According to MHD and MMAC officials, the transfer of units authorization data between the DHSS and MHD systems is insufficient to allow for a proration of the authorized units under each care plan (old and new) during months when a participant's care plan is changed causing MHD system edits to function improperly during those months, and MMAC audits of providers have also noted instances where providers billed and were paid for more units than authorized in those circumstances resulting in overpayments to be recouped because the MHD system did not detect those overpayments.

Without accurate information about service authorizations, edits denying, or flagging for further review, instances where billed units exceed authorized units are ineffective. Allowing a known weakness to continue to result in overpayments results in resources being unnecessarily used to identify the overpayments and seek collection.

In a previous audit of the MHD system,⁷ we noted other edits did not function properly resulting in improper payments.

Recommendation

The DHSS and MHD implement changes to provide for more effective execution of MHD system edits to prevent and detect potential overpayments of HCBS benefits. In addition, the MMAC should investigate the potential overpayments identified and recoup any resulting overpayments.

Auditee's Response

The DHSS provided a written response. See Appendix A.

The DSS provided a written response. See Appendix B

Randall W. Williams, MD, FACOG
Director

Michael L. Parson
Governor

August 27, 2018

The Honorable Nicole Galloway, CPA
State Auditor
State Capitol, Room 121
Jefferson City, MO 65101

Dear Auditor Galloway,

The Department of Health and Senior Services (DHSS) is in receipt of the audit entitled Home and Community Based Services (HCBS) and has reviewed the draft audit report. This letter will serve as a written response to the audit recommendations 2.1, 3.1, and 4.1.

Recommendation 2.1: *The DHSS develop more accurate budget estimates for HCBS services. When making program changes to produce costs savings, expenditure projections should consider any applicable historical rates.*

While DHSS agrees with the aspect of this recommendation regarding program changes and the need to consider any applicable historical rates, the recommendation to develop more accurate budget estimates for HCBS services does not take into account all of the relevant projections provided to the Office of Administration-Budget & Planning, as well as the General Assembly, which historically have been reflective of actual expenditures. This recommendation is based on one estimate prepared for a specific purpose and assumptions. Given the size and variabilities of the program, DHSS will work to provide the most accurate budget estimates possible by studying all available information in formulating budget estimates. In addition, DHSS will continue to provide a detailed explanation of all assumptions used in formulating budget projections.

Recommendation 3.1: *The DHSS should continue efforts to improve the systems and processes for LOC assessments and authorizations of service, and consider establishing limits on the amounts of authorized services by LOC score.*

Response: DHSS will continue to move forward with changes to the nursing facility LOC. As DHSS has indicated, nursing facility LOC is one component of eligibility and not completely reflective of a participant's acuity level. Authorization of services in the current LOC process is person centered and based upon the needs of each individual participant, taking into account available formal and informal supports as well as the nursing facility LOC. DHSS will continue to move forward with analysis of different authorization systems, which would facilitate consistent person centered care planning amongst all regions, and provide targeted care planning guidance to the regions with higher authorization levels.

Home and Community Based Services
Auditee Response - Department of Health and Senior Services

SAO – HCBS Letter
August 27, 2018
Page 2

Recommendation 4.1: *The DHSS and MHD implement changes to provide for more effective execution of MHD system edits to prevent and detect potential overpayments of HCBS benefits. In addition, the MMAC should investigate the potential overpayments identified and recoup any resulting overpayments.*

Response: DHSS agrees with the recommendation. DHSS will evaluate system changes in the current prior authorization system. In addition, DHSS will provide further guidance to providers concerning this issue. DHSS will continue to work side-by-side with MHD and MMAC to identify potential solutions.

Thank you for your consideration.

Sincerely,

Randall W. Williams, MD, FACOG
Director

October 11, 2018

Honorable Nicole R. Galloway, CPA
Missouri State Auditor
P.O. Box 869
Jefferson City, MO 65102

Dear State Auditor Galloway:

Please find below the Department of Social Services (DSS), MO HealthNet Division (MHD) and Missouri Medicaid Audit and Compliance (MMAC) combined response to the recommendation from the audit of the administration of the home and community based services (HCBS) program.

Audit Recommendation:

The DHSS and MHD implement changes to provide for more effective execution of MHD system edits to prevent and detect potential overpayments of HCBS benefits. In addition, the MMAC should investigate the potential overpayments identified and recoup any resulting overpayments.

DSS/MHD and MMAC Response:

MHD agrees, in part, with the findings of this report. MHD agrees that overpayments did occur in months where care plans were reauthorized by Department of Health and Senior Services (DHSS). MHD does not agree that these overpayments were due to the lack of system edits in the MHD system (MMIS). The appropriate edits exist in the MMIS to reimburse services in accordance with the authorization received from the DHSS system. MHD agrees with the recommendation to implement changes (in the authorization process) to provide for more effective execution of MHD system edits; however, this is subject to available state funding and staff resources.

In response to the recommendation to recoup overpayments, MMAC is running reports to identify each category of HCBS services that is authorized through DHSS within the MMIS system. MMAC opened a special project covering State Fiscal Years 2016, 2017, and 2018 and identified overpayments to providers

Auditee Response - Department of Social Services

for Personal Care, Advanced Personal Care Assistance (PCA), and Consumer Directed Services (CDS) PCA Services; some of which was identified in the SAO report. MMAC is in the process of notifying the providers and recouping the identified overpayments. MMAC calculated the overpayments based on the number of units billed in excess of the larger amount of units authorized on the two Prior Authorizations. Additionally, MMAC is running separate reports for Respite, Home Maker Chore, Nursing, and Adult Day Care services.

Thank you for allowing the Department of Social Services, MO HealthNet Division and Missouri Medicaid Audit and Compliance the opportunity to prepare and submit this response.

Sincerely,

/s/

CITIZENS SUMMARY

Findings in the Audit of the City of Seymour

Utility System Controls and Procedures	The Board of Aldermen has no documentation of any discussions held or the basis for determining the amounts to be transferred from each of the city's three utility funds to the General Fund. Periodic formal cost studies of utility rates have not been performed and rates have not been increased or decreased for any utility services for the past several years. The city does not reconcile customer utility deposit balances reported in the utility system to the city's accounting records. The city's utility customers that qualify as tax-exempt entities under Section 501(c)(3) of the Internal Revenue Code are not billed for sewer service, and the city is not open and/or transparent when awarding certain economic incentives in the form of reduced or waived electric charges. Controls over non-monetary adjustments posted to customer utility accounts need improvement. The city did not perform monthly reconciliations of total amounts billed, payments received, and amounts unpaid for any of the city's utility services. City officials do not have any procedures to determine electric losses, and do not review and investigate significant water losses.
Monitoring Financial Condition	The Board has not been monitoring the financial condition of the city, is not receiving detailed information showing cash balances for each fund, and has relied on transfers from utility funds to balance the city's budget.
Budgets and Financial Reporting	Annual budgets do not contain a budget message, the actual beginning and estimated ending cash balance for each fund, or a budget summary as required by state law. The Board unknowingly approved deficit budgets for the General Fund and Library Fund for the fiscal year ended June 30, 2017, in violation of state law. The Board does not adequately monitor budget-to-actual receipts and disbursements. The Board needs to evaluate its relationship with the Missouri Joint Municipal Electric Utility Commission (MJMEUC), including the Mid-Missouri Municipal Power Energy Pool, a power pool managed by the MJMEUC, to determine proper disclosures about the relationship in the city's financial statements.
Nepotism	During the February 22, 2018, Board meeting, Alderwoman Nadine Crisp voted to approve the appointment of her daughter, Sheila Sturdefant, to a 2-year term on the newly created Seymour Electric Rate Utility Commission.
Disbursements	Some disbursements paid from the Electric Fund should have been paid from the General Fund. The city does not have written contracts with some service providers and certain outside parties. The city does not always solicit competitive bids or proposals for goods and services as required by city code. The city does not require documented supervisory approval for purchases. Mileage records are not reviewed for reasonableness and bulk fuel purchases are not reconciled to bulk fuel dispensed. The Board was aware of two planned projects that resulted in the city using public resources for private gain, but it took no action to stop these projects.
Closed Meetings	Some topics discussed and voted on in closed meetings by the Board were not related to the reasons cited for closing the meeting listed in the open meeting minutes. In addition, the Board discussed some items in closed meetings that were not allowable under the Sunshine Law.

Payroll Controls and Procedures	The Board approved year-end payments to all full-time city employees in violation of the Missouri Constitution. The city does not require time records be prepared or maintained for salaried employees, the city's procedures for calculating overtime are not compliant with city policies and federal regulations, and employees are paid based on estimated instead of actual hours. The city's computerized system only allows employees to accrue 200 hours of vacation leave instead of the maximum of 320 hours allowed by personnel policy due to a programming error. At the Emergency Services Coordinator's request, the city changed the Coordinator from an independent contractor to an employee starting in January 2016. The city did not document the reasons for the change or document how it determined what the proper classification was for this position. The city does not have ordinances establishing the compensation of city officials and employees as required by city code. The city is not complying with city code or personnel policy when giving pay raises to appointed officers.
Accounting Controls and Procedures	The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work performed by city office personnel are performed. The city is not properly tracking and recording some restricted monies. The city has not established procedures to routinely follow up on outstanding checks. The Board members, who sign checks and have access to monies held in bank accounts, are not covered by a bond. Also, the Utility Clerk's bond does not provide adequate coverage.
Planning and Zoning	The City of Seymour does not have a city plan or comprehensive plan to guide planning and zoning activities.

In the areas audited, the overall performance of this entity was **Poor**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
Seymour, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Seymour. We have audited certain operations of the city in fulfillment of our duties. The city engaged Decker and DeGood, Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2017. To minimize duplication of effort, we reviewed the CPA firm's report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2017. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.
2. Evaluate the city's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

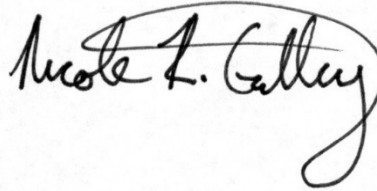

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and its audited financial statements and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Seymour.

An additional report, No. 2018-040, *Thirtieth Judicial Circuit, City of Seymour Municipal Division*, was issued in June 2018.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Audit Manager:	Travis Owens, MBA, CPA, CFE, CGAP
In-Charge Auditor:	Shannon Spicer, MBA
Audit Staff:	Misty Bowen, MSED

City of Seymour

Management Advisory Report

State Auditor's Findings

1. Utility System Controls and Procedures

1.1 Utility transfers

There are significant weaknesses in the city's utility operations. The city provides electric, water, and sewer services, and accounts for the financial activity of each service in a separate fund. The city collected approximately \$2.7 million in utility revenues during the fiscal year ended June 30, 2017.

The Board of Aldermen (Board) has no documentation of any discussions held or the basis for determining the amounts to be transferred from each of the city's three utility funds to the General Fund. The city has historically transferred substantial amounts of money from the Electric Fund, and more recently from the Water Fund and Sewer Fund, to help finance the operations and activities of the General Fund.

During the fiscal year ended June 30, 2017, the city transferred \$561,853 (classified in the city's financial system as transfers and fees in lieu of taxes) in utility monies to the General Fund. Transfers included the following dollar amounts and the corresponding percentage of each fund's total operating revenues: (1) \$450,653 from the Electric Fund (20 percent), (2) \$15,692 from the Water Fund (13 percent), and (3) \$95,508 from the Sewer Fund (29 percent). These utility monies transferred to the General Fund represent approximately 87 percent (Electric Fund), 57 percent (Water Fund), and 116 percent (Sewer Fund) of the operating income for each fund. Thus, the city is transferring the majority of operating income from utilities, and even transferring some amounts exceeding the amount of operating income, in order to subsidize the General Fund. This is an indicator that current utility rates may be higher than what is reasonable and necessary.

For the fiscal year ended June 30, 2018, the city budgeted transfers from the utility funds (formally referred to as "in lieu of tax") to the General Fund totaling \$265,390. The transfer amounts for 2018 are based on 10 percent of each utility fund's total operating revenues. In addition, the city budgeted additional transfers between funds including a transfer from the Water Fund to the General Fund of \$20,810, and 2 transfers from the Electric Fund of \$27,620 and \$61,505 to the Library Fund and Park Fund, respectively. The city could not provide a reason why these transfers were needed. In total, the city budgeted \$286,200 for utility transfers to the General Fund.

To compare Seymour to other cities, we haphazardly selected 12 cities (7 with municipally-owned utilities and 5 with privately-owned utilities) with populations of less than 6,000. In March and April 2018, we contacted each city to obtain the approximate percentage of utility revenues transferred to the city's General Fund for electric, water, and sewer for each city's most recently completed fiscal year. We also obtained the total dollar amount of utility monies transferred to each city's General Fund. Using data provided by the Missouri Municipal League, we also calculated the average transfer amount

City of Seymour
Management Advisory Report - State Auditor's Findings

on a per-capita basis. Our survey included 11 cities with electric transfers,¹ 9 cities with water transfers, and 7 cities with sewer/wastewater transfers. Table 1 shows the results of our survey.

Table 1: Utility transfers to the General Fund for similarly sized cities and City of Seymour, most recently completed fiscal year

	Electric	Water	Sewer/ Wastewater	Total Transferred	Average per capita (1)
Lowest	3%	3%	3%	\$ 34,308	\$ 11
Average	6%	7%	7%	338,158	113
Highest	10%	10%	9%	1,054,602	197
Seymour	20%	13%	29%	561,853	\$ 292

(1) This was calculated by taking the total dollar amount of utility monies transferred to the General Fund divided by the city's population at the most recent census.

As shown in the table, the City of Seymour's percentage of utility revenues transferred was significantly higher than the other cities surveyed, and the average transfer amount per capita was also significantly higher. Because these transfers represent a significant revenue source for the General Fund, it is important for the Board to periodically re-evaluate the impact, not only on the General Fund budget, but also on utility rates. The 12 cities surveyed reported various reasons for the transfers including recovery of administrative or overhead costs that benefited the city utilities, or the need for funding to provide other city services such as police and street services.

To ensure utility transfers are reasonable, it is important the city evaluate the value of government services the transfers are offsetting during the annual budget process and document the process for determining the percentage to be charged.

1.2 Utility rates

Periodic formal cost studies of utility rates have not been performed and rates have not been increased or decreased for any utility services for the past several years. Although utility rates have not been changed, some utility funds subsidize other city funds, and heavily subsidize the General Fund as discussed in section 1.1. Electric, water, and sewer rates have not been adjusted since 2014, 1979, and 2012, respectively.

Section 67.042, RSMo, provides that fees may be increased if supported by a statement of costs that shows the increase is necessary to cover costs of providing the service. To ensure utility rates are set to cover the cost of providing the related services, the city should periodically perform and document a detailed cost study of each of its utility costs, including

¹ Transfers in cities with privately-owned utilities consist of payments in lieu of taxes and/or franchise fees.

City of Seymour
Management Advisory Report - State Auditor's Findings

depreciation, and establish rates to cover the total cost of operations without generating excessive profits. Additionally, City Code Section 710.450 requires a review of the balance of the Sewer Fund at the end of each fiscal year to ensure adequate and equitable rate schedules for the following year.

1.3 Utility deposits

The city does not reconcile customer utility deposit balances reported in the utility system to the city's accounting records. The city collects deposits from new electric and water customers and places the monies in the city's primary bank account. According to city officials, customer utility deposits are held, along with other monies, in the city's primary bank account or are included in certificates of deposit. At our request, the city generated a detailed list of customer deposits from the utility system, which totaled \$137,640 as of June 30, 2017. However, customer deposits recorded in the accounting system (general ledger) totaled \$139,656 as of June 30, 2017, a difference of \$2,016. City officials were unable to explain the apparent shortage, but noted monies in the General Fund or certificates of deposit could also be used to return customer deposits if needed.

Periodic reconciliation of customer utility deposit balances to city accounting records is necessary to ensure sufficient funds are available for potential utility deposit refunds. Such reconciliations would allow for prompt detection of discrepancies.

1.4 Utility billing

The city's utility customers that qualify as tax-exempt entities under Section 501(c)(3) of the Internal Revenue Code (i.e., nonprofit entities) are not billed for sewer service. Additionally, the Board does not discuss or approve economic incentives, and as a result, the city is not open and/or transparent when awarding certain economic incentives in the form of reduced or waived electric charges.

The City Administrator granted economic incentives for businesses and other entities to locate in the city. For example, the city informally agreed to permanently charge a commercial business the industrial electric rate that is significantly less than the commercial rate in exchange for opening a new grocery store in the city, resulting in a cost savings of \$28,000 to the grocery store during fiscal year 2017. The city could provide no documentation this decision was approved or discussed by the Board. In addition, the city waived \$1,000 in electric charges for a religious organization as an incentive for it to locate in city limits and did not bill 10 nonprofit entities for sewer service. As a result of these actions, the city did not collect approximately \$9,000 in sewer revenues and \$29,000 in electric revenues for the fiscal year ended June 30, 2017.

City of Seymour Management Advisory Report - State Auditor's Findings

Per City Code Section 710.390, customers that qualify as tax-exempt Section 501(c)(3) entities are not billed for monthly sewer charges if they submit documentation of their exemption. However, this practice of waiving sewer charges violates Article VI, Section 23, Missouri Constitution, that specifically prohibits counties, cities, or other political subdivisions from granting public money or things of value to any corporation, association, or individual. Also, allowing customers to receive free or preferential utility services reduces city revenues and could create higher utility rates for other paying customers. Further, the city does not have an ordinance or policy for offering or approving financial incentives to new or existing businesses. Economic development financial incentives should be fair and transparent, and requiring these incentives to be approved by the Board and discussed in open meetings would help provide transparency and full disclosure to the public.

1.5 Non-monetary adjustments

Controls over non-monetary adjustments posted to customer utility accounts need improvement. Non-monetary adjustments are any transactions where monies are not received; however, the account balance has been changed in the accounting records, such as waiving customer late charges, adjusting usage for inaccurate meter readings, or reducing a balance due to water leaks. Non-monetary adjustments posted to the system are not reviewed and approved by an independent person and documentation of the reasons why these adjustments are necessary is not always retained.

Non-monetary adjustments should be verified and approved by a person independent of the person posting these transactions to ensure they are legitimate. Considering the risks associated with non-monetary adjustments, the Board should consider monitoring all such transactions.

1.6 Accounts receivable reconciliations

During the fiscal year ended June 30, 2017, the city did not perform monthly reconciliations of total amounts billed, payments received, and amounts unpaid for any of the city's utility services.

Monthly reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected and corrected timely.

1.7 Utility loss

City officials do not have any procedures to determine electric losses, and do not review and investigate significant water losses.

City officials do not reconcile the total kilowatts of electricity purchased to the total kilowatts billed to customers and kilowatts used for city operations to determine if there has been any significant electric loss. For water, the City Clerk prepares a monthly reconciliation of total gallons of water pumped to total gallons of water billed and other known usage including flushing of fire hydrants and usage by the sewer/wastewater plant; however, the monthly water reconciliation is not reviewed by a supervisor and significant

City of Seymour
Management Advisory Report - State Auditor's Findings

differences are not investigated. During our review of the reconciliations performed during 2017, we noted water losses of over 10 percent for 4 months, and one month was 18 percent.

Monthly reconciliations and reviews of electric and water loss are necessary to help detect significant utility loss and ensure all utility use is properly billed. Significant differences should be investigated.

Recommendations

The Board of Aldermen:

- 1.1 Determine the value of government services being offset by the utility transfers, maintain documentation to support the amounts transferred, and evaluate the effect on the General Fund.
- 1.2 Ensure formal reviews of utility rates are performed periodically to ensure revenues are sufficient to cover all costs of providing the service without generating excessive profits.
- 1.3 Periodically reconcile customer utility deposits per the utility system to accounting records and promptly investigate any differences.
- 1.4 Ensure all sewer charges are assessed and paid, and determine whether the city should seek reimbursement of sewer charges not paid. Also, the Board should review and approve any economic incentives offered by the city.
- 1.5 Ensure all non-monetary adjustments are properly approved and compared to actual changes posted to the computer system. Documentation of all non-monetary adjustments should be retained.
- 1.6 Ensure monthly reconciliations of amounts billed to amounts collected and delinquent accounts are performed.
- 1.7 Prepare a monthly reconciliation of electric purchased to amounts billed and used by the city. Also, the Board should review the city's monthly water and electric loss reports and investigate significant differences.

Auditee's Response

- 1.1 *The Board will determine the value of government services being offset by the utility department, determine the effect on the General Fund, and work towards eliminating those offsets.*
- 1.2 *The Board has already initiated a current professional rate study and is awaiting the results. We will continue to monitor utility rates periodically.*

City of Seymour
Management Advisory Report - State Auditor's Findings

- 1.3 All utility customer deposit accounts will be reconciled.
- 1.4 The Board will address the grocery store that is being charged industrial rates, and will begin charging sewer fees to everyone to follow state law. The Board will amend the existing city ordinance that allows free sewer to certain entities and will also begin approving all economic incentives.
- 1.5 We have already implemented this recommendation by requiring an approval signature and documentation for any adjustment. All documentation will be retained.
- 1.6 We will reconcile amounts billed to amounts collected and delinquent accounts.
- 1.7 We have already implemented this recommendation. A monthly calculation of electric loss is being performed, and the electric and water losses are being reported to each department for investigation.

2. Monitoring Financial Condition

The Board has not been monitoring the financial condition of the city, is not receiving detailed information showing cash balances for each fund, and has relied on transfers from utility funds to balance the city's budget.

As discussed in Management Advisory Report finding number 1.1, the utility funds have been used to subsidize the General Fund. During the fiscal year ended June 30, 2017, the city transferred utility monies totaling \$561,853 to the General Fund. These transfers represented approximately 50 percent of General Fund revenues and transfers in, which totaled \$1,117,390.

As shown in Appendix A, the General Fund and Library Fund had deficit fund balances at June 30, 2017. Despite a transfer of \$52,713 from the General Fund, the Library Fund was still operating at a deficit. Also, despite the large amount transferred from the three utility funds, the General Fund was still operating at a deficit.

As shown in Table 2, the adjusted cash balances of the General Fund and Library Fund are negative (deficits) as of June 30, 2017. This was a direct result of monies owed to other funds.

Table 2: Adjusted cash balance for the General Fund and Library Fund at June 30, 2017

Category	General Fund	Library Fund
Cash and cash equivalents	\$ 270,992	0
Due from other funds	36,201	0
Due to other funds	(393,546)	(36,201)
Adjusted cash balance	\$ (86,353)	(36,201)

Source: Appendix B

City of Seymour
Management Advisory Report - State Auditor's Findings

As shown in Appendix A, fiscal year 2017 revenues for the General Fund were \$555,537 and disbursements were \$858,107, for a deficit of \$302,570. Fiscal year 2017 revenues for the Library Fund were \$61,615 and disbursements were \$97,219, for a deficit of \$35,604. The General Fund and Library Fund cannot continue to operate by spending significantly more than they receive. As a result, other funds are subsidizing these funds.

The utility transfers to the General Fund were budgeted and approved by the Board. However, the budgets do not contain beginning and ending cash balances, and financial reports of cash and fund balances are not prepared and provided to the Board members. Without having adequate financial data, it is apparent the Board is not monitoring the financial condition of the various city funds throughout the year. There is no documentation to support discussion of these cash flow problems or the reasons for transferring the monies from the utility funds.

Numerous internal control weaknesses, lax controls over disbursements, poor budgeting practices, and lack of financial reporting to the Board have been identified and discussed in more detail throughout our Management Advisory Report. These weaknesses and lack of monitoring by the Board have put several of the city's funds in financial difficulty.

It is essential the Board address the financial condition of the various city funds in both the immediate and long-term future. Restricted utility funds should not be used to subsidize other funds. The Board should reduce spending where possible, evaluate controls and management practices to ensure efficient use of resources, monitor detailed financial data that includes cash balances for each fund, and closely monitor budgets.

Recommendation

The Board of Aldermen ensure monthly detailed financial data is provided to Board members, perform immediate and long-term planning, and closely monitor and take necessary steps to improve the financial condition of the various city funds. In addition, the Board should discontinue subsidizing city funds with utility monies.

Auditee's Response

The Board has been implementing new practices to improve the financial condition of each city fund. The Board will also receive a copy of detailed financial data monthly. The Board will work on identifying methods to eliminate the subsidizing of city funds with utility monies.

3. Budgets and Financial Reporting

Budgeting and financial reporting procedures need improvement.

3.1 Budgetary requirements

Annual budgets do not contain a budget message, the actual beginning and estimated ending cash balance for each fund, or a budget summary as required

City of Seymour Management Advisory Report - State Auditor's Findings

by state law. As a result of not having all information required to accurately prepare budgets, the Board unknowingly approved deficit budgets for the General Fund and Library Fund for the fiscal year ended June 30, 2017, in violation of state law. Deficit budgeting and/or fund balances were also noted as problems in the financial statement audit report.

A complete and well-planned budget, in addition to meeting statutory guidelines, can serve as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and utility rates and informing the public about city operations and current finances. Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and sets specific requirements for information to be included in the budget. The law also indicates that in no event shall the total proposed disbursements from any fund exceed the estimated revenues to be received plus any unencumbered balance or less any deficit estimated for the beginning of the budget year.

3.2 Budget monitoring

The Board does not adequately monitor budget-to-actual receipts and disbursements. Per reports provided by the city, the city's actual disbursements exceeded budgeted disbursements for the General, Library, Electric, and Water Funds prior to June 30, 2017; however, a budget amendment was not prepared or approved by the Board before the budget was overspent or before the fiscal year ended.

The Board does not receive a report of the city's budget-to-actual financial information at its meetings, and as a result, does not adequately monitor the city's annual budget. The Board first amended the budget on March 23, 2017. On July 13, 2017, the Board approved a second and final budget amendment for all seven of the city's funds that changed each variance of budget-to-actual disbursements to zero. This was done after the actual disbursements had already exceeded the budgeted amounts and after the fiscal year had ended.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted but allows for budget increases if the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursements of public monies should be made unless it is authorized in the budget. Proper monitoring and amending prior to disbursing funds is necessary for the budget to be an effective management tool and to comply with state law.

3.3 Mid-Missouri Municipal Power Energy Pool disclosures

The Board needs to evaluate its relationship with the Missouri Joint Municipal Electric Utility Commission (MJMEUC), including the Mid-Missouri Municipal Power Energy Pool (MMMPEP), a power pool managed by the MJMEUC, to determine proper disclosures about the relationship in the city's financial statements.

City of Seymour Management Advisory Report - State Auditor's Findings

The city contracts with the MJMEUC for the purchase of electrical power and energy. The city, along with other Missouri municipalities, is also a member of the MMMPEP. The city has a long-term commitment to these entities that expires May 31, 2028. The obligations of the MMMPEP members include maintaining adequate customer rates and maintenance of power facilities and contracts in order to meet members' commitments to the pool. If a member city decides to leave the pool, it must give a 5-year notice. At the end of the 5-year period, the city would be responsible for a pro-rata share of the ongoing capital and operation costs of each pool project based on its share of energy.

The city did not include any disclosure about MJMEUC and MMMPEP or details regarding potential financial obligations in the city's audited financial statements until after we brought this issue to the city's attention. Such disclosures are necessary to fully disclose the financial arrangements, as well as potential, significant future debt to citizens.

Recommendations

The Board of Aldermen:

- 3.1 Ensure annual budgets contain all information required by state law. In addition, the Board should not approve deficit budgets.
- 3.2 Periodically obtain and review reports of budgeted and actual disbursements to properly monitor the annual budget, ensure disbursements do not exceed budgeted appropriations, and prepare any necessary budget amendments timely.
- 3.3 Continue to consult with its independent auditor to ensure proper and necessary disclosures are included in the financial statements.

Auditee's Response

- 3.1 *The Board has already implemented a budget message and will begin including the beginning and estimated ending cash balances for each fund to help ensure it does not approve deficit budgets in the future. The Board will also implement a budget summary.*
- 3.2 *The Board will review reports of budgeted and actual disbursements to monitor the budget, and will amend the budget when necessary.*
- 3.3 *The Board has and will continue to consult with our independent auditor to determine the proper and necessary disclosures for financial statements.*

4. Nepotism

During the February 22, 2018, Board meeting, Alderwoman Nadine Crisp voted to approve the appointment of her daughter, Sheila Sturdefant, to a 2-year term on the newly created Seymour Electric Rate Utility Commission. The Seymour Electric Rate Utility Commission Rules and Regulations state

City of Seymour
Management Advisory Report - State Auditor's Findings

each member of the commission shall receive a salary of \$100 per meeting; however, as of April 16, 2018, no payments had been made to any of the five appointees.

Article VII, Section 6, Missouri Constitution, provides that any public official who names or appoints to public office or employment any relative within the fourth degree shall forfeit his office.

Recommendation

The Board of Aldermen consult with legal counsel regarding matters of legal interpretation and ensure compliance with the Missouri Constitution related to the hiring or appointment of relatives.

Auditee's Response

The Board will consult with legal counsel to ensure we are in compliance with the Missouri Constitution, and evaluate if any action is needed.

5. Disbursements

Improvement is needed over city disbursements.

5.1 Electric Fund disbursements

Some disbursements paid from the Electric Fund should have been paid from the General Fund. For example, in fiscal year 2017 disbursements totaling \$10,406 for the bi-annual citywide clean ups, \$2,048 for the city's recycling program, and \$315 for advertising a rabies clinic were charged to the Electric Fund when these costs should have been charged to the General Fund. These disbursements do not benefit or relate to the city's electric operations.

To ensure restricted monies are used for the intended purpose, disbursements should be paid from the appropriate funds. This is also necessary to accurately determine the results of operations of specific activities, thus enabling the city to establish the level of taxation and/or user charges necessary to meet all operating costs.

5.2 Written contracts

The city does not have written contracts with some service providers and certain outside parties. During the fiscal year ended June 30, 2017, the city paid for various services without a written contract including mowing (\$28,400), consulting (\$18,001), information technology (\$10,057), legal (\$38,214), and pest control (\$1,450).

Clear and detailed written contracts, including reporting requirements and provisions to allow for proper monitoring, are necessary to ensure all parties are aware of their duties and responsibilities, prevent misunderstandings, and ensure city monies are used appropriately and effectively. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

5.3 Bidding and documentation

The city does not always solicit competitive bids or proposals for goods and services as required by city code. With the exception of pest control services, which is under the bidding threshold, the remaining services listed in section

City of Seymour Management Advisory Report - State Auditor's Findings

5.2 were not bid in violation of city code. Also, the city has not solicited bids for other professional services including banking services. In addition, city personnel do not document the reasons when rejecting the lowest bid. For example, mowing services were not awarded to the lowest bidder, and no reasons for rejecting this bid were documented. Per City Code Section 135.010, sealed bids are required for purchases over \$2,000; however, City Code Chapter 135, "Purchasing and Inventory Policies," does not include sufficient detail on how bids are to be solicited or advertised, and does not include discussion of procedures or required documentation for selecting a bidder that is not the lowest bidder.

Formal bidding procedures for major purchases or services provide a framework for economic management of city resources and help ensure the city receives fair value by contracting with the lowest or best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in city business. Soliciting proposals for professional services is a good business practice, helps provide a range of possible choices, and allows the city to make better-informed decisions to ensure necessary services are obtained from the best qualified provider after taking expertise, experience, and cost into consideration. Formal bidding procedures should be sufficiently detailed and include requirements for documenting the process of awarding a bid.

5.4 Approval process

The city does not require documented supervisory approval for purchases. Although the city has adopted a purchase order form to document supervisory approval prior to payment, the purchase order procedure has not been added to the city code and is not being consistently followed. As a result, some payments were made without documented supervisory approval.

Payment of invoices without documented approval from a department head and/or the City Administrator and a properly completed purchase order increases the risk of paying for goods and services not received.

5.5 Mileage records and fuel

Mileage records are not reviewed for reasonableness and bulk fuel purchases are not reconciled to bulk fuel dispensed. The city purchases gasoline and diesel for vehicles using fuel cards, and uses a bulk fuel tank to fuel equipment with diesel fuel. The city has 24 vehicles and 20 pieces of heavy equipment. The city spent approximately \$18,500 on gasoline and diesel fuel during the fiscal year ended June 30, 2017.

The fuel card vendor provides detailed monthly statements, and each piece of equipment that uses bulk fuel (diesel) has a manual log for employees to record gallons pumped. However, the city does not compare mileage records provided by the fuel card vendor with the fuel purchases for reasonableness. Also, the city does not perform a reconciliation to compare bulk fuel

City of Seymour
Management Advisory Report - State Auditor's Findings

purchases against bulk fuel usage logs, and does not review bulk fuel usage for reasonableness.

Procedures for maintaining and reviewing fuel usage logs and reconciling fuel use to fuel purchases are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper amounts, and decrease the risk of loss, theft, or misuse of fuel occurring without detection.

5.6 Questionable use of city resources

The Board was aware of two planned projects that resulted in the city using public resources for private gain, but it took no action to stop these projects. Also, when Alderwoman Crisp made inquiries related to these two projects at Board meetings, the Board did not discuss or approve the projects. In addition, the city did not seek to recover any of the expenses incurred for working on or making improvements to private land.

- The October 26, 2017, board meeting minutes indicate Alderwoman Crisp inquired whether the city could assist with clearing a fence row separating private property and undeveloped city property. The work was subsequently performed by city personnel and city equipment, but there was no discussion or approval of this matter by the Board. At our request, the Assistant Supervisor determined the use of city labor, equipment, and diesel to clear the fence row were valued at over \$1,000. Since the city did not build the fence row, the city did not have any responsibility for the maintenance or repair of the fence row.
- The May 11, 2017, board meeting minutes indicate Alderwoman Crisp inquired whether the city could assist with mowing a ditch on private property. The work was subsequently performed by city personnel and city equipment on a weekly basis, but there was no discussion or approval of this matter by the Board.

Taxpayers have placed a fiduciary trust in the Board to spend public funds only on items necessary and beneficial to the city. These projects were not a reasonable or necessary use of city resources. In addition, Article VI, Section 23, Missouri Constitution, specifically prohibits counties, cities, or other political subdivisions of the state from granting public money or things of value to any corporation, association, or individual. Further, the city could have been liable in the event of injury on or damage to private property.

Recommendations

The Board of Aldermen:

- 5.1 Ensure costs are charged to the appropriate funds.
- 5.2 Enter into written contracts defining services provided and benefits received.

City of Seymour
Management Advisory Report - State Auditor's Findings

- 5.3 Solicit bids and proposals for all applicable purchases and clarify city code to include the requirements for soliciting and/or advertising bids. In addition, document the reasons when the lowest bid is not accepted.
- 5.4 Establish formal policies and procedures to ensure the proper use, accountability, and review and approval of purchase orders and invoices prior to payment.
- 5.5 Reconcile fuel billings to fuel use records, promptly investigate any discrepancies, and periodically review fuel usage for reasonableness.
- 5.6 Prohibit the use of public resources for private gain and consult with legal counsel to determine whether the value of services provided to private citizens should be recovered.

Auditee's Response

- 5.1 *The Board has implemented this recommendation and will continue to charge costs appropriately.*
- 5.2 *The Board will implement this recommendation, taking into account the requirements of state law.*
- 5.3 *The Board will solicit sealed bids when necessary and document any reason for not accepting the lowest bid. The Board will clarify city code to include requirements for soliciting and/or advertising bids.*
- 5.4 *This recommendation has already been implemented by requiring a Financial Reconciliation Report be prepared and approved for each purchase.*
- 5.5 *This recommendation has already been implemented by reconciling all fuel billings to fuel use records. Fuel usage will be monitored for reasonableness.*
- 5.6 *The Board will not use public resources for private gain. Regarding past actions taken by a specific elected official, the Board will discuss these actions to ensure those types of actions do not happen again.*

6. Closed Meetings

Some topics discussed and voted on in closed meetings by the Board were not related to the reasons cited for closing the meeting listed in the open meeting minutes. For example, the September 22, 2016, open meeting minutes cited real estate and personnel as the reasons for the closed meeting; however, closed meeting minutes included discussion of potential litigation. In addition, the Board discussed some items in closed meetings that were not allowable under the Sunshine Law. For example, the Board discussed in a closed meeting on January 25, 2018, whether a currently closed city street

City of Seymour
Management Advisory Report - State Auditor's Findings

should be re-opened. In the same closed meeting, the Board discussed the need to create salary schedules for city employees.

Section 610.021, RSMo, lists the topics that may be discussed in closed meetings and requires discussion in closed meetings be restricted to the allowable topics listed. Also, Section 610.022, RSMo, requires the Board's motion to enter closed session include specific statutory citations for the allowable topics that will be discussed and requires the Board to limit discussion to those topics.

Recommendation

The Board of Aldermen ensure only allowable topics cited in the open minutes as the reason for closing the meeting are discussed in closed meetings.

Auditee's Response

The Board will ensure closed session discussion is limited to topics that have been cited in the open minutes or on the agenda for the closed session. During closed session the Board will only discuss allowable topics.

7. Payroll Controls and Procedures

Payroll controls and procedures need significant improvement. The city disbursed approximately \$727,000 in salaries and wages during the fiscal year ended June 30, 2017.

7.1 Bonuses

The Board approved year-end payments to all full-time city employees in violation of the Missouri Constitution. The December 2016 board meeting minutes indicate each employee received \$100 cash, totaling \$1,800 for all employees. The cash payments represent bonus compensation for services previously rendered. In addition, the city did not report these cash payments as taxable wages on employee W-2 forms as required by federal and state employment laws.

Payments for services previously rendered are in violation of Article III, Section 39(3), Missouri Constitution and contrary to Attorney General's Opinion 72-1955 (June 14, 1955), which states, "... a government agency which derives its power and authority from the Constitution and laws of this state would be prohibited from granting extra compensation in the form of bonuses to public officers or servants after the service has been rendered."

7.2 Time records

The city does not require time records be prepared or maintained for salaried employees, the city's procedures for calculating overtime are not compliant with city policies and federal regulations, and employees are paid based on estimated instead of actual hours. Errors were noted with processing of time and leave records, and documentation to support payroll transactions was not always adequate.

Hourly employees typically record daily time using the electronic time clock to record their arrival and departure times, or by manually recording their

City of Seymour
Management Advisory Report - State Auditor's Findings

	<p>arrival and departure times on time cards or records. Hourly employees also complete separate overtime request forms and leave request forms when applicable.</p>
Records not required or approved	<p>Salaried employees are not required to submit documentation of hours worked and/or tasks performed. Also, of the 6 hourly employee time records we reviewed, 4 were not signed or approved by a supervisor.</p>
Overtime and compensatory leave	<p>Hourly employees do not always record overtime worked on time records and/or submit separate overtime requests for overtime worked, and overtime and compensatory time accruals are not always recorded on an employee's weekly time record. As a result, there is a risk that employee overtime could be calculated and recorded incorrectly in the city's payroll system. In addition, the city's method of calculating overtime is not consistent with the Fair Labor Standards Act (FLSA) or city personnel policies, resulting in increased and unnecessary costs to the city.</p> <p>Per the City Clerk, employees either work 8- or 10-hour days and overtime is calculated for any hours physically worked in excess of 8 or 10 hours per day, respectively. We reviewed pay records for one payroll cycle and noted a streets employee earned 43.25 hours of compensatory time but should have earned 11.75 hours for the pay period. The difference of 31.50 hours cost the city approximately \$500. Also, the city calculates employee overtime at twice the regular rate for holidays, but the personnel policy does not clearly indicate how to determine the amount of overtime or compensatory time accrued on holidays. The City Clerk indicated the personnel policies were implemented during previous administrations and have not changed in recent years.</p> <p>City personnel policy 3-8 indicates non-exempt employees excluding police and fire will be paid overtime at 1.5 times the regular hourly wage for hours exceeding 40 hours a week. City personnel policy 4-3 indicates that work performed on a holiday will be compensated at the city's approved overtime rate or a day off at the regular pay rate in lieu of the holiday missed. This policy is vague, could lead to varying interpretations, and may result in an increased cost to the city.</p>
Payments made based on estimates	<p>The city distributes payroll for all employees every other Friday. Time records are prepared and submitted approximately 2 days in advance of the payroll distributions, and as a result, are not accurate because they reflect the employee's scheduled hours instead of actual hours worked. The city has not established an official policy or provided employees with guidance on how to report unanticipated changes such as unplanned vacation leave or sick leave taken on the days that were paid based on estimates. However, the City Clerk indicated she will update the employee leave records accordingly if a leave request is submitted to her.</p>

City of Seymour Management Advisory Report - State Auditor's Findings

Signed and approved time records are necessary to document hours worked, substantiate payroll disbursements, monitor hours worked and leave taken, and demonstrate compliance with the FLSA. Also, compliance with city policy and the FLSA is necessary to limit the city's financial liability for overtime and compensatory time. Further, due to timing of the city's payroll cycle and due dates for timesheets, employees are partially paid based on their estimated hours, which may lead to errors and the potential for employees to be over/under paid.

7.3 Leave accruals

The city's computerized system only allows employees to accrue 200 hours of vacation leave instead of the maximum of 320 hours allowed by the personnel policy due to a programming error. In addition, employees accrue 10 hours of sick leave monthly instead of 3.69 hours per bi-weekly pay period established by the personnel policy.

City personnel policy 4-4 indicates employees should be allowed to accrue a maximum of 320 hours of vacation leave, and city personnel policy 4-5 indicates sick leave should be accrued at a rate of 3.69 hours per bi-weekly pay period. The personnel policies do not specify what happens when employees reach the maximum leave accrual. Strict compliance with personnel policies is necessary to ensure employees are properly compensated. In addition, timely policy revisions are necessary to provide guidance to city employees, provide a basis for proper compensation, and avoid misunderstandings.

7.4 Independent contractor

At the Emergency Services Coordinator's request, the city changed the Coordinator from an independent contractor to an employee starting in January 2016. The city did not document the reasons for the change or document how it determined what the proper classification was for this position.

During the fiscal year ended June 30, 2017, the city paid the Coordinator \$7,200 (\$600 per month) and also contributed \$551 for the employer's share of payroll taxes. Prior to January 2016, the employee was classified and paid as an independent contractor, and the city did not withhold or remit payroll taxes. Although his classification changed, there were no significant modifications to his responsibilities or the contractual requirements. The contract with the Coordinator indicates "the Emergency Services Coordinator is not an employee of the City." In addition, the Coordinator does not submit a log or other records to document hours worked. Section III of the contract indicates the Coordinator is required to submit a log and provide time entries for a minimum of 36 hours per month.

Proper classification of employees is necessary to ensure compliance with various state and federal laws and regulations.

City of Seymour
Management Advisory Report - State Auditor's Findings

7.5 Compensation ordinance The city does not have ordinances establishing the compensation of city officials and employees as required by city code. City personnel policy 3-1 indicates the employee pay rate is established by the pay plan. However, the city was unable to provide a pay plan.

Ordinances documenting approved salary amounts help ensure equitable treatment and help prevent misunderstandings. Section 79.270, RSMo, authorizes the Board to fix the compensation of all city officials and employees by ordinance, and City Code Section 115.060 requires the Board to fix compensation of all officers (appointed or elected officials) and employees by ordinance.

7.6 Pay raises and performance appraisals The city is not complying with city code or personnel policy when giving pay raises to appointed officers. For example, in March 2018 the Board approved a pay increase for the City Administrator (who was appointed in 2014) with options for additional raises based on his performance, in violation of city code. Additionally, the city does not conduct documented performance reviews or appraisals of employees as required by the city personnel policy, though various pay increases are given including, but not limited to, successful completion of job specific certifications, successful completion of a probationary period, and promotions.

City Code Section 115.060 indicates the salary of an officer shall not be changed during the time for which he/she was elected or appointed. The term of the City Administrator is indefinite until such time as he is removed by the Board or voluntarily resigns. City personnel policy 3-16 indicates no performance increase shall be applied to the salary of any employee unless accompanied by a complete performance review that contains both the employee and supervisory signatures.

Recommendations

The Board of Aldermen:

- 7.1 Discontinue paying employee bonuses and ensure all employee compensation is properly reported on each employee's W-2 form.
- 7.2 Ensure daily time records are prepared, properly signed, approved, and retained for all employees, and the information should be reviewed for accuracy prior to entry into the accounting system. In addition, ensure overtime and compensatory time accruals comply with established city policies and the FLSA, ensure controls are in place to make sure employees are not over/under paid based on the payment of estimated hours, and ensure personnel policies contain adequate detail.
- 7.3 Ensure vacation and sick leave accruals are in compliance with personnel policies.

City of Seymour
Management Advisory Report - State Auditor's Findings

- 7.4 Determine the proper classification for the Emergency Services Coordinator. In addition, proper supporting documentation indicating hours worked should be obtained.
- 7.5 Establish the compensation of all city officials and employees by ordinance, and ensure city code and city personnel policies reflect current procedures.
- 7.6 Ensure compensation for appointed officials does not increase during the time for which he/she was elected or appointed in compliance with city code. In addition, ensure documented performance reviews are performed in conjunction with pay raises and promotions.

Auditee's Response

- 7.1 *The Board has not paid any other bonuses and will not in the future. The Board was unaware that this previous action violated the Missouri Constitution.*
- 7.2 *This recommendation has already been implemented by requiring time records to be signed and approved by a supervisor and retained. All overtime and compensatory time accruals now comply with city policy and the FLSA. Employee pay dates were adjusted to ensure employees are not being paid for estimated time, and the personnel policy is being updated to reflect accurate information.*
- 7.3. *This recommendation has already been implemented. Employees accrue vacation and sick leave in compliance with the city's personnel policy.*
- 7.4 *The Board will review the position of Emergency Services Coordinator and better define its role and monetary compensation. The Board will determine the proper classification for the position and require documentation of the hours worked.*
- 7.5 *The Board has already created an employee pay plan, and will create an ordinance to reflect this change.*
- 7.6 *The Board has already implemented this recommendation by creating a performance review record for each employee, and will not increase compensation for officials during the time for which they are appointed or elected.*

8. Accounting Controls and Procedures

Accounting controls and procedures need improvement. The city receives monies for charges for services (utilities), sales taxes, property taxes, franchise fees, merchant licenses, and other miscellaneous receipts. During the year ended June 30, 2017, the city collected approximately \$3.5 million.

City of Seymour
Management Advisory Report - State Auditor's Findings

8.1 Segregation of duties

The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work completed by city office personnel are performed. The City Clerk, Utility Clerk, and Court Clerk can all receipt and deposit monies and post transactions to the accounting system, including adjustments to customer account balances. The City Clerk is primarily responsible for making purchases, preparing checks, and reconciling the bank accounts. No reviews of the detailed accounting and bank records are performed by other city personnel or Board members.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records should be performed.

8.2 Restricted monies

The city is not properly tracking and recording some restricted monies. During the fiscal year ended June 30, 2017, approximately \$77,000 in state motor vehicle related monies and \$52,700 in Capital Improvements Sales Tax (CIST) monies were deposited into the General Fund. Although these monies are restricted for specific purposes, they were deposited into the General Fund and the related disbursements and balances were not tracked separately. As a result, the city cannot determine at a point in time what portion of the General Fund represents restricted monies or demonstrate disbursement of these funds was allowable or appropriate.

Article IV, Sections 30(a) and 30(b), Missouri Constitution require motor vehicle-related receipts apportioned by the state of Missouri be disbursed for street-related purposes only. As required by City Code Section 130.120, the capital improvements sales tax is to be used for the funding of capital improvements including fire apparatus, training equipment, police vehicles, and emergency services stations, including the operation and maintenance of capital improvements. In addition, Section 94.577.3, RSMo, requires that CIST monies be deposited in a special trust fund. Separate accounting of restricted monies is necessary to ensure compliance with the Missouri Constitution and state laws.

8.3 Outstanding checks

The city has not established procedures to routinely follow up on outstanding checks. As of June 30, 2017, 29 outstanding checks totaling \$2,001 had been outstanding for over a year, with 3 checks dating back to 2006.

Proper follow up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law. Old outstanding checks should be voided and reissued to payees that can be readily located, and amounts remaining unclaimed should be disposed of in accordance with state law.

City of Seymour
Management Advisory Report - State Auditor's Findings

8.4 Bonding

The Board members, who sign checks and have access to monies held in bank accounts, are not covered by a bond. Also, the Utility Clerk's bond does not provide adequate coverage since it is significantly less than other personnel. The Utility Clerk's bond is \$15,000, while the bonds for the Court Clerk, City Clerk, and City Administrator are \$150,000 each.

Failure to properly bond individuals who have access to funds exposes the city to risk of loss.

Recommendations

The Board of Aldermen:

- 8.1 Segregate the accounting duties of the city office personnel. If proper segregation cannot be achieved, ensure a documented independent or supervisory review of detailed accounting and bank records is performed.
- 8.2 Determine the amount of restricted monies in the General Fund and establish separate funds or a separate accounting of the restricted monies.
- 8.3 Establish procedures to routinely follow up on and reissue old outstanding checks and dispose of unclaimed monies in accordance with state law.
- 8.4 Obtain bond coverage for all personnel with access to city monies, and ensure the bond amount for the Utility Clerk is comparable to other personnel.

Auditee's Response

- 8.1 *This recommendation has already been implemented by segregating accounting duties among office personnel.*
- 8.2 *This recommendation has already been implemented by establishing separate accounting for the restricted monies.*
- 8.3 *We have begun the process of reporting and distributing all unclaimed monies to the State Treasurer.*
- 8.4 *All office personnel with access to city monies are currently bonded in accordance with city ordinance, and all Board members with authority to sign checks will be covered by a bond. The Board believes the Utility Clerk's bond is adequate.*

City of Seymour
Management Advisory Report - State Auditor's Findings

9. Planning and Zoning

The City of Seymour does not have a city plan or comprehensive plan to guide planning and zoning activities.

According to a report from the Missouri Municipal League (MML), a "city plan is a detailed development plan, commonly referred to as a comprehensive development plan or master plan, showing the future growth of the municipality." A "comprehensive plan . . . means that zoning decisions should be governed by what is good for the community as a whole rather than by what is best for an individual land owner." The MML report also noted "most professional city planners believe that a separate document or plan is needed in order for zoning to work, both from a legal and practical standpoint."

City Code Section 405.010 states that the zoning regulations will be based on the comprehensive plan; however, officials were unable to provide us a plan other than the current zoning map. All cities, towns, and villages in Missouri may adopt planning and zoning. Section 89.340, RSMo, requires the city's planning and zoning commission to make and adopt a city plan for the physical development of the municipality. Section 89.040, RSMo, states the zoning regulations shall be made in accordance with a comprehensive plan. The MML report noted that a zoning ordinance based on a comprehensive plan is administered in a consistent manner and furthers a legitimate public purpose.

Recommendation

The Board of Aldermen and/or the Planning and Zoning Board create and adopt a city plan and comprehensive plan to help guide future decisions regarding development of the municipality.

Auditee's Response

The Board will take this under consideration.

City of Seymour

Organization and Statistical Information

The City of Seymour is located in Webster County. The city was incorporated in 1895 and is currently a fourth-class city. The city employed 18 full-time employees and 4 part-time employees on June 30, 2017.

City operations include fire protection services, law enforcement services, utilities (electric, water, and sewer), street maintenance, city parks, a municipal library, and a municipal cemetery.

Mayor and Board of Aldermen

The city government consists of a mayor and 4-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a two-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2017, are identified below. The Mayor is paid \$600 per month and Board of Aldermen members \$150 per month. The compensation of these officials is not established by ordinance.

Larry Chafin, Mayor
Grady Bennett, Alderman
Mary Carpenter, Alderwoman
Nadine Crisp, Alderwoman
Jim Ashley, Alderman

Other Principal Officials

The City Clerk, City Administrator, Chief of Police, Fire Chief, and City Attorney are appointed positions. The city's principal officials at June 30, 2017, are identified below:

Leslie Houk, City Clerk
Sam Burt, City Administrator
Ron Wright, Chief of Police
Shawn Crump, Fire Chief
Paul Link, City Attorney

Financial Activity

A summary of the city's financial activity for the year ended June 30, 2017, obtained from the city's audited financial statements follows:

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Harrisonville, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2017-035, *City of Harrisonville*, (rated as Poor), issued in May 2017, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the city about the follow-up review on those findings.
2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by city officials and held discussions with city officials to verify the status of implementation for the recommendations. Documentation provided by the city included minutes of meetings, financial records, and other pertinent documents. This report is a summary of the results of this follow-up work, which was substantially completed during July and August 2018.

Nicole R. Galloway, CPA
State Auditor

City of Harrisonville

Follow-Up Report on Audit Findings

Status of Findings

1.2 Highway 71/291 Partners in Progress Transportation Development District - City loan	The majority of the \$1.5 million (maximum) pledged loan to the Highway 71/291 Partners in Progress Transportation Development District (TDD) was planned to come from restricted utility funds as stated in the amended agreement, in violation of the bond covenants for the Electric and Combined Water and Sewer System (CWSS) Funds. The city pledged \$209,000 from the General Fund, \$833,000 from the CWSS Fund, and \$457,700 from the Electric Fund in the amended agreement, with \$200,000 from the Electric Fund already contributed as of August 2016. The city did not obtain a written legal opinion regarding these loans. Monies in the Electric and CWSS Funds were restricted for their intended purpose and could not be used for the general operation of the city.
---	--

Recommendation	The Board of Aldermen repay the CWSS Fund and Electric Fund any monies loaned related to this TDD project and ensure restricted utility funds are only used for their intended purpose.
----------------	---

Status	Implemented The city repaid \$200,000, plus interest, to the Electric Fund on October 31, 2017, from TDD funds and has not loaned additional restricted revenues to the TDD. As of September 30, 2018, the city has loaned \$896,913 from the General Fund to the TDD.
--------	--

2. Tax Increment Financing	Problems existed with the city's handling of Tax Increment Financing (TIF) project funding and reporting for the Towne Center and Market Place redevelopment areas.
-------------------------------	---

2.1 Debt service requirements	Revenues generated in the Towne Center Redevelopment Area were not sufficient to pay the bond principal and interest payments and the city was required to cover the shortage with general revenues. The remaining principal and interest outstanding on the bonds at December 31, 2015, was \$6.92 million and \$2.64 million, respectively.
----------------------------------	---

The city issued \$6.86 million in tax increment revenue notes in December 2005 to pay a portion of the infrastructure improvements and site development costs. The city issued \$8.63 million in revenue bonds in June 2007 to refinance the 2005 revenue notes and pay the capitalized interest on those notes. The city established the project with the intent to repay the bonds using a portion of the increased revenue from economic activity generated as provided in the Tax Increment Allocation Redevelopment Act. In accordance with this Act, payments in lieu of taxes (PILOTS) and a portion of the incremental increases to the economic activity taxes (EATS) were placed in a special allocation fund to pay for the bonds. Additionally, the city pledged its own general revenues to secure the debt.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

In addition, the Towne Center TDD was formed and the TDD established a one percent sales tax in December 2005. TDD collections of this sales tax were deposited into the same special allocation fund as the project PILOTS and EATS and were committed to repay the bonds.

Since the project fund was established in 2007, principal and interest payments on the debt have exceeded TDD sales taxes, EATS, and PILOTS by approximately \$1 million. The city provided \$1,141,583 in subsidies from the General Fund to this project from 2010 to 2016.

Recommendation

The Board of Aldermen refrain from pledging taxpayer funds to assist developers in obtaining financing for projects. Future undertakings of a similar nature should incorporate assurances or other safeguards to avoid exposing the city's financial resources to risk. In addition, review the current status of the Towne Center redevelopment project and determine the appropriate course of action to minimize the amount of city General Fund subsidies required to cover the debt service requirements of this project.

Status

In Progress

The Board of Aldermen continues to provide the required subsidies to the Towne Center redevelopment project, but has not approved any additional incentives or provided assistance to any developers on new projects since at least May 2017. The Board held a public hearing on the status of the Towne Center redevelopment project in November 2017 and the City Administrator indicated recent discussions have been held with a developer regarding additions to the Towne Center redevelopment project. The Board decided to refund the bonds issued in 2007 for this project and passed ordinance 3436 in April 2018 authorizing the issuance of annual appropriation-supported tax increment revenue bonds to refund the 2007 revenue bonds. City officials estimate refunding the bonds will eventually save the city at least \$50,000 per year. In 2017 and 2018, the General Fund provided a subsidy of approximately \$150,000 each year, but city officials project the subsidy will decrease to an estimated \$100,000 in 2019.

2.2 Management and oversight

There were significant weaknesses regarding the city's management and oversight of its TIF districts. In addition to the Towne Center Redevelopment Area discussed in section 2.1, the city also established the Market Place Redevelopment Area and approved the Market Place TIF Plan in March 2007 and amended the plan in February 2009. We identified weaknesses in management and oversight, as well as compliance issues, with both TIF projects.

- The city had not ensured there was an active TIF Commission to control and timely finish the TIF projects. According to city officials, the TIF

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Commission had not been active for many years, and the Commission had 3 vacancies for city appointed members.

- The developers had not filed annual progress reports or detailed reports on the progress of the projects on each 5-year anniversary with the Board, as required in the redevelopment agreements.
- City officials had not filed annual reports for the year ended December 31, 2010, or December 31, 2014, with the Missouri Department of Revenue (DOR).
- The city had not held public hearings every 5 years for each TIF as required.

Recommendation

The Board of Aldermen ensure there is an active TIF Commission to oversee and manage TIF projects to help ensure the projects are completed timely. Adequate records should be maintained to support project costs. In addition, the Board should ensure annual reports are filed with the state and public hearings are held on TIF projects as required by state law.

Status

Implemented

On September 9, 2017, the Board of Aldermen appointed 6 new members to fill the vacant positions on the TIF Commission, which then held its first meeting in October 2017. The minutes of that meeting indicate discussions were held regarding the status of TIF projects. A public hearing was held by the Board in November 2017 to discuss the status of each TIF project in the city, as required by state law. Annual progress reports were filed in October and November 2017 by the developers of the Towne Center and Market Place TIF districts. In addition, the 2017 TIF annual reports were filed with the DOR for both the Towne Center and Market Place TIFs by November 15, 2017, as required by state law.

2.3 Financial reporting

The city provided accounting services for the Towne Center TDD, Towne Center TIF, Market Place TDD A and B, and the Market Place TIF. The city maintained a fund for each TIF project that accounted for the receipts and disbursements of the TIF, along with the financial activity of the associated TDD. The TDD's cash balance and TDD portion of the TIF debt was not maintained. As a result, the city could not ensure each entity was properly paying its portion of the debt service payments and this weakness could have allowed TDD monies to be improperly used to pay a portion of the TIF debts.

Recommendation

The Board of Aldermen work with the TDD Boards to establish procedures to track the remaining TDD debt obligations and establish a fund to separately account for TDD receipts, disbursements, and cash balances.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Status

In Progress

The Finance Director has updated an excel spreadsheet used to track the balance of the TDD Boards' debts. A separate account maintained by the bond trustee has been established for TDD Boards but the city still accounts for TDD and TIF monies in the same fund. The Finance Director is developing ledger accounts in the city accounting system to allow the city to track the receipts, disbursements, and cash balances for each of the TDD Boards' monies separately from the TIF monies.

3.1 Utility Services -
Electric transfers

The city had no documentation of discussions held and had no basis for determining the annual franchise tax transfer from the Electric Fund to the General Fund. During 2015, \$916,688 was transferred to the General Fund, based on 8 percent of electric sales and fees revenues.

Recommendation

The Board of Aldermen determine the value of government services being offset by the electric transfers, evaluate the effects of the transfers and their impact on the General Fund, and retain documentation of how the transfer rate is determined.

Status

In Progress

The city continues to make unsupported transfers from the Electric Fund to the General Fund, with \$925,375 transferred during 2017 and \$1,010,250 budgeted to be transferred during 2018. City personnel solicited requests for proposals from 5 firms in the greater Kansas City area to perform a study of cost allocations, including the electric transfers, but none of the firms submitted a proposal. One firm did provide the name of a company from another state that provides this type of service. The city contacted the company, which indicated verbally this type of study would cost approximately \$20,000. Sufficient appropriations were not included in the 2018 budget to cover this cost, but city personnel indicated the Board plans to appropriate funds in the 2019 budget for this study.

3.3 Utility Services -
Missouri Public Energy
Pool disclosures

The Board of Aldermen needed to evaluate its relationship with the Missouri Joint Municipal Electric Utility Commission (MJMEUC), including the Missouri Public Energy Pool (MoPEP), to determine proper disclosures about the relationship in the city's financial statements.

According to the MJMEUC documents, Harrisonville's pro-rata share was 4.8 percent and the city's obligation for the project bonds issued was approximately \$23.7 million as of December 31, 2015. The city may also have been obligated for any purchase power contracts. However, the city did not include any disclosure about the MJMEUC and the MoPEP in the city's financial statements.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Recommendation	The Board of Aldermen consult with its independent auditor to evaluate the relationship with the MJMEUC/MoPEP and determine the proper and necessary disclosures for the financial statements.
Status	Implemented The city's 2016 and 2017 audited financial statements included appropriate disclosures regarding the city's relationship with the MJMEUC/MoPEP.
3.4 Utility Services - Utility adjustments	Controls over adjustments posted to customer utility accounts needed improvement. Billing clerks were not required to obtain independent approval for adjustments posted to the utility system prior to making the change.
Recommendation	The Board of Aldermen ensure all adjustments are properly approved and compared to actual changes posted to the computer system.
Status	Implemented Utility adjustments are required to be approved by the Finance Director. Adjustment reports are now printed by the billing clerks and provided to the Finance Director, who then compares approved adjustments to actual changes posted to the computer system.
4. Procurement Procedures and Contracts	Controls and procedures over city disbursements and construction projects needed improvement.
4.1 Professional services and contracts	The city had not established policies and procedures for the selection of vendors providing professional services. The city did not solicit requests for proposals for various professional services, had not periodically conducted a competitive selection process for various professional services, and did not always enter into contracts with the providers selected.
Recommendation	The Board of Aldermen periodically solicit proposals for professional services and enter into written agreements for those services. In addition, the Board should establish a policy to address the selection of professional services to ensure the city is in compliance with state law.
Status	Partially Implemented The Board of Aldermen solicited proposals for audit services in November 2017 and a written agreement was entered into with the selected firm. The city has not solicited proposals for legal services and continues to contract with the same attorney selected in August 2016. The Board has amended the city's purchasing policy to address the selection of professional services.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

4.2 Bidding

City personnel did not always follow the city's purchasing policy when obtaining goods and services. Our review of 37 disbursements requiring bids during the year ended December 31, 2015, determined 20 items were either not bid or were not advertised as required by city code. In addition, the policy did not address bid requirements when multiple purchases from the same vendor exceeded the bid threshold during a set period of time.

City personnel indicated several purchases were not bid because they were considered sole source purchases, but the reasons were not documented. The city's purchasing policy did not address procedures for sole source procurements.

According to city personnel, they did not bid several other items because they considered these transactions emergency purchases. The purchasing policy requires a full written explanation for an emergency purchase and the approval of the City Administrator or Finance Director; and if neither is available, the department head may authorize the purchase. None of these purchases were supported by such documentation.

Recommendation

The Board of Aldermen solicit bids in compliance with the City Code of Ordinances and amend the policy to add time frames for bid thresholds and procedures addressing sole source procurement.

Status

Implemented

The Board of Aldermen has amended the city's purchasing policy by adding a section that states contracts or purchases will not be subdivided to avoid the requirements of the policy. In addition, a section was added to the policy addressing situations where annual bids for multiple purchases of the same product from the same vendor could be awarded when it is advantageous to the city. A section was also added to address procedures to be followed when a sole source procurement is necessary. We selected 6 purchases/services obtained during the period April through June 2018 and all 6 were properly bid and/or advertised in accordance with city policy.

4.3 Change orders

Significant improvement was needed in the city's handling of change orders related to construction projects.

- The city did not have a formal written change order policy.
- The city did not competitively bid significant changes to construction projects, when appropriate.

Recommendation

The Board of Aldermen implement a change order policy that includes requirements for monitoring change orders and provides guidance on when bidding for substantial project changes is required.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Status

Implemented

The Board of Aldermen amended the city's purchasing policy to stipulate that no change order exceeding 1 percent of the total approved bid amount would be allowed without following the normal purchasing policy procedures. If quotes or sealed bids are not obtained when required, that decision must be approved by the applicable department director, the City Administrator, and the Mayor. We reviewed 2 contracts that had a total of 3 change orders. The 2 change orders that exceeded the threshold requiring the change to be bid were not bid, but both were properly approved. Change orders of less than 1 percent of the total contract amount do not require supervisory approval.

4.4 Approval process

The city had not adopted a purchase order policy and city procedure did not require purchase orders for all goods and services. In addition, payment was made on some invoices, which did not require a purchase order, without documented approval.

Recommendation

The Board of Aldermen establish formal policies and procedures to ensure the proper use, accountability, and review and approval of purchase orders and invoices prior to payment.

Status

Implemented

A policy requiring purchase orders for all purchases was adopted. It specifies the type of information to be included on the purchase order, such as a description, specifications, unit purchase price, and freight conditions and place of delivery. The policy also requires approvers to ensure invoices are in conformity with the related purchase orders. We selected 6 disbursements made during the period April to June 2018 for testing. Purchase orders were maintained for all items tested, each invoice was approved, and each invoice was in conformity with the purchase order.

6.1 Allocations and
Restricted Funds - Cost
allocations and charges
to restricted funds

The Finance Director used several different calculations to allocate costs to various city funds, and some calculations used were questionable. Approximately \$2 million in costs paid by the General Fund in 2014 were allocated in 2015 to other city funds using various methods.

Administrative costs

The administrative costs allocated included personnel costs, fringe benefits, and travel and training costs for various finance and administrative employees, along with legal costs, insurance, other contractual services, and utility costs for city hall. Administrative costs allocated to various funds totaled approximately \$1.52 million during the year ended December 31, 2015.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

The Finance Director allocated most administrative costs based upon the average of a fund's percentage of full-time equivalents (employees), operating expenditures, fund balance (governmental funds) or net assets (proprietary funds), and insured asset values. None of the administrative costs were allocated based on specific documentation, such as time sheets, maintained by city personnel to indicate the amount of time or actual costs incurred in direct relation to a specific department/fund. Each of the utility funds was paying a large percentage of the general administrative costs of the city, although we could not determine if the amounts allocated to any department/fund were reasonable compared to the benefits derived by each fund from the shared activities/costs. In addition, some administrative costs were allocated based on estimated percentages.

Overhead costs added

An overhead rate of 20 percent was applied to the administrative costs allocated to each fund and added to the amount to transfer to the General Fund. The overhead charged to the other funds and added to the administrative allocation amounts totaled approximately \$269,000 for the 2015 allocations. These were not costs paid by the General Fund and the former Interim City Administrator could not provide an explanation for why this calculation was performed or what the overhead rate represented.

PILOT payments

In addition to the administrative costs and overhead allocated to the Electric and CWSS Funds, the city also charged a PILOT to each of these funds, which totaled approximately \$72,000 (\$25,644 to the Electric Fund and \$47,146 to the CWSS Fund) in the 2015 allocations. City officials did not provide any statutory authority for charging this PILOT to the Electric and CWSS Funds.

Recommendation

The Board of Aldermen allocate administrative costs to city funds based on specific criteria and retain documentation to support the allocation.

Status

In Progress

The city has made no changes to its allocation methods. However, as discussed in the status comments of finding number 3.1, the city plans to appropriate funds in the 2019 budget for a study of cost allocations.

6.3 Allocations and
Restricted Funds -
Restricted revenues

City personnel did not track the balance of various restricted revenues received during the year ended December 31, 2015. Motor vehicle-related revenues, county road and bridge sales tax revenue, law enforcement and public safety revenues, and federal and state grant monies are all accounted for within the General Fund, but the balances of those restricted monies are not tracked. As a result, city officials could not determine at a point in time what portion of the General Fund balance represented restricted monies.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Recommendation	The Board of Aldermen determine the balance of restricted monies in the General Fund and establish separate funds or a separate accounting for these monies, including the current balance.
Status	Implemented The city has developed a spreadsheet to use when preparing the budget showing, among other things, the amount of restricted monies received into the General Fund and the planned expenditure amounts for these specific purposes, such as street-related expenditures. The City Administrator indicated restricted revenues accounted for in the General Fund are normally fully spent in the year received. He indicated if any of those monies were not fully spent, the city has mechanisms in place to determine the unspent amount and those monies would be restricted within the General Fund.
7.2 Cash Handling Controls and Procedures - Segregation of duties and oversight	The city did not have adequate personnel in most departments where monies were collected to segregate duties and adequate oversight of the transmittal process was not performed.
Recommendation	The Board of Aldermen ensure the duties of receipting and transmitting/depositing monies are segregated or implement timely adequate supervisory reviews if duties cannot be appropriately segregated.
Status	Implemented A worksheet has been developed for the various departments to document all funds received and receipt slip numbers issued. The departments then bring the funds along with the worksheet to city hall for entry into the accounting system and deposit. The Finance Director or other independent personnel perform site visits and audits of transmittals periodically to ensure amounts transmitted agree to receipt slips issued.
8.1 Sunshine Law and Statutory Compliance - Closed meetings	The Board discussed some items in closed meetings that were not allowed by state law and sometimes discussed issues unrelated to the specific reason cited in the open minutes for going into a closed meeting.
Recommendation	The Board of Aldermen ensure issues discussed in closed meetings are allowed by state law, and limit issues discussed in closed meetings to only those specific reasons cited for closing the meeting.
Status	Implemented

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

The Board of Aldermen had the City Attorney review closed meeting minutes from 2015 through June 2017 to determine which minutes contained discussion of unallowable topics. The minutes identified were subsequently made public by the Board and posted on the city's website. We reviewed closed meeting minutes for the period August 2017 to June 2018 and identified no instances in which unallowable topics were discussed. Topics discussed agreed to the reasons cited for closure.

8.2 Sunshine Law and
Statutory Compliance -
Meeting minutes

The city did not ensure minutes of meetings were prepared timely and posted to its website. In addition, the Board did not review and approve closed meeting minutes. Closed meeting minutes were only signed by the City Clerk.

Recommendation

The Board of Aldermen ensure meeting minutes are prepared, approved, and posted to the city website timely for all open meetings.

Status

Implemented

We reviewed open meeting minutes for Board meetings and work sessions held in May, June, and July 2018 and located minutes for each meeting/session on the city's website. The City Administrator indicated he checks regularly to ensure the minutes are posted and indicated the new City Clerk is conscientious about posting minutes timely.

Procedures were changed in regard to closed meeting minutes approval. Minutes of closed meetings are now distributed to board members in sealed packets before the next open meeting. Closed minutes are approved at the open meeting, along with the open meeting minutes, and signed by the Mayor. If an amendment is necessary, the Board will discuss the proposed change at the next closed meeting, vote to approve the minutes, and have them signed by the Mayor. The closed meeting minutes for the period August 2017 to June 2018 were reviewed and were approved by the Board and signed by the Mayor.

9.2 Accounting Controls
and Procedures -
Delinquent accounts

The city had not developed written policies and procedures regarding handling and accounting for delinquent utility and Emergency Medical Services (EMS) accounts.

At our request the utility billing and EMS departments generated reports of delinquent accounts. The reports included 2,912 accounts (totaling \$1,765,864) more than 5 years old. City officials did not have a process to periodically review these reports and evaluate the likelihood of collection, and had not removed delinquent accounts from the utility system in many years or the EMS billing system since 2009.

City of Harrisonville
Follow-up Report on Audit Findings
Status of Findings

Recommendation

The Board of Aldermen establish policies and procedures regarding the collection of delinquent accounts.

Status

Not Implemented

City officials indicated they are committed to developing policies and procedures regarding the collection of delinquent accounts, but none have been implemented as of September 30, 2018.

Office of Missouri State Auditor
Nicole Galloway, CPA

Iron County

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Iron County

Sheriff's Controls and Procedures	The Sheriff has not adequately segregated accounting duties and does not ensure adequate supervisory reviews of detailed accounting and bank records are performed. The Sheriff's office does not prepare a monthly list of liabilities for the fee bank account, and consequently, liabilities are not reconciled to the available cash balance in the account. The Sheriff's office maintains an inactive commissary bank account and has not followed up on old outstanding checks or properly reconciled the bank account and determined the proper disposition of the account balance. The Sheriff's office does not properly account for bond forms and does not reconcile amounts per the forms to deposits in the bank account and transmittals to cities. The Sheriff's office does not timely disburse fees and other receipts from the fee account to the County Treasurer. The Sheriff does not have proper controls and procedures in place to ensure collection and transmittal of amounts billed and received for boarding of prisoners.
Tax Maintenance Fund	The County Collector made monthly salary payments of \$100 from the Tax Maintenance Fund to the Deputy County Collector to supplement the salary paid the deputy from the General Revenue Fund. Since these payments were not processed through the county payroll system, these payments were not reported on the employee's W-2 form, appropriate payroll taxes were not withheld, and the employer's share of payroll taxes were not paid.
Senate Bill 40 Tax Rate	The County Commission did not hold a public hearing and approve the Senate Bill 40 property tax rate.
Passwords	Employees in the office of the Recorder of Deeds and Sheriff are not required to use passwords for accessing office computers, and employees in the office of Prosecuting Attorney are not required to periodically change passwords.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations of another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Information	

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Iron County

We have audited certain operations of Iron County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones and Associates, Certified Public Accountants, was engaged to audit the financial statements of Iron County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

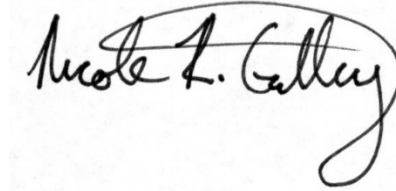

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Iron County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Nicole R. Galloway, CPA

Audit Staff:	Terese Summers, MSAS, CPA
	Sherrye Lesmes

Iron County

Management Advisory Report

State Auditor's Findings

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The Sheriff's office processed receipts for civil paper service, prisoner transportation reimbursement, commissary commissions, and other miscellaneous receipts totaling approximately \$31,000 through the fee account, and bond receipts totaling approximately \$22,000 through the bond account during the year ended December 31, 2017.

1.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties and does not ensure adequate supervisory reviews of detailed accounting and bank records are performed.

The Administrative Assistant is responsible for receipting, recording, and depositing monies; making disbursements; and preparing the monthly bank reconciliations for both bank accounts. The Sheriff does not review accounting records to ensure monies received have been properly recorded, deposited, and disbursed to the appropriate parties.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving, recording, depositing, disbursing, and reconciling monies. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of detailed accounting and bank records are essential and should include comparing daily receipt activity to deposits and disbursements to supporting documentation.

1.2 Liabilities

The Sheriff's office does not prepare a monthly list of liabilities for the fee bank account, and consequently, liabilities are not reconciled to the available cash balance in the account. We determined liabilities to be 3 months of undistributed collections (see section 1.5) totaling \$7,566, as of December 31, 2017. The reconciled bank balance of \$9,090 at December 31, 2017, exceeded the identified liabilities, resulting in an unidentified balance of \$1,524.

Regular identification and comparison of liabilities to the available cash balance is necessary to ensure accounting records are in balance, all amounts received are disbursed, and monies are available to satisfy all liabilities. Differences should be adequately investigated and explained. Various statutory provisions provide for the disposition of unidentified monies.

1.3 Commissary account

The Sheriff's office maintains an inactive commissary bank account and has not followed up on old outstanding checks or properly reconciled the bank account and determined the proper disposition of the account balance. The account has been inactive since January 2017 when the county began contracting for the commissary operations. Upon our request, the Sheriff's office prepared a bank reconciliation as of April 30, 2018. The reconciled bank balance of \$4,129 exceeded the book balance of \$3,549 by \$580 and the outstanding checks listing included 8 checks totaling \$1,188 that had been

Iron County Management Advisory Report - State Auditor's Findings

outstanding for more than 1 year. According to the Administrative Assistant, the payee for one outstanding check for \$1,000 has been recently located, a stop payment order was issued for the check, and a new check was issued. Also, according to the Administrative Assistant, the book balance consists of undistributed commissary net proceeds and interest earned on the bank account; however, there is no documentation to support the book balance amount.

Maintaining an inactive account increases the risk of loss, theft, or misuse of funds. Proper follow-up procedures on old outstanding checks are necessary to ensure monies are appropriately disbursed to the payee or as otherwise required by state law. Various statutory provisions provide for the disposition of unclaimed monies. If appropriate distribution of the account balance cannot be determined, the Sheriff should dispose of it in accordance with state law and close the account.

1.4 Bonds

The Sheriff's office does not properly account for bond forms and does not reconcile amounts per the forms to deposits in the bank account and transmittals to cities. The numerical sequence of bond forms is not accounted for and some bond forms were not issued in numerical order. Additionally, while most cash bonds received are deposited into the bond account, some cash bonds received are held until transmitted to the cities for whom the arrest was made, and the Sheriff's office does not obtain a receipt slip from the cities for the bonds transmitted.

To reduce the risk of loss, theft, or misuse of bond monies received, and to provide assurance bond monies are accounted for properly, prenumbered bond forms should be issued in numerical order and the numerical sequence of bond forms should be accounted for properly. In addition, receipt slips should be obtained from cities for bonds transmitted directly to the cities, and bond forms should be reconciled to deposits and also to transmittals to the cities.

1.5 Disbursements

The Sheriff's office does not timely disburse fees and other receipts from the fee account to the County Treasurer. The Sheriff's office made disbursements to the County Treasurer approximately every 2 to 3 months, and those disbursements ranged from \$4,089 to \$8,725.

Timely disbursement of fees and other receipts is necessary to provide adequate controls over account balances and increase the likelihood discrepancies are promptly detected. Section 50.370, RSMo, requires all county officials who receive fees or any other remuneration for official services to pay such monies monthly to the County Treasurer. In addition, pursuant to Section 50.380, RSMo, the Sheriff may be subject to penalties for failure to timely disburse monies.

Iron County
Management Advisory Report - State Auditor's Findings

1.6 Prisoner boarding

The Sheriff does not have proper controls and procedures in place to ensure collection and transmittal of amounts billed and received for boarding of prisoners. During 2017, the Sheriff's office did not track all board bills sent or payments received. As a result, the Sheriff's office is unable to monitor billed amounts to ensure payments are received and transmitted to the County Treasurer. County records indicate amounts transmitted to the County Treasurer for board bills totaled approximately \$1,300 in 2017, and unpaid billings totaled approximately \$12,800 as of June 2018. In addition, the Sheriff has not entered into written agreements with the surrounding counties and cities for the boarding of prisoners detailing the housing rate to be paid, the services to be provided, or any required notification for emergency or non-routine situations.

Procedures such as independent reconciliations of billing records to jail records and payments received should be established to ensure prisoner housing is properly billed, collected, recorded, and transmitted to the County Treasurer. Proper records and follow-up procedures are also necessary to safeguard against possible loss, theft, or misuse of funds going undetected.

Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. Written agreements, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

Similar conditions
previously reported

A condition similar to section 1.1 was noted in our 2 prior audit reports, while conditions similar to sections 1.2, 1.3, and 1.6 were noted in our prior audit report.

Recommendations

The Sheriff:

- 1.1 Segregate accounting duties or ensure adequate independent or supervisory reviews of detailed accounting and bank records are performed and documented.
- 1.2 Prepare a monthly list of liabilities for the fee account and reconcile it to the available cash balance. Any differences should be promptly investigated and resolved. After sufficient efforts are made to resolve differences, any remaining unidentified monies should be disposed of in accordance with state law.
- 1.3 Dispose of monies held in the inactive commissary bank account in accordance with state law and close the account. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located the amount should be disbursed in accordance with state law.

Iron County
Management Advisory Report - State Auditor's Findings

- 1.4 Account for the numerical sequence of prenumbered bond forms. Additionally, receipt slips should be obtained from cities for bonds transmitted to cities, and bond forms should be reconciled to deposits and transmittals to cities.
- 1.5 Disburse fees and other receipts to the County Treasurer monthly in accordance with state law.
- 1.6 Develop procedures to ensure collections of costs for boarding prisoners and the proper recording and transmittal of payments received. In addition, the Sheriff should work with the County Commission to obtain written agreements with other counties and cities for the boarding of prisoners.

Auditee's Response

- 1.1 *The County Treasurer has begun reviewing the office's financial records quarterly. In addition, I will begin reviewing accounting records with the Administrative Assistant monthly.*
- 1.2 *I will have the Administrative Assistant prepare a monthly list of liabilities, and she and I will reconcile the list to the cash balance. I will consult the Prosecuting Attorney regarding disposition of unidentified monies.*
- 1.3 *This account was closed in October 2018, and the balance was turned over to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. We will contact payees of old outstanding checks, and reissue checks as applicable. We will dispose of remaining unidentified funds in accordance with state law.*
- 1.4 *The Circuit Court recently required the bond forms be revised; however, the printer did not prenumber the new forms. We will attempt to order new prenumbered bond forms. If prenumbered forms cannot be obtained, we will number the existing forms manually and account for the numerical sequence of the forms when issued. Additionally, we now deposit all city bonds and disburse those bonds by check.*
- 1.5 *This recommendation has been implemented.*
- 1.6 *We are developing a contract document that will be approved by the Circuit Judge and then presented to the cities for signature and execution. Additionally, we will reconcile billings to payments received by the County Treasurer monthly and we will follow-up on unpaid billings and notify the Circuit Judge about unpaid billings.*

Iron County
Management Advisory Report - State Auditor's Findings

2. Tax Maintenance Fund

The County Collector made monthly salary payments of \$100 from the Tax Maintenance Fund to the Deputy County Collector to supplement the salary paid to the deputy from the General Revenue Fund. These payments totaled \$1,200 during the year ended February 28, 2018. Since these payments were not processed through the county payroll system, these payments were not reported on the employee's W-2 form, appropriate payroll taxes were not withheld, and the employer's share of payroll taxes were not paid. The Internal Revenue Code indicates individuals treated as employees should have all compensation reported on W-2 forms.

To ensure all employee compensation is properly reported and taxed, all compensation should be paid through the normal county payroll process. The failure to properly report and tax all wages could result in penalty and interest charges assessed against the county.

A similar condition was noted in our prior audit report.

Recommendation

The County Collector ensure all employee compensation is paid through the county's normal payroll process, properly taxed, and reported to the Internal Revenue Service.

Auditee's Response

I have discussed this issue with the County Commission and we will begin processing the compensation through the county's normal payroll process.

3. Senate Bill 40 Tax Rate

The County Commission did not hold a public hearing to approve the Senate Bill 40 property tax rate. The property tax rate was approved by the Senate Bill 40 Board; however, the Senate Bill 40 Board does not have the legal authority to set the property tax rate.

Section 137.055, RSMo, states the county governing body shall hold a public hearing prior to approving the tax rates of the county. In addition, the Missouri Supreme Court issued an opinion in the case of *State ex rel. Indus. Services Contractors, Inc. v. County Comm'n of Johnson County*, 918 S.W.2d 252 (Mo. Banc 1996) that there is no statutory authority allowing Senate Bill 40 Boards to set the property tax levy.

Recommendation

The County Commission should approve the Senate Bill 40 property tax rate in accordance with state law.

Auditee's Response

We have implemented this recommendation with the August 2018 property tax rate setting process.

4. Passwords

The Recorder of Deeds, Sheriff, and Prosecuting Attorney have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in the office of the Recorder of Deeds and Sheriff are not required to use passwords for accessing office

Iron County
Management Advisory Report - State Auditor's Findings

computers, and employees in the office of Prosecuting Attorney are not required to periodically change passwords.

Passwords are necessary to authenticate access to computers. However, since passwords are not used or do not have to be periodically changed in certain offices, there is less assurance access to computers and data files is limited to only those individuals who need access to perform their job responsibilities. Passwords should be confidential, contain a minimum number of characters, and be changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

Recommendation

The County Commission work with other county officials to require employees establish and maintain confidential passwords that must be periodically changed.

Auditee's Response

We will make revisions to our internal control policy to incorporate this recommendation.

Iron County

Organization and Statistical Information

Iron County is a county-organized, third-class county. The county seat is Ironton.

Iron County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 38 full-time employees and 5 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Jim Scaggs, Presiding Commissioner	\$	29,390
Joshua A. Campbell, Associate Commissioner		27,390
Dwayne Warncke, Associate Commissioner		27,390
Karen K. Reagan, Recorder of Deeds		41,500
Virginia Queen, County Clerk		41,500
Brian Parker, Prosecuting Attorney		51,000
Roger D. Medley, Sheriff		46,000
Carol Hardy, County Treasurer		41,500
Tim Harbison, County Coroner		14,000
Lisa Light, Public Administrator		41,500
Linda Kemp, County Collector, year ended February 28,	41,500	
David L. Huff, County Assessor, year ended August 31,		41,500

New Sales Tax

On April 4, 2017, Iron County voters approved a 1/2 of 1 percent general sales tax.

Office of Missouri State Auditor
Nicole Galloway, CPA

Perry County

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Perry County

Sheriff's Controls and Procedures	The Sheriff's office has not remitted net proceeds from the inmate commissary account to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. The Sheriff does not properly reconcile fuel usage to fuel purchases, and does not document his review of fuel usage reports.
County Procedures	The County Clerk does not properly consider prior years' results when performing his annual property tax reduction calculations. The county used the same provider to serve as both financial advisor and underwriter for the issuance of lease participation certificates. The County Commission does not document its approval of court orders for property tax additions and abatements.
Passwords	Employees in the offices of the County Collector, Sheriff, Prosecuting Attorney are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations of another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Information	

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Perry County

We have audited certain operations of Perry County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Perry County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

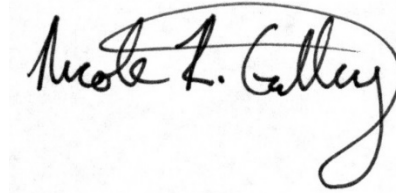

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Perry County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is written in a cursive style with a large, looping "G" at the end.

Perry County Management Advisory Report State Auditor's Findings

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The office collected monies for civil paper service, bonds, housing prisoners, inmates, and other miscellaneous receipts totaling approximately \$209,000 during the year ended December 31, 2017.

1.1 Commissary net proceeds

The Sheriff's office has not remitted net proceeds from the inmate commissary account to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. The inmate commissary account balance of \$71,000 at December 31, 2017, consisted of approximately \$500 in inmate monies and approximately \$70,500 in net proceeds from commissary sales.

Section 221.102, RSMo, requires each county jail to keep revenues from its commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (net proceeds) into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer.

1.2 Fuel reconciliation

The Sheriff does not properly reconcile fuel usage to fuel purchases, and does not document his review of fuel usage reports. Deputies fuel patrol cars using a bulk fuel tank. The fuel tank is monitored by video camera; however, the tank is easily accessible and unlocked, and the pump is always turned on. The Sheriff indicated he reviews the monthly fuel usage reports, but he does not document this review. During the year ended December 31, 2017, the Sheriff's office spent approximately \$45,000 on fuel for 24 vehicles.

Procedures for reconciling fuel use to fuel purchases and documenting reviews of fuel usage reports are necessary to ensure vehicles are properly utilized and decrease the risk of loss, theft, or misuse of fuel going undetected.

Similar conditions
previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The Sheriff:

- 1.1 Disburse net proceeds not necessary to meet cash flow needs or current operating expenses to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund.
- 1.2 Establish procedures to reconcile fuel used to fuel purchased and document the review of fuel usage reports. Any significant discrepancies should be promptly investigated.

Auditee's Response

- 1.1 *The Sheriff will continue with the current process which involves oversight by the County Commission.*

Perry County
Management Advisory Report - State Auditor's Findings

1.2 *The Sheriff feels the current procedures are adequate. The Sheriff will sign the fuel usage reports to document his review.*

Auditor's Comment

1.1 Section 221.102, RSMo, requires net proceeds from the commissary, other than a minimum amount for cash flow purposes and current expenses, to be deposited into the Inmate Prisoner Detainee Security Fund held by the County Treasurer.

2. County Procedures

Procedures over county property tax reductions, lease participation certificates, and additions and abatements need improvement.

2.1 Property tax levy reduction

The County Clerk does not properly consider prior years' results when performing his annual property tax reduction calculations. As a result, the general revenue property tax levy has been reduced by approximately \$16,000 more than required by law since our last audit in 2014. Including previous years, the general revenue property tax levy has been reduced by approximately \$150,000 more than required by law.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Perry County voters enacted a one-half of 1 percent general sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement based on estimated sales tax collections of the current year, and adjust for actual sales tax collections of the preceding year that were more or less than the estimate for that year. To ensure property tax levies are properly set, the County Commission and the County Clerk should ensure property tax reductions are accurately calculated.

A similar condition was noted in our prior report.

2.2 Lease participation certificates

The county used the same provider to serve as both financial advisor and underwriter for the issuance of lease participation certificates. In March 2017, the county issued lease participation certificates totaling \$3,345,000 to pay for the renovation of the courthouse. Lease participation certificates are a method of financing a capital project whereby a financial institution sells interests in the capital project, leases the project to a public entity, and repays the certificates with the lease payments. After the certificates have been repaid, the local government typically has the option to purchase, at a nominal amount, the capital project it has been leasing. Lease participation certificates are not required to be approved by county voters and carry higher borrowing costs than traditional bond financing.

Using the same provider to act in the dual capacity of underwriter and financial advisor for a debt issuance creates an inherent conflict of interest. The lack of independent financial advice could result in the county not being

Perry County Management Advisory Report - State Auditor's Findings

adequately informed of debt issuance options or being unable to adequately evaluate debt proposals. The underwriter does not have a fiduciary responsibility to the county.

2.3 Additions and abatements

The County Commission does not document its approval of court orders for property tax additions and abatements. During the year ended February 28, 2018, additions totaled approximately \$207,000 and abatements totaled approximately \$71,000.

The County Assessor and County Collector process additions and abatements and print a court order for review and approval by the County Commission. The County Commission indicated it reviews the court orders but does not document its approval.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. Documented reviews and approvals of additions and abatements, would help ensure changes made to the property tax system are proper.

Recommendations

The County Commission:

- 2.1 And the County Clerk properly calculate property tax rate reductions and adequately reduce property tax levies for 50 percent of sales tax revenue.
- 2.2 Discontinue using an underwriter who also acts in a dual capacity as financial advisor for debt issuances.
- 2.3 Document approval of all property tax additions and abatements.

Auditee's Response

The County Commission and the County Clerk provided the following response:

- 2.1 *The County Commission and County Clerk will discuss with legal counsel to determine how to proceed.*

The County Commission provided the following responses:

- 2.2 *In the future, the County Commission will ensure any financial proposals are reviewed by an independent source.*
- 2.3 *The County Commission will begin receiving a detailed report monthly which will be signed by the County Commissioners to document the review of the additions and abatements.*

Perry County
Management Advisory Report - State Auditor's Findings

3. Passwords

The County Collector, Sheriff, Prosecuting Attorney, and Public Administrator have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.

Passwords are necessary to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since employees in several offices are not required to change passwords periodically, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

A similar condition was noted in our prior report.

Recommendation

The County Commission work with other county officials to require employees to maintain confidential passwords that must be periodically changed.

Auditee's Response

The County Commission will develop a county-wide password policy for all the offices to adhere to.

Perry County

Organization and Statistical Information

Perry County is a county-organized, third-class county. The county seat is Perryville.

Perry County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 66 full-time employees and 15 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board, Mental Health Board, Youth Board, Senior Citizen Board, Solid Waste Board, and 911 services. Also, in conjunction with the City of Perryville, the county operations include maintenance of a community multi-purpose facility.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Carl Leuckel Jr., Presiding Commissioner	\$	36,650
Jay P. Wengert, Associate Commissioner		34,545
Jim Sutterer, Associate Commissioner		34,545
Dana Pritchard, Recorder of Deeds		52,260
Jared W. Kutz, County Clerk (1)		54,343
Thomas L. Hoeh, Prosecuting Attorney		64,324
Gary J. Schaaf, Sheriff		52,139
Kathy A. Schumer, County Treasurer		52,343
Bill Bohnert, County Coroner		16,336
Tamara M. Tarrillion, Public Administrator		47,424
Rodney J. Richardet, County Collector (2), year ended February 28,	64,546	
Charles Triller, County Assessor (3), year ended August 31,		54,343
Tim Baer, County Surveyor (4)		

- (1) Includes \$2,000 of commissions earned for preparing city property tax books.
- (2) Includes \$12,213 of commissions earned for collecting property taxes for cities, levee districts, and drainage districts.
- (3) Includes \$2,000 of commissions earned for assessing city property taxes.
- (4) Compensation on a fee basis.

Perry County
Organization and Statistical Information

Financing
Arrangement

The county entered into a lease agreement with UMB Bank (the trustee) in March 2017 to provide funding for the costs of renovating the courthouse. Certificates of Participation bonds totaling \$3,345,000 were issued by the trustee on behalf of the county. The county's lease payments to the trustee are equal to the amount due to retire the trustee's indebtedness. Construction was completed in 2018 and the lease is scheduled to be paid off in 2034. The remaining principal outstanding at December 31, 2017, was \$3,345,000. The remaining interest at December 31, 2017, was \$1,013,021. The lease payments are anticipated to be paid with revenue generated from the county's sales tax passed in April 2016.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of City of Greenville

Background	<p>The former City Clerk, Pam Birmingham, began employment with the city in June 2008. Ms. Birmingham also served as the Court Clerk of the Municipal Division. The Board identified concerns regarding Ms. Birmingham's performance in April 2016, and as a result of those concerns, the Board terminated Ms. Birmingham's employment on April 14, 2016. The Missouri State Highway Patrol initially investigated and obtained documents regarding unsupported checks issued to the former City Clerk, and turned these records over to the Missouri Attorney General's Office (AGO) for prosecution. The AGO contacted the State Auditor's Office (SAO) on January 30, 2018, and requested assistance in reviewing city records and preparing documents and testimony regarding unsupported checks issued to the former City Clerk. On March 9, 2018, the Board passed an ordinance formally requesting and authorizing an audit and the audit began on that date.</p>
Improper Payments and Missing Monies	<p>The lack of segregation of duties and adequate controls, and the absence of proper oversight, resulted in the overpayments, improper payments, improperly negotiated city checks, falsified records, and missing receipts going undetected for a significant period of time. The audit identified a total of approximately \$161,000 in improper payments and undeposited monies from January 1, 2014 through April 14, 2016. Improper payments totaling \$52,594 were made to the former City Clerk. The former City Clerk also improperly cashed or negotiated 123 city checks issued to the City of Greenville totaling \$39,536. Most of the checks issued for these improper payments were only signed by the former City Clerk. The former City Clerk deposited many of the checks written to herself from the city, cash, and other unrelated checks into a personal bank account and spent \$62,416 from this account on various personal items. Documentation of amounts spent from this account was prepared at the request of the AGO and was provided for their use in prosecution.</p> <p>The former City Clerk also falsified disbursement listings provided to the Board for its review and approval at monthly meetings to conceal improper disbursements totaling \$25,980. Utility and municipal division receipts totaling \$69,229 were not deposited by the former City Clerk, and only \$2 of cash was deposited into utility accounts over this more than 2 year period.</p>
Oversight, Annual Audits, and Bond Coverage	<p>The Board did not establish adequate oversight of the former City Clerk, obtain annual audits as required by state law, or obtain bond coverage for city officials and personnel with access to city monies.</p>
Accounting Controls and Procedures and Disbursements	<p>Manual receipt slips were not issued for all monies received; manual receipt books were missing; utility payments were not timely recorded in the computerized utility system; the method of payment was not consistently recorded on receipt records; and receipts were not deposited timely or intact. The city maintains an excessive number of bank accounts; monthly bank reconciliations were not performed; and the city failed to monitor the city's cash balances and incurred overdraft and minimum balance fees. The former City Clerk made excessive and unauthorized transfers between various bank accounts, and did not always deposit utility receipts into the proper bank</p>

account, which led to commingling of restricted funds. Refundable utility deposit monies held in the water bank account are not accounted for properly. Pre-numbered forms are not used for merchant and liquor licenses and gathering hall and festival booth rental fees, and records were not retained to account for the collection and deposit of these fees. Various financial and personnel records were not maintained. Some records were recovered from a city dumpster shortly after the termination of the former City Clerk.

Payroll Policies, Records, and Taxes	Significant improvement regarding personnel policies, records, and remitting payroll taxes is needed. The city had not established personnel policies addressing overtime, holidays, vacation and sick leave, employee benefits, uniform allowances, and hours of work, and a personnel file was not retained for the former City Clerk. The former City Clerk did not timely file and remit approximately \$65,000 in various payroll taxes, and concealed some of these untimely filings and payments by falsifying disbursement listings provided to the Board.
Municipal Division	Several case files and other court records could not be located by the municipal division. Neither the municipal division nor city personnel performed adequate supervisory or independent reviews of accounting functions and records. The municipal division's procedures for receipting, recording, and depositing were poor. The former Court Clerk did not disburse fines and court costs timely, submit a monthly caseload summary report to the city, or submit monthly reports of court activity to the Office of the State Courts Administrator. The former Municipal Judge had not issued a court order for the schedule of fines and court costs to be collected through the violation bureau, and a schedule could not be located by the municipal division.
Electronic Data Security	The city had not developed a formal, written contingency plan for recovering computer systems and data, and the city did not regularly back up data or periodically test backup data, and did not always store backup data at a secure off-site location.

In the areas audited, the overall performance of this entity was **Poor**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Greenville, Missouri

We have audited certain operations of the City of Greenville as they relate to the city's finances in fulfillment of our duties under Section 29.200.3, RSMo. Due to concerns regarding missing monies and improper payments, the State Auditor initiated the audit with the approval of the City of Greenville Board of Aldermen. The scope of our audit included, but was not necessarily limited to the period from January 1, 2014, through April 15, 2016. The objectives of our audit were to:

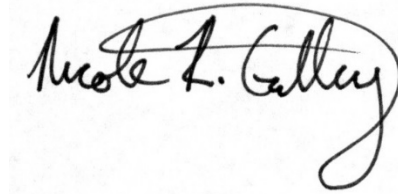

1. Evaluate the city's internal controls over significant management and financial functions.
2. Evaluate the city's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.
4. Determine the amount of missing monies and improper disbursements to the extent possible.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) missing monies and improper disbursements totaling approximately \$161,000. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Greenville.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with the first name "Nicole" and last name "Galloway" clearly legible. The initials "R." are written in a smaller, more compact style between the first and last names.

Nicole R. Galloway, CPA
State Auditor

City of Greenville

Introduction

Background

The former City Clerk, Pam Birmingham, began employment with the city in June 2008. As City Clerk, Ms. Birmingham was solely responsible for financial accounting functions and records of the city as follows:

- Receipts - collecting and receipting all payments to the city, posting to the accounting records and customer utility accounts, and preparing and making bank deposits.
- Disbursements - making purchases; receiving goods and services; preparing a listing of bills to be paid each month and providing the listing to the Board of Aldermen for approval; maintaining supporting documentation (all disbursements are to be supported by invoices or other documentation); preparing, signing, and distributing checks; posting payments to the accounting records; and transferring monies between bank accounts.
- Payroll - preparing computerized timesheets; calculating, preparing, signing, and distributing payroll checks (including checks related to the payment of payroll taxes); posting payments to the accounting records; and preparing 941 and W-2 forms.
- Utility and license billings - entering meter readings in the utility software program; preparing and mailing invoices for merchant and liquor licenses; and issuing licenses.
- Bank accounts - receiving and reconciling monthly bank statements to accounting records.
- Reporting - preparing Board meeting minutes and financial reports.

Ms. Birmingham also served as the Court Clerk of the Municipal Division, and a description of those duties are included in MAR finding number 5.2.

According to the current Mayor and City Clerk, the Board identified concerns regarding the former City Clerk's job performance in April 2016, and as a result of those concerns, terminated her on April 14, 2016.

The Missouri State Highway Patrol (MSHP) initially investigated and obtained documents regarding unsupported checks issued to the former City Clerk, and turned these records over to the Missouri Attorney General's Office (AGO) for prosecution. The AGO contacted the State Auditor's Office (SAO) on January 30, 2018, and requested assistance in reviewing city records, preparing documents, and providing testimony regarding unsupported checks issued to the former City Clerk. The SAO conducted an initial review of the information provided by the MSHP and AGO as provided by Section 29.221, RSMo, and determined that an audit was warranted. On March 9, 2018, the Board passed an ordinance formally requesting and

City of Greenville Introduction

authorizing an audit and the audit began that day. On July 18, 2018, the AGO filed felony criminal charges of receiving stolen property and forgery in Wayne County Circuit Court against former Greenville City Clerk Pamela S. Birmingham.

The city's fiscal year end is July 1 through June 30. The scope of our audit included, but was not necessarily limited to the period January 1, 2014, through April 14, 2016, and was determined through communications with the AGO. We applied procedures to city receipts and disbursements (including payroll), utility billings, and municipal division transactions to identify the amount of improper payments and missing monies, and the methods used to perpetrate and conceal the theft. At the AGO's request, we also compiled how the former City Clerk spent monies from her personal bank account using information obtained by the AGO. Based on the timing and amounts of improper payments and monies missing during the audit period, it is likely there are additional improper payments and monies missing during periods prior to January 2014.

City of Greenville

Management Advisory Report

State Auditor's Findings

1. Improper Payments and Missing Monies

The audit identified approximately \$161,000¹ in improper payments and undeposited monies. The former City Clerk also falsified disbursement listings presented to the Board of Aldermen to conceal 76 improper disbursements totaling \$25,980, which included some of the overpayments and inappropriately negotiated city checks.

Along with other amounts discussed in this finding the report appendixes present details regarding improper payments and undeposited monies. Appendixes A through D show improper payments, Appendix E shows improperly negotiated city checks, Appendix F shows falsified records, and Appendixes G and H show undeposited utility and municipal division receipts. Appendixes A, B, D, and E also show the disposition of each check listed.² Appendix I shows how the former City Clerk spent \$62,416 from her personal bank account and was prepared at the request of the AGO.

The following table provides a summary of the improper payments and missing monies.

Method	Year Ended December 31,		January 1 to April 14,	
	2014	2015	2016	Total
Overpayments	\$ 26,302	12,428	5,549	44,279
Improper uniform allowances	1,121	1,377	710	3,208
Other improper payments	4,147	960	0	5,107
Improperly negotiated city checks	25,811	9,139	4,586	39,536
Undeposited receipts	25,454	30,231	13,544	69,229
Total	\$ 82,835	54,135	24,389	161,359

Overpayments

Overpayments totaling \$38,730 were made to the former City Clerk from January 1, 2014, to December 31, 2015. A comparison of checks written to the former City Clerk and cash withdrawal tickets indicating the withdrawals were for her wages to net pay amounts reported on timesheets showed overpayments totaling \$38,242 (see Appendix A). All checks written to the former City Clerk that denoted wages as the purpose were for amounts that differ from the net pay amounts documented on the timesheets, with the majority being written for more than the net pay amount documented on the timesheets. Also, numerous checks written to the former City Clerk did not document the purpose of the payments.

¹ Amounts presented in the report findings are rounded to the nearest dollar, whereas amounts presented in the report appendixes are not rounded.

² Bank officials provided our office with details regarding how these checks were negotiated. These checks were either deposited into the former City Clerk's personal bank account or her son's personal bank account, cashed, applied to a personal loan of the former City Clerk, applied to a personal loan of the former City Clerk's son, or used to purchase money orders to pay personal expenses of the former City Clerk.

City of Greenville
Management Advisory Report - State Auditor's Findings

The former City Clerk prepared a computerized timesheet each year that listed each work week and included the number of hours worked, hourly pay rate, gross wages, deductions, and net pay. Her 2014 timesheet indicates 40 hours were worked 50 weeks of the year excluding the first and last weeks of the year, which included time worked in other years. Her 2015 timesheet indicates 40 hours were worked 45 weeks of the year and 32 hours were worked the remaining 7 weeks of the year, with 2 of the 7 weeks containing a holiday.

In addition to the \$38,242 of overpayments noted on Appendix A, the former City Clerk improperly increased her hourly pay rate for various periods, resulting in additional overpayments totaling \$488. The former City Clerk improperly increased her hourly pay rate to \$11 per hour when calculating her gross pay for the 8 week period from April 21, 2014, through June 13, 2014, and 3 week period from December 1, 2014, through December 26, 2014. However, according to the former City Clerk's timesheet, her hourly pay rate was \$9.50 per hour from January 1, 2014 until May 6, 2014, when meeting minutes indicated the Board approved a 50 cent per hour pay increase to \$10 per hour. The former City Clerk's 2015 timesheet indicates her hourly pay rate was \$11 per hour and this rate was used consistently throughout the year; however, city officials could not provide documentation to support this rate had been approved. This use of an unauthorized pay rate could represent additional overpayments to the former City Clerk during 2015.

Employees were paid weekly and checks were typically issued each Friday. Therefore, during the 2 years 2014 and 2015 a maximum of 104 paychecks should have been issued to each employee. However, the former City Clerk issued 190 checks to herself and withdrew cash for wages on 2 occasions during this time period. Many of these checks were issued throughout the week (not on Friday) and more than one check was issued to the former City Clerk on the same Friday in 16 instances. Forty-seven checks were written for whole dollar amounts and 79 checks did not have a purpose documented on the memo line. It would be unusual for payroll checks with tax withholdings to be written for whole dollar amounts. The former City Clerk was the only signer on these 190 checks.

Compensatory time, vacation, and sick pay Several checks included memo line notations indicating the payments related to compensatory time, vacation, or sick pay; however, none of the former City Clerk's timesheets showed compensatory time worked and/or vacation or sick leave taken, and no other records were maintained to document compensatory time, vacation, or sick leave. City policy limits accrued compensatory time to 40 hours, requires employees to maintain a compensatory time ledger to document hours worked and the balance of hours available, and provides for all compensatory time to be approved by the employee's supervisor. Personnel policies regarding vacation and sick leave had not been established by the Board as noted in MAR finding number 4.1.

City of Greenville
Management Advisory Report - State Auditor's Findings

Fifteen of the 190 checks included memo line notations indicating the payment related to or included compensatory time; 7 checks included memo line notations indicating the payment related to vacation time; and 1 check indicated it was issued, in part, for sick pay. Timesheets further indicated the former City Clerk was paid for working 5 days each week during 2014 and each week during 2015, except for the 7 work weeks of 32 hours noted earlier, with 2 of the 7 weeks containing a holiday leaving 5 work days not reported on the timesheets.

In addition, our review of the former City Clerk's personal bank account disbursement activity (as later discussed and summarized in Appendix I), shows the former City Clerk made purchases on Monday, July 28, 2014, in Alabama and on Wednesday, July 30, 2014, in Georgia. Based on this information, the former City Clerk was likely out of state and, therefore, not at work; however, her timesheets indicate she worked 40 hours that week and did not report any leave taken. In addition, the former City Clerk issued herself 2 checks just prior to and just after this time period. Personal bank account disbursement activity also shows the former City Clerk made purchases at a resort in Biloxi, Mississippi, on February 2, 3, and 4, 2016, (Tuesday through Thursday). Based on this information, the former City Clerk was likely out of state and, therefore, not at work. However, the former City Clerk issued herself 2 checks just prior to and just after this time period. The issuance of multiple checks at times the former City Clerk was apparently not working is unusual. These checks are included in the calculation of estimated overpayments on Appendixes A and B.

Estimated overpayments
for 2016

The city could not provide the 2016 timesheet for the former City Clerk. Therefore, we estimated the former City Clerk was overpaid an additional \$5,549 during the period January 1, 2016 through April 14, 2016.

We calculated an estimate of the amount of the net pay (\$366 per week) based on city records during the latter part of 2015 including: weekly payroll periods (Monday through Friday), gross pay of \$440 (40 hours a week at \$11.00 per hour), and tax withholdings (\$74 per week) for the 14 weeks ending April 8, 2016, totaling \$5,124. An estimate of the former City Clerk's net pay of \$278 for her last week of work (week ending April 14, 2016) was calculated based on 32 hours of work and the same weekly withholdings.

Appendix B shows a comparison of the actual checks written to the former City Clerk totaling \$10,951 to the total estimated net pay of \$5,402, resulting in estimated overpayments totaling \$5,549.

Final paychecks

Final paychecks issued to the former City Clerk appear questionable and are included in the estimated amounts overpaid. According to Board members, on Thursday, April 14, 2016, the former City Clerk was terminated, but was allowed to continue working the remainder of the day. The former City Clerk issued herself 2 final paychecks totaling \$1,399 that were signed by herself

City of Greenville
Management Advisory Report - State Auditor's Findings

and former Mayor Bennett. All other checks issued to the former City Clerk during 2016 were only signed by the former City Clerk. Check number 3668 was issued for 32 hours of work (8 hours a day April 11 through April 14, 2016), and one sick day. However, the former City Clerk was terminated on April 14, 2016, and would not have been entitled to take a sick day on April 15, 2016, which resulted in an overpayment of \$80. Check number 3671 was also issued to the former City Clerk for "3 weeks/1 sick day" in the amount of \$1,042. No supporting documentation was retained to explain the purpose and amount of this check, resulting in an overpayment of \$1,042.

Improper uniform allowances

The former City Clerk improperly paid herself for uniform allowances totaling \$3,208 from January 24, 2014, to April 12, 2016 (see Appendix C). These uniform allowances were not approved by the Board. All of these checks, except for a final uniform allowance check, were signed only by the former City Clerk. The final uniform allowance check was signed by the former Mayor and the former City Clerk.

The Board approved uniform allowances to various city employees at its November 9, 2010, meeting. Allowance amounts varied based on job positions, with the former City Clerk receiving \$200. The meeting minutes do not specify if the allowance amounts were intended to be one-time payments in 2010 or continuing payments to employees; however, Board members indicated the uniform allowances were to represent annual end of the year bonuses to city employees. City accounting records also show payments were continued for all employees, including the former City Clerk, at the end of each year from 2010 to 2015 at the same amounts as approved in 2010 (these amounts are not included in the improper amounts paid to the former City Clerk above). The only other Board action we identified regarding uniform allowances occurred at its January 8, 2013, meeting where the Board approved uniform allowances to certain city maintenance employees at the Mayor's discretion. Accounting records show that in 2014 the former City Clerk began issuing checks to herself for uniform allowances throughout the year at the same time checks were issued to the city maintenance supervisor. Since the Board did not authorize additional uniform allowances for the former City Clerk, these additional checks are considered improper.

Other improper payments

The former City Clerk improperly issued 16 of 19 checks to herself and withdrew cash on 2 occasions totaling \$5,107, for the reimbursement of supplies, petty cash, change fund, and for the park during the period January 1, 2014 through April 14, 2016 (see Appendix D). Supporting documentation was not available for these 16 checks and the withdrawal slips, all of the checks were signed only by the former City Clerk, and the 2 withdrawal slips were written in Pam Birmingham's scripted handwriting. Fourteen of the 16 improper checks and both withdrawals were for whole dollar amounts. It would be unusual for checks issued for the reimbursement of specific

City of Greenville
Management Advisory Report - State Auditor's Findings

**Improperly negotiated
city checks**

expenses to be written for whole dollar amounts. Unlike these improper checks and withdrawals, the 3 remaining checks, issued to the former City Clerk for the reimbursement of supplies totaling \$194, were supported by invoices and issued for the actual amounts of the supporting invoices. Also, city officials indicated a petty cash fund was not used.

The former City Clerk improperly negotiated 123 city checks issued to the City of Greenville totaling \$39,536 (see Appendix E). Bank officials provided our office with details regarding how these checks were negotiated. Bank records show that 120 checks were cashed (\$38,723) at banks, 2 checks were used to purchase a money order payable to a dental provider (\$713) for personal dental services, and 1 check was negotiated at a local gas station (\$100). The former City Clerk was the only signer on these checks. The endorsement for 119 of these checks consisted of "City of Greenville Pam Birmingham" written in Pam Birmingham's scripted handwriting; 3 checks had no endorsement; and the remaining check initially had "City of Greenville Pam Birmingham," but that endorsement was marked through and the restrictive endorsement of a local gas station applied.

Of these 123 checks, 54 checks had no purpose documented and some of the checks had multiple purposes documented. In addition, 23 checks were issued from the municipal court bank account with the purpose documented as municipal division cases, and 4 checks were issued with the purpose documented as taxes. While these check purposes seem to be legitimate reasons to transfer monies from one account to another, it is questionable why the former City Clerk would cash these checks, and we found no evidence this cash was deposited into any of the city bank accounts. Legitimate checks for the transfer of funds between bank accounts were paid to the order of the City of Greenville, restrictively endorsed with a "for deposit only" stamp, and were appropriately deposited into various city bank accounts (these are not included on Appendix E). Also, 23 checks were issued with the purpose of petty cash documented, and 2 checks were issued with the purpose of change documented; however, city officials indicated a petty cash fund was not used, and no documentation was retained to support these checks. Only one of the 17 checks issued for supplies was partially supported by an invoice. Check number 3367 was issued for \$300 on June 30, 2015; however, documentation was retained to support only \$193, and the remaining \$107 was not supported. Additionally, 120 of these checks were issued for whole dollar amounts.

Personal bank account

The former City Clerk deposited many of the checks written to herself from the city, cash, and other unrelated checks into a personal bank account as noted in the disposition section of Appendixes A, B, and D. Appendix I shows how the former City Clerk spent monies totaling \$62,416 from this account on various personal items and was prepared at the request of the AGO.

City of Greenville
Management Advisory Report - State Auditor's Findings

Falsified records

The former City Clerk falsified check details on at least 14 disbursement listings provided to the Board for its review and approval at monthly meetings. This occurred to conceal 76 improper disbursements totaling \$25,980 (see Appendix F). These listings pertained to the months January through August of 2014; October and November of 2014; and February, August, September, and November of 2015. Most of these disbursements showed a routine city vendor as the payee; however, 50 of the 76 improper checks were actually issued to the former City Clerk (totaling \$18,217), 25 of the 76 checks were actually issued to the City of Greenville and improperly negotiated by the former City Clerk (totaling \$7,318), and the amount of another check was altered from \$1,755 to \$1,500. Three of the 76 improper checks (check numbers 3011, 3110, and 3409) were included as voided checks on the disbursement listings, while the actual checks were written and cleared the bank for \$250, \$550, and \$300. Two of the 76 improper checks (3014 and 3448) were listed as being issued for wages to other city employees for \$378 and \$197, while the actual checks were issued to the former City Clerk for \$250 and \$280. These check amounts are included in the overpayments and improperly negotiated checks discussed earlier, and are reflected in other appendixes as noted on Appendix F.

Additional falsified disbursement listings may have been prepared during other months of 2014, 2015, and 2016; however, the city could not provide these records.

Undeposited utility receipts

The former City Clerk did not deposit \$43,596 of recorded utility receipts and only deposited \$1 in cash during the year ended December 31, 2014; periods of 2015 including January 1 through February 2, March 17 through April 30, and December 5 through December 31; and the period January 1 through April 18, 2016 (see Appendix G) or approximately 19 months. Ninety-five percent (\$41,522) of the undeposited receipts were likely cash payments. The remaining \$2,074 of the undeposited receipts related to recorded payments from utility customers that typically paid by check, but related check payments were not located in deposits and are considered missing.

Our review of utility bank deposits made during January through April 2017 (after the termination of the former City Clerk), determined an average of \$11,715 of total utility receipts were deposited each month, with an average of \$2,341 or 20 percent of this total deposited being cash. There was no significant change in the number of utility customers between 2014 and 2017; however, in July 2016, residential base utility rates increased from \$15 to \$17.50 a month and commercial base utility rates increased from \$20 to \$25 per month, which represents an increase in monthly utility revenues of approximately \$730.

In comparison, during the approximate 19 months reviewed (when the former City Clerk was employed), only \$1 of utility receipts deposited was cash and

City of Greenville
Management Advisory Report - State Auditor's Findings

the average total amount deposited each month was approximately \$7,000,³ almost \$4,000 less than the total monthly average deposited in the first 4 months of 2017 (after adjusting for the rate increases). Based on this comparison it is likely unrecorded utility receipts are also missing.

The former City Clerk recorded utility payments on manual payment logs, computerized utility reports, and on manual receipt slips. However, some of these records were not retained for various periods reviewed. We compared payments recorded in the records retained to deposits to determine the amount of undeposited utility receipts. The method of payment was not typically noted on the various receipt records; however, some utility customers typically paid with cash. The method of payment noted on Appendix G was determined by comparing available payment records to the contents of deposits.

Estimated undeposited
utility receipts

The former City Clerk did not deposit an estimated \$15,966 of utility receipts during the months of February,⁴ May through November of 2015 and the period March 1 through March 16, 2015. The city could not provide payment logs, utility reports, and manual receipt slips for these periods.

Based on amounts documented in Appendix G, we calculated a monthly average of undeposited cash receipts totaling \$1,803³ or 20 percent of total amounts deposited that was used in the calculation of the estimated undeposited utility receipts for these 8 full months (\$14,424). For the period March 1 through March 16, 2015, we reduced the monthly average for recorded cash receipts shown on Appendix G for March 17 and March 30, 2015, from \$1,803 to \$1,542.

Our review of utility bank deposits during this approximate 8 1/2 month time period showed less than \$1 of cash being deposited, and the average total amount deposited each month totaled \$6,825,⁵ almost \$4,200 less than the total monthly average deposited in the first 4 months of 2017 (after adjusting for the rate increases), showing it is likely there are also unrecorded utility receipts missing.

Undeposited municipal
division receipts

The former City Clerk did not deposit \$9,667 of recorded municipal division receipts from January 1, 2014, through April 14, 2016 (see Appendix H). Each case file included an amount assessed and a copy of the related ticket.

³ February and March 2015 deposit activity reported on Appendix G was excluded from our average calculations due to incomplete activity for each month. December 2015 deposit activity was also excluded due to the unusual nature of some recorded payments.

⁴ The deposit made on February 2, 2015, on Appendix G was for January 2015 receipts; therefore, we estimated the amount not deposited for the entire month of February 2015.

⁵ March 2015 activity was excluded from our average calculations because complete activity for this month was not available.

City of Greenville
Management Advisory Report - State Auditor's Findings

The former City Clerk recorded payments to multiple different records (manual receipt slips, agreement to pay forms, copies of tickets, and the outside of the case file folders) and did not ensure payments were consistently and properly recorded to all appropriate records. We compared payments recorded on any of these records to deposits and determined the undeposited receipts.

Overall conclusion

The lack of segregation of duties and adequate controls, and the absence of proper oversight, as discussed in the remainder of this report, resulted in the overpayments, improper payments, improperly negotiated city checks, falsified records, and missing receipts going undetected for a significant period of time. The unusual nature and lack of supporting documentation for various cash withdrawals and checks written, should have caused suspicion and alerted the Board to the misappropriation. It is apparent city financial activity was not adequately monitored by the Board.

Recommendation

The Board of Aldermen continue to work with law enforcement officials regarding criminal prosecution of the improper payments, inappropriately negotiated city checks, the falsified records, and the undeposited receipts, and take the necessary actions to seek restitution.

Auditee's Response

We will continue to work with law enforcement officials regarding criminal prosecution and seek restitution as best we can.

2. Oversight, Annual Audits, and Bond Coverage

The Board did not establish adequate oversight of the former City Clerk, obtain annual audits as required by state law, or obtain bond coverage for applicable officials and employees.

2.1 Oversight and segregation of duties

The Board did not establish adequate segregation of duties or supervisory reviews over the various financial accounting functions performed by the former City Clerk as identified in the background section. Weaknesses identified throughout this report are significant and demonstrate a lack of segregation and proper oversight by the Board. There is little assurance city monies were handled and accounted for properly.

In addition, 239 checks issued to the former City Clerk (many of which were improper) and the majority of city checks issued during the period of our review were for less than \$1,000, and as a result, were only signed by the City Clerk. According to Board members and the Mayor, checks over \$1,000 were to be co-signed by the Mayor. Dual authorized signatures help provide assurance that checks represent payment for legitimate city disbursements. Failure to require dual signatures on all checks is a significant control weakness and along with the lack of review of bank statements or canceled

City of Greenville Management Advisory Report - State Auditor's Findings

checks by anyone other than the former City Clerk allowed the improper checks and overpayments to occur.

Proper segregation of duties helps ensure transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, timely supervisory or independent reviews of work performed and investigation into unusual items and variances is necessary. Good management practices require extensive and detailed oversight by the Board.

2.2 Annual audits

The city does not obtain annual audits as required and city officials do not know when the last audit of city finances occurred. Section 250.150, RSMo, requires the city to obtain annual audits of the combined waterworks and sewerage system, and the cost of the audit is to be paid from the revenues received from the system.

2.3 Bonding

The city did not have bond coverage for city employees or officials. The former City Clerk, the Mayor, and Board members, who signed checks and had access to monies held in bank accounts, were not covered by a bond. Failure to properly bond individuals with access to funds exposes the city to risk of loss. Had the city obtained bond coverage, some of the improper payments and missing monies may have been covered by a bonding company.

Recommendations

The Board of Aldermen:

- 2.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures. In addition, the Board should require dual signatures on all checks.
- 2.2 Obtain annual audits of the waterworks and sewerage system as required by state law.
- 2.3 Maintain bond coverage for all personnel with access to city monies.

Auditee's Response

- 2.1 *A member of the Board currently documents the review of timesheets, reviews bank statements and all canceled checks and will document this review on the bank statements in the future. Dual signatures are now required on all checks, signature authority is limited to 3 Board members, and the City Clerk does not sign any checks.*
- 2.2 *We will start obtaining an annual audit in accordance with state law.*
- 2.3 *We have obtained bond coverage for all personnel with access to city monies.*

City of Greenville
Management Advisory Report - State Auditor's Findings

3. Accounting Controls and Procedures and Disbursements

3.1 Receipting, recording, and depositing

Significant weaknesses exist in the city's accounting controls and procedures. The city's primary revenue source includes various taxes electronically deposited into the city's bank accounts. The city's other primary revenue source is water and sewer customer payments. Utility payments, license, and miscellaneous fees received by the city are collected through the mail, in person, or in the collection box at city hall.

The city's procedures for receipting, recording, and depositing monies were poor. As a result, there is no assurance all monies collected were properly receipted and deposited.

- The former City Clerk did not always issue manual receipt slips for monies received. Per city officials, the former City Clerk's procedure was to issue manual receipt slips, and/or record utility payments and utility deposits on manual payment logs, and then record these payments into the computerized utility system. Invoices were prepared for merchant and liquor licenses due and would sometimes be marked paid and retained in a file folder. Manual receipt slips were sometimes issued for utility receipts, merchant and liquor licenses, gathering hall and booth rental fees, accident reports, and municipal division receipts; however, a complete record of all monies received was not maintained.
- Some manual receipt books were missing. Only 2 manual receipt books were retained containing copies of receipts issued from September 2, 2015, through March 29, 2016, (1 book) and February 29, 2016, through April 15, 2016 (other book). As noted in MAR finding number 5.1, some copies of receipt slips from the missing manual receipt books were included in case files.
- The former City Clerk did not always timely record utility payments in the computerized utility system. Our review of utility system reports retained indicated that during some time periods the former City Clerk would only record utility receipts in the system once or twice a month and did not record the payments on the date received.
- The former City Clerk did not consistently indicate the method of payment, or reconcile the method of payment to the composition of receipts recorded in the computerized utility system or to the deposit. The method of payment was not indicated on 29 of 156 (19 percent) of manual receipt slips reviewed.
- The former City Clerk did not deposit receipts timely or intact. The former City Clerk generally deposited monies once or twice a week. Total deposit amounts ranged from \$50 to \$3,930, and averaged \$1,005 for each deposit.

City of Greenville
Management Advisory Report - State Auditor's Findings

Failure to implement adequate receipting, recording, and depositing procedures increases the risk that loss, theft, or misuse of funds will go undetected.

3.2 Bank accounts, reconciliations, and fees

Number of bank accounts

Controls and procedures over bank accounts and reconciliations need improvement.

The city maintains an excessive number of bank accounts, resulting in cumbersome record keeping. The city maintained 15 checking accounts (an account for each of the city's 15 funds) and 3 certificates of deposit (CDs). Two of these checking accounts and the 3 CDs have subsequently been closed. The large number of bank accounts may have helped conceal the improper checks.

Bank reconciliations

Monthly bank reconciliations were not performed by the former City Clerk from January 1, 2014, through March 31, 2016. Neither the Board members nor the Mayor reviewed these monthly bank statements and the accompanying images of deposit slips and canceled checks. Bank reconciliations have been performed since the current City Clerk was appointed in June 2016, and the Board currently reviews bank statements and the accompanying images of deposit slips and canceled checks.

Overdraft and minimum balance fees

The Board and the former City Clerk failed to monitor the city's cash balances. As a result, the city incurred \$332 in bank fees in the General, Water, Cemetery, Capital Improvement and Special Fund bank accounts during the period January 1, 2014, through April 30, 2016.

The city may benefit from combining some city bank accounts. A large number of bank accounts requires additional record keeping and increases the likelihood that errors may occur. The preparation and retention of formal monthly bank reconciliations is necessary to ensure accounting records are accurate and in balance and to identify errors timely. To prevent bank account overdraft and minimum balance charges, the city should more closely monitor bank account balances.

3.3 Excessive and unauthorized transfers and commingling of restricted funds

The former City Clerk made excessive and unauthorized transfers between various bank accounts, and did not always deposit utility receipts into the proper bank account, which led to commingling of restricted funds. The excessive and unauthorized transfers and incorrect deposits helped conceal shortages in city bank accounts.

- The city's accounting records indicated 64 transfers totaling \$127,318 were made between bank accounts during the period January 1, 2014, through April 14, 2016. Forty-six of these transfers were for small dollar amounts (less than \$900). The majority of these transfers were not approved by the Board and inappropriately made from various restricted funds.

City of Greenville Management Advisory Report - State Auditor's Findings

- The former City Clerk routinely incorrectly deposited utility receipts into non-utility bank accounts. During the period August 19, 2014, through April 14, 2016, 40 utility payments, totaling \$9,469, were deposited into the Police Department or the General Fund bank accounts.

To ensure restricted monies are used for the intended purpose, monies received should be deposited into the appropriate bank account. In addition, Section 250.150, RSMo, restricts the use of water and sewer monies for operating the systems, payment of bonds, establishment of a reserve, fulfillment of any agreements contained in ordinances, and payment of costs of improvements of such systems.

3.4 Utility deposits

Refundable utility deposits held in the water bank account are not accounted for properly. The former City Clerk did not keep a listing of deposits held and was not properly tracking them. Effective August 2014, city Ordinance 53.100 requires a \$50 deposit for homeowners and a \$100 deposit for renters when an account is activated. The city currently has approximately 245 water/sewer accounts, but customer account records are not adequate to determine the amount of deposits held. The water bank account balance was \$2,229 as of April 30, 2016, resulting in a shortage of refundable utility deposits.

Refundable utility deposits are restricted funds held for customers. The Board should review utility customer deposit records to ensure all customer deposits are accounted for properly. In addition, the City Clerk should maintain an accurate list of all utility deposits held and reconcile the list monthly to monies held in the water bank account.

3.5 Licenses and rental fees

Prenumbered forms are not used for merchant and liquor licenses and gathering hall and festival booth rental fees, and records were not retained to account for the collection and deposit of these fees. Utilizing prenumbered forms and periodically accounting for their numerical sequence and reconciling those forms to related deposits would help ensure all monies are properly recorded and deposited.

3.6 Record retention

As mentioned in MAR finding numbers 1, 3.1, 3.5, 4.1, and 5.1, various financial and personnel records were not maintained. Some records were recovered by city officials from a city dumpster shortly after the termination of the former City Clerk.

Retention of records is necessary to ensure the validity of transactions and provide an audit trail. Section 109.270, RSMo, provides that all records made or received by an official in the course of his/her public duties are public property and are not to be disposed of except as provided by law. Section 109.255, RSMo, provides that the Local Records Board issue directives for

City of Greenville
Management Advisory Report - State Auditor's Findings

the destruction of records. Record retention schedules can be found on the Secretary of State's website.⁶

Recommendations

The Board of Aldermen:

- 3.1 Require issuance of receipt slips for all monies received with the method of payment indicated and reconciliation of the composition of receipts to the composition of amounts recorded and deposited. The Board should also ensure receipt slips are retained and monies received are deposited timely and intact.
- 3.2 Evaluate the number of bank accounts. The Board should also properly monitor bank account balances to avoid bank fees.
- 3.3 Monitor and reduce the number of transfers made between bank accounts and ensure monies received are deposited in the appropriate bank accounts.
- 3.4 Account for customer utility deposits previously paid, prepare an accurate list of utility deposits and reconcile to monies in the water bank account monthly, and resolve any discrepancies.
- 3.5 Require prenumbered forms for licenses and rentals, properly account for the numerical sequence of the forms, and reconcile the related monies collected to deposits.
- 3.6 Retain records in accordance with state law.

Auditee's Response

- 3.1 *We will start issuing receipt slips indicating the method of payment for all monies received, and we will retain all manual receipt slips. We will reconcile the composition of the receipts to the composition of deposits. We will ensure deposits are made intact and timely, with deposits being made at least weekly.*
- 3.2 *We reduced the number of bank accounts, and a Board member is reviewing bank statements to monitor account balances and for bank fees.*
- 3.3 *We currently approve the transfer of all funds made by the City Clerk, and a Board member reviews the bank statements for any transfers made. The City Clerk currently deposits monies into the appropriate bank accounts, and a Board member reviews bank statements and deposit slips to ensure monies are deposited appropriately.*

⁶ <https://www.sos.mo.gov/archives/localrecs/schedules>

City of Greenville
Management Advisory Report - State Auditor's Findings

- 3.4 *We are now maintaining a list of deposits and will restrict those monies within the water bank account. We will reconcile the list to the restricted balance within the water bank account.*
- 3.5 *In the future, merchant and liquor licenses will be prenumbered and prenumbered receipt slips will be issued for all monies received. We will account for the numerical sequence of licenses and receipt slips.*
- 3.6 *We will ensure records are retained in accordance with state law.*

4. Payroll Policies, Records, and Taxes

Significant improvement regarding personnel policies, employee records, and remitting payroll taxes is needed.

4.1 Personnel policies and files

The city had not established personnel policies addressing overtime, holidays, vacation and sick leave, employee benefits, uniform allowances, and hours of work, and a personnel file was not retained for the former City Clerk. Had personnel policies been established and a personnel file retained, additional evidence would have been available to support the former City Clerk's pay rate, payroll withholdings, and vacation and sick leave.

A current city employee, who has been employed since January 2011, indicated 1 week of vacation is given for the first year of service and 2 weeks of vacation for subsequent years. This employee also indicated vacation leave is earned at the start of each calendar year and is to be used by the end of the year. In addition, the May 6, 2014, Board meeting minutes indicated 3 sick days a year were provided to each employee, including the former City Clerk.

Written personnel policies are necessary to ensure equitable treatment of employees and prevent misunderstandings. Personnel files should at a minimum contain documentation of the Board's authorization for hiring the employee, the employee's authorized pay rate, and any subsequent changes in pay rate. In addition, the Internal Revenue Service (IRS) requires employers to ensure a W-4 form is completed by each employee to support payroll withholding and taxes. Also, according to the Immigration Reform and Control Act of 1986, an individual may not begin employment unless an I-9 form is completed. Employers are subject to civil or criminal penalties if they do not comply.

4.2 Payroll taxes and unreported compensation

The former City Clerk did not timely file and remit various payroll taxes, and concealed some of these untimely filings and payments by falsifying disbursement listings provided to the Board as discussed in MAR finding number 1 and presented in Appendix F.

- The former City Clerk did not timely file 941 forms and remit applicable payroll taxes, totaling \$59,629, to the IRS for the period March 2014

City of Greenville Management Advisory Report - State Auditor's Findings

through December 2015, resulting in an assessment of interest totaling \$6,335.

- The former City Clerk did not timely file and remit applicable payroll taxes, totaling \$5,114, to Missouri Department of Revenue (DOR) for the period February 2015 through December 2015, resulting in an assessment of interest totaling \$531.
- The former City Clerk did not timely file quarterly contribution and wage reports and remit unemployment taxes totaling \$155 to the Missouri Department of Labor and Industrial Relations, Division of Employment Security, for the second, third, and fourth quarter of 2015, resulting in an assessment of penalties totaling \$400.

Also, overpayments and improper payments identified in MAR finding number 1 were not included on the former City Clerk's W-2 forms and not subject to payroll tax withholdings.

The Internal Revenue Code requires employers to file a 941 form by the last day of the month following the end of the quarter, along with payment of Social Security and Medicare taxes withheld from employees and the employer's share, as well as federal income taxes withheld. Similarly, Chapter 143, RSMo, includes requirements for reporting wages and withholding state income taxes. Missouri Employment Security Law, Section 288.160.2, RSMo, states that if any employer neglects or refuses to file any report by the last day of the month following the due date there shall be imposed a monthly penalty not to exceed the greater of \$200 dollars or 20 percent of the contributions. The IRS requires employers to report all compensation on W-2 forms and withhold and remit income and payroll taxes.

Recommendations

The Board of Aldermen:

- 4.1 Adopt detailed personnel policies addressing requirements of employees and benefits provided, and maintain personnel files for all city employees.
- 4.2 Establish procedures to ensure all compensation is properly reported and payroll taxes are properly withheld and remitted to the appropriate taxing entities timely. In addition, the former City Clerk's W-2 forms should be amended as appropriate.

Auditee's Response

- 4.1 *We will adopt personnel policies addressing overtime, holidays, vacation and sick leave, benefits, clothing allowances, and hours of work. We will ensure personnel files are maintained for all employees.*

City of Greenville
Management Advisory Report - State Auditor's Findings

4.2 *We currently review payroll tax reports quarterly and payroll tax payments monthly. We will also contact the IRS and Missouri Department of Labor and Industrial Relations to determine the appropriate reporting methods for the overpayments and improper payments.*

5. Municipal Division

We identified significant weaknesses with accounting controls and procedures of the municipal division. As a result, there is no assurance all municipal division receipts are accounted for properly. The former City Clerk also served as the Court Clerk until her termination.

5.1 Missing records

Several case files could not be located by the municipal division. In addition, as noted in MAR finding number 3.1, some manual receipt books were not retained; however, some case files contained copies of manual receipt slips issued from the missing receipt books.

Supreme Court Operating Rule 4.08 requires municipal divisions to maintain a docket or backer sheet for each case. All information regarding the case should be documented including, but not limited to, a copy of the ticket, case number, defendant name, sentence, bond information, warrant information, and disposition of the case. In addition, Supreme Court Operating Rule No. 8.04.7 requires all financial records be maintained for 5 years or until completion of an audit. Retention of applicable records is necessary to properly account for the municipal division's financial activity.

5.2 Oversight

Neither the municipal division nor city personnel performed adequate supervisory or independent reviews of accounting functions and records. The former Court Clerk was responsible for all duties related to collecting and recording monies, posting fines and court costs into the manual case records, preparing and making deposits, and making disbursements. Neither the Municipal Judge nor other personnel independent of the cash custody and record-keeping functions provided adequate supervision or review of the work performed by the former Court Clerk. In addition, the former Municipal Judge did not approve the final disposition of cases brought before the court or the fines handled through the Violations Bureau (VB), and the Municipal Judge's approval of amended and dismissed tickets was not documented.

To reduce the risk of loss, theft, or misuse of funds going undetected, the municipal division should ensure documented supervisory or independent reviews of accounting records are conducted. In addition, to ensure the proper disposition of all cases has been entered in the municipal division records, the Municipal Judge should sign the final docket sheet to indicate approval of the recorded disposition.

City of Greenville
Management Advisory Report - State Auditor's Findings

5.3 Receipting, recording, and depositing

The municipal division's procedures for receipting, recording, and depositing were poor. As a result, there was no assurance all monies collected were properly receipted, recorded or deposited.

- The former Court Clerk did not always issue manual receipt slips for monies received and did not always record the method of payment on receipt slips issued. Bank records showed numerous payments deposited, but not receipted.
- The former Court Clerk recorded payments to multiple different records and did not ensure payments were consistently and properly recorded to all appropriate records. The former Court Clerk recorded municipal division payments to multiple different records including; manual receipt slips, agreement to pay forms, ticket copies, and case file folders. The manner in which payments were recorded also varied and was inconsistent. In some instances all details of the payment (date, amount, and method of payment) were recorded, and in other instances, the case file folder or copy of ticket was marked paid.
- The former Court Clerk did not deposit receipts timely or intact. For example, a \$176 money order dated November 12, 2015, was not deposited until January 14, 2016, while a \$433 check dated November 19, 2015, was deposited on December 1, 2015.

To reduce the risk of loss, theft, or misuse of monies received going undetected, procedures should be established to ensure all monies received are properly receipted, recorded, and deposited.

5.4 Disbursement and reporting

The former Court Clerk did not disburse fines and court costs timely. In addition, the former Court Clerk did not submit monthly caseload summary reports to the city or monthly reports of court activity to the Office of the State Courts Administrator (OSCA) during the period July 1, 2014, through April 14, 2016.

For example, the former Court Clerk issued 8 checks on December 4, 2015, to the Crime Victims Fund totaling \$285. The memo lines of the 8 checks indicated: July 2014 - 4 cases, September 2014 - 1 case, November 2014 - 3 cases, January 2015 - 11 cases, March 2015 - 5 cases, July 2015 - 7 cases, September 2015 - 1 case, and November 2015 - 8 cases. In addition, the former Court Clerk did not disburse any of the Peace Officer Standards and Training Commission fees collected to the state or any court costs and fines collected to the city during the period July 1, 2014, through April 14, 2016.

Section 479.080.1, RSMo, requires all fines and court costs to be paid to or deposited into the city treasury at least monthly. Supreme Court Operating Rule 4.29 and Section 479.080.3, RSMo, require the Court Clerk

City of Greenville Management Advisory Report - State Auditor's Findings

to prepare a monthly report of all cases heard in the municipal division court. The report is to be verified by the Court Clerk or Municipal Judge and filed with the city. In addition, Missouri Supreme Court Operating Rule 4.28.3 indicates municipal divisions should report all court activity to OSCA monthly.

5.5 Violation Bureau schedule

The former Municipal Judge had not issued a court order for the schedule of fines and court costs to be collected on tickets paid through the VB, and if a schedule of fines and court costs was used by the former Court Clerk to assess court costs and fines during the period July 1, 2014 through April 14, 2016, it could not be located at the VB. The lack of an approved schedule of fines and court costs and independent review of fines and costs assessed (as discussed in MAR section number 5.2) increases the risk that fines and costs could have inappropriately been assessed and collected by the former Court Clerk.

Supreme Court Rule No. 37.49(d), requires the Municipal Judge to establish a schedule of fines and court costs for each offense by court order and prominently post the established schedule at the VB.

Recommendations

The City of Greenville Municipal Division:

- 5.1 Ensure necessary records are retained.
- 5.2 Ensure documented periodic independent or supervisory reviews of municipal division records is performed, and ensure the Municipal Judge approves the final disposition of all cases and reviews and approves all amended and dismissed tickets.
- 5.3 Properly receipt, record, and deposit all monies received.
- 5.4 Ensure court fees are disbursed within 30 days of receipt and monthly reports are submitted timely to the city and OSCA.
- 5.5 Establish the VB schedule by court order and prominently post the schedule.

Auditee's Response

The City of Greenville Municipal Division Judge, Board of Alderman, City Attorney, and Court Clerk provided the following responses:

- 5.1 *We will retain court records in accordance with state law. We also plan to start using the state's automated court system.*
- 5.2 *The Board will work together with the City Attorney and Municipal Judge to provide adequate oversight of the Court Clerk. The Municipal Judge indicated she will ensure all court dockets are*

City of Greenville
Management Advisory Report - State Auditor's Findings

reviewed and signed and all amended and dismissed tickets are properly reviewed by the City Attorney.

- 5.3 *In the future, we will ensure all monies are receipted, recorded, and deposited timely, with deposits made at least weekly.*
- 5.4 *We will ensure all court fees are disbursed monthly and reports are submitted monthly to the city and the OSCA.*
- 5.5 *The Municipal Judge indicated she will approve a VB schedule by court order and ensure it is posted at city hall.*

6. Electronic Data Security

The city has not developed a formal, written contingency plan for resuming normal business operations and recovering computer systems and data in the event of a disaster or other extraordinary situations. In addition, city personnel did not regularly back up data or periodically test backup data to ensure essential data could be restored, and did not always store backup data at a secure off-site location.

City officials indicated the utility system software provider used during the period January 1, 2014, through April 14, 2016, was purchased by another software vendor and the city discontinued using this software in October 2016. City officials were unable to access the old utility software system or retrieve information from back up data, and as a result, data could not be provided by the city, as noted in MAR finding number 1.

A formal, written contingency plan should be prepared, and periodically tested and updated as needed to address actions for restoring computer systems should a disaster or other extraordinary situation occur. In addition, completing regular data backups and periodically testing the backup data helps ensure current data is available to be restored and is complete and reliable. Storing backup data in a secure off-site location provides increased assurance city electronic records could be restored if necessary.

Recommendation

The Board of Aldermen develop a formal, written contingency plan that is periodically tested, evaluated, and updated as needed. The Board should also require data to be backed up regularly, tested on a periodic basis, and stored in a secure off-site location.

Auditee's Response

We will develop a contingency plan and test data back ups, and we are now backing up data monthly, and the new utility software company also backs up data and stores it off-site.

City of Greenville

Organization and Statistical Information

The City of Greenville is located in Wayne County. The city was incorporated in 1819 and is currently a fourth-class city. The city employed 5 full-time employees and 3 part-time employees on June 30, 2015.

City operations include utility services (water and sewer), police, maintenance of streets, and parks and recreation.

Mayor and Board of Aldermen

The city government consists of a mayor and a 4-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at April 30, 2016, are identified below. The Mayor is paid \$50 per month and Board of Aldermen members are paid \$10 per month.

Carroll Rainwater, Mayor
Larry Burchard, Alderman
Rendell Wills, Alderman
Jarred Costephens, Alderman
Mack Lawrence, Alderman (1)

(1) Resigned from the Board in December 2016, and the Board subsequently appointed Carl Rickman as an Alderman in January 2017.

Financial Activity

A summary of the city's financial activity, prepared using the city's bank statements, for the year ended June 30, 2015 is as follows:

City of Greenville
Organization and Statistical Information

Total net pay per checks			\$ 74,100.25				\$ 43,858.75	27,221.97	1,371.08	857.35	791.10	74,100.25
Net payroll per 2014 and 2015 timesheets			\$ 34,830.43									
Adjustment for insurance deductions in 2015 (7)			1,027.52									
Adjusted net payroll for 2014 and 2015			35,857.95									
Total overpayments in 2014 and 2015			\$ 38,242.30									

(1) The date noted on the check is January 10, 2013; however, based on check number sequence and date cleared, it was likely written on January 10, 2014.

(2) The former City Clerk withdrew cash using a cash withdrawal ticket at the bank.

(3) The former City Clerk purchased a money order payable to Banner Finance.

(4) Bank officials provided documentation showing the former City Clerk paid \$26.64 in cash along with \$180.10 of the listed check for a total payment of \$206.74 towards her son's (Austin Birmingham) loan.

(5) Bank officials provided documentation showing the former City Clerk paid \$67.01 in cash along with the listed check of \$395.10 and purchased a money order totaling \$462.11 payable to the United States Treasury.

(6) Bank officials provided documentation showing \$125.01 was deposited into the former City Clerk's bank account and \$300 was deposited into her son's (Austin Birmingham) 2 personal bank accounts (\$150 was deposited into each account).

(7) During 2015, the former City Clerk's timesheet included a deduction for insurance of \$19.76 each week totaling \$1,027.52 for the year, but the city did not provide the former City Clerk with health insurance. Since we could not determine the disposition of these amounts, we adjusted net payroll amounts for these insurance deductions.

Estimated net pay for 2016 (2)			5,402.00								
Total overpayments in 2016			\$ 5,548.84								

(1) Final paychecks account for \$1,121.14 of the total overpayments - \$79.53 of check number 3668 and all of check number 3671. These 2 final paychecks were the only checks signed by both the former City Clerk and former Mayor Bennett.

All other checks were only signed by the former City Clerk.

(2) The former City Clerk's total net pay for the period of January 1, 2016, through April 14, 2016, was estimated using weekly pay periods (Monday through Friday), and hourly rates and withholding information used during the latter part of 2015.

4/4/2016	3639	200.00	Petty cash	General	4/4/2016	Cashed
	Total	\$ 39,535.61				

(1) Check was endorsed "City of Greenville Pam Birmingham" written in the former City Clerk's scripted handwriting unless otherwise indicated by (3) or (6).

(2) Check was negotiated at the city's bank, People's Community Bank, unless otherwise indicated by (5) or (6).

(3) Check was not endorsed.

(4) Checks were used to purchase a money order in the amount of \$713.24 made payable to a dental provider for personal dental services of the former City Clerk.

(5) Check was negotiated at First Midwest Bank, where the former City Clerk maintains a personal bank account.

(6) Check was initially endorsed "City of Greenville Pam Birmingham," but that endorsement was marked through and the restrictive endorsement of a local gas station applied.

(7) The check was issued for \$300 and \$192.97 of this amount was supported by invoices for an Independence Day park event; leaving \$107.03 considered as improper.

* The table provides supporting documentation for the undeposited utility receipts totaling \$43,596.21 for the year ended December 31, 2014; periods of 2015 including January 1 through February 2, March 17 through April 30, and December 5 through December 31, 2015; and the period January 1, 2016, through April 18, 2016; the time periods during which utility reports, payment logs, and/or manual receipts slips were available.

- (1) Method of payment was not recorded on payment logs, utility reports, and some of the manual receipt slips. Therefore, the method of payment was determined to be cash based on a comparison of payment records to the contents of deposits.
- (2) The former City Clerk recorded payments totaling \$5,387.18 to seven old, inactive accounts on December 21, 2015, that were unusually large amounts, not typical of a monthly utility payment.
- (3) Receipt activity was summarized for December 2015 and January, February, March, and April of 2016 because initial receipt records were not available and utility payments were not posted in the computerized utility system at time of receipt.
- (4) Computerized utility records indicate payments were received on these accounts. For previous months reviewed these utility customers paid their utility bills by check. However, check payments for January through March 2016 were not located in deposits and are missing.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Director of Public Safety
and
Chief of Police - St. Louis Metropolitan Police Department
and
Building Commissioner
City of St. Louis, Missouri

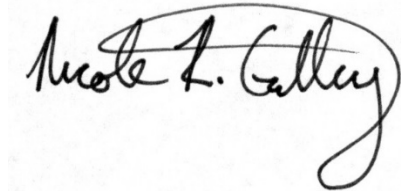

We have compiled the statuses of the audit report findings contained in the following reports as part of our current audit of the City of St. Louis: 1) Report No. 2009-122, *City of St. Louis, Department of Public Safety*, issued in November 2009; 2) Report No. 2009-123, *St. Louis Board of Police Commissioners*, issued in November 2009; and 3) the applicable audit report findings contained in Report No. 2009-60, *City of St. Louis, Lead Safe St. Louis Program*, issued in June 2009. The functions of the Lead Safe St. Louis Program are performed by the Community Development Administration, Department of Public Safety - Building Division, and Department of Health; therefore, applicable follow-up statuses for the Lead Safe St. Louis Program have been included in these agency follow-up reports. In addition, upon vote of the citizens of the City of St. Louis, the oversight of the St. Louis Metropolitan Police Department transferred from the former St. Louis Board of Police Commissioners to the city's Department of Public Safety in September 2013. Therefore, follow up statuses of the St. Louis Board of Police Commissioners are included in the Department of Public Safety follow-up report.

These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Department of Public Safety. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Department of Public Safety that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May and September 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is written in a cursive style with a large, looping "G" at the end.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Department of Public Safety

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Commissary

Finding Number: 1.A.

Finding: The Corrections Division did not prepare monthly bank reconciliations for the commissary account.

Recommendation: The Department of Public Safety (DPS) require monthly bank reconciliations be prepared for the commissary account.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Following the audit, the DPS - Corrections Division hired a temporary accountant and a clerk to complete outstanding bank reconciliations for the Inmate Trust Fund (Trust Fund) and the 1730 Inmate Fund (Inmate Fund). The Inmate Fund holds the commissions received on inmates' purchases of phone cards, commissary, etc.

Accounting staff use financial data from bank statements, various source documents, and the Keefe Commissary system (Keefe) reports to identify financial transactions that were not recorded in the banking system, identify and investigate discrepancies, and reconcile bank transactions with the appropriate commissary account. Staff also contact bank personnel concerning reimbursement of potential fraud.

When appropriate, checks are cut for inmate accounts with balances due, such as restitution or medical fees; checks and supporting documents are then forwarded to the Treasurer's office for deposit into the appropriate fund. In other circumstances, vouchers are prepared for outstanding liabilities and processed for payment. Inactive inmate accounts with balances are identified and forwarded to the State Treasurer where they are posted to the unclaimed property website.

Keefe has recently converted to an online system, which has improved the accuracy of account reconciliation. Old discrepancies and transactions that could not be cleared or verified (prior to 2005) have been written off.

Currently, the Corrections Division prepares a monthly reconciliation of the Trust Fund and the Inmate Fund. Specifically, monthly reports are run for inmate payroll, etc. Reported amounts are compared to amounts in Keefe, and check vouchers are prepared. Checks are cut from the Inmate Fund, deposited in the Trust Fund, and entered into Keefe.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Commissary

Finding Number: 1.B.1.

Finding: The Corrections Division did not prepare liabilities lists.

Recommendation: The DPS require liabilities lists be prepared on a monthly basis and reconciled to the cash balance.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Corrections Division currently uses a classified balance sheet to create a list of liabilities and assets which are balanced to the Trust Fund's reconciled cash balance. Liabilities are listed by individual accounts.

Contact Person: Kim Maloney

Contact Phone Number: (314) 621-5848, Ext. 1059

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Commissary

Finding Number: 1.B.2.

Finding: The Corrections Division did not make adequate efforts to review the status of old inmate accounts. At March 31, 2009, inmate accounts for 11,493 inmates on the liabilities list totaled \$143,174. However, the city jails could only house 2,153 inmates. Some liabilities were for inmates who were released from the city jails as far back as 1999.

Recommendation: The DPS ensure the division attempts to resolve unclaimed balances of old inmate accounts and establishes routine procedures to distribute inmate balances of released prisoners in a timely manner.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The procedure to distribute released prisoners' funds depends on their destination. For example, a weekly report identifies inmates that have been transferred to the Missouri Department of Corrections (MDOC) and the Corrections Division forwards their funds on a weekly basis. However, if the inmate is transferred to a facility other than an MDOC facility, the inmate must submit a transfer request on official facility stationary before funds can be forwarded. Finally, if the inmate is released, he/she is able to pick up the funds on site in the form of a debit card.

The Corrections Division currently runs an abandoned funds report to identify inactive inmates with funds held more than 3 years. The Corrections Division attempts to contact any person who has more than \$50 in unclaimed property before funds are transmitted to the Missouri State Treasurer by October 31 of each year, in accordance with state law.

Contact Phone Number: (314) 621-5848, Ext. 1059

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Commissary

Finding Number: 1.B.3.

Finding: The Corrections Division had not established procedures to collect unpaid inmate balances. An inmate has a negative balance if the inmate has charges for medical services and restitution but does not have any monies in the inmate account.

Recommendation: The DPS establish procedures to collect unpaid inmate balances.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Keefe system is now set up to automatically withdraw amounts due to the Corrections Division from the account of any active inmate with available funds. A check is cut from the Trust Fund and forwarded to the city Treasurer for deposit. If there is a balance owed upon inmate release, the debt will be charged to the Inmate Fund.

Restitution and fees for copying medical records are typical charges to an inmate's account. Division policy allows inmates to release funds (in the form of a check) from their trust accounts to individuals outside the facility. There is a \$3.00 fee for processing the release. The fund release will not occur if the inmate's available balance is less than the release amount plus the processing fee.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Commissary

Finding Number: 1.C.

Finding: The agreement for commissary services did not specifically address all services provided by the contractor including collecting and recording monies and personal property received when inmates were arrested.

Recommendation: The DPS ensure agreements address all services provided by the contractor.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Keefe is the contracted vendor for commissary services and all of its duties are noted in the agreement. Concerns about the vendor's responsibility regarding inmate property during intake will be addressed with a contract amendment that spells out the vendor's responsibility more clearly.

It should be noted that this is a joint inventory by Keefe and the Corrections Division. Keefe establishes an inmate account based on monies collected and is responsible for bank deposits which are verified by the Corrections Division. The Corrections Division does not take custody of any cash funds. However, the Corrections Division has custody of non-cash items. The Corrections Division inventories all personal property of newly admitted inmates and provides secure storage for their property.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Expenditures

Finding Number: 2.A.

Finding: The Corrections Division did not adequately review invoices for compliance with contract terms prior to approving payments. The Corrections Division also did not adequately review some invoices and/or supporting documentation.

Recommendation: The DPS ensure invoices are adequately reviewed for validity, accuracy, and compliance with contract terms. In addition, the department should seek reimbursement of overpayments.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Corrections Division maintains a list of current contracts and their terms. The accounting clerk reviews each invoice for accuracy and compliance with contract terms. Charges are checked for accuracy to avoid overpayments. When items are returned, a credit invoice is requested from the vendor. If certain charges like shipping or tax are disallowed, the division pays the adjusted amount.

Non-contract services over \$499.99 but less than \$5,000 are submitted to either the Supply Division or Board of Public Service (BPS) for bids. Typically, facility maintenance services go to the BPS while other services like copier maintenance go to the Supply Division. Non-contract services \$5,000 or greater must go to a selection committee. Generally, contracts are awarded to the vendor with the lowest bid.

The Corrections Division is allowed to use vendors on the contract list of the BPS, the Supply Division, or on a state contract. Non-contract items over \$499.99 are submitted to the Supply Division. Items that are a sole source are also submitted to the Supply Division with the required documentation, and emergency items are submitted for approval with at least 3 bids in order to expedite the process.

The previous audit cited overpayments with the recommendation that the Corrections Division seek reimbursement of overpayments. We do not have the necessary documentation to comment on whether any reimbursements were received.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Expenditures

Finding Number: 2.B.1.

Finding: The Building Division (BD) did not maintain adequate documentation of efforts to compare prices (i.e., phone contacts, inquiries, etc.) for emergency demolitions. The division indicated demolition contractors were called when an emergency demolition was required. However, documentation of the calls and prices obtained were not retained.

Recommendation: The DPS ensure services are obtained through a competitive selection process and documentation of the process is maintained.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Emergency demolitions are now documented and processed within the BD's web-based operating system, implementing this finding.

Finding Title: Expenditures

Finding Number: 2.B.2.

Finding: The BD did not prepare and approve change orders for demolitions.

Recommendation: The DPS require change orders be prepared and approved for changes to contracts.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The BD now completes change orders per the recommendation.

Finding Title: Building Division Receipts

Finding Number: 3.A.

Finding: Numerous employees in the BD collected and received checks and money orders. Various sections of the BD recorded receipts on unnumbered receipt slips which did not always have duplicate copies. In addition, a copy of the receipt slip was not always retained by the section initially receiving the monies even when there were duplicate copies.

Recommendation: The DPS limit the number of employees who receive or handle monies prior to recording and processing payments. The department should also require official prenumbered duplicate receipt slips or a log be prepared and reconciled to transmittals.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Citizens apply for permits (building, demolition, commercial occupancy, and trade) using the Dataflex or STLCity systems. These systems generate a permit application that lists a unique permit number as well as the permit cost, permit type, and work site address.

Citizens pay for permits at the Building Division - Cashier's Office. Currently, only two employees receive payments for permits: the Account Clerk II and the Cashier. These employees process daily payments by recording receipts by permit type on the Receipt Coding Form (RCF), reconciling the RCF to the closing report generated by the cash register, and preparing the deposit. Using reports run in Dataflex and STLCity, the Accountant II audits the RCF by comparing the permit numbers generated to the permit numbers paid for, makes any necessary corrections to the RCF, and forwards the deposit to the Treasurer's office.

All transactions are reconciled to the general ledger on a monthly basis by the Accountant II and reviewed and approved by the Executive Assistant II.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Building Division Receipts

Finding Number: 3.B.

Finding: Licenses and electrical contractor permits issued were not reconciled to monies collected and amounts transmitted. The BD did not note the permit number on some receipt slips issued and could not determine whether a license or electrical contractor permit fee had been collected when the license or permit number was not indicated on the receipt slip. In addition, the BD did not indicate the receipt slip number in the computer system for licenses and electrical contractor permits.

Recommendation: The DPS require licenses and/or permits included on a receipt slip be clearly identified. The department should also reconcile licenses and permits issued to amounts transmitted.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

All trade receipts (mechanical, electrical, and plumbing) are recorded and processed via the BD's web-based operating system. All trade receipts are reconciled to the general ledger on a monthly basis. As recently as 2017, the Internal Audit Section of the Comptroller's office performed a revenue review and issued an audit with no findings.

Finding Title: Building Division Receivables

Finding Number: 4.A.

Finding: Monitoring procedures related to outstanding electrical permit fees were not adequate. The BD allowed electrical contractors to obtain electrical permits and pay the permit fee after the final inspection.

Recommendation: The DPS establish procedures to adequately record and monitor outstanding electric permit fees.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The web-based operating system requires payment of all fees prior to issuance of any electrical permit. Most electrical contractors now utilize escrow accounts to pay for permits.

Contact Person: Randall Mourning

Contact Phone Number: (314) 622-3318

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Building Division Receivables

Finding Number: 4.B.

Finding: The BD did not ensure demolition costs were correctly billed to various property owners. As a result, some property owners were under billed.

Recommendation: The DPS ensure property owners are billed the correct amount for demolition costs.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Currently, the BD issues invoices for demolition through STLCity, a web-based operating system. However, prior to the implementation of this system, the BD did not have the capacity to invoice property owners for demolition charges and relied on Forestry, a division of the Department of Parks, Recreation, and Forestry, to perform this task.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Building Division Receivables

Finding Number: 4.C.

Finding: The BD had not performed a cost benefit analysis to determine when a lien should be placed on property for unpaid building violations. City officials indicated the BD and City Counselor's office informally determined liens should only be filed when a property owner had unpaid fees for at least 10 current building violations due to the cost of filing the lien. While it appeared reasonable the cost of filing a lien could be greater than unpaid fees, there was no documentation a formal cost/benefit analysis was performed.

Recommendation: The DPS perform a formal cost analysis to ensure the city is making the most economical decisions regarding follow up procedures for administrative fee receivables.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A change in state law allows the city to include these past due receivables on the owners' property tax bills, eliminating the need for the City Counselor to assess liens.

Finding Title: Meeting Minutes

Finding Number: 5.

Finding: Meeting minutes for the Board of Appeals were not adequately detailed. Although the meeting minutes recorded decisions made, the meeting minutes did not include the Board member who made or seconded the motion or the votes taken. In addition, the meeting minutes were not reviewed by the Board or signed by a Board member to attest to the completeness and accuracy.

Recommendation: The DPS ensure complete and accurate minutes of the Board of Appeal's meetings are maintained in compliance with state law and signed.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Board minutes are maintained with required compliance. Minutes are entered into our web-based operating system and stored in data silos with retrieval capabilities. Minutes from each meeting contain motions made and the party who seconded the motions. All minutes are compiled, reviewed, and signed by a Board member.

Finding Title: Criminal Cost Billings

Finding Number: 6.

Finding: The Director's office did not have adequate procedures to ensure criminal cost billings to the state for incarceration costs were accurately prepared.

Recommendation: The DPS develop procedures to ensure all criminal costs for incarceration are accurately billed to the state.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Repeated attempts to create an interface between the Circuit Court and the Corrections Division have failed. However, current discussions indicate that the obstacles previously preventing creation of an interface will be overcome with the appointment of former 22nd Judicial Circuit Judge Jimmie Edwards as the Director of Public Safety.

Investigations into deferred revenues revealed new, additional documentation requirements imposed by the MDOC as well as delayed billing. Consequently, the department has partnered with the Regional Justice Information Service (REJIS), the Corrections Division, the Sheriff's office, and the Circuit Court to streamline and improve the criminal cost billing process. These efforts to more fully automate the completion of the bill of costs as well as the reconciliation of the bill of costs to the jail time endorsement will enhance accuracy and processing speed, benefitting both the DPS and the MDOC.

The DPS began implementing the recommendation by developing procedures to ensure all criminal costs for incarceration are accurately billed to the state. The DPS has continued efforts to improve its billing procedures and is currently partnering with REJIS to develop an automated system that will improve efficiency and minimize the possibility of duplicate billing.

Finding Title: Burglar Alarm Controls and Procedures

Finding Number: 7.A.

Finding: The Director's office did not adequately monitor the burglar alarm contract. Although the Director's office approved false alarm appeals and reviewed the calculation of the amount retained by the burglar alarm contractor, the DPS had not conducted a review of the contractor's accounting records nor had it requested the Internal Audit Section of the Comptroller's office conduct a review of the contractor to ensure the accuracy of the gross revenues reported to the department.

Recommendation: The DPS adequately and effectively monitor the operations of the burglar alarm contractor.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

As stated on the Comptroller's office website, the Internal Audit Section focuses its efforts on areas with the greatest risks and makes recommendations for improvements to the efficiency and effectiveness of operations and the adequacy of internal controls over financial information, the safeguarding of assets, and compliance with laws and regulations. However, the Internal Audit Section will also conduct special reviews of areas at the request of a city operating department.

The special review of the burglar alarm controls and procedures issued in July 2010 was completed at the request of the office of the Director. The purpose of the review was to determine if the contractor and the Department of Public Safety effectively and efficiently managed risks to ensure accomplishment of established objectives and goals, and complied with applicable laws, regulations, and contractual obligations; and to review the reliability and integrity of financial and operational information.

The only observation was that collection procedures could be improved. However, more aggressive collection efforts are prohibited by the absence of legislative authority in the alarm ordinance. Currently, the contractor's collection efforts on delinquent accounts with balances greater than \$250 consist of sending bi-annual invoices via certified mail and calling on a 90-day rotating schedule.

The Internal Audit Section has not conducted an audit of burglar alarm controls and procedures as part of its self-initiated activities subsequent to the special review. Going forward, the office of the Director will meet with the Internal Audit Section to determine an appropriate review schedule and implement periodic reviews.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Burglar Alarm Controls and Procedures

Finding Number: 7.B.

Finding: The Director's office had not performed an analysis to determine the most cost effective method to manage burglar alarm fees.

Recommendation: The DPS perform an analysis to determine the most cost effective method for managing burglar alarm fees. Once this analysis is completed, the department should consider whether to manage burglar alarm fees or contract for this service.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In 2010, an internal cost assessment for managing the alarm registration and false alarm management program determined the annual cost to be \$344,045 (including labor, print, postage, transactions fees, and computer hardware and software). Today's cost would be even higher given annual adjustments for inflation, transaction fees, postage, software enhancements, etc.

For fiscal year 2017, the contractor was compensated \$344,159. The contractor absorbed all costs of the support infrastructure, staffing and training, hardware, operating system software, database licensing, network administration, technical support and communication, and printing and mailing services. In addition, the contractor provided support services to alarm owners and alarm companies including staffing a customer service line.

Finding Title: Vehicles

Finding Number: 8.A.

Finding: Records and monitoring procedures for DPS vehicles were not sufficient. The department did not require vehicle usage logs be maintained for its vehicles. In addition, the DPS did not regularly monitor its fleet to ensure vehicles were used efficiently and effectively. Also, the Board of Public Service's Equipment Services Division maintained a fleet management report of all city vehicles, including those of the DPS, which showed the mileage for vehicles when refueled; however, the DPS did not regularly obtain and review the reports to ensure the reports were accurate and vehicles were used efficiently and effectively.

Recommendation: The DPS require the preparation of usage logs for all vehicles and ensure the logs are properly reviewed.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The DPS fully complies with the reporting requirements set out in the City of St. Louis Vehicle Manual, dated November 19, 2010, which was approved by the Board of Estimate and Apportionment in December 2010. Fuel usage is monitored monthly when invoices listing the date, location, and amount of fuel purchased are reviewed and authorized for payment. For the period from July 2016 through April 2018, the average monthly fuel charge was about \$28 per vehicle.

Finding Title: Vehicles

Finding Number: 8.B.

Finding: The Director did not report commuting mileage to the Internal Revenue Service (IRS) as reportable compensation. The Director did not maintain a vehicle usage log to document miles driven for official, commuting, and personal use. The department was unable to show why the director's vehicle should have been exempt from IRS reporting requirements although the director took his vehicle home every day. Department personnel indicated the director needed his vehicle to respond to some public safety emergencies; however, no one could provide the IRS regulation that exempted vehicles for this reason.

Recommendation: The DPS ensure commuting mileage is reported in compliance with IRS requirements or reasons for the exemption status is clearly documented.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

At the time of the original finding a take-home vehicle was assigned to the Director. After the audit, the take-home vehicle assignment was terminated and subsequent directors have driven personal vehicles.

Finding Title: Excise Division Summonses

Finding Number: 9.

Finding: The Excise Division did not maintain adequate records to account for the numerical sequence of summonses issued for violations of city and state liquor laws. A log was not maintained to account for the summonses assigned to officers or issued to violators, or the ultimate disposition of all summonses. The Excise Commissioner did not retain the summons if the Excise Commissioner decided not to forward the violation to the City Counselor's office for any reason such as the lack of severity of the offense.

Recommendation: The DPS ensure records are maintained to account for the numerical sequence of summonses assigned and issued, and the ultimate disposition.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In February 2010, a summons book log was initiated with the first book being numbered 00001 to 00025. Each book contains 25 tickets. The only book that is not listed on the log is 00326 to 00350; however, this book has been located and was either returned by one of the former Liquor Control Officers (LCO) or overlooked when a replacement book was being logged out in 2012. As of September 2018, the last book logged out was 00850 to 00874 on February 24, 2017.

The current system allows each LCO to maintain records of the summonses he/she writes. Once a summons is issued it is sent to the municipal court and the LCO maintains a copy. The Excise Commissioner has proposed a policy of making an extra copy of each summons and maintaining a separate, sequential master list, regardless of who writes the summons.

In 2012 the previous Excise Commissioner elected to suspend obtaining the dispositions from the court. The new Commissioner has requested the dispositions from the Court Administrator's office for 2016 and 2017. The Court Administrator's office reported all but five cases have been disposed of with one still pending, two on payment plans, and two under bench warrants for failure to appear.

Finding Title: Seized and Prisoner Property

Finding Number: 1.A.

Finding: The department could have improved its procedures to dispose of Criminal Activity Forfeiture Act (CAFA) monies on a more timely basis. The department had not properly identified the owners of the monies. The department spent over \$188,000 in seized CAFA monies for various operating expenses, including vehicle purchases, office supplies, and wireless phone bills.

Recommendation: The St. Louis Board of Police Commissioners (SLBPC) continue to implement controls to track and account for all seized monies, including source and disposition, and prohibit paying operating expenditures from seized asset accounts. In addition, the SLBPC should continue to research and identify recipients for remaining unidentified monies or turn over the monies to the State Treasurer's Office Unclaimed Property Division.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

An Access database and Excel spreadsheets have been established and used for all seizures with step-by-step accountability of where the asset is at all times. The State Treasurer's Office Unclaimed Property Division is still used for assets that are to be returned to the owner when the owner cannot be located. The strict control processes implemented in 2007 are still being followed today.

Finding Title: Seized and Prisoner Property

Finding Number: 1.B.

Finding: Over \$4,100 in prisoner cash and property became missing while in police department custody during the 2 years ended June 30, 2008.

Recommendation: The SLBPC continue to implement controls to ensure prisoner cash and other property is safeguarded and require independent verification of property held.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In January 2009, the department implemented new inmate property control measures for money and non-currency valuables including the following:

Inmate property money bag: Form GEN-388 is a clear sealable 4" x 8" plastic bag, with pre-printed designations for pedigree, currency breakdown with monetary denominations, and places for signatures.

Inmate valuable bag: Form GEN-403 is a clear sealable 4" x 8" plastic bag, with pre-printed designations for pedigree, jewelry type, and quantity.

Both bags are used in conjunction with the current inmate property bag, GEN-86. They all have tamper-proof sealing where someone cannot re-open without destroying the bag. All are clear heavy plastic and visual inspection of their contents is evident.

This procedure is covered under special order 8-01, Arrest, Booking and Related Procedures, section G.2.b, Currency and Valuables, which states, "The booking person will count and verify any money and/or valuables in the presence of the prisoner and arresting or assisting officer. All money will be placed in a small currency envelope (Form GEN-388). Currency will be itemized on the envelope. The arresting officer witness (assisting officer or booking officer) and prisoner will sign the envelope. The currency envelope will then be placed in the property envelope along with other items."

Finding Title: Towing Contract

Finding Number: 2.A.

Finding: The SLBPC failed to adequately monitor the vehicle towing operations of a contractor which allowed the contractor to underpay the police department and City of St. Louis. The towing contractor failed to properly remit towing fees to the department and the city, resulting in the contractor underpaying the department and the city for towing fees collected. The department failed to properly monitor fees remitted by the contractor which appeared to have contributed to underpayments by the towing contractor.

Recommendation: The SLBPC ensure future contracts are monitored for accuracy and compliance with contract requirements. In addition, the SLBPC should continue to seek compensation from the contractor for the amount of underpaid towing fees.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

This contract with this towing contractor is no longer in effect. The SLBPC pursued compensation through an outside attorney. Upon the transition to local control, this litigation was passed to the City Counselor's office. In May 2015, a settlement agreement was entered into by the City of St. Louis and St. Louis Metropolitan Towing LLC for \$50,000.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Contract

Finding Number: 2.B.

Finding: The department did not adequately monitor the status of towed vehicles or ensure complete and accurate information was recorded for all towed vehicles. The department maintained an internal database to record the status of towed vehicles. In addition, the towing contractor was responsible for entering towed vehicle information into the REJIS. The department did not monitor whether the contractor updated vehicle status timely or ensure the information in the internal database agreed to the information in the REJIS.

Recommendation: The SLBPC ensure information for all towed vehicles is properly recorded and updated in applicable databases.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In support of the changes to towing procedures in 2009, several reports were created, and those reports remain in place today. The report distribution software allows the command to receive an automated notification when the reports are prepared, and it allows for review of previous versions of the following reports.

Weekly tow data report - A weekly report of all towed vehicles is produced to allow command oversight of all towed vehicles. This information includes report date, department service number of the officer authorizing the tow, assignment code, plate number, vehicle identification number (VIN), complaint number, tow reference number, tow slip number, reason towed, tow status, tow location, and tow district. The report includes not only detailed data but summary counts of tows.

Monthly tow data report - The same information listed above is also produced on a monthly basis to better allow for examination of trends. This report still includes detailed listings of the summary counts of tows so that command staff may review and follow up if they have any questions or concerns about towing activities.

Tow exception weekly report - An additional step was taken in order to better account for towing activities. A weekly report is produced that compares the REJIS tow record with the vehicle information entered into the I/Leads Records Management System. If there is a difference in VIN, license plate number, complaint number, or tow slip number, the tow will be displayed on this report so that the records may be corrected.

Outstanding tows monthly report - This monthly report shows all tows that have a status of "Active". The towed vehicles will remain on the report as long as they are active.

Contact Phone Number: (314) 444-5770

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Contract

Finding Number: 2.C.

Finding: Until 2008, the towing contract allowed the department to utilize up to five abandoned vehicles in the custody of the towing contractor. Limitations on the use of the vehicles were not included in the contracts. While the department may have used the vehicles for legitimate law enforcement purposes, the lack of policies and procedures or specific contract stipulations gave the appearance vehicles may have been available for inappropriate or personal use.

Recommendation: The SLBPC ensure the practice of utilizing abandoned vehicles for police operations is not included in future towing contracts.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The city's Towing Division provides towing services by Special Order 7-02. The Towing Division manages any private tow contractors used by the city. Police officers do not use abandoned vehicles for police operations.

Finding Title:	Property Custody Unit
Finding Number:	3.A.
Finding:	As of February 2009, cash of approximately \$24,000 in custody of the Property Custody Unit (PCU) was missing, mislabeled, or misplaced.
Recommendation:	The SLBPC require the PCU to continue to investigate currency classified as "unable to locate" and continue to improve controls over currency maintained by the PCU.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The "unable to locate" investigation by the Internal Affairs Unit and Audit Advisory Unit is now considered closed.

The PCU has implemented several policies as a result of these findings. First and foremost, the department began a policy on July 21, 2009, where we no longer accept money that is proceeds or suspected proceeds of drug trafficking or other criminal activity as evidence unless probable cause exists tying the money to the crime. Buy money would be an example of this.

Money that is brought into our possession as a "recovered article" is placed in the valuables vault and is deposited into a bank account on a regular basis, minimizing the amount of cash we have in our physical inventory.

The PCU has also installed video recorder cameras and a Lenel card reader entry system in the valuables vault. An "integrity rule" has been instituted wherein no one person has access to the valuables vault. It is a two-person entry system where one person has the door combination, and another has the door key and card swipe access. No one person has both the combination and the key. Two property custody employees are required to be in the vault at all times when entry is made.

Monthly audits and alarm tests of the vaults are conducted and sent to the Property Custody Commander. The last one was completed on August 30, 2018 (as of September 2018).

It should be noted that since these policies were instituted, there has not been any instance of missing items.

Contact Phone Number: (314) 444-5300

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Property Custody Unit

Finding Number: 3.B.1.

Finding: The PCU had a large number of weapons and old evidence stored in its property room which the department determined had no value and should have been destroyed. Failure to properly destroy or dispose of property created a lack of space to store more relevant items within the property room. The increased inventory also increased the amount of time to conduct physical inventories.

Recommendation: The SLBPC require the PCU to purge firearms and old evidence in accordance with policy and continue to work with the Circuit Attorney's office (CAO) to obtain approval for evidence destruction.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department, in agreement with the CAO, conducts quarterly purges through court hearings (February, May, August, and November) with the 22nd Judicial Circuit, Division 16. Prior to these court hearings, a list of eligible property/evidence is obtained through an established advanced search in our property control computer software system (Tracker system). Once the judgment is received from the judicial court, the list is given to the CAO for review and authorization of disposal. When authorization is approved, the firearms are properly prepared in accordance with department policy and taken to a smelter and destroyed. Other evidence is either taken to city refuse or put up for auction on propertyroom.com per department policy.

Contact Person: Sergeant Michael Boll

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Property Custody Unit

Finding Number: 3.B.2.

Finding: The PCU had the responsibility to store bulk prisoner property (such as bicycles) for the city's Justice Center. While all other prisoner property is stored by the Justice Center, bulk items have traditionally been given to the police department. Independent auditors noted the bulk prisoner property created a lack of storage space for items the department was required to store.

Recommendation: The SLBPC require the PCU to work with the Justice Center to determine the best storage location for bulk prisoner property.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A resolution with the city's Corrections Division could not be reached as it, too, could not come up with a physical location to resolve the issue due to the space requirements of large or bulk property.

This issue was resolved by the ability of the PCU to now accept prisoner "bulk property." The creation of form PRO-8 was established in April 2008 to accompany any "bulk property". The form is a three-part carbonless form with the distribution of the original being attached to the Arrest Register, one copy to the prisoner, and one copy affixed to the bulk property itself.

Any property that will not fit into the GEN-86 property bag is deemed "bulk property" and is subject to the rules and regulations under Special Order 8-03, Holdover Operations, Section V, Processing of Prisoners, Section C, No. 6 which states, "Property that will not fit into the standard property bag will be considered bulk property. Bulk property will be packaged separately by the arresting officer who will temporarily place said property in a secure location. Since the city Justice Center will not accept bulk property, this property will be placed in the property room and forwarded to Property Custody during normal operation hours. The arresting officer will complete a Bulk Property Form, PRO-8, when dealing with bulk property. Note: Bulk property will not be accepted by Property Custody without the Bulk Property Form completed and attached."

Contact Person: Mark Garanzini

Contact Phone Number: (314) 621-5655

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Property Custody Unit

Finding Number: 3.C.

Finding: The PCU did not have adequate controls to track evidence released to other agencies. The PCU routinely released evidence to the CAO and Sheriff for trials. While entries were made in the property system to show the transfer of evidence, there were no procedures in place for the PCU to periodically check the status of the evidence.

Recommendation: The SLBPC require the PCU to establish procedures to track the status of all evidence transferred to other agencies and identify items in the property system records that are permanently transferred.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A distinction must be made between an item that is checked out and an item that is disposed (released). If an item is checked out that means we expect the item to be returned to the Property Custody Unit and an item disposed means the item is removed from department's inventory and will not be returned.

With a few exceptions, items are only checked out to department employees while items released to an outside agency are disposed. The most notable exception to this general rule is the Juvenile Court. The Juvenile Court office does not have a property room so, as a courtesy, we allow the employees to check out an item(s) and then check in the item(s) as needed. These items are rarely checked out for more than a day or two. The advanced search that is run in the property control computer software system (Tracker) will return all items that are checked out and who they are checked out to whether or not they are department employees.

The Sheriff's office and Circuit Attorney's office are outside agencies and, as stated above, any evidence disposed of to them is no longer part of the department's inventory. Since the disposed items become the responsibility of their respective agency it would be impossible for the department to keep track of their statuses.

For the Circuit Attorney's office and other outside agencies, the agency's representative must present his/her Agency Identification (ID). The ID is copied, and the person must sign the copy of the ID with a red ink pen. In addition, the person must present a subpoena or demand letter on his/her department's letterhead requesting the specific item(s). The item is then marked "disposed" in Tracker. A PCU employee and the representative both sign a transfer receipt slip in black ink for each item. The PCU files and stores all transfer receipt slips by week/year in a folder from the weekly transfers to the Sheriff's office.

It is the responsibility of the PCU employee that checked out or disposed of an item to scan all relevant paperwork involved in the transfer process and attach the digital image to the appropriate complaint number in Tracker. Periodic audits are done of checked out and disposed items to make sure the required paperwork is scanned into Tracker and all policies and procedures are followed.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Fitness Center Receipts

Finding Number: 4.

Finding: Proceeds from Fitness Center memberships and merchandise sales totaling at least \$1,162 were received during the period July 1, 2007, through January 8, 2009, but were not transmitted to the Treasurer's office.

Recommendation: The SLBPC ensure reasons for Fitness Center receipt shortages are investigated, and seek reimbursement for the amount of receipts not transmitted to the City Treasurer. In addition, the SLBPC should consider implementing a thorough review of all Fitness Center receipts prior to July 1, 2007, to determine if additional shortages exist.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Below is a list of measures that have been established since the audit:

- Checks and/or money orders are the only acceptable form of payment at the Fitness Center for memberships. Checks and/or money orders are currently made payable to the City of St. Louis.
- Colleen Rossomanno and Tom Kelso are the only individuals allowed to accept payment for Fitness Center memberships.
- New members and existing members wishing to make their annual dues payments may only do so in person during normal business hours (8 a.m. - 4 p.m.) when Tom Kelso or Colleen Rossomanno are available.
- All checks and/or money orders received will be promptly receipted to include the check/money order number.
- To avoid tampering or missing receipts, the receipt slip book shall be kept locked up within the confines of the Fitness Center and/or lock box.
- A deposit of all checks and/or money orders received shall be made bi-weekly by a member assigned to the Academy Unit. If a representative is unavailable in the Budget and Finance Division, a deposit will be made the next business day. The Budget and Finance Division will, in turn, issue a receipt.
- A budget worksheet provided by the Compliance Auditor shall be maintained by the Fitness Programs Supervisor to include the fiscal year beginning balance and entries of all deposits and credits.
- The Fitness Programs Supervisor shall reconcile the Fitness Center spreadsheet and/or deposits made in the Budget and Finance Division with the Compliance Auditor quarterly or as requested. If an account does not balance, assistance will be given by the Budget and Finance Division.

An internal investigation was conducted on the missing funds, per Employee Misconduct Report 09-160. Internal controls were implemented, which included a policy of no longer accepting cash or selling merchandise.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Receipt Accounting Controls and Procedures

Finding Number: 5.A.

Finding: Accounting duties were not adequately segregated and there was no independent review or oversight related to receipts in various divisions. Staff shortages and a vacant internal auditor position contributed to the lack of oversight.

Recommendation: The SLBPC adopt procedures to adequately segregate receipt duties between available employees and/or establish documented periodic reviews of records by employees independent of the recording, depositing, and transmitting functions.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Compliance Auditor performs an independent review of the Fitness Center's and Records Division's records on a quarterly basis. Since the Private Security Section (PSS) now operates out of the St. Louis County Police facility, it falls under the St. Louis County Police Department's day-to-day control and is not reviewed by the Compliance Auditor.

Status of Findings

Finding Title: Receipt Accounting Controls and Procedures

Finding Number: 5.B.

Finding: The composition of receipts was not reconciled to the composition of deposits and transmittals made by the Fitness Center or Budget and Finance Division.

Recommendation: The SLBPC adopt procedures to reconcile the composition of receipt slips issued to the composition of amounts deposited or transmitted.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Compliance Auditor continues to perform periodic reviews of receipts and deposits. The Fitness Center no longer accepts cash; all payment must be made by check. Since checks are the only form of payment accepted, the composition of receipt slips issued to the composition of amounts deposited or transmitted never varies.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Receipt Accounting Controls and Procedures

Finding Number: 5.D.

Finding: The Fitness Center, PSS, and Records Division did not always deposit or transmit monies intact. The PSS and Records Division made cash refunds when checks were received for more than the amount due. In addition, the Fitness Center did not maintain a change fund at a constant amount and withheld monies from deposits to increase the change fund balance during peak demand times. Fitness Center employees also used receipts to purchase food and other items.

Recommendation: The SLBPC adopt procedures to deposit or transmit receipts intact.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Fitness Center is part of the Police Academy and is the only part of the Police Academy that accepts payments. The Fitness Center does not maintain a change fund. The Records Division closes out twice a day and makes daily deposits. Since the PSS now operates out of the St. Louis County Police facility, it falls under the St. Louis County Police Department's day-to-day control and is not reviewed by the Compliance Auditor.

Finding Title: Severance Payments

Finding Number: 6.

Finding: The SLBPC approved approximately \$133,000 in severance wages for two department officials that did not appear reasonable or necessary.

Recommendation: The SLBPC refrain from paying excessive severance payments. If severance payments are provided, they should be limited and consistent with requirements of employment contracts.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The SLBPC has refrained from further excessive severance payments. The City Counselor's office reviews requests for severance payments. The Director of Public Safety approves severance payments that do not involve payout of paid leave.

Contact Person: Dave Daniels

Contact Phone Number: (314) 444-5518

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Leave and Overtime

Finding Number: 7.A.

Finding: The department did not pro-rate the accrual of vacation and sick leave earned during employees' last month of employment. In April 2008, the department began pro-rating the amount of vacation leave earned based on the number of days worked during the month; however, employees still earned a full month's accrual of sick leave on the first working day of the month. In addition, employees were allowed to take leave on their last days of service, which could have extended their term of service into a new month and allowed additional leave accrual.

Recommendation: The SLBPC evaluate the reasonableness of allowing employees to use leave in their final pay period that allows additional leave accruals and consider pro-rating the amount of leave earned during the final month of employment based on the number of days worked during the month.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

After evaluating leave and overtime policies, the SLBPC chose to pro-rate vacation leave. However, the SLBPC continued to allow employees to earn a full month's accrual of sick leave on the first day of the month. The accrual was for the previous month's service. This sick leave policy remained in place for commissioned and civilian employees hired prior to local control until the passage of Ordinance 70791. Ordinance 70791, effective July 1, 2018, set bi-weekly rates of leave accrual for commissioned and civilian employees hired prior to local control. Installation of software updating the current time and attendance system is on track to be completed by the end of the year.

Contact Phone Number: (314) 444-5518

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Leave and Overtime

Finding Number: 7.B.

Finding: The department's previous payroll and timekeeping system allowed for employees to record and be compensated for unearned overtime. To help address known problems with the previous payroll system and implement additional controls over payroll, the department implemented a new payroll system in June 2008. The department's new payroll system continued to allow overlapping or unearned overtime to be processed and paid.

Recommendation: The SLBPC ensure all overtime earned is valid and in compliance with SLBPC policy. The SLBPC should seek reimbursement of any unearned overtime payments. In addition, the SLBPC should ensure controls are implemented in the payroll system to prevent overlapping overtime accruals.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department holds commanders responsible for ensuring that overtime is valid and in compliance with department special orders. Additionally, controls in PeopleSoft, an electronic time and attendance system the department adopted in 2008, prevent overlapping overtime accruals.

PeopleSoft also allows the Budget and Finance Division to delete overtime paid in error at the request of the employee's commander. When time is deleted in PeopleSoft a dock in pay is generated. A dock in pay reimburses the department by reducing pay earned in the current period by the amount of unearned time paid from prior periods.

Due to turnover in personnel, we were unable to determine if any specific efforts were made to seek reimbursement of unearned overtime prior to the implementation of PeopleSoft.

Contact Phone Number: (314) 444-5518

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Leave and Overtime

Finding Number: 7.C.

Finding: Contrary to department policy, employees worked more than 16 hours in a workday in 14 of the 65 applicable (18 percent) February 2008 payroll transactions reviewed.

Recommendation: The SLBPC implement a policy to limit the total number of hours worked per day and implement controls to ensure the policy is followed.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

By special order, officers are limited to working a maximum of 16 hours (normal 8 hour department duty plus any overtime) in any one day. The special order contains one exception to the 16-hour limit: officers may exceed the maximum due to instances requiring mandatory overtime with supervisory approval.

With the adoption of PeopleSoft, the Compliance Auditor is easily able to run reports that identify employees working excessive hours and share this information with the employee's commander for follow up.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Expenditures

Finding Number: 8.A.

Finding: Several purchases, totaling \$2,976, were made at clothing and department stores, local restaurants, and ticket venues. There was no documentation to indicate these purchases were business related, and these purchases appeared to be personal in nature. The majority of the purchases were made by the former Police Chief. Neither the SLBPC nor department employees reviewed supporting documentation for the former Police Chief's purchasing card expenditures. The SLBPC had not worked with the issuer of the purchasing cards to place restrictions on the types of purchases that could be made. Some purchasing card expenditures were not supported by original invoices or other documentation and were not approved in accordance with SLBPC policy. Purchasing cards were used to purchase items available under existing SLBPC contracts or bids.

Recommendation: The SLBPC implement adequate controls over the use of purchasing cards to ensure all purchases are reasonable and necessary. Supervisory or other approval should be documented and original invoices or other supporting documentation should be provided prior to payment of all purchases. In addition, the SLBPC should review the purchases made by the former Police Chief and seek reimbursement for personal purchases not already reimbursed to the department.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The number of purchasing cards has been greatly limited. The only cards are held by the Police Commissioner, Assistant Chief of Police, lieutenant colonels, the Commander of Intelligence, the Chief of Staff to the Commissioner of Police, and the Purchasing Division. No purchases may be made for personal gain and purchases must be reasonable and necessary in furtherance of the department's mission.

Procedures for any purchases on the purchasing cards include the preparation of a departmental requisition or a travel request form. Both of these forms must be approved through the chain of command and the Budget and Finance Division prior to their submission to the Purchasing Division. Additional reimbursement will not be sought from the former Chief of Police due to the remaining and immaterial amount of \$71.

Finding Title: Expenditures

Finding Number: 8.D.

Finding: The department purchased two hand-crafted gold badges for the former Chief of Police at a cost of approximately \$6,000 each, and 5 gold-plated hand-crafted badges costing \$1,987 each for the new Chief of Police, lieutenant colonels, and assistant chiefs. Bids were not obtained for the badge purchases, and were purchased from a jeweler the department had used for many years to purchase hand-crafted badges for top-ranking officers. The department obtained bids for badges purchased for other officers which cost approximately \$20 each.

Recommendation: The SLBPC discontinue purchasing hand-crafted gold or gold-plated badges for top-ranking officers, and ensure bids are obtained for all badge purchases.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Gold badges were not purchased after November 2008. Gold-plated badges are still purchased for lieutenant colonels and the Chief of Police.

Finding Title: Purchasing and Bidding Policies

Finding Number: 9.A.

Finding: The SLBPC adopted a purchasing manual; however, the policies contained in the manual did not include some provisions applicable to state boards as required by Chapter 34, RSMo. SLBPC policy required bids for purchases over \$5,000; however, Section 34.040, RSMo, required bids for purchases over \$3,000. Other requirements of Chapter 34, RSMo, were not included in the purchasing manual, including a review to determine whether potential vendors have met requirements for collecting and paying state sales and use taxes.

Recommendation: The SLBPC review the purchasing manual and make necessary amendments to ensure compliance with state purchasing laws.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The SLMPD is now an agency of the city and is subject to the purchasing regulations of the city, including the Supply Division. Since 2013, the Purchasing Division has been in compliance with all city purchasing regulations.

Finding Title: Capital Assets

Finding Number: 10.A.

Finding: The SLBPC purchased over \$200,000 of computer equipment that was not placed into service for extended periods of time.

Recommendation: The SLBPC ensure only equipment that is necessary and readily able to be placed in service is purchased. In addition, the SLBPC should determine if any of the equipment in storage can be used by other divisions or other city departments, and dispose of items that cannot be used.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

We employ a common sense, two-pronged approach to maintaining sensible inventory levels.

When placing orders, we try to estimate a quantity that will last no more than one calendar year and that will easily fit on the shelves in our storeroom or within a reasonable area at the department's Supply Division.

We typically do not order inventory until we have less than a half dozen units of a given item. This ensures we use all of a given item before replenishing our supply. This has been our policy since the last city audit.

Purchased items are placed in the usage rotation within a reasonable period of time. Most items are used or placed in service within 180 days of receipt.

Finding Title: Capital Assets

Finding Number: 10.B.

Finding: SLBPC capital asset records were maintained in five separate databases maintained by five separate divisions and there were no policies or procedures requiring uniform information be maintained on the various databases.

Recommendation: The SLBPC review capital asset procedures to ensure complete and accurate lists are maintained for all capital assets. Consideration should be given to adopting one centralized list for all capital assets.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Budget and Finance Division consolidates capital asset purchase and retirement information provided by the department's Supply Division and city's Equipment Services Division to create a centralized capital asset list. The accuracy of the list is ensured by the Budget and Finance Division which reviews general ledger entries, the Supply Division which conducts an annual inventory, and the Internal Audit Section of the Office of the Comptroller which includes reviews of the department's fixed and capital assets in its audit plan.

Finding Title: Capital Assets

Finding Number: 10.C.

Finding: Our review of capital asset records noted items were not always recorded in the appropriate capital asset database, the location of items was incorrectly recorded in the database, and items were not always tagged or identified as police department property. In addition, some tools and diagnostic equipment utilized by the Fleet Services Division were not tracked in the capital asset database despite these items meeting the criteria for classification as capital assets.

Recommendation: The SLBPC ensure all capital assets are promptly and accurately recorded on the capital asset database and capital assets are tagged or identified as SLBPC property.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Procedures relating to the accounting, tagging, and control procedures for property and equipment have been updated several times since this recommendation was made. The department's Fleet Services Division was absorbed by the city's Equipment Services Division after the department changed to local control.

Currently, the Budget and Finance Division maintains a database by funding source of all real and personal property over \$5,000. The division reviews invoices at the time of payment to capture items that need to be added to the capital asset listing. Asset donations over \$5,000 are reported to the division at the time of receipt by the Commander of the Office of Special Projects, the liaison between the department and the St. Louis Police Foundation which makes all donations. Deletion of capital assets considered surplus or condemned are reported to the division by the department's Supply Division. Any discrepancies between physical inventories and the division's database are noted and resolved annually.

All capital assets except real property, laboratory equipment, computer software, and firearms are tagged and recorded via bar-coded property tags upon receipt by the department's Supply Division. Laboratory equipment is tagged by the Laboratory Division. The Communications Service Center processes computer boards, plug-ins, and modifications. The Armory records serial and model numbers of firearms. The department's Supply Division creates and supplies the bar-coded property tags.

Finding Title: Vehicle Usage

Finding Number: 11.

Finding: The SLBPC allowed commuting and other personal use of some department vehicles for employees considered on-call status, but did not require these employees maintain documentation to distinguish between business, commuting, and personal use. The SLPBC assigned unmarked vehicles to officers with the rank of captain and above and to four civilian department directors, and policy allowed personal use of those vehicles.

Recommendation: The SLBPC evaluate the need to assign unmarked vehicles to all high ranking officers and civilian employees and consider prohibiting personal use of department vehicles other than for commuting purposes. Mileage logs or other records should be maintained to distinguish between personal, commuting, and business use for all unmarked vehicles, and the taxable benefit of personal use should be reported on employees' W-2 forms.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Since 2009, the city overall has reduced the number of vehicles allowed for personal use. There remains a select number of commissioned personnel in the SLMPD who are allowed personal use of unmarked vehicles. We are examining the tax issues concerning use of such vehicles and the required reporting and documentation.

Status of Findings

Finding Title: Budgetary Practices

Finding Number: 12.B.

Finding: The SLBPC approved over \$3.1 million in transfers between General Fund budgetary expenditure accounts during the year ended June 30, 2008. Transfers were made to cover budget overruns in some budgetary expenditure accounts. In addition, both transfers-in and transfers-out occurred throughout the fiscal year in nine different accounts. Generally, budget transfers should only be made for unforeseen expenditures, but it appeared many of the transfers were made to cover normal operating cost overruns. Per SLBPC and department officials, some transfers were necessary because the original budget approved by the City of St. Louis Budget Director and Board of Aldermen did not reflect the needs of the SLBPC.

Recommendation: The SLBPC work with applicable city officials to prepare budgets that accurately reflect the needs of the department, and refrain from making excessive and unnecessary transfers between budgetary accounts.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Budgets are prepared and approved in accordance with the city charter and ordinances. The department prepares budgets to address operational needs. Once the department's budget is submitted to the city's Budget Division, the city's Budget Director is able to make any changes to reach a balanced budget for the city as a whole. If changes to the department's budget do not meet the operational needs of the department or unexpected needs arise, budget transfers will be made. For example, in recent years large budget transfers occurred because staffing issues and civil unrest increased overtime costs.

Finding Title: Bank Accounts and Investments

Finding Number: 13.B.

Finding: At December 31, 2008, the SLBPC held 22 certificates of deposit totaling \$5.275 million at 22 banks throughout the country, none of which had a presence in the City of St. Louis. The investment policy required time deposits be made at banks with a presence within the City of St. Louis.

Recommendation: The SLBPC deposit funds in banks with a City of St. Louis presence in accordance with policy, or review the policy to determine if the bank location continues to be an objective.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The SLMPD only uses banks selected by the City of St. Louis Treasurer's office.

Contact Person: Dave Daniels

Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Traffic Tickets
Finding Number:	14.A.1.
Finding:	Documentation of some tickets assigned to area stations was missing or inadequate, and ticket books were not always assigned in numerical sequence.
Recommendation:	The SLBPC ensure traffic tickets are assigned to area stations in numerical sequence and documentation is properly completed and maintained for all tickets assigned.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Ticket Distribution Procedures

- The department's Supply Division maintains a log sheet of traffic tickets that are distributed.
- Tickets are distributed in numerical sequence.
- The log sheet records the date, amount of ticket books, the beginning and ending ticket numbers, the box number(s) containing the tickets, and the unit for which the tickets are assigned.
- A receipt slip listing the number of books and the ticket beginning and ending numbers is included with the log sheet.
- Upon delivery, the recipient checks the log sheet for accuracy and signs the receipt slip.
- The receipt slip is a duplicate with one copy for the recipient and one copy for the Supply Division.

The aforementioned procedures are rarely used since the introduction of mobile ticketing.

The recipients of the ticket books are responsible for the documentation of issued tickets. Gaps before distribution are a result of printing problems encountered by the vendor printing the tickets. All gaps in ticket sequences are documented by the department's Supply Division prior to distribution.

Contact Phone Number: (314) 444-5395

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Traffic Tickets

Finding Number: 14.A.2.

Finding: A ticket database was maintained to account for all ticket numbers assigned to the department and the ultimate disposition of each ticket number; however, the database was incomplete and department officials did not investigate gaps in the numerical sequence of tickets. In addition, reports were available which identified ticket numbers not entered into the database; however, department officials indicated these reports were not reviewed.

Recommendation: The SLBPC ensure all tickets, including the ultimate disposition, are recorded on the database and gaps in the numerical sequence of tickets are investigated and resolved.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department's Supply Division maintains a database of traffic ticket books and accounts for the numerical sequence of tickets. This database is rarely used as most tickets are now issued by mobile ticketing. The numerical sequence of mobile tickets is generated electronically so there are no omissions in the sequence. Most other procedures are the same for mobile or manual tickets.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Traffic Tickets

Finding Number: 14.B.1.

Finding: Some tickets were voided by officers without adequate documentation, and copies of some voided tickets were not maintained. Officers were required to complete a form for each voided ticket for approval by a supervisor, which included an explanation code of the reason for voiding the ticket; however, some voided ticket forms were approved with inadequate or no documentation of the reason.

Recommendation: The SLBPC require detailed descriptions of reasons for voided tickets to be documented and ensure all required documentation, including copies of tickets, is maintained.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

This recommendation is specifically targeted at the voiding of tickets. Special Order 07-01, section XI-C covers administrative procedures for voided tickets. This special order was issued in 2010 in direct response to the audit recommendation. The order requires the officer to complete a form which is reviewed and approved by a lieutenant or above. This procedure helps ensure that the reason for the void is included.

Finding Title: Lead Remediation

Finding Number: 2.A.

Finding: Remediation projects tested from fiscal years 2007 and 2008 took an average of 179 days, or almost 6 months, from initial inspection to completion. For many of the projects reviewed, there was no documentation to support reasons for extensions granted to owners or why these individuals were not referred to court.

Recommendation: The BD implement procedures to ensure remediation projects are completed in a timely manner, including referring property owners to court when progress is not made, and documenting reasons for granting extensions.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The time to complete remediation projects has been greatly reduced. In 2017, the average timeframe from when a client met all program qualifications until the date when a contract for remediation assistance was signed was only 78 days. While there may be delays from the time that the inspection is done until the time that the owner completes an application for remediation assistance (which can impact the start date of remediation work), these factors are often outside of the city's control. For instance, the owner may take a long time to complete the eligibility paperwork to qualify for financial assistance. Typical causes of delay include paying delinquent real estate taxes, obtaining property insurance, having the child(ren) living in the unit screened for lead poisoning, etc. Once a contract is signed, there is often a delay until the work starts because, when historic replacement windows are required, it can take anywhere from 6-12 weeks for the windows to come in from the manufacturer. However, once the work starts, the remediation is typically completed within 5 business days.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Lead Remediation

Finding Number: 2.B.

Finding: Our review of remediation projects noted 19 of 43 (44 percent) applicable residences were not re-inspected within the required timeframe after the violation notice was sent. BD policy required properties to be re-inspected within 14 days of the violation notice to monitor progress towards remediation.

Recommendation: The BD re-inspect properties 14 days after the violation notice is sent, in accordance with division policy.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Re-inspection of properties occurs within the timeframes set by the BD. The goal is for any unit with identified lead hazards to be remediated and achieve clearance whether through remediation work done by the property owner or through the city. When the property owner applies for financial assistance, a re-inspection is not required until the remediation work begins. The lead inspectors document all re-inspections in project files including reasons for granting extensions, such as during the winter months. Projects that receive financial assistance through the city are inspected daily once the remediation work begins. Owners that do not comply are referred to court where the ultimate goal of the court is to achieve compliance (clearance) as opposed to collecting fines.

City of St. Louis - Department of Public Safety
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Lead Remediation

Finding Number: 2.C.

Finding: Our review of remediation project files noted 26 of 75 (35 percent) were missing at least one required piece of documentation. BD and Community Development Administration (CDA) policy required documentation for proof of ownership, tax compliance, signed agreements, and proof of insurance be maintained in the project files.

Recommendation: The BD and the CDA ensure required documentation is obtained and maintained in remediation project files.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The BD has tailored its web-based database to make sure all elements of a lead inspection/risk assessment (LIRA) are incorporated into the report so that the report produced is fully compliant with Housing and Urban Development (HUD) and Environmental Protection Agency guidelines. In addition, management staff at the BD review each HUD file project to make sure all requirements of the grant are met. They have developed an Inspection Checklist so that each file can be reviewed to ensure all components are included in the LIRA. They also utilize a Project Designer Close Out Checklist for each file so they can confirm all compliance requirements have been met.

The CDA developed a checklist after the last audit for the intake staff to use to make sure each project meets the program requirements. The checklist includes all items a client needs to qualify for the program. The two intake staff members conduct peer reviews of each file so that there are two reviews of each file before it is determined to be eligible. CDA management periodically reviews these peer reviewed files as well.

The program was monitored by the HUD Office of Healthy Homes and Lead Hazard Control within the past year. There were no findings or concerns noted during the monitoring visit and the HUD stated that "the city's grant operation is exemplary and may be of benefit to other grantees."

Finding Title: Temporary Relocation Expenditures

Finding Number: 3.

Finding: The Department of Health (DOH) and BD did not adequately monitor the Lead Safe St. Louis Program (LSSL) temporary relocation process, resulting in expenditures in excess of the maximum allowance for lodging and meals.

Recommendation: The DOH and BD continue to monitor the eligibility and expenditures of temporarily relocated families to ensure compliance with LSSL policies.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The city has not provided temporary relocation funding in the form of lodging or meals since May 2009. The city only provides a uniform stipend (currently at \$150) for households that self-relocate while the remediation work occurs and other forms of relocation assistance are not available.

Status of Findings

Finding Title: Grant Compliance

Finding Number: 5.

Finding: The DOH and BD overspent applicable grant funding during the year ended June 30, 2008, and the errors were not corrected in a timely manner.

Recommendation: The DOH and BD implement controls to ensure grant monies are expended within grant budgets, and correcting entries are made timely.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Both the BD and the DOH have implemented controls to monitor and track spending. Since the last audit took place over 8 years ago, this issue has not recurred. The BD submits a monthly report of all expenditures to the Building Commissioner, the Lead Program Manager, and the CDA for review. The Fiscal Services Section in the DOH also tracks expenditures on a regular basis.

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Board of Aldermen
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2008-62, *City of St. Louis, Board of Aldermen*, issued in September 2008, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Board of Aldermen. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Board of Aldermen that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in June and October 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Board of Aldermen

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Elected Officials' Allowances

Finding Number: 1.A.1.

Finding: The Board of Aldermen (BOA) policy on expense reimbursement allowed several items to be reimbursed which did not appear to be prudent uses of taxpayer monies. Seven aldermen submitted reimbursement requests totaling approximately \$10,600 for donations and charitable contributions. The city code also allowed for reimbursement of flowers, gifts, and lobbying.

Recommendation: The BOA discontinue the practice of reimbursing for charitable contributions, lobbying expenses, gifts, and flowers.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

No steps have been taken by the BOA on this finding. Reimbursement of these items is still allowed per city code.

Contact Person: Tom Shepard

City of St. Louis - Board of Aldermen
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Elected Officials' Allowances

Finding Number: 1.A.2.

Finding: The BOA policy did not require adequate documentation for some reimbursements. Although aldermen submitted receipts for meal purchases, the business purpose of the meeting and the individuals present were not documented. The city code did not specifically require the submission of receipts and documentation of business purpose and individuals present for meal purchases. In addition, one meal reimbursement reviewed included the purchase of alcohol.

Recommendation: The BOA require the business purpose and names of individuals attending meetings be documented on meal receipts. In addition, the BOA should consider banning reimbursement for the purchase of alcohol.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The majority of board members do not utilize the accountable plan for expense reimbursement. The members who choose to use the accountable plan must submit receipt slips for reimbursement of meals. The BOA does not allow reimbursement for the purchase of alcohol.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Elected Officials' Allowances

Finding Number: 1.A.3.

Finding: Adequate supporting documentation was not received or retained for some expense account reimbursements. The city code did not specifically indicate the type of supporting documentation required for reimbursement.

Recommendation: The BOA specifically address in the city code supporting documentation requirements for expense account reimbursements.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The city code has not been changed to specifically indicate the type of supporting documentation required for expense account reimbursements.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Vehicle

Finding Number: 2.

Finding: The BOA President used his city-owned vehicle for personal use and did not maintain vehicle usage logs to document commuting and personal use of the vehicle.

Recommendation: The BOA discontinue allowing the Board President to use a city-owned vehicle for personal use. In addition, the Board of Aldermen should require the preparation of usage logs for the vehicle and ensure these logs are properly reviewed.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The President of the BOA no longer uses a city-owned vehicle for work or personal purposes.

Status of Findings

Finding Title: Minutes

Finding Number: 3.A.

Finding: The BOA minutes were prepared and signed by the clerk/legal counsel; however, they were not signed by a member of the BOA.

Recommendation: The BOA ensure the minutes are signed by the preparer and a board member to attest to their completeness and accuracy.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A member of the BOA (the Chairman of the Rules and Engrossments Committee) now signs all minutes.

Contact Person: Tom Shepard

City of St. Louis - Board of Aldermen
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Minutes

Finding Number: 3.B.

Finding: Reasons and the vote for closing meetings were not documented in the minutes of the open meeting. Open session minutes did not provide any indication of the board voting to close the meetings or the specific reason for closing the meetings.

Recommendation: The BOA ensure the reason and vote for closing a session is documented in the open minutes.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The BOA currently documents the reason and vote for closing a session in the open minutes.

Contact Person: Tom Shepard

Contact Phone Number: (314) 622-4114

City of St. Louis - Board of Aldermen
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Minutes

Finding Number: 3.C.

Finding: The BOA closed meeting minutes were not adequate. The closed meeting minutes did not include sufficient detail of matters discussed and actions taken. The only closed meeting minutes were roll call sheets with brief descriptions and the record of the vote by the board. It was often difficult to understand what was being voted on and the final decision of the board. In addition, decisions made during closed session were not disclosed in open session as required.

Recommendation: The BOA ensure minutes of closed meetings clearly document all business conducted and the votes taken in closed session are disclosed in open session.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

BOA closed meeting minutes document all business, and votes taken in closed session are disclosed.

Contact Person: Tom Shepard
Contact Phone Number: (314) 622-4114

City of St. Louis - Board of Aldermen
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Personnel Policies

Finding Number: 4.

Finding: The BOA considered all 15 of its employees exempt from the overtime and compensatory time provisions of the Fair Labor Standards Act (FLSA), and therefore, not entitled to overtime compensation. However, several of these employees may not have been exempt from these provisions.

Recommendation: The BOA review the classification of its employees and its current overtime and compensatory time policies to ensure such policies comply with the FLSA.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The BOA gives compensatory time to non-management employees if there is an evening meeting of the BOA or a BOA committee meeting that they are required to attend. BOA employees work shifts are 8 a.m. to 4 p.m. and 9 a.m. to 5 p.m., Monday through Friday. Non-management employees have a sign-in sheet to record their hours of work. The office is not open on the weekend.

Contact Person: Tom Shepard

Contact Phone Number: (314) 622-4114

City of St. Louis - Board of Aldermen
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Cellular Telephones

Finding Number: 5.

Finding: Procedures for approval of cellular telephone usage could have been improved. In February 1997, the BOA passed ordinance 63999 which prohibited the possession or use of city-owned cellular telephones by any official or employee of the City of St. Louis except for those designated by resolution of the BOA. However, various city departments reimbursed employees for use of their personal cellular telephones and approval by the BOA for employees to receive this reimbursement was not required.

Recommendation: The BOA revise its policy to require approval by the board for reimbursement of personal cellular telephone usage.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Ordinance 68654 requires the passing of a resolution by the BOA and recommendation of the Board of Estimate and Apportionment to designate any employee that has a city-owned or leased cellular phone. The ordinance requires the same approval process if any city official or employee is requesting reimbursement for personal cellular phone costs that relate to official city business.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Director of Streets
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2009-63, *City of St. Louis, Department of Streets*, issued in June 2009, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Department of Streets. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Department of Streets that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in June, September, and October 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Department of Streets

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.A.

Finding: At least \$1,210 in permit fee collections were not accounted for properly and appeared to be missing, and additional amounts could have been missing.

Recommendation: The Department of Streets take necessary action to recover missing funds and work with law enforcement officials regarding any criminal prosecution. In addition, department personnel should determine if any additional monies are missing.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

This issue related to a prior employee who is no longer employed. Our current accountant started employment in November 2011. The St. Louis Metropolitan Police Department (SLMPD) investigated and the former accountant was charged with theft. The SLMPD did not identify any additional missing monies.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.B.1.

Finding: Accounting duties were not adequately segregated and there was no independent oversight related to receipts.

Recommendation: The Department of Streets segregate the accounting duties of the Director's office to the extent possible. If proper segregation of duties cannot be achieved, timely supervision or independent review of work performed and investigation into unusual items and variances is necessary.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The current accounting duties are segregated, transactions are recorded daily, and activity is supervised.

Contact Person: Jamie Wilson

Contact Phone Number: (314) 647-3111

City of St. Louis - Department of Streets

Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.B.2.

Finding: The method of payment (i.e., cash, check, or money order) and date received were not recorded on some receipt slips. As a result, the composition of receipt slips could not be reconciled to the composition of monies transmitted.

Recommendation: The Department of Streets ensure the method of payment and date received is recorded on each receipt slip, and the composition of receipt slips issued is reconciled to the composition of transmittals.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The method of payment and date received are recorded on each receipt slip and all receipt slips are reconciled daily.

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.B.4.

Finding: Some receipts were not transmitted to the Treasurer's office in a timely manner.

Recommendation: The Department of Streets transmit all monies in a timely manner.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

All monies are transmitted in a timely manner.

Contact Person: Jamie Wilson

Contact Phone Number: (314) 647-3111

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.B.5.

Finding: Procedures were not established to properly document, investigate, and resolve daily cash overages and shortages. In addition, office personnel indicated an additional \$100 change fund was normally maintained as an emergency fund; however, this fund had been used to replenish the change funds of the three front office clerks when shortages occurred.

Recommendation: The Department of Streets establish procedures to ensure personnel properly document, investigate and resolve daily overages and shortages. In addition, the department should ensure the change funds remain at a constant amount and any overages/shortages are reflected in amounts transmitted.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department's accountant reviews the recorded permit receipts and the amounts collected by the clerks on a daily basis. The amount transmitted is what was actually collected, not utilizing change funds to compensate for overages/shortages. The overages/shortages are documented to identify trends.

The change funds are maintained at a constant level and are not used to replenish cash drawers for overages/shortages.

This is the department's practice; however, to fully implement the recommendation we will document this as an official procedure.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.B.6.

Finding: Some receipt and transmittal documentation maintained by the Director's office accountant was poorly organized and maintained.

Recommendation: The Department of Streets ensure all records are well organized and properly maintained.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A filing system is in place. Files and accounting records are organized and properly maintained.

Contact Person: Jamie Wilson

Contact Phone Number: (314) 647-3111

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.C.1.

Finding: The department did not account for the numerical sequence of permits issued. In addition, unused permits were maintained in a supply room in an unsecured location with access by all department employees.

Recommendation: The Department of Streets ensure the numerical sequence of permits is accounted for properly. In addition, unused permits should be maintained in a secure location.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Currently, permits are issued from the Cityworks computerized system, and temporary paper permits are issued only on rare occasions when the system is down. The electronic permit data is stored on a secure city network. The paper permits, used as a temporary permit when the system is down, are stored in a combination-locked safe until they can be entered in the computerized system. Cityworks allows us to account for the numerical sequence of permit and receipt numbers issued and we can generate periodic reports (daily, weekly, monthly, etc.) to verify the numerical sequence. If a permit is voided (i.e., canceled), this status is indicated by the system and any reports generated from the system reflect the voided permit.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Director's Office Controls and Procedures

Finding Number: 1.C.2.

Finding: The department had not established adequate procedures related to the issuing of permits. The department prepared some permits from information received over the phone and held the permit for the customer to pick up. By holding the permits for customers, the department was not transmitting monies collected for permits in numerical sequence which made it difficult to trace receipts to transmittals.

Recommendation: The Department of Streets improve procedures and requirements for handling and issuing permits.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Procedures for issuance, voiding, and variances of permits were established and have been effective.

Status of Findings

Finding Title: Towing Division

Finding Number: 2.A.

Finding: Receipts totaling \$1,380 received by the division were not accounted for properly and appear to be missing.

Recommendation: The Department of Streets take necessary action to recover missing funds and work with law enforcement officials regarding any criminal prosecution. In addition, department personnel should determine if any additional monies are missing.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The information was forwarded to the SLMPD for investigation. To the department's knowledge, this did not lead to the recovery of the missing funds or criminal prosecution. In addition, the department has not discovered any additional missing funds since that time.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.B.1.

Finding: The method of payment (i.e., cash or check) was not recorded on the towing tickets or the daily receipt ledger, thus the composition of receipts could not be reconciled to the composition of transmittals to the Treasurer's office. In addition, the division did not obtain information from the Treasurer's office documenting the composition of transmittals.

Recommendation: The Department of Streets require the method of payment to be recorded on each towing ticket and the daily receipt ledger, and the composition of receipts be reconciled to the composition of transmittals. In addition, the department should obtain documentation of the composition of transmittals from the Treasurer's office.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The method of payment is recorded on each towing ticket and the daily receipt ledger. We also receive documentation from the Treasurer's office indicating the composition of receipts in each transmittal. In addition, the composition of receipts is reconciled with the composition of transmittals.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.B.2.

Finding: The division did not adequately document monies received for vehicles auctioned. The auction date, amount bid, if payment was cash, and the tow ticket number were recorded on a ledger sheet at the time of the auction. Most auction monies were collected the day of the auction; however, some regular customers were allowed to bring in payment and claim the vehicle over the course of the week. The payment date was not recorded on the ledger nor was the receipt of these monies recorded on any other records.

Recommendation: The Department of Streets record the date monies are received for auctions and reconcile auction monies received to amounts transmitted.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Auction money is recorded in the daily receipt ledger with the date received and appropriate Treasurer's office receipt number. The auction monies received are reconciled to the amounts transmitted to the Treasurer's office.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.D.

Finding: The division sent notification letters by first class mail instead of certified mail to vehicle owners whose vehicles had been towed. City Revised Code Sections 17.56.140 through 17.56.190 set forth procedures concerning the impoundment and redemption of towed vehicles. The code indicated the division was required to send notification to the owner of a towed vehicle in a sealed envelope with postage prepaid. The notification informed the owner of the location of the vehicle and procedures for redemption of the vehicle. The code did not specifically mention if the notification should be sent by first class mail or certified mail.

Recommendation: The Department of Streets evaluate the costs of sending towed vehicle notifications by certified mail versus the benefits of better documentation.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

It was determined that sending letters via United States Postal Service certified mail was justified and beneficial for these purposes.

Contact Person: Jamie Wilson

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.E.1.

Finding: The division did not have a written policy and procedure for the distribution of excess auction monies. When a vehicle was not claimed by the owner within 30 days of being towed, the division auctioned the vehicle. If the amount received was greater than the towing, storage, and administration fees, the excess was transmitted to the Treasurer's office for deposit into an escrow account. At the end of each fiscal year, the Comptroller's office distributed unclaimed monies to the city's General Fund.

Recommendation: The Department of Streets adopt a written policy and procedure concerning the distribution of excess auction monies.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department has a policy following the sale of auctioned vehicles that includes the transfer of monies (less the tow fee and storage fee) to the Treasurer's office to an escrow account. The Treasurer's office holds the amount for a period of 1 year in the event the vehicle owner comes forward with a valid claim to collect. If that time period expires, the monies are transmitted to the city's General Revenue Fund.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.E.2.

Finding: A \$200 administration charge was assessed on each vehicle sold to cover the costs of labor and paperwork involved in auctioning a vehicle; however, no documentation of costs or how this fee was determined was available.

Recommendation: The Department of Streets review and document the division's costs of administering auctions of towed vehicles and establish the administrative fee to recover those costs.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department reviewed the costs associated with administration of auctioning vehicles and determined them to be nominal and reasonably covered under the general administration efforts by staff, negating the need for an additional fee solely for auction administration time.

Contact Phone Number: (314) 647-3111

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Towing Division

Finding Number: 2.E.3.

Finding: The \$200 administration fee for auctioning a vehicle was not adequately recorded in the division's accounting records, and as a result, the accounting records and the amount transmitted as surplus from the auction sale did not reconcile. The court based Regional Justice Information System (REJIS) computer system was used by the division to obtain information concerning a vehicle it had towed and to record information such as the fees charged for towing and storage; however, the \$200 administration fee was not recorded on this system.

Recommendation: The Department of Streets ensure the fees for towing, storing, and auctioning a vehicle, including the \$200 administration fee, are documented in the REJIS system.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

All fees (less the auction administration fee no longer charged) are documented in the REJIS system.

Status of Findings

Finding Title: Towing Division

Finding Number: 2.F.

Finding: The division did not have written procedures concerning the handling of damage claims and claims were not adequately documented. The division did not obtain bids for three of four damage claims reviewed. The division had not obtained bids or entered into a written contract with the auto repair shop utilized by the division. The division did not properly complete damage claim forms. The division did not obtain or retain adequate documentation for some damage claim expenditures.

Recommendation: The Department of Streets establish a written policy or procedure for the handling of vehicle damage claims. Procedures should include proper handling of bids, completing damage claim forms, and obtaining adequate documentation for expenditures. In addition, the Division should work with the city's Supply Division to obtain bids and enter into a written contract for auto repair services.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The City Counselor's office has a written policy for handling damage claims. When a claim occurs, it is handled directly by the City Counselor's office. The City Counselor's office is responsible for properly handling of bids, completing damage claim forms, and obtaining adequate documentation for expenditures.

Finding Title: Collection Procedures

Finding Number: 5.

Finding: The Department of Streets had not developed procedures to properly follow up and turn over old accounts receivable balances to a collection agency or the City Counselor's office. A report of amounts owed to the department could not be generated due to how files were organized.

Recommendation: The Department of Streets develop procedures to ensure accurate lists of accounts receivable are prepared and updated on a timely basis, and to monitor and pursue timely collection of outstanding amounts due to the city.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department maintains accurate listings of accounts receivable and the department monitors and pursues timely collection of outstanding amounts due to the city.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Permits and Fees

Finding Number: 6.A.

Finding: The Department of Streets had not documented how fees for several permits charged by the department were established or determined. Many permit fees charged by the department had been established by city revised code or ordinances; however, there were several permit fees such as bike rack rentals (security barriers), street performer permits, city street map sales, street paving and sealing charges, traffic count book (number of vehicles using specific city streets) sales, and dumpster impound charges which were not set by city revised code or ordinance. These fees were set at the discretion of the director with no written documentation of how the fees were determined.

Recommendation: The Department of Streets review and document the costs of various permits, items, and services and establish fees to recover those costs.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Permit fee amounts were examined in 2010 and took into account the cost of these services and administration. Of the 28 permit items reviewed, 9 new fee increases were recommended for consideration. Primary examples of permit fees that changed following this review were excavations (previously \$65 and now \$125), blocking lanes (previously we charged various amounts for different conditions but now charge \$20 per curb/parking lane and \$30 per traffic lane), driveway construction (previously \$50 commercial/\$20 residential and now \$100 commercial/\$50 residential), sidewalk construction (previously \$10 residential/\$50 non-residential and now \$25 residential/\$50 non-residential), sidewalk vending (previously \$25 and now \$200), vacate streets/alleys (previously \$100 and now \$500), and bad check fee (previously \$20 per check and now \$40 per check). Fees that are no longer applicable are curbing (previously \$5/linear foot, but we no longer sell curbing), barricade rental (previously \$2.10 each day plus a \$25.00 delivery charge, but we no longer rent out barricades). The fee structure will be reviewed again in fiscal year 2019.

Finding Title: Permits and Fees

Finding Number: 6.C.

Finding: Fees were not consistently charged in accordance with the established schedule for sidewalk permits. City Revised Code Section 20.46.010, indicated a sidewalk construction permit in a residential zone was \$10 and all other zoning areas were \$50 per permit. The department had not adequately documented why these amounts were not charged for some sidewalk permits.

Recommendation: The Department of Streets ensure fees charged for sidewalk permits are in accordance with the established policies. Exceptions should be fully documented and approved by a supervisor.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Fees charged for sidewalk permits are reviewed daily by a supervisor per policy and city code.

Finding Title: Street Paving and Sealing

Finding Number: 7.A.

Finding: Some amounts recorded as payments received from contractors in the manual log did not agree to the invoices mailed to the contractors. After street paving and sealing work was complete, an invoice was prepared by a front office clerk, based on the inspection report, and mailed to the contractor for payment. The Director's office maintained a book with a ledger sheet for each contractor and an entry was made to this ledger indicating the amount due per the invoice. Department personnel indicated that sometimes a contractor informed the Director's office about a mistake in the charges on the invoice. The Director's office obtained verbal approval to change the invoiced amount from the Street and Traffic Inspector Supervisor. The Director's office did not maintain documentation of the revised invoice, but the entry in the ledger was revised when payment was received from the contractor.

Recommendation: The Department of Streets ensure proper documentation, including supervisory approval, is maintained for changes to street paving and sealing invoices.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The department verifies documentation is proper, including a supervisor approval, on all street paving invoice charges.

City of St. Louis - Department of Streets
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Street Paving and Sealing

Finding Number: 7.B.

Finding: Some invoices were not mailed to the contractors in a timely manner for street paving and sealing work. Invoices were sent to the contractors after a street inspector approved the work performed at the site. The inspectors submitted the inspection report to the Director's office and the invoice was prepared by the clerical staff. The inspector's report indicated when the work was completed but did not clearly indicate when it was submitted to the clerical staff for processing.

Recommendation: The Department of Streets improve procedures for the processing of inspection reports and ensure invoices for street paving and sealing are mailed in a timely manner.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Invoices for street paving and sealing are mailed in a timely manner. A review of the division procedure is as follows. An asphalt ticket is prepared as soon as the backfill inspection is completed. The asphalt ticket is forwarded to the asphalt crews on the next business day. The asphalt crews then patch the area. Upon completion, the asphalt ticket is delivered to the accountant either the same day or the next business day. The completed work request has always been delivered back to the accountant no later than the next business day. Asphalt tickets are customarily signed and dated by the employee completing the work.

Finding Title: Vehicles

Finding Number: 8.A.

Finding: The Department of Streets did not require vehicle usage logs be maintained for its vehicles. In addition, the Department of Streets did not regularly monitor the fleet to ensure vehicles were used efficiently and effectively.

Recommendation: The Department of Streets require the preparation of usage logs for all vehicles and ensure these logs are properly reviewed.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Global Positioning System (GPS) devices are installed on vehicles with the ability to generate daily logs on demand for usage/activity. The department has recently procured new GPS technology due to discontinuation of the prior GPS product by the manufacturer. The new system will also allow us to prepare usage logs and our policy will be to review them regularly to verify fleet efficiency.

Finding Title: School Crossing Guard Program

Finding Number: 10.

Finding: The Department of Streets did not have written policies and procedures for the school crossing guard program. Both private and public schools could request the Director of Streets provide a crossing guard for its school. The crossing guards were considered Department of Streets employees and paid through city payroll.

Recommendation: The Department of Streets develop written policies and procedures for the handling of the school crossing guard program.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Historically, the department has funded school crossing guards at approximately 22 schools. However, in fiscal year 2018 we were only allowed to support 3 schools with our budget. Depending on the direction of the program and funding availability for subsequent fiscal years, we will fully document a procedure and policy accordingly.

NICOLE GALLOWAY, CPA

Missouri State Auditor

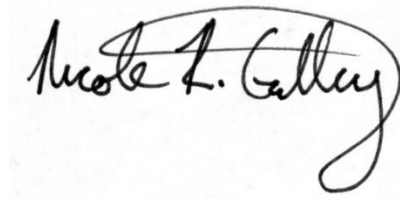

To the Honorable Mayor
and
Acting Director of the Department of Health/Commissioner of Health
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2009-59, *City of St. Louis, Department of Health*, and applicable audit report findings contained in Report No. 2009-60, *City of St. Louis, Lead Safe St. Louis Program*, both issued in June 2009, as part of our current audit of the City of St. Louis. The functions of the Lead Safe St. Louis Program are performed by the Community Development Administration, Department of Public Safety - Building Division, and Department of Health; therefore, applicable follow-up statuses for the Lead Safe St. Louis Program have been included in these agency follow-up reports. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Department of Health. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Department of Health that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May and June 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is written in a cursive style with a large, looping "G" at the end.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Department of Health

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Travel Expenses

Finding Number: 1.A.

Finding: Department of Health (DOH) employees attended out-of-state conferences and incurred excessive lodging expenses by staying at the hotels that sponsored the conferences. City travel regulations encouraged employees to stay at the sponsoring hotel for the conference and allowed transportation expenses between the airport and the hotel; however, travel regulations stated taxi services within a city were unallowable expenses. As a result, it appeared employees had little choice except to stay in sponsoring hotels.

Recommendation: The DOH work with the Board of Estimate and Apportionment to change city travel policies to allow reimbursement for travel expenses incurred within a city.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A travel policy was implemented on March 10, 2010, and updated and revised on July 19, 2017. The City of St. Louis travel regulations do not allow taxi services within a city and DOH staff are encouraged to obtain lodging at either the sponsoring hotel or at a comparable hotel.

Finding Title: Travel Expenses

Finding Number: 1.B.

Finding: The DOH incurred travel expenses that did not appear allowable under the funding grant or included expenses that were not allowed by travel regulations.

Recommendation: The DOH ensure travel expenses are paid only for amounts allowed by city travel regulations and applicable grant agreements.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A travel policy was implemented on March 10, 2010, and updated and revised on July 19, 2017. The DOH has taken the necessary actions to ensure that travel expenses are paid only for amounts allowed by the City of St. Louis travel regulations and applicable grant agreements. All travel paid for using grant funds must be included in the grant budget and must relate to the grant deliverables and outcomes.

Finding Title: Travel Expenses

Finding Number: 1.C.

Finding: The DOH allowed requested trips to be completed without required approvals and documentation.

Recommendation: The DOH adopt procedures to ensure all travel requests and reimbursements are approved by the appropriate authorities and required documentation is obtained prior to approval.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A travel policy was implemented on March 10, 2010, and updated and revised on July 19, 2017. The DOH has procedures in place that require travel requests be submitted and approved in advance. At least 45 days in advance of travel, the staff must obtain his/her manager's approval. The travel packet is then logged and submitted to the Fiscal Services Section of the DOH. The appropriate accountant ensures that funding is available and all necessary paperwork is submitted to the Fiscal Manager, DOH Director, and the Comptroller's and Mayor's offices for approval.

Finding Title: Payroll and Other Expenditures

Finding Number: 2.A.

Finding: Our review of payroll expenditures from grant funds noted applicable timesheets reviewed did not have documentation of time spent on grant-related functions.

Recommendation: The DOH require all employees document time spent on grant-related functions.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A policy was implemented in 2010 and updated and revised on November 20, 2016. Managers or supervisors must ensure that all employees assigned to a grant submit time documentation forms that indicate the time spent/hours worked on and charged to the grant. These forms are due bi-weekly at the end of each pay period. The manager or supervisor approves the form, retains a copy for his/her records, and sends the original to the payroll section where it is shared with the appropriate accountant. The accountant for the grant uses the time documentation form and the employee timesheet information to reconcile spending against the approved grant budget.

Finding Title:	Payroll and Other Expenditures
Finding Number:	2.B.
Finding:	Our review of grant-funded expenditures noted items that did not appear allowable under the funding grant.
Recommendation:	The DOH implement procedures to ensure only allowable items are purchased with grant funds.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A purchasing and expenditure policy was implemented on October 23, 2008, and updated and revised on April 30, 2018. All purchases from grant monies must be included in the grant budget and must be tied to the grant's scope of work, deliverables, and outcomes. Employees within each program complete an internal requisition and attach a copy of the page of the grant contract that clearly states that the expenditure is allowable and a statement justifying the purchase. The internal requisition, copy of the grant contract page, and brief justification/explanation for the purchase should be forwarded to the Fiscal Accountant for verification of funds and then to the DOH Director or Commissioner of Health for approval.

Finding Title: Payroll and Other Expenditures

Finding Number: 2.D.

Finding: The DOH entered into two agreements for the creation of data management systems without soliciting proposals or justifying the reason for the sole source purchase.

Recommendation: The DOH ensure city purchasing policies are followed for purchases of data management systems.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A purchasing and expenditure policy was implemented on October 23, 2008 and updated and revised on April 30, 2018. The DOH follows the City of St. Louis Supply Division's policies and procedures for requests for proposal and entering into contractual agreements, including the sole source purchases. The contract with Innovative Data Systems was canceled in December 2016, resulting in a cost savings of \$10,000. The Functional Needs Registry contract was funded in part by the DOH (the Department of Human Services is the contract holder). The DOH no longer provides funding for this contract.

Finding Title: Air Pollution Control Program

Finding Number: 3.A.

Finding: Eight employees of the Air Pollution Control Program (APCP) regularly took their assigned vehicles home rather than parking them at the air pollution control building. APCP officials stated there was no particular business purpose for allowing the inspectors to drive the vehicles home and this practice had been allowed for many years. In addition, the inspectors were not required to maintain mileage logs.

Recommendation: The DOH require mileage logs for all city vehicles and discontinue the practice of allowing employees to commute in city vehicles when there is no clear business purpose.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

On June 10, 2011, the State of Missouri discontinued funding of local air pollution agencies, including the City of St. Louis DOH APCP. There have been no air pollution control employees since November 2013.

Any future air pollution control employees will make use of personal vehicles and will submit mileage records for reimbursement. Any persons using city vehicles will make use of a daily report form to document mileage, purpose, etc. for each trip.

Finding Title: Air Pollution Control Program

Finding Number: 3.C.

Finding: The city did not have a Board of Air Pollution Control Appeals and Variance Review as required by city code.

Recommendation: The DOH work with the Mayor's office to reinstate the Board of Air Pollution Control Appeals and Variance Review to comply with city code.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

City Ordinance 68657 (effective June 2, 2010) eliminated the Board of Air Pollution Control Appeals and Variance Review. City Ordinance 70607 (effective July 19, 2017) replaced Ordinance 68657, and did not reinstate a Board of Air Pollution Control Appeals and Variance Review due to two factors:

1. City Ordinance 70607 relies on the Administrative Citation Fine Ordinance 69821 (effective January 24, 2015) to address any appeal for fines.
2. The scope of City Ordinance 70607 covers limited air pollution functions, including asbestos abatement/demolition and air pollution nuisance, and any variance will be considered by the Commissioner of Health or his/her designee.

Finding Title: Special Fund Receipts

Finding Number: 4.

Finding: The DOH did not reconcile Medicaid or court fine deposits to applicable billing and receipt records. While the DOH received monthly reports of deposits into the Remediation Special Fund from the Comptroller's office, the DOH did not reconcile deposits to BD Medicaid billing records or to fines received from the municipal court.

Recommendation: The DOH implement procedures to reconcile deposits into the Remediation Special Fund to applicable billing and receipt records.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Changes in personnel have interrupted this reconciliation procedure but it is being restored. Court fines from the Problem Property Court will be received by the DOH each month from the Law Department. Medicaid invoices will be received by the DOH each month from the BD's Lead Program. These receipts will be compared to the monthly revenue report to ensure funds are deposited in the Remediation Special Fund for the Lead Program.

Status of Findings

Finding Title: Grant Compliance

Finding Number: 5.

Finding: The DOH and BD overspent applicable grant funding during the year ended June 30, 2008, and the errors were not corrected in a timely manner.

Recommendation: The DOH and BD implement controls to ensure grant monies are expended within grant budgets, and correcting entries are made timely.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Many of the positions supported by grant funds were partially paid by other city funds. On a monthly basis the DOH's Fiscal Services Section prepares documents known as "payroll exceptions" to transfer any payroll costs from grants to the other funds that partially cover payroll expenses. For example, a nurse may be paid 50 percent from a grant and 50 percent from other city funds. The payroll expenditures are initially charged to the grant. After the payroll is completed, the payroll exceptions documents transfer half of the payroll expenses from the grant fund to the city fund. These controls help ensure that grant funds expended are not in excess of the available funds.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Tishaura O. Jones, Treasurer
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2008-97, *City of St. Louis, Office of Treasurer*, issued in December 2008, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Office of Treasurer. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Office of Treasurer that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Office of Treasurer

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Bank Accounts and Investments

Finding Number: 1.A.

Finding: The Treasury Division did not adequately document the competitive procurement of services for the deposit of city funds. The investment policy required the Treasurer to annually select financial institutions through a formal, competitive procurement process. However, the Treasury Division had not competitively procured the bank depositories and the banks and accounts utilized by the Treasury Division had not changed in recent years.

Recommendation: The Treasurer's office periodically solicit formal bids or proposals for banking services and maintain adequate documentation of the factors considered and the decisions made.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasurer's office has met with the banks currently managing the city's largest accounts to identify potential savings. These meetings with the current city depositories have yielded over \$100,000 in potential savings in bank services. The Funds Committee meets annually to certify every bank that does business with the City of St. Louis after evaluating its lending data.

Per the Chief of Staff and Counsel, the Treasurer's office plans to issue a formal request for qualifications (RFQ) later this year for banking services.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Bank Accounts and Investments

Finding Number: 1.B.1.

Finding: The Treasury Division had not resolved old reconciling items in its accounts. The Dormant Account contained old unidentified monies from other bank accounts that were closed 10 or more years ago.

Recommendation: The Treasurer's office contact the payees and attempt to resolve the old outstanding checks and unidentified monies. If payees cannot be located, the amounts should be turned over to the state's Unclaimed Property Division. Old outstanding checks and unidentified monies should be followed up on and resolved timely.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasury Division works with other departments to get the necessary data to contact everyone that has outstanding checks before funds are submitted to the State of Missouri.

Per the Treasury Division Operations Director, the outstanding checks at the time of the 2008 audit (i.e., checks as of October 31, 2007) have been identified and/or sent to the State of Missouri as unclaimed property. There is a requirement to send unclaimed property to the state within 3 years of its issuance. Currently, the department has three types of outstanding checks and the status of each is as follows:

- Election Board and Jury Checks: Outstanding jury checks were submitted to the state in a timely fashion. Board of Election checks are still outstanding. The Treasury Division is working to address these outstanding matters.
- Payroll Checks: Some outstanding payroll checks were submitted to the state, but there still are several outstanding checks within this timeframe. The Treasury Division is currently working to address whether these outstanding checks were issued to the state, but may not have been properly recorded or reconciled. The Treasury Division is working to address this issue.
- Miscellaneous Withholding: Outstanding withholding checks were submitted to the state for calendar year 2011, but there is still one check outstanding for December 31, 2008. Currently, the Treasury Division is working on 13 checks for the period February 11, 2015, to December 31, 2015.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Bank Accounts and Investments

Finding Number: 1.B.2.

Finding: The procedures of the Treasury Division for posting electronic deposits to the daily ledger and contacting other departments about unremitted Receipt Coding Forms (RCFs) or adjustments related to those electronic deposits were not sufficient to ensure timely posting of those receipts. We noted several items recorded on the November 2007 bank reconciliation that had been electronically deposited into the clearing bank account, but were not posted to the daily ledger until at least a month or more later.

Recommendation: The Treasurer's office work with other city departments as necessary to ensure that receipts are promptly posted to or adjusted on the accounting ledgers.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Treasury Division Account Manager, electronic receipts go to the city clearing account, which is the omnibus account that is used to pay many of the city's bills and tax increment financing payments. Most of the electronic receipts are related to the Grants Department regarding federal grants, but many of the receipts pertain to wire transactions initiated by the Treasury Division. The RCF is required to book the receipt to the accounting ledgers. The Treasury Division Accounting Manager notifies all departments by email when a receipt arrives.

If an RCF is not received by the Treasury Division within 1 week, the recommended practice is to contact the department by email. The Treasury Division has two dedicated staff who conduct research and provide the Comptroller's office with customer service regarding outstanding RCFs.

RCFs are also prepared by the departments and submitted to the Treasury Division for booking. To be more proactive and to keep books as accurate as possible, the Treasury Division has recently implemented a process where Treasury Division clerks print out the daily incoming wire transactions and list the department for which each respective wire transaction is assigned. The Treasury Division clerks give this information daily to the Cashier so she will know which wire transactions have been completed. However, it is the responsibility of the receiving department to prepare and submit the RCF to claim the funds. Thus, these wire transactions will not be booked until the Cashier receives an RCF. In this case, the Treasury Division will only reflect receipt of the wire transaction.

The Treasury Division has created documentation using Google Docs which lists all wire transactions that have been posted for the month. This document covers the outstanding wire transactions from the Treasury Division, as well as wire transactions that have been claimed by departments. This document is available for the Comptroller's office to review.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Bank Accounts and Investments

Finding Number: 1.C.

Finding: The Treasury Division did not always promptly prepare bank reconciliations.

Recommendation: The Treasurer's office perform bank reconciliations timely for all accounts.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Treasury Division Operations Director, specific timeframes for reconciliation have not been assigned on each of the 33 accounts. However, the Accounting Manager has been directed to oversee the process, and all accounts are expected to be reconciled within 2 weeks after month end. As of the date of this response (May 2018), all accounts have been reconciled through December 31, 2017, except for the payroll and city clearing accounts. The ability to perform timely reconciliations for all City of St. Louis accounts requires an additional accountant clerk, which requires funding through the budget process.

Contact Person: Connie Johnson
Contact Phone Number: (314) 622-3510

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Bank Accounts and Investments

Finding Number: 1.D.

Finding: The Treasury Division did not maintain adequate documentation to support investment decisions.

Recommendation: The Treasurer's office maintain documentation to support investment decisions.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasury Division maintains a listing of investments in the general pool and for bonds by maturity. As instruments mature or a determination has been made internally that funds are needed, the Treasury Division will inquire about investment strategy/direction from the Comptroller's office via email. The Treasury Division will periodically inquire about investment strategy.

The Treasury Division relies on the city's contracted asset manager (PFM) to help make investment decisions for the city. PFM sends quarterly reports to the city. In certain situations, we reach out to PFM to request information about certain investments, losses and gains, etc. All desired changes are communicated to PFM from the Treasury Division via email. These emails are the documentation to support any investment decisions relating to the general pool and bond issues and are kept in the Comptroller's office. The Treasury Division also maintains emails and other documentation regarding all investments and we encourage the departments to do the same. The listing of investments is updated daily and maintained on the Treasury Division's shared drive.

All investment decisions relating to the St. Louis Lambert International Airport (Airport) are directly communicated from the Airport to PFM. The Treasury Division does not maintain any documentation of these decisions. The Water Division and Airport are required to make their own investment decisions, but they also work with the Treasury Division. The Treasury Division maintains copies of all trade tickets as well.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Segregation of Duties

Finding Number: 2.

Finding: Receipting procedures did not provide adequate control over monies received in the Treasury Division. The various city departments turned over collections of fees, taxes, and other monies received to the Treasury Division for deposit into city accounts. The remitting city departments documented each turnover on a RCF and a Form 449 and remitted these forms along with the collections to the cashier in the Treasury Division. The Treasury Division indicated these forms were not prenumbered due to the forms originating in multiple city departments. The Treasurer's cashier verified the cash and checks to the form, stamped the RCF paid, recorded a sequential number on the form, remitted one copy of the RCF to the Comptroller's office, and returned one copy of the RCF to the remitting department. These procedures appeared adequate to ensure monies recorded on the daily ledger were deposited; however, errors or irregularities could have occurred that would not have been detected by current procedures. Because the RCFs and Forms 449 were not prenumbered, but were instead assigned a sequential number by the cashier who received these forms directly from the remitting departments and deposited the cash, there was less assurance that all collections were posted to the daily ledger.

Recommendation: The Treasurer's office strengthen controls over monies collected in the Treasury Division.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasury Division has a two-tier approach to receipting procedures which ensures adequate control over monies. The first tier involves the Cashier who is responsible for the daily operations and management of the cash window. The Cashier reconciles daily receipts, prepares deposits, receipts and journalizes payments made by cash and checks received from departments and the public, and completes and issues official receipt slips for all revenues received, as well as counts and balances amounts received against the revenue receipt slips issued daily. The Cashier books all transactions with approved RCFs.

The second tier involves the Accountant who is responsible for bank reconciliations and fund investments, including General Ledger research and reconciliations for 33 bank and investment accounts. This position also serves as a back-up Cashier when necessary. Recently, the Treasury Division acquired a temporary Investment and Reconciliation Clerk who works directly with the Accountant. The addition to the team has helped the Treasury Division make significant progress in updating most reconciliations handled by the Treasury Division. Through this team effort, with the assistance of the Comptroller's office, account books have been and are currently being researched on a regular basis to ensure all outstanding issues are addressed. This process usually results in the preparation of RCFs and adjustments for wire and investment transactions. Upon approval of the RCFs and adjustments by the Account Manager or the Assistant Treasurer, RCFs and adjustments are submitted to the Cashier for booking purposes.

Another way the Treasury Division has worked to strengthen procedures is by working more closely with the Comptroller's office. The Treasury Division and the Comptroller's office meet on an average of once a month and as

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

needed. This collaboration with the Deputy Comptroller and her team of accountants in conjunction with the Treasury Division's Accountant, Investment and Reconciliation Clerk, and Assistant Treasurer have been a check and balance on providing quality assurance and control over the city's deposits and receipts.

The Treasurer's office requires each department to perform monthly reconciliations to ensure all funds have been posted.

Contact Phone Number: (314) 622-3510

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Expenditures

Finding Number: 3.A.1.

Finding: The Treasurer's office did not execute written agreements for the services paid from bond proceeds related to parking projects. Additionally, the advisors remitted the invoices directly to the bond trustee for payment, and the Treasurer did not document or maintain evidence of formal approval of the payments. Furthermore, the invoices noted only the total amount due and provided no detail as to how the amount due was derived. For the 2006 bond issuance, the Treasurer's office contracted with one of the financial advisors to assist with the bond issuance and other matters for \$48,000 for one year. The Parking Division subsequently made monthly payments to the advisor totaling \$48,000 from the Parking Fund. Additionally, the advisor invoiced the bond trustee directly and received another payment totaling \$37,000 from the proceeds of the 2006 bonds. Consequently, it appears the advisor received \$37,000 more than he was entitled to under the terms of the contract.

Recommendation: The Treasurer's office execute written contracts for financial advisory services on bond issuances, document approval of related invoices, and ensure amounts paid are consistent with the contract terms. Additionally, the Treasurer should review the payments to the financial advisors and consider obtaining repayment for any amounts paid in excess of agreed-upon terms.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Chief of Staff and Counsel, written contracts are in place for all current financial advisory services. Financial advisory services are paid a flat fee on a monthly basis specified by contract, which simplifies oversight over such payments. The contracts are placed on the executive drive and are accessible for review by all pertinent parties. Although financial advisory services are paid a flat fee, invoices are submitted for all payments. They are reviewed by the Chief Financial Officer (CFO), vouchered for payment, and submitted to the Treasurer, Chief of Staff, and Counsel for approval. Once approved, they are resubmitted to the Fiscal Department's Accounting Clerk II, who begins the cycle of payment with the Comptroller's Accounting Services Section. The advisory services were awarded after issuing a competitive request for proposal (RFP) or RFQ. Additionally, the Treasurer issued an RFQ for underwriters in 2015. The Treasurer ultimately selected three different firms to potentially serve as underwriters for bond issuances.

The current procedure that we have in place of the CFO reviewing all invoices before they are sent to the bond trustee for payment should prevent overpayment. If an overpayment should occur, the Parking Division will attempt to recoup funds from the vendor through reduction of current payments or seek legal action. We do not retain copies of invoices for financial advisory services that are paid by the bond trustee.

Finding Title: Expenditures

Finding Number: 3.B.

Finding: As of May 2008, the Treasurer's office had not installed a new payroll/personnel system that was acquired in December 2007 and some of the warranties had already expired.

Recommendation: The Treasurer's office install the automated payroll/personnel system promptly. Future equipment purchases should be installed in a timely manner.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The automated payroll/personnel system that was purchased in December 2007 was installed under the previous administration in 2009. That system became outdated and obsolete. The NOVAtime 5000 Workforce Management Solution was purchased in February 2016. The system and equipment were installed promptly and the system was fully implemented on August 7, 2016.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Expenditures

Finding Number: 3.C.

Finding: The Treasurer's office did not have a formal procurement policy. As a result, the decision of whether to solicit bids/proposals for a particular purchase was made on an item-by-item basis.

Recommendation: The Treasurer's office establish formal procurement policies and procedures, including documentation requirements regarding the bids or proposals received and justification for the vendor selected.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Chief of Staff and Counsel, the Treasurer's office utilizes the RFP process for procuring professional services. Additional guidelines have been established this year regarding the minimum dollar amount required to justify utilizing the RFP process. Our office has issued RFPs or solicited bids for financial advisory services, financial management services, feasibility studies, and engineering services, which were identified in the 2008 audit. Our office has not issued formal RFPs for legal services based upon inheriting several cases from the previous administration. The law firms utilized by the Treasurer's office tend to have either specialized knowledge or institutional history with the office.

A minimum of three proposals are required, and if three proposals are not obtained, the office must issue another RFP. The Executive Committee will evaluate the proposals, which will include a financial analysis for due diligence as a part of the selection process. The RFP process is not utilized for nonprofessional services.

Status of Findings

Finding Title: Expenditures

Finding Number: 3.D.

Finding: The Treasurer's office did not execute formal written contracts for legal services, engineering services, and feasibility study services.

Recommendation: The Treasurer's office execute formal written agreements for services received.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Chief of Staff and Counsel, there are formal written agreements for current services being rendered. These contracts are on the executive drive and are accessible for review by all pertinent parties. These written agreements are to be finalized, signed, and placed on the executive drive prior to the start of any services being rendered.

Finding Title: Euclid/Buckingham Garage

Finding Number: 4.A. and 4.B.

Finding: The Parking Division did not ensure a developer complied with contract terms regarding invoicing and payment for the Euclid/Buckingham garage construction. The Parking Division did not require the developer to provide documentation of construction progress as a basis for requesting payment. The Parking Division processed the payments to the developer without applying a \$500,000 credit for the sale of the air rights.

Recommendation: The Treasurer's office ensure staff responsible for monitoring projects and approving invoices are aware of significant contract terms and make no further payments to the developer without documentation of construction completion and lien waivers. Subsequent payments should be linked to the documented percentage of construction completed. Additionally, amounts paid to the developer should be net of the \$500,000 air rights credit.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Per the Parking Administrator, the Treasurer's office has begun utilizing the services of outside independent project managers that will work in conjunction with the Facilities Manager for construction projects on a more systematic basis. For example, the most recent construction project was for Cupples #7 and the project manager was Kwame Building Group.

A timeline is provided that indicates construction progress and payment requirements, in conjunction with the contract. Updates are given to the Chief of Staff, Counsel, and Parking Administrator. Project information is uploaded to the My Smart Plans system for review. All signed and executed contracts are on the executive network drive for access. It is required that lien waivers be provided by each contractor. Invoices are presented for payment, along with an Application and Certificate for Payment, that indicates the portion of the contract that has been completed. This is approved by the Facilities Manager, the Chief of Staff, Counsel, or Parking Administrator before submission to the Fiscal Department for payment. The Fiscal Department ensures all pertinent documents have been prepared and executed prior to processing for payment. Air rights credits are no longer included in current construction projects.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Parking Ticket Processing Contract

Finding Number: 5.A.

Finding: The Parking Division did not consistently verify the number of processed tickets, paid tickets, or delinquent collections on the contractor's billings.

Recommendation: The Treasurer's office verify the number of tickets processed and paid and the delinquent collections on the contractor's billings to the totals of detailed reports.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Currently, the contractor's bill reflects the tickets processed for the month (Police and Treasurer's office), along with the delinquent tickets collected, credit card charges, and reimbursable postage. We are not charged on tickets paid; these would be included in the tickets processed. The price is verified on the contractor's billings based on the contract. The tickets processed and the dollar amount of the delinquent collections are verified against the Payment Detail Reports from eTims (the contractor's database). The Fiscal Department has access to eTims, which has tickets issued and tickets paid. A methodology will be developed with the Parking Administrator to verify the tickets issued in eTims against the tickets issued and tracked by the Parking Enforcement Office for the Treasurer's office.

The tickets paid are not verified. However, the amount paid is verified through the UMB Bank reconciliation process. It should also be noted that this contract was awarded via a competitive RFP process in February 2015 to Xerox State and Local Solutions, Inc.

Finding Title: Parking Ticket Processing Contract

Finding Number: 5.B.

Finding: The Parking Division did not consistently verify the contractor met the performance criteria for the performance bonus. The contractor did not routinely provide the Parking Division with the details of its performance measurements. Additionally, the Parking Division did not periodically test the contractor's measures or its compliance with most standards.

Recommendation: The Treasurer's office require the contractor to routinely provide reports supporting its performance measurements and periodically test the contractor's compliance with each of the performance standards before paying the performance bonus.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The performance bonus has been eliminated. However, the contractor's compliance with performance standards is still crucial. To ensure compliance, the Parking Division receives the Service Organization Compliance Report on an annual basis from the contractor's independent auditor.

Finding Title: Parking Ticket Processing Contract

Finding Number: 5.C.

Finding: The 2005 contract amendment appeared to have provided no additional services to the Parking Division and city while allowing the contractor to earn additional bonuses related to the early collection incentive bonus.

Recommendation: The Treasurer's office require additional services from the contractor for any subsequent contract amendments which allow additional bonuses.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The bonus structure was a part of a contractual obligation with Duncan Solutions, which no longer exists. This contract ended in January 2014. This is no longer applicable.

Finding Title: Parking Meters

Finding Number: 6.

Finding: The Parking Division had not analyzed and compared meter costs and related revenues.

Recommendation: The Treasurer's office analyze and compare meter costs and revenues and consider removing the low revenue meters or service, replace, and collect coins from those meters with less frequency than other meters.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasurer's office issued a competitive RFP for meter costs and related revenues in 2014. Additionally, the Treasurer's office commissioned an independent parking study examining the city's current parking system and national best practices in 2014. In February 2015, an agreement was entered into between the Treasurer's office and Xerox State and Local Solutions, Inc. for the management of the Integrated Parking Management System for the City of St. Louis. This consists of managing the Parking Violations Bureau, meter maintenance and collections, and the sub-contractor companies (Hudson, IPS, and Parkeon) that offer their services to the city for parking purposes. Xerox is now operating under the name Conduent.

Finding Title: Personnel Policies and Payroll Procedures

Finding Number: 7.A.

Finding: The Treasurer's office did not have written policies addressing related employees. Employees were not required to disclose to management their relationship to other employees and related employees were sometimes in supervisory/subordinate positions.

Recommendation: The Treasurer's office develop a written policy on related employees, require employees to disclose such relationships, and prohibit employees from supervising relatives.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasurer's office Employee Handbook, effective January 1, 2015, includes an anti-nepotism policy that prohibits close relatives, partners, those in dating relationships, or members of the same household to be in positions that have a reporting responsibility to each other. The Treasurer's office application for employment requires applicants to disclose whether the applicant has relatives that work for the office. Additionally, the anti-nepotism policy requires employees to inform management and human resources if they begin a dating relationship or become relatives, partners, or members of the same household when one party is in a supervisory position.

Contact Phone Number: (314) 612-1475

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Personnel Policies and Payroll Procedures

Finding Number: 7.B.

Finding: Policies related to employee leave were not always enforced, and leave balances were not always maintained accurately. Additionally, employees were not periodically notified of their accumulated leave balances and the leave balances kept by the Treasurer's office were not periodically compared to the balances maintained by the Comptroller's office.

Recommendation: The Treasurer's office enforce employee leave policies and ensure accurate leave balance records are maintained. Periodically, employees should be notified of their leave balances and leave balances should be reconciled with the Comptroller's office.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Treasurer's office implemented the NOVAtime 5000 Workforce Management Solution on August 7, 2016, for the purposes of capturing, tracking, and managing employee time, labor, and attendance. The system automatically processes employee accruals on a bi-weekly basis and tracks current leave balances based on the manual entry of accrual usage by payroll clerks. All employees can view current accrued leave balances at any time via Employee Web Services from a computer or at a hand punch data collection terminal. The employees of the Treasurer's office are not civil service employees and do not fall under the civil service pay ordinance, and therefore, leave balances are not tracked by the Comptroller's office.

City of St. Louis - Office of Treasurer
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Vehicle Policies and Records

Finding Number: 8.A.

Finding: Vehicle usage/maintenance logs were often incomplete. Usage/maintenance logs were maintained in each vehicle and contained columns for the date, beginning and ending odometer readings, fuel dispensed, and maintenance. We noted 14 of the usage/maintenance logs had no odometer readings recorded for 2007, although the fuel invoices indicated usage for those vehicles, and many of the other logs lacked usage data for one or more days during 2007. Also, none of the logs included information about the daily destinations and purposes of the trip.

Recommendation: The Treasurer's office require employees record daily destinations, purpose, and odometer readings on the usage/maintenance logs. The logs should be periodically reviewed and the usage of the vehicles evaluated for reasonableness and propriety.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Indication of the daily destination and purpose for routine drivers (i.e., parking enforcement officers, parking enforcement supervisors, and couriers) is not necessary as they are required to utilize vehicles to complete essential functions of their jobs. Drivers are required to complete the daily mileage and safety ticket form which assures the documentation of mileage and the vehicle safety check. Information captured on the daily mileage and safety ticket form is reviewed by management to ensure completeness prior to submitting to the Fleet Section.

Maintenance logs are maintained by the Director of Fleet and Safety. Once the driver's daily mileage logs are received by the Fleet Section, they are reviewed by the Administrative Clerk. If there are any maintenance items checked off or recorded on the forms, the Administrative Clerk forwards them to the Director of Fleet and Safety. The Director then reviews the items that need attention and addresses those items by making the repair (i.e., replace burned out light bulbs; replace worn windshield wiper blades; add windshield washer fluid, engine oil, anti-freeze/coolant, etc.). Items that need to be addressed through routine maintenance or repair are then scheduled for service at a repair facility.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 52 political subdivisions required to file a financial report by September 30, 2018, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in September 2018, after their filing deadline. The filing status for these 14 entities is presented in summary on page 3 and by individual entity in Appendix B-D.

Nicole R. Galloway, CPA
State Auditor

Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings

September 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the State Auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 52 political subdivisions, other than cities, towns, and villages, with a fiscal year end of March 31, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 52 political subdivisions, 42 filed an annual financial report by September 30, 2018.

This report also includes the filing status for 14 political subdivisions, other than cities, towns, and villages, that filed their financial report in September 2018, after their filing deadline.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by September 30, 2018, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 51 cities and 25 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in September 2018, after their filing deadline. The filing status for these 29 cities and 2 villages is presented in summary on pages 4 and by individual entity in Appendixes B to D.

Monthly Report on Municipal Court and Revenue Filings

September 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities operating a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that operates a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 51 cities and 25 villages with a fiscal year end of March 31, 2018, whose financial reports, addendums, or certifications were due by September 30, 2018. Of the 76 cities and villages required to file an annual financial report, 55 filed the annual financial report timely. Of the 31 cities and villages required to file an addendum, 18 filed an addendum timely. Of the 30 cities and villages required to file a certification, 16 filed a certification timely.

Monthly Report on Municipal Court and Revenue Filings
September 2018
Executive Summary

This report includes the filing status for 29 cities and 2 villages that filed at least one of the items (financial report, addendum, or certification) in September 2018, after their filing deadline. Of these entities, 8 filed an annual financial report, 9 filed an addendum, and 21 filed a certification.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
and
Board of Directors of Fire Protection
Districts in St. Louis County

Certain fire protection districts are required by Section 321.690, RSMo, to be audited and to submit their audit reports to the State Auditor's Office (SAO). To address our responsibilities of Section 321.690.3, RSMo, and 15 CSR 40-4.010 to 15 CSR 40-4.020, we have reviewed the independent audit reports of the fire protection districts in St. Louis County, as of and for the year ended December 31, 2017. The purpose of this review was to evaluate the districts' compliance with statutory audit requirements and SAO regulations. Because our review is limited to statutory and regulatory compliance, we do not express an opinion or any other form of assurance on the audit reports.

There are 23 fire protection districts in St. Louis County. All districts with an audit period ending December 31, 2017, submitted audit reports. Section 321.690.2, RSMo, requires certain fire protection districts to have an audit performed biennially, and Section 321.690.3, RSMo, requires the districts to forward the audit report to our office within 6 months of fiscal year end. Kinloch Fire Protection District was not required to submit a report in 2018, because it is intending to obtain a biennial audit for the 2 years ended December 31, 2018, according to a letter received from the Kinloch Fire Protection District on September 4, 2018. This district is expected to submit an audit report for the 2 years ended December 31, 2018.

The SAO posts the individual audit reports to its website. A searchable link is available at <https://auditor.mo.gov>. A table summarizing our review of the St. Louis County fire protection districts' audit reports follows.

District	Audit Report Period	Report Compliance with Section 321.690.3, RSMo	Findings in Independent Audit Report

Riverview	1 Year Ended 12/31/2017	Yes	No
Robertson	1 Year Ended 12/31/2017	Yes	Yes
Spanish Lake	1 Year Ended 12/31/2017	Yes	No
Valley Park	1 Year Ended 12/31/2017	Yes	No
West County EMS	1 Year Ended 12/31/2017	Yes	No
West Overland EMS	1 Year Ended 12/31/2017	Yes	No

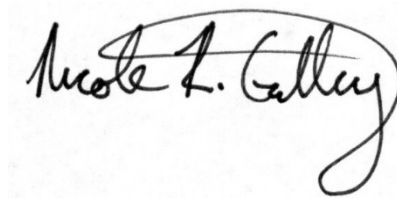

¹ The fire protection district provided a letter of intent to have an independent audit covering the 2 years ended December 31, 2018. The audit report is required to be submitted to the SAO no later than June 30, 2019.

² The audit report was filed after the statutory deadline of 6 months after the close of the fiscal year end.

³ The audit report filed included an error in the notes to the financial statements. A revised audit report was requested and obtained. We noted no concerns with the revised audit report.

⁴ The audit report filed did not include the views of responsible officials related to the audit findings, conclusions, and recommendations, as required for audits performed in accordance with *Government Auditing Standards*. A revised audit report was requested and obtained. We noted no concerns with the revised audit report.

No findings resulted from our review of the audit reports submitted by the St. Louis County fire protection districts.

Nicole R. Galloway, CPA
State Auditor

NICOLE GALLOWAY, CPA **Missouri State Auditor**

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
and
Board of Directors of Fire Protection
Districts in Greene County

Certain fire protection districts are required by Section 321.690, RSMo, to be audited and to submit their audit reports to the State Auditor's Office (SAO). To address our responsibilities of Section 321.690.3, RSMo, and 15 CSR 40-4.010 to 15 CSR 40-4.020, we have reviewed the independent audit reports of the fire protection districts in Greene County, as of and for the year or 2 years ended December 31, 2017. The purpose of this review was to evaluate the districts' compliance with statutory audit requirements and SAO regulations. Because our review is limited to statutory and regulatory compliance, we do not express an opinion or any other form of assurance on the audit reports.

There are 11 fire protection districts in Greene County. All districts with an audit period ending December 31, 2017, submitted audit reports. Section 321.690.2, RSMo, requires certain fire protection districts to have an audit performed biennially, and Section 321.690.3, RSMo, requires the districts to forward the audit report to our office within 6 months of fiscal year end. Some of the districts were not required to submit a report in 2018, because they obtain biennial audits and the most recent audit report submitted was for the 2 years ended December 31, 2016. These districts are expected to submit a biennial audit report for the 2 years ended December 31, 2018. As noted in our prior report, No. 2018-017, *Greene County Fire Protection Districts*, issued in April 2018, the West Republic Fire Protection District did not obtain the required independent audit for the 2 years ended December 31, 2016, in a timely manner. The SAO received the audit report on March 5, 2018, subsequent to our prior review.

The SAO posts the individual audit reports to its website. A searchable link is available at <https://auditor.mo.gov>. A table summarizing our review of the Greene County fire protection districts' audit reports follows.

District	Audit Report Period	Report Compliance with Section 321.690.3, RSMo	Findings in Independent Audit Report
Ash Grove	2 Years Ended 12/31/17	Yes ²	Yes
Battlefield	1 Year Ended 12/31/17	Yes	No
Bois D'Arc	2 Years Ended 12/31/17	Yes	No
Brookline ¹			
Ebenezer ³	2 Years Ended 12/31/17	Yes	No
Fair Grove ¹			
Logan-Rogersville ¹			
Strafford Volunteer ¹			
Walnut Grove	1 Year Ended 12/31/17	Yes	Yes
West Republic ^{1, 4}			
Willard	1 Year Ended 12/31/17	Yes	No

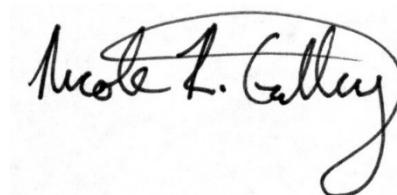

¹ The fire protection district had an independent audit for the 2 years ended December 31, 2016. The district's next audit is expected to cover the 2 years ended December 31, 2018, and is required to be submitted to the SAO no later than June 30, 2019.

² The audit report was filed after the statutory deadline of 6 months after the close of the fiscal year end.

³ The audit report filed included an error in the notes to the financial statements. A revised audit report was requested and obtained. We noted no concerns with the revised audit report.

⁴ Due to noncompliance in a previous period, the SAO reviewed the audit report for the 2 years ended December 31, 2016, submitted March 5, 2018. The audit report had no audit findings and was in compliance with Section 321.690.3, RSMo, except that the audit report was filed after the statutory deadline of 6 months after the close of the fiscal year end.

No findings resulted from our review of the audit reports submitted by the Greene County fire protection districts.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Laclede County

Sheriff's Controls and Procedures	The Bookkeeper does not deposit inmate monies timely. Sheriff's office personnel do not compare reports of month-end liabilities to the reconciled bank balance for the civil account. The Sheriff charges a \$10 flat fee for mileage when serving civil papers, which is not in accordance with state law. The seized property evidence log maintained is not accurate. The Sheriff's office does not charge or collect sales taxes on e-cigarettes sold to inmates, and no sales taxes are remitted to the Department of Revenue.
Property Tax System Changes	Refunds of overpayments related to errors in property tax records are not always properly recorded in the property tax system and reductions in assessed valuations do not always go through the abatement process.
County Collector's Penalty Distributions	The County Collector improperly calculated the distribution of late payment penalties collected from January 1, 2018, to May 31, 2018.
Tax Maintenance Fund	Some disbursements from the county's TMF were not in compliance with uses allowed by state law and/or were not reasonable. The County Collector did not transfer TMF monies in excess of the allowable limit at year-end to the county's General Revenue Fund.
Passwords	The County Assessor, Recorder of Deeds, and Public Administrator have not established adequate password controls to reduce the risk of unauthorized access to computers and data.
Prosecuting Attorney's Accounts Receivable	The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution.
Recorder of Deeds' Controls and Procedures	The Recorder of Deeds does not document his review of the daily transaction reports used to reconcile receipts to deposits and does not account for the numerical sequence of receipt numbers.
Senate Bill 40 Board's Budgets	The Senate Bill 40 Board did not approve budgets for the years ended December 31, 2017, and 2018, until April 2018, after our inquiry.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations of another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information	14
---	----

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
Officeholders of Laclede County

We have audited certain operations of Laclede County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, LLC, Certified Public Accountants, was engaged to audit the financial statements of Laclede County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

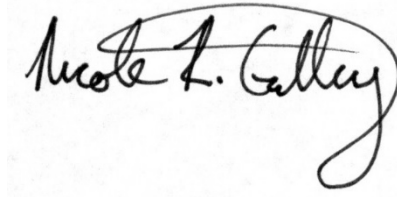

1. Evaluate the county's internal controls over significant management and financial functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Laclede County.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

	Misty Bowen, MSED
	Dovile Zavistauskaite

Laclede County

Management Advisory Report

State Auditor's Findings

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The office processed inmate monies, paper service fees, concealed carry weapon permit fees, bonds, and other miscellaneous receipts totaling approximately \$437,500 during the year ended December 31, 2017.

1.1 Deposits

The Bookkeeper does not deposit inmate monies timely. The Bookkeeper removes monies from 2 kiosks for deposit approximately once a month. This results in substantial cash amounts accumulating in the kiosks prior to deposit. For example, \$13,930 received at the lobby kiosk from September 22 through October 14, 2017, was not deposited until October 18, 2017. In addition, \$1,387 received at the booking kiosk and booking area from September 22 through October 14, 2017, was not deposited until October 17, 2017.

Failure to implement adequate depositing procedures increases the risk that loss, theft, or misuse of monies could occur and go undetected.

1.2 Liabilities

Sheriff's office personnel do not compare reports of month-end liabilities to the reconciled bank balance for the civil account. The monthly income summary report and the transaction report listed liabilities totaling \$2,947 at December 31, 2017, and the reconciled bank balance was \$2,297, resulting in a shortage of \$650. Due to personnel changes, a different person began reviewing disbursements and bank reconciliations in March 2018, and identified and corrected an overpayment error from November 2017 that caused the shortage. While procedures over disbursements and bank reconciliations have improved, monthly reports of collections on hand are not compared to the reconciled bank balance to ensure adequate funds are available to pay all liabilities.

Regular identification and comparison of liabilities to the reconciled bank balance is necessary to ensure accounting records are in balance and cash is sufficient to satisfy all liabilities. Differences should be adequately investigated and explained.

1.3 Paper service fees

The Sheriff charges a \$10 flat fee for mileage when serving civil papers, which is not in accordance with state law. The Sheriff collected approximately \$44,000 for civil paper service fees, including mileage, during the year ended December 31, 2017.

Section 57.280, RSMo, provides that the Sheriff be reimbursed for each mile actually traveled to serve any summons, writ, subpoena, or other order of the court. Charging a per-mile reimbursement for service will bring the Sheriff into compliance with state law.

1.4 Seized property

The seized property evidence log maintained is not accurate. During our review of the evidence log and items on hand as of April 2018, we noted cash totaling \$5,424 was recorded on the evidence log, but was not on hand. We

Laclede County
Management Advisory Report - State Auditor's Findings

later determined it had been turned over to the Circuit Clerk in February 2018. The evidence log had not been updated to reflect the disposition of this item.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the property. Complete and accurate inventory records should be maintained to ensure seized property is accounted for properly.

1.5 Sales tax

The Sheriff's office does not charge or collect sales taxes on e-cigarettes sold to inmates, and no sales taxes are remitted to the Department of Revenue (DOR). Pursuant to 12 CSR 10-110.955(3)(B), sales by the state of Missouri and its political subdivisions are subject to tax. Therefore, the Sheriff should be charging and collecting sales tax and remitting tax collections to the DOR.

Similar conditions
previously reported

Similar conditions to sections 1.1, 1.2, and 1.4 were noted in our prior audit report.

Recommendations

The Sheriff:

- 1.1 Ensure monies received are deposited timely.
- 1.2 Prepare a monthly lists of liabilities for the civil account and reconcile it to the reconciled bank balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved.
- 1.3 Ensure civil paper service fees are charged in accordance with state law.
- 1.4 Maintain accurate seized property records and ensure dispositions of seized property are properly recorded.
- 1.5 Contact the DOR for guidance on establishing procedures for charging and collecting sales taxes on e-cigarette sales and ensure all future sales tax collections are remitted to the DOR.

Auditee's Response

- 1.1 *No money was found missing during the auditor's review. The Sheriff's office has implemented new procedures regarding more timely deposits of money received at the kiosks.*
- 1.2 *No money was found missing during the auditor's review. The Sheriff's office staff identified the shortage mentioned in the review, not the auditors, and the shortage was an accounting issue and the money was not missing. The Sheriff's office has adopted new procedures regarding reconciliation of deposits and comparing a monthly list of liabilities to the reconciled balance.*

Laclede County
Management Advisory Report - State Auditor's Findings

- 1.3 *The flat fee for civil process was implemented by the previous Sheriff's administration. The purpose of the flat fee was to try to implement a recommendation from the State Auditor's Office to collect a mileage fee in advance. The procedure was changed on July 1, 2018, and mileage fees are now charged after the service of process.*
- 1.4 *No seized property was found missing by the auditors. The controls over seized property were overhauled at the beginning of the current administration, and best practices were implemented prior to the audit and are under continuous review by the current administration. The money mentioned in the finding was accounted for without issue, and was a data entry issue. Procedures for spot audits of the property room have been implemented.*
- 1.5 *This is under current legal review as to whether the Sheriff's office is required under state statute and the state code of regulations to collect the tax. If legal counsel agrees with the auditor's interpretation, the Sheriff's office will remit the tax money on future sales.*

2. Property Tax System Changes

Refunds of overpayments related to errors in property tax records are not always properly recorded in the property tax system and reductions in assessed valuations do not always go through the abatement process. If an error in a property tax record resulting in an overpayment is identified after the related tax has been paid, it is processed in one of the following methods:

- If the taxpayer does not request a refund, the County Assessor adjusts the assessed value of the property in the subsequent tax year so that the tax liability is reduced to offset the amount of the overpayment, and enters a note into the tax system to verify the accuracy of the assessed value in the following year. However, a refund check should be issued by the County Collector for tax overpayments instead of the County Assessor changing assessed valuations to lower a future payment.
- If the taxpayer requests a refund for the overpayment, the County Assessor sends a letter to the County Collector indicating the error and requesting a refund to the taxpayer. The County Collector issues the refund and makes a manual adjustment to a monthly settlement to reduce monthly distributions by the amount of the refund. These refunds are not presented to the County Commission for abatement. For example, a taxpayer was issued a \$1,580 refund on April 27, 2016, for taxes overpaid during the past 5 years. The County Assessor corrected the assessed valuation beginning in tax year 2016, but did not prepare an abatement order for the prior 5 years. As a result, the County Commission did not review and approve an abatement order for the erroneous assessment.

Laclede County Management Advisory Report - State Auditor's Findings

According to the County Collector's annual settlement for the year ended February 28, 2018, distributions for these types of refunds totaled approximately \$6,200.

The lack of independent verification and approval of changes in the property tax system significantly increases the risk of intentional and unintentional errors and omissions to the property tax books. Presenting abatement orders to the County Commission provides an independent review of changes made to the property tax system and helps ensure these changes are proper.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. Section 53.030, RSMo, requires the County Assessor to take an oath to assess property at what the official believes to be the actual cash value, and no provision of law permits the County Assessor to change the assessment based on overpayment of tax. Making adjustments to assessed valuations to satisfy overpayments increases the risk of improper assessments in future years and loss of tax revenues.

Recommendation

The County Assessor discontinue the practice of changing assessed valuations for subsequent billings when overpayments occur and present abatement orders to the County Commission for correction of all erroneous assessments.

Auditee's Response

The County Assessor's office has discontinued the practice of changing assessed valuations for subsequent billings when overpayments occur. The County Commission will be presented with abatement orders for correction of all erroneous assessments.

3. County Collector's Penalty Distributions

The County Collector improperly distributed late payment penalties collected from January 1, 2018, to May 31, 2018. The County Collector did not change the penalty distribution calculation when the penalty increased from 7 percent to 9 percent on January 1, 2018, in accordance with state law. Due to this oversight, the distribution to the County Employees' Retirement Fund was calculated as three-sevenths of late payment collections but should have been calculated as five-ninths. As a result, \$14,064 was under distributed to the County Employees' Retirement Fund, and the Tax Maintenance and General Revenue Funds were each over distributed \$7,032.

Effective January 1, 2018, the penalty for late payment authorized under Section 52.290.1, RSMo, increased to 9 percent and provides for the penalty to be distributed as follows: two-ninths to the General Revenue Fund, two-ninths to the Tax Maintenance Fund, and five-ninths to the County Employees' Retirement Fund. To ensure all penalties are properly distributed and to help detect errors timely, penalties collected and distributed should be periodically reviewed and recalculated for accuracy.

Laclede County
Management Advisory Report - State Auditor's Findings

Recommendation

The County Collector ensure the distribution of penalties is calculated accurately and correct the distributions made in error.

Auditee's Response

According to your correspondence to begin the audit and your correspondence for the audit exit, this audit was related to the time frame for the year ended December 31, 2017.

The penalty distribution inaccuracy did not occur and was not discovered until after the time frame of your audit. The calculation was discovered and corrected after the local exit from your field workers. Other counties that use the same monthly settlement software were notified to remedy the differences. This finding should be omitted or used on the next audit cycle if you deem it necessary.

Auditor's Comment

Our audit communication memo provided to the County Collector at the beginning of the audit (dated March 12, 2018), stated our audit included, but was not necessarily limited to, the year ended December 31, 2017. The County Collector corrected the calculation for future penalty distributions after we identified the error and brought it to his attention. However, the distribution errors noted in the finding still need to be corrected to ensure compliance with state law.

4. Tax Maintenance Fund

Controls over the management and use of Tax Maintenance Fund (TMF) monies need improvement. By law, the TMF is to be used for additional administrative or operational costs related to the office of the County Collector. During the year ended December 31, 2017, disbursements totaled approximately \$25,800 from the TMF.

4.1 Disbursements

Some disbursements from the county's TMF were not in compliance with uses allowed by state law and/or were not reasonable.

- The County Collector paid approximately \$1,900 for 4 computers in July 2017, and gave the computers to other county offices approximately 2 months later after he had purchased 4 more computers. The other county offices did not reimburse the TMF for the cost of these computers.
- The County Collector paid approximately \$2,000 for a security system installed throughout the courthouse that primarily benefitted other county offices. The cost of this system was not allocated among all county offices benefiting from the system.

Section 52.315, RSMo, requires TMF monies be expended for additional administration and operation costs of the County Collector's office. Because the purchases listed above were primarily for the benefit of other county offices and not related to costs or expenses incurred in the office of the County Collector, the disbursements are not an appropriate use of TMF monies.

Laclede County
Management Advisory Report - State Auditor's Findings

4.2 Balance over limit

The County Collector did not transfer TMF monies in excess of the allowable limit at year-end to the county's General Revenue Fund. As of December 31, 2017, the balance of the TMF was \$110,560, which exceeds the County Collector's prior year's approved budget of \$108,776 by \$1,784.

Section 52.317.1, RSMo, sets limits for the TMF balance as of December 31 each year. In all counties other than first class counties, which collect more than four million dollars, the balance shall be limited to an amount equal to the previous year's approved budget for the office of the County Collector. Any moneys remaining in the TMF as of December 31 each year that exceed the established limits shall be transferred to the county's general revenue by January 15 of the following year.

Recommendations

The County Collector:

- 4.1 Ensure future disbursements from the TMF are in compliance with statutory provisions. In addition, the TMF should be reimbursed from the applicable fund(s) for the improper disbursements benefiting other county offices.
- 4.2 Review the balance of the TMF as of December 31 each year and disburse funds in excess of the allowable limit to the county's General Revenue Fund in accordance with state law.

Auditee's Response

- 4.1 *The County Collector finds the auditor to be incorrect and strongly disagrees with its findings. The primary purchase of the computers was for the County Collector's office and in compliance with Section 52.315, RSMo. It was discovered upon receipt of this purchase that these lacked the technology and hardware for the purpose intended. The County Collector's office did the reasonable and responsible thing to properly provide other offices with these computers that have a direct benefit to this office, and therefore, was in compliance with state statute. At the present time, all County Commissioners have computers that have a direct result of this practice.*

The County Collector strongly disputes this finding. The County Collector's office found it curious that the auditor did not address Section 52.315.3, RSMo, "The collector has the sole responsibility for all expenditures made from the tax maintenance fund and shall approve all expenditures from such fund. All such expenditures from the tax maintenance fund shall not be used to substitute for or subsidize any allocation of county general revenue for the operation of the office of collector." The County Collector's general revenue budget only provides for salaries and mileage/training. In the year ending December 31, 2017, the TMF had expenditures that clearly were for the operation of the County Collector's office and the County

Laclede County
Management Advisory Report - State Auditor's Findings

did not reimburse the fund. These expenditures included \$4,960 for the County Collector's software, \$1,010 for information technology and hardware setup, \$4,956 for office supplies, \$3,000 for website and web-based payment portal, \$10,470 for equipment and installation, along with many others that were office related. The TMF has transferred to the General Revenue Fund \$20,000 since your previous audit period for expenditures that have a direct impact to the operation of the County Collector's office and there were no reimbursements to the TMF and also no mention of this in your findings.

4.2 *The County Collector will review the balance of the TMF as of December 31 each year and disburse funds in excess of the allowable limit to the county's General Revenue Fund in accordance with state law.*

Auditor's Comment

4.1 The items indicated in the finding benefiting other county offices are not administrative or operating costs of the County Collector's office and the TMF should be reimbursed from the applicable fund for the improper disbursements benefiting other county offices. In addition, the County Collector's contends that the county used the TMF to subsidize allocations from the General Revenue Fund. However, the County Collector's approved budget in the General Revenue Fund has increased in each of the last 3 years and for 2018 the County Collector's approved budget in the General Revenue Fund was higher than the original budget request submitted by the County Collector. Thus, the County Commission is not using the TMF to subsidize the General Revenue Fund.

5. Passwords

The County Assessor, Recorder of Deeds, and Public Administrator have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent on keeping them confidential. However, since passwords do not have to be periodically changed by employees in these offices, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

Laclede County
Management Advisory Report - State Auditor's Findings

Recommendation

The County Commission work with other county officials to require employees maintain confidential passwords that must be periodically changed.

Auditee's Response

The County Assessor provided the following response:

Passwords in the County Assessor's office are now periodically changed and kept confidential.

The Recorder of Deeds provided the following response:

All the computers in the Recorder of Deeds' office, except the public computers, now have a scheduled password change which is done every 180 days.

The Public Administrator provided the following response:

During the fieldwork pertaining to the audit of Laclede County, Missouri for the year ended December 31, 2017, it was brought to the Public Administrator attention the necessity of having a policy and procedure regarding the changing of passwords for our computer system.

At the time of the discussion, the Public Administrator immediately incorporated a policy to require all passwords be changed approximately every 90 days. All employees will change their passwords every quarter.

The County Commission provided the following response:

The County Commission will work with office holders to ensure passwords are changed periodically and kept confidential.

6. Prosecuting Attorney's Accounts Receivable

Improvement is needed to better monitor and pursue collection of receivables. The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution. As a result, the amount of unpaid receivables is unknown and the need for follow up on specific cases may not be identified timely.

A complete and accurate list of unpaid bad checks and restitution would allow the office personnel to more easily review amounts due, take appropriate steps to ensure amounts due are collected, and determine if any amounts are uncollectible.

A similar condition was noted in our prior audit report.

Recommendation

The Prosecuting Attorney establish procedures to monitor and collect accounts receivable.

Laclede County
Management Advisory Report - State Auditor's Findings

Auditee's Response

Typically, individuals who owe money to crime victims are placed on probation with a specific condition that the individual pay restitution. The Prosecuting Attorney believes that it is a function of the probation provider to make sure that the person being supervised is paying restitution as ordered by the court. However, per your recommendation, the Prosecuting Attorney is now working more closely with the probation provider so that if restitution is not paid as ordered, the court is notified in a timely manner so the court can take any action the court deems appropriate.

As to bad checks, the Bad Check Clerk manually reviews the check referrals monthly to determine what action needs to be taken. Per your recommendation, the Bad Check Clerk will generate a report from our case management system to compare with the manual review she currently makes to ensure that checks are being processed and prosecuted in a timely manner.

7. Recorder of Deeds' Controls and Procedures

Controls and procedures in the Recorder of Deeds' office need improvement. The office collected approximately \$270,000 for recording documents such as marriage licenses and deeds, passport fees, and other miscellaneous receipts during the year ended December 31, 2017.

The Recorder of Deeds does not document his review of the daily transaction reports used to reconcile receipts to deposits. In addition, office personnel do not account for the numerical sequence of receipt (invoice) numbers automatically generated by the accounting system. We noted 10 missing receipt numbers during our review of 20 daily transaction reports.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies could occur and go undetected.

Recommendation

The Recorder of Deeds perform a documented review of the accounting records and account for the numerical sequence of all receipt numbers.

Auditee's Response

Our information technology vendor was contacted to program our system to not allow invoices to be deleted. This task was finished August 28, 2018. A daily report of the invoice numbers is now being printed and the review is documented and kept on file.

The invoices were mistakenly deleted because there was all new personnel in the office. They would go into the invoicing system by mistake thinking it was our indexing system. When they realized they were in the wrong system, they simply deleted the invoice.

8. Senate Bill 40 Board's Budgets

The Senate Bill 40 Board did not approve budgets for the years ended December 31, 2017, and 2018, until April 2018, after our inquiry. These budgets were on file in the Board's records; however, they had not been forwarded to the State Auditor's Office as of August 29, 2018.

Laclede County
Management Advisory Report - State Auditor's Findings

Budget documents are an essential tool for the efficient management of finances and should be prepared annually at the beginning of each fiscal year. In addition, Section 50.740, RSMo, requires budgets to be submitted to the State Auditor's Office.

Recommendation

The Senate Bill 40 Board should ensure budgets are approved and submitted to the State Auditor's Office in a timely manner as required by state law.

Auditee's Response

The Senate Bill 40 Board will ensure budgets are approved and submitted in a timely manner.

Laclede County

Organization and Statistical Information

Laclede County is a county-organized, third-class county. The county seat is Lebanon.

Laclede County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 113 full-time employees and 13 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Danny Rhoades, Presiding Commissioner	\$	32,984
Joe Pickering, Associate Commissioner		30,297
Darrell Pollock, Associate Commissioner		30,297
Lynn Stowe, Recorder of Deeds		47,498
Glenda Mott, County Clerk		47,498
Jon Morris, Prosecuting Attorney (1)		141,046
David Millsap, Sheriff		51,740
Jean Cook, County Treasurer		47,498
Steve Murrell, County Coroner		16,557
Karen Guinn, Public Administrator		46,567
Steve Pickering, County Collector (2), year ended February 28,	67,145	
Johnny North, County Assessor, year ended August 31,		46,329
Steve Mathis, County Surveyor (3)		

(1) Includes \$4,028 of back pay due to a raise that was received in 2016, but not issued until January 2017.

(2) Includes \$19,560 of commissions earned for collecting city property taxes.

(3) Compensation on a fee basis.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Mavis T. Thompson, Esq., License Collector
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2009-64, *City of St. Louis, Office of License Collector*, issued in June 2009, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Office of License Collector. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Office of License Collector that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Office of License Collector

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Businesses Operating Without Valid Licenses

Finding Number: 1.

Finding: The License Collector's office could have improved procedures to timely resolve non-compliance issues in the license application clearance process, including establishing guidelines for determining when it was appropriate to close non-compliant businesses.

Recommendation: The License Collector continue to coordinate with other city departments to strengthen procedures to resolve problems with businesses obtaining clearance and determine whether there are any other legal avenues the city can take against non-compliant businesses. In addition, the office should consider developing guidelines for determining what factors will be considered when deciding whether to close a business and when those determinations will be made.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector's office, in coordination with other city departments, established a comprehensive procedure for determining what factors and guidelines will be considered when deciding to close a business. We have coordinated with other city departments to strengthen procedures for resolving problems with businesses obtaining clearance and determined whether there are other legal avenues the city can take against non-compliant businesses. Specifically, we met with the Collector of Revenue, Assessor, Building Division, Municipal Court Judge, City Counselor's office, and the Health Department.

The outcome of these meetings resulted in the formulation and implementation of a comprehensive Business Closure Policy. This policy addressed the procedure for pursuing a legal remedy in court against non-compliant businesses.

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Follow-up on Delinquencies and Pending Applications

Finding Number: 2.A.

Finding: Some follow-up procedures performed on delinquencies and pending applications were not adequately documented and information was not maintained in a readily accessible, centralized location to allow for proper monitoring and supervision. As a result, it was difficult for management to determine what follow-up work had been performed on a particular business.

Recommendation: The License Collector improve procedures to ensure adequate documentation is maintained in an accessible centralized location for all follow-up work performed.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector office's procedures to follow up on delinquencies are the following:

- Field service representatives (FSRs) are assigned to delinquent businesses existing on their specified routes.
- FSRs call the business owner to arrange a date and time for collections.
- FSRs physically go to the business to collect payment.
- FSRs send correspondence to delinquent businesses that are not reachable by phone.
- FSRs leave a door hanger identifying the delinquent business and restricted time allotted for payment.
- All documentation concerning efforts of collections and results of those efforts are logged into a centralized location in the licensing system shared drive.
- If the efforts are unsuccessful, compliance officers are asked to intervene to try to get better results and obtain payment from delinquent business.
- If the compliance officers are also unsuccessful, a summons will be issued by the police department.
- After due process, our business closure policy will be implemented if needed.

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Follow-up on Delinquencies and Pending Applications

Finding Number: 2.B.

Finding: The License Collector's office did not send out deficiency notices to businesses in a timely manner, if at all, when licenses could not be issued as a result of pending applications that had deficiencies in the clearance process.

Recommendation: The License Collector ensure follow-up work is performed consistently and timely, and documentation of such actions is maintained.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector office's procedures for notifying delinquent businesses and pending applications in a timely manner are the following:

- Phone calls are made by the municipal business license section to inform the taxpayer of delinquency.
- Emails are sent out to delinquent taxpayers.
- Billing statements to identify a 30, 60, and 90 day delinquency are mailed out regularly.
- Evidence of emails and phone calls can be found in the Land Records Management System (LRMS).
- A staff person has been assigned to perform daily online reviews of address delinquencies, if any.
- Information is logged daily in a spreadsheet to show each attempt made by the FSRs to contact delinquent taxpayers.
- A route sheet is submitted daily to the Field Service Supervisor to show the frequency of attempts made to communicate with delinquent taxpayers.
- All information is maintained in a shared drive database.
- All pending applications are reviewed and taxpayers are contacted and provided necessary information to bring their statuses into compliance.
- Separate delinquency notification letters are no longer mailed to delinquent taxpayers due to implementation of the above procedures. The billing delinquency statement serves as the notification.

Contact Person: Mavis Thompson

Contact Phone Number: (314) 622-4643

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Follow-up on Delinquencies and Pending Applications

Finding Number: 2.C.

Finding: The License Collector's office coded incorrect statuses for some businesses on the LRMS, preventing the required follow-up work from being performed. In addition, the License Collector's office did not have adequate procedures in place to identify such errors. While the License Collector's office had identified some errors when follow-up work was performed on some businesses, procedures were not in place to identify such errors on a timely basis.

Recommendation: The License Collector establish procedures to ensure businesses are coded to the correct status in the LRMS system and actively monitor the statuses to help ensure any errors are identified timely.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector office's procedures for coding are as follows:

- FSRs physically go to the location to confirm the status of businesses no longer operating and will adjust codes to identify them as such if needed.
- Confirmed compliant taxpayers' codes are changed by the Finance Division after verification of a checklist to put them in the proper status.
- The access to change codes is restricted to specified departments and managers (depending on the type of change).
- Once a status code has been modified, changed, or corrected, the employee must use his/her sign-in code (Operator Identification) to identify who made the change.
- Management periodically reviews code entry changes to ensure the proper status of businesses.

Contact Person: Mavis Thompson

Contact Phone Number: (314) 622-4643

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Verification of Business License Applications

Finding Number: 3.

Finding: The License Collector's office could have improved procedures used to verify the accuracy of information reported on some types of business license applications where fees due were based solely on information provided by businesses.

Recommendation: The License Collector develop procedures to verify the accuracy of information submitted on business license applications, at least on a periodic or sample basis. This could include performing audits or examinations of the information submitted in business license applications.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Manufacturers representatives verify the accuracy of information submitted on business license applications by manufacturers during the annual site visits to the manufacturers' locations.

The FSRs verify the accuracy of information submitted on business license applications by non-manufacturers during the annual site visits to the non-manufacturers' locations.

Additionally, the License Collector's office continues to coordinate information with other city offices in an effort to validate information provided by businesses, particularly the Collector of Revenue, Assessor, and Building Division.

Contact Person: Mavis Thompson

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Internal Controls and Procedures

Finding Number: 4.A.1.

Finding: Monies received by mail were not adequately tracked to ensure all monies received were deposited. The License Collector's office maintained a mail log to track all monies received by mail; however, entries on the mail log were not reconciled to deposits.

Recommendation: The License Collector ensure receipts recorded on the mail log are reconciled to deposits.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Checks received in the mail are reconciled to the deposits on a daily basis. The procedure is as follows:

- The mail clerk will log each check on the mail log spreadsheet and include the total amount received each day.
- The checks and the accompanying applications are given to the Chief of Staff for review.
- After this review, the Chief of Staff will deliver the checks and applications to the cashier's room. The cashier will create a cash slip for each check received.
- The checks are remotely deposited to our bank account and a deposit summary is created. The summary provides a list of the checks and the total amount deposited.
- The deposit summary is then reconciled to the mail log spreadsheet.

Finding Title: Internal Controls and Procedures

Finding Number: 4.A.2.

Finding: The License Collector's office did not have procedures in place to ensure monies collected in the field were turned over to the Finance Division for processing and depositing. In addition, records retained of monies collected in the field were not reliable.

Recommendation: The License Collector develop procedures to ensure monies collected by field staff are turned over to the Finance Division for deposit. This should include issuing prenumbered receipt slips, maintaining a record of receipt for all monies collected in the field, and accounting for the numerical sequence of receipt slips.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A procedure is in place for the payment collection process. Prenumbered receipt slips are issued to the FSRs. The receipt slip book is in a three-tab form: the white copy is given to the taxpayer, the pink copy is given to the accounting department, and the yellow copy is retained in the field department. The collected amount is also recorded on the FSRs route sheet and on the electronic file "Daily Productivity Report" which is stored on the shared drive. The route sheet will have a copy of the form of payment and a copy of the prenumbered receipt slip issued.

Upon return to the office, funds collected in the field by FSRs are submitted to the accounting department along with the pink copy of the receipt slip. The Field Service Manager keeps an electronic log of the numerical sequence of receipt slips given to each employee.

Finding Title: Internal Controls and Procedures

Finding Number: 4.A.3.

Finding: The License Collector's office did not have procedures in place to ensure monies collected for duplicate license fees or insufficient fund (NSF) check fees were deposited.

Recommendation: The License Collector develop procedures to ensure all monies collected for duplicate license fees and NSF check fees are deposited.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The LRMS system has been updated to process and record duplicate license fees and NSF check fees. These transactions are accompanied by a cash slip that is reconciled to the daily deposit report, and monies are deposited in the same manner as all other collections.

Status of Findings

Finding Title: Internal Controls and Procedures

Finding Number: 4.B.

Finding: Independent or supervisory reviews and reconciliations of various records were not always performed or documented. Office procedures required adjustments made to the LRMS system be reviewed by the Assistant Finance Manager on a daily basis; however, the review was not documented. Bank service fees were charged to each bank account on a monthly basis; however, no documentation existed to indicate anyone reviewed the propriety of the bank fees charged. Supervisory approvals of both manufacturers on-site inspection reports and property declarations were not always documented.

Recommendation: The License Collector ensure independent reviews and reconciliations are performed and adequately documented.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Finance Manager or Assistant Finance Manager perform reviews and reconciliations daily. They initial the documents reviewed and reconciled.

Adjustments to the LRMS system are reviewed by the Finance Manager or Assistant Finance Manager daily. They initial the documents reviewed.

The Chief of Staff has always reviewed the propriety of bank fees charged each month and his initials document that the review was performed. Additionally, Royal Banks of Missouri has recently waived all bank fees.

Manufacturers representatives make annual site inspections, starting January 1 of each year. Site inspection forms are filled out by the manufacturers representatives and signed. The Manufacturers Manager reviews all property declarations and his initials document the review. The declarations are submitted to the Merchants and Manufacturers Tax Equalization Board every year from April through August for a final review.

Finding Title: Disbursements

Finding Number: 5.A.

Finding: The License Collector's office did not have a formal written procurement policy. As a result, the decision to solicit competitive bids/proposals for purchases was made on an item-by-item basis and was generally obtained through informal inquiries or research. Additionally, supporting documentation of bids obtained or inquiries and research performed was generally not retained.

Recommendation: The License Collector establish formal procurement policies and procedures, including documentation requirements regarding bids, quotes, or proposals received and justification for the selection made.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector's office has developed a comprehensive procurement policy.

Contact Person: Mavis Thompson

Finding Title: Disbursements

Finding Number: 5.B.

Finding: The License Collector did not execute formal written contracts with several businesses for services provided. Services provided without current or formal written contracts included armored car services, general contract work for office renovations, and employee performance assessments.

Recommendation: The License Collector enter into current, formal written contracts for all services received.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector's office has secured a written contractual agreement for armored car services and no longer uses the other vendors cited in the prior audit.

The License Collector's office procurement policy requires formal written contracts for all persons engaging in business with and on behalf of the License Collector's office. The License Collector's office has adhered to this policy since its implementation.

Finding Title: Payroll Procedures

Finding Number: 6.B.

Finding: Payroll records in the License Collector's office contained a number of errors and inconsistencies.

Recommendation: The License Collector establish procedures to ensure all payroll records are checked for mathematical accuracy, completeness, and agreement with other records.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The use of an electronic time clock has greatly reduced the number of errors and inconsistencies. We have also implemented an Excel spreadsheet version of the time card which significantly reduces data entry errors.

The procedure for verifying the accuracy of an employee signing in and out includes comparing the time clock record with any request that an employee has submitted for time off and also comparing it to the daily assigned work calendar. The final step is for the employee to review and verify the payroll record before it is submitted to the Comptroller's office.

Finding Number: 6.C.

Finding: The personnel manual had not been updated to include all policies and procedures followed by the License Collector's office.

Recommendation: The License Collector update the personnel manual to ensure it includes all significant personnel policies and procedures currently in use.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The personnel manual has been updated to include all significant policies and procedures. The manual includes information regarding sick leave time earned and maximum accruals allowed for leave balances. The manual also includes guidelines for the shared leave program which allows employees to donate leave to other employees, as well as guidelines for leave balances and handling of accumulated leave balances upon termination or resignation.

The personnel manual is updated regularly as new policies and procedures are developed.

Finding Title: Vehicles

Finding Number: 7.A.

Finding: The License Collector, the Chief Deputy License Collector, and a manager used their assigned, unmarked, city-owned vehicles for commuting and personal use. The officials did not maintain vehicle usage logs to document miles driven for official, commuting, and personal use. The License Collector's office did not provide documentation approving and justifying personal use of the vehicles.

Recommendation: The License Collector discontinue the use of city-owned vehicles for personal use or ensure proper approval documentation is maintained for any exceptions. The License Collector should also ensure personal and commuting mileage reported for compensation is adequately supported.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector, as the appointing authority, has complied with the City Vehicle Policy Manual Section 3.8.1. The License Collector granted a written exception which approves personal use of vehicles owned by the License Collector's office to the License Collector and the Chief of Staff.

Personal mileage of these 2 vehicles is reported to the city, in accordance with city regulations, for reporting to the Internal Revenue Service as compensation on the W-2 forms of these individuals.

In addition, both the License Collector and the Chief of Staff complete a daily vehicle usage log to document beginning and ending odometer readings for official, commuting, and personal use.

City of St. Louis - Office of License Collector
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Vehicles

Finding Number: 7.B.

Finding: Records of vehicle use and monitoring procedures for the License Collector's vehicle fleet were not sufficient. While periodic mileage readings were recorded on a monthly basis and when vehicles were fueled, the License Collector's office did not require detailed vehicle usage logs be maintained to document beginning and ending odometer readings, destination, and trip purpose for any of its 12 vehicles.

Recommendation: The License Collector require the preparation of usage logs for all vehicles and ensure these logs are properly reviewed.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector's office keeps in its Field Service Division both a paper record and electronic file of daily mileage usage. The main source for this information is the field service route sheet which collects the beginning and ending odometer readings, the address of the site visited, and what activity was performed at the location. The Field Service Manager reviews this information daily.

Status of Findings

Finding Title: Vehicles

Finding Number: 7.C.

Finding: Vehicles may not have been used efficiently and effectively. The License Collector's office had a total of 12 vehicles. Our review of monthly mileage records noted three of these vehicles had 8 months of inactivity during the 15-month period reviewed.

Recommendation: The License Collector review vehicle usage and vehicle assignments periodically to ensure the number of vehicles in the fleet are necessary and justified.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector's office no longer has 12 vehicles in its fleet. The Field Service and Manufacturers Divisions currently share 5 vehicles for the purpose of field collection and verification. The Field Service Division uses 3 of the vehicles and the Manufacturers Division uses 2 of the vehicles on a daily basis. All vehicles are signed in and out daily on the log sheet located in the Field Service Division.

Status of Findings

Finding Title: Bank Accounts

Finding Number: 8.A.

Finding: The License Collector could have improved procedures to monitor and ensure bank accounts were sufficiently collateralized. While securities were released at the authorization of the Chief Deputy License Collector and a month-end summary of pledged collateral was reviewed, the License Collector's office relied on the bank to monitor and ensure adequate collateral securities were pledged on a daily basis to cover amounts deposited in the various bank accounts.

Recommendation: The License Collector establish procedures to actively monitor and ensure bank accounts are adequately collateralized.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

A daily report is provided on the office's collateral position by the bank. The report is reviewed daily by the Chief of Staff and Finance Division Manager. Communication is maintained on a daily basis between the bank and the License Collector's office concerning deposits and the collateral position.

Finding Title: Budgetary Practices

Finding Number: 9.

Finding: The License Collector's office operated without a formal budget during fiscal year 2008. The beginning balance plus revenues collected were significantly more than the amount needed to cover operating expenditures for the fiscal year, and it is unclear why such a large reserve was needed.

Recommendation: The License Collector prepare a formal budget on an annual basis, including a plan to retain only the necessary commissions for the operations of the office and to maintain a reasonable reserve level. If additional monies are being reserved for planned projects or needs, such issues should be identified in the budget document.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The License Collector prepares and maintains a formal budget on an annual basis. We retain only the commissions necessary for operating the office. We do not maintain a reserve level. All planned projects and needs are included in the annual budget.

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Honorable Mayor
and
Executive Director of Community Development Administration
and
Affordable Housing Commission
and
Land Reutilization Authority
City of St. Louis, Missouri

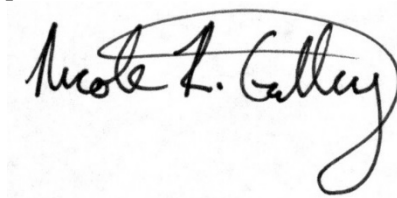

We have compiled the statuses of the audit report findings contained in Report No. 2009-38, *City of St. Louis, Community and Economic Development Offices*, issued in April 2009, and the applicable audit report finding contained in Report No. 2009-60, *City of St. Louis, Lead Safe St. Louis Program*, issued in June 2009, as part of our current audit of the City of St. Louis. The functions of the Lead Safe St. Louis Program are performed by the Community Development Administration, Department of Public Safety - Building Division, and Department of Health; therefore, applicable follow-up statuses for the Lead Safe St. Louis Program have been included in these agency follow-up reports.

These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our ongoing audit of the city's administration of economic incentives and special taxing districts, and our upcoming audit of Community and Economic Development offices. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Community Development Administration, Affordable Housing Commission, and Land Reutilization Authority that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is written in a cursive style with a large, looping "G" at the end.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Community and Economic Development Offices

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Community Development Administration Awarding Procedures

Finding Number: 1.A.

Finding: The Community Development Administration (CDA) did not perform a standard analysis or summarize the results of the evaluation process when selecting proposals for subrecipient or ward pool housing project awards. As a result, the reasons for funding the various proposals were not adequately documented. The CDA published annual requests for proposals for new subrecipients, but did not require previously funded subrecipients to apply for funding.

Recommendation: The CDA develop a formal selection process for all subrecipient and housing project awards which includes requests for proposals for previously funded subrecipients and for program income awards. The selection process should include performing a standard analysis with stated criteria for each type of award, and preparing and retaining documentation of the reasons for funding the various proposals.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In 2013, the CDA embarked on a significant change to the way it allocates its Community Development Block Grant (CDBG) and Home Investment Partnerships Program (HOME) grant funds awarded by the U.S. Department of Housing and Urban Development (HUD). In partnership with HUD St. Louis field office staff and the HUD's technical assistance consultants, the CDA developed a process that competitively awards grant funds based on priorities identified in the city's Consolidated Plan.¹ As a part of this process, changes were made to the city's CDBG/HOME request for proposal (RFP) process that were integral to ensuring compliance with federal rules and a robust public participation process. Significant changes to the RFP process include the following:

- The CDA posts and solicits feedback from the community on funding priorities prior to issuance of an RFP.
- The availability of the RFP is advertised in multiple sources including the St. Louis Post-Dispatch, the St. Louis American, and the CDA's website.
- All applicants, including previously funded organizations, are required to apply for funding by the deadline detailed in the RFP.
- All applicants must utilize the same application form.
- An applicant scoring matrix is provided in the RFP and is posted on the CDA's website.
- Applications are submitted through an electronic grants management system.
- Several capacity building workshops are held to assist applicants with proposals and federal compliance.
- Questions on the RFP are answered and posted as Frequently Asked Questions (FAQ) on the CDA's website.

¹ The City of St. Louis Consolidated Plan is a five-year plan and annual action plan that assesses market conditions, affordable housing, and community development needs in the City of St. Louis and establishes data-driven, place-based priorities for investment in community development. The Consolidated Plan allocates specific federal entitlement grant funding from the HUD.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

- A Proposal Evaluation Committee consisting of outside community development professionals and city staff is used for the review of applications.
- Summaries of evaluation criteria are prepared and maintained by the CDA.
- Applicants are rated and ranked for recommendation to the Board of Aldermen (BOA) and the Mayor's office for approval as a part of the annual CDBG/HOME annual board bill process.

Using the RFP process as a guide, in 2014 the CDA made significant changes to the way it allocates funding to housing development/residential projects. Interested developers are required to apply for funding during the Notice of Funding Availability (NOFA) process, which occurs at least once a year. The CDA's NOFA process also utilizes the same posting, workshop, and FAQ process as the CDBG/HOME grants. Each proposal received is also rated and ranked by city staff, with summaries prepared of evaluation criteria.

Finding Title: Community Development Administration Awarding Procedures

Finding Number: 1.B.

Finding: The city did not advertise for proposals or document the selection process for projects funded under the Major Residential/Commercial Initiatives program.

Recommendation: The CDA work with the BOA to establish a formal competitive selection process for projects funded by the Major Residential/Commercial Initiatives program.

Status of Finding: No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The African-American Aldermanic Caucus and BOA are no longer directly involved with selecting residential development projects. The Major Residential/Commercial Initiatives program is no longer available.

Contact Person: Alana Green

Contact Phone Number: (314) 657-3835

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Community Development Administration Monitoring Procedures
Finding Number:	2.A.1.
Finding:	The CDA did not have formal procedures for tracking program review recommendations made by CDA staff. As a result, there was no documentation that CDA staff performed follow-up procedures on the recommendations.
Recommendation:	The CDA ensure follow-up on program monitoring recommendations is performed and documented on a timely basis.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

As reflected in the CDA's initial response to the finding in 2009, the programmatic monitoring tracking sheet was updated to include three new columns: the date the monitoring report was mailed, the date the operating agency response was due (if applicable), and the date the concern was resolved. In 2013, to coincide with the aforementioned technical assistance provided by the HUD, the CDA developed a new Programmatic Monitoring Guidebook which significantly enhanced procedures for federal compliance. The main goal of the guidebook was to formalize, in policy, that programmatic monitoring is not a "one-time event" and should be an ongoing process of planning, implementation, communication, and follow-up. Significant enhancements reflected in the guidebook include the following:

- Using a provided template, programmatic monitors are required to complete annual risk assessments of all funded organizations and agencies.
- Programmatic monitors are required to complete a technical assistance visit during the first quarter of the year for all organizations deemed "high risk." High risk organizations include, but are not limited to, those organizations with previous compliance issues.
- The programmatic monitoring visit process was detailed to include steps for scheduling site visits, completing entrance conferences, acquiring the necessary data and documentation, and determining how and when to complete the exit conference.
- All site visit forms and checklists were significantly enhanced to include all HUD required review materials and guidance.
- A sample monitoring letter and guidance on preparing letters was included.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Community Development Administration Monitoring Procedures

Finding Number: 2.A.2.

Finding: The CDA did not adequately document some monitoring visits for housing projects. Documentation was prepared for monitoring visits that were required by CDA policy; however, CDA staff indicated optional monitoring visits were normally performed several times during each project and monitoring reports were not prepared for these optional visits unless concerns were noted and not immediately corrected during the visit.

Recommendation: The CDA prepare documentation of all housing project monitoring visits.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Engineering Technician II and/or the Senior Plan Examiner conduct inspections of all housing projects. While no form is utilized to document property inspections when construction is not being funded with federal funds, the CDA completes a thorough review of each "acquisition only" project prior to releasing any deed restrictions. This includes a final inspection, documentation of improvements, and the completion of associated closeout checklists. The Engineering Technician also prepares a bi-weekly report that summarizes the findings noted during all of the inspections conducted in that period for each project. Finally, an inspection is required before each construction payment request is processed. The above-referenced staff reviews each construction payment request and must sign off that the work was completed before the payment request can be processed.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Community Development Administration Monitoring Procedures
Finding Number:	2.B.
Finding:	The CDA had not established formal policies and procedures for the repayment or write-off of rental housing loans to contractors that built or rehabilitated rental housing benefiting low-income city residents.
Recommendation:	The CDA establish formal written policies and procedures for repayment and write-off of rental housing project loans.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Asset Management Committee (AMC) has developed a policy in which partial or full forgiveness of rental housing project loans will be considered. This policy was last revised in July 2014. The policy outlines the circumstances in which forgiveness of the loan, either in whole or in part, will be considered. All requests must be reviewed by the AMC and the developer/property owner is required to provide documents for review to the AMC. In some cases, if requested by the AMC, the developer/owner may be required to make an in-person presentation before the committee in addition to providing the requested documents. Any loan modifications approved must be signed by the CDA Executive Director.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Community Development Administration Healthy Home Repair Program

Finding Number: 3.A.

Finding: The CDA had not periodically solicited proposals for Healthy Home Repair Program (HHRP) administration services.

Recommendation: The CDA periodically solicit proposals for administrative services related to the HHRP.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

On January 1, 2014, the HHRP was centralized and is now administered directly by the CDA. Under the new system, the CDA performs client intake and participant eligibility determinations, but solicits proposals for assistance with the following construction management services: developing a scope of work, competitively selecting contractors, and monitoring construction work. As with all other subrecipients funded by the CDA, organizations that wish to apply for funding to provide HHRP construction management services must apply through our standard, competitive application process on an annual basis.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Community Development Administration Healthy Home Repair Program

Finding Number: 3.B.

Finding: It did not appear the city adequately allocated the monies to wards based on the areas of greatest need. The annual city appropriation amount was usually divided equally between the wards regardless of the previous years' unspent balances and waiting lists for the program.

Recommendation: The CDA work with the BOA to review the allocation of HHRP monies and maintain documentation to support how the monies are allocated. Consideration should be given to allocating the monies to the areas of the city with the greatest need.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

As of January 1, 2014, the HHRP is no longer funded on a ward basis, and the waiting list is now administered on a first-come, first-served basis. All funding is issued on a citywide basis, and there are no more ward pools.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Community Development Administration Receipt Procedures

Finding Number: 4.A.

Finding: Numerous employees in the CDA collected or received checks and money orders. In accordance with CDA receipt-handling policies and procedures, receipts were transmitted to other employees for additional processing prior to being recorded by the CDA Fiscal Management Section and transmitted to the Comptroller's office.

Recommendation: The CDA limit the number of employees who receive or process monies prior to recording and transmitting monies.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The CDA implemented written cash receipt procedures that require section personnel to immediately transmit all checks and money orders received to the designated person responsible for maintaining the section's cash receipt log. After the receipt is recorded in the log, it is transmitted to the CDA Fiscal Section for recording in the Cash Receipt Log and is then transmitted to the Treasurer's office for deposit.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Community Development Administration Receipt Procedures

Finding Number: 4.B.

Finding: Checks and money orders received by the Residential Development Section were not always recorded immediately upon receipt on either official prenumbered receipt slips or a receipt log. Monies for open housing projects were initially received by the Housing Analyst but were not recorded until transmittal to the Asset Manager. In addition, receipt records were not reconciled to amounts transmitted to the Fiscal Management Section. As a result, receipts for the Residential Development Section were not always transmitted to the Comptroller's office in a timely manner. Also, checks and money orders were not restrictively endorsed upon receipt.

Recommendation: The CDA ensure all receipts are immediately recorded on official prenumbered receipt slips or receipts logs, and the original receipt records are reconciled to transmittals to the Fiscal Management Section by someone independent of the receipting or collection functions. In addition, all monies should be transmitted to the Comptroller's office on a timely basis, and checks and money orders should be restrictively endorsed immediately upon receipt.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The CDA implemented written cash receipt procedures that mandate the Asset Manager maintain an electronic copy of the Residential Development Check Receipt Log. All checks received in the mail or hand delivered to the Asset Manager are recorded immediately upon receipt and transmitted to the Fiscal Section. Checks received by other Residential Development staff members are forwarded immediately to the Asset Manager for recording and transmittal to the Fiscal Section. The Fiscal Section has a designated staff person that records receipts received from all sections in the Fiscal Cash Receipt Log and stamps all checks and money orders with a restrictive endorsement. The cash receipts are then transmitted to the Treasurer's office on a weekly basis for deposit. A designated staff person in the Fiscal Section, not involved with the recording or transmittal of cash receipts, reconciles all CDA section cash receipt logs with the CDA Fiscal Cash Receipt Log and the city's general ledger on a monthly basis.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Affordable Housing Commission Controls and Procedures

Finding Number: 5.A.

Finding: The Affordable Housing Commission (AHC) did not summarize the results of the evaluation process when selecting applications for funding awards. As a result, reasons for funding the various proposals were not adequately documented. The application forms included criteria which AHC personnel indicated were considered when evaluating the applications. The AHC normally documented and summarized some information for each application; however, this information did not always agree with the stated criteria.

Recommendation: The AHC develop a standard analysis for evaluating funding applications and ensure the reasons for funding the various proposals are adequately documented.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

In response to the previous audit recommendations, the AHC returned to a six-point coding system to explain and/or document the reasons for staff recommendations for the grant proposals received in fall 2008. Since 2010, grant evaluations have been updated to include the reason on the evaluation form instead of only writing the code on the form. The staff recommendation sheets, including the written reasons, are provided to AHC members before projects are selected for funding.

In addition, staff prepare evaluations that are provided to the AHC for both grants and loans. These documents denote whether a project meets explicitly stated funding priorities that are clearly stated in news releases, advertisements for proposals, and the NOFA. The NOFA is mailed to applicants that respond to the news releases and advertisements.

For projects that involve the new construction or rehabilitation of housing, AHC staff prepare the following analysis for each construction proposal. The following documents are distributed to AHC members in advance of funding decisions:

- **Proposal Analysis** - This multi-page document details all project costs allowing for comprehensive scrutiny of each project's financial outlay. The analysis is an objective comparison of each project's financial data. It allows comparative project strengths and weaknesses to be observed.
- **Proposal Summary** - The proposal summary provides a narrative description of each proposal. It organizes and describes the proposal's subjective qualities, and it incorporates and explains the financial data derived from the analysis. In response to feedback received throughout the State Auditor's previous audit, the AHC included a section in the 2008 development proposal summaries that documented concerns in which proposal weaknesses and unresolved issues were detailed.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

- **Proposal Evaluation** - This one-page summary recaps significant elements from both the analysis and the summary in order to provide commissioners with a succinct project synopsis. Additionally, it reiterates the AHC's concerns about the project, and includes the AHC's funding recommendations and funding terms/stipulations, and serves as the AHC's funding determination document of record.

All AHC development projects approved for funding by the AHC are additionally reviewed by the CDA. This added layer of review produces an additional evaluation form prepared by CDA housing analysts. The CDA evaluation summarizes the proposal, and indicates in a check-box table how the proposal meets various development criteria, using a scale of good, fair, or poor. During the AHC's exit conference with the State Auditor's office, audit staff referenced the CDA evaluation tool, and suggested that AHC staff consider using this form as well. The AHC now uses a rating sheet with a scale of good, fair, or poor for each development.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Affordable Housing Commission Controls and Procedures
Finding Number:	5.B.1.
Finding:	The AHC did not have a formal plan for the selection of recipients chosen for fiscal monitoring.
Recommendation:	The AHC work with the Internal Audit Section to develop a formal plan for fiscal monitoring to ensure recipient awards are reviewed on a timely basis.
Status of Finding:	Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The AHC worked with the Comptroller's Internal Audit Section to develop a fiscal monitoring plan, and contracted with that office to perform some audits of the grantees. We have since created a position (Community Development Specialist II) that has the responsibility of monitoring, auditing, and contract compliance and works with the Comptroller's internal auditors.

Social Service Agencies:

Social service recipients identified as Contracting Grant Agencies (CGAs) are monitored on an annual basis. This monitoring list is comprised of agencies that were not monitored/audited during the previous year and is also based upon the current compliance status of any existing contracts.

The previous monitoring list is reviewed by the Secretary II, Accounting Clerk, and Community Development Specialist II before a new monitoring list is created. During reviews, staff check for outstanding findings and any additional concerns related to current contracts (i.e., program management, reimbursement issues, etc.).

If there are no outstanding findings listed and all concerns were resolved, no further action is necessary. If current findings have not been addressed, those CGAs are then placed on the monitoring/auditing list for the current year in addition to the remaining CGAs that were not previously monitored/audited.

See finding 5.B.2. for the process of how CGAs are notified and monitoring visits are executed.

Development/Housing Projects:

All housing development projects are monitored/audited upon completion. When development projects are finalized, files are then placed in the "Servicing" phase to be monitored annually. These compliance efforts take place throughout the duration of time listed on each housing project loan agreement.

On an annual basis, the AHC sends correspondence requesting each housing project's audited financial statements from the previous year, Tenant Income Certification sheets (TICs), HOME Compliance Reports, and the most recent copy of the certificate of insurance for each property.

See finding 5.B.3. for detail on this process.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Affordable Housing Commission Controls and Procedures

Finding Number: 5.B.2.

Finding: The AHC did not have formal procedures for tracking recommendations made as a result of the Internal Audit Section's fiscal monitoring reviews. As a result, there was no documentation that AHC staff performed follow-up procedures on these recommendations.

Recommendation: The AHC ensure follow-up on fiscal monitoring recommendations is performed and documented on a timely basis.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Plan of Action:

The AHC has developed an outline for fiscal monitoring follow up. The procedures relating to CGAs are as follows:

Step One: The CGA is notified by mail of upcoming auditing/monitoring visits with specific dates for each agency to choose. The CGA is then asked to respond via email or phone with their desired date and time of choice.

Step Two: Desired dates are noted and monitoring visits are conducted.

Step Three: During monitoring visits, any findings, concerns, and/or recommendations are documented on the AHC "Programmatic Monitoring Checklist" for hardcopy files.

Step Four: The AHC then sends the contracting agency a "Monitoring Review Letter" that lists recommendations and/or findings with a deadline date included. If the CGA does not respond by the deadline given, a "Noncompliance Letter" is mailed for follow-up purposes with another deadline.

Step Five: Once the CGA has addressed all recommendations and/or findings and specified tasks are complete, AHC staff review the documentation for accuracy and AHC compliance standards. Staff then communicate with agencies via email regarding additional requests until all concerns listed have been resolved.

Step Six: The AHC then sends the CGA a "Monitoring Conclusion Letter" stating the monitoring review has now concluded and no further action is necessary.

Contact Person: April Ford Griffin

Contact Phone Number: (314) 657-3880

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Affordable Housing Commission Controls and Procedures

Finding Number: 5.B.3.

Finding: The AHC had not established adequate policies or procedures for on-site monitoring of recipients. Site visits were not conducted for social service recipients. For housing projects which were also subsidized by federal, state, or other city monies, the AHC relied on the federal, state, or other city agency or office to monitor these projects. However, the AHC did not obtain monitoring reports from these other offices. The AHC did not ensure some housing projects were monitored and complied with the contract requirements.

Recommendation: The AHC establish formal policies and procedures to ensure on-site monitoring is performed for award recipients to ensure recipients are complying with contractual requirements.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The AHC established an on-site monitoring system for all grants. In 2011, the AHC hired a full-time Community Development Specialist II who performs these duties. A standardized form has been developed for monitoring purposes. This form documents performance, issues, and goals established for resolution of issues noted during the visit. Please see finding 5.B.2. for the step-by-step monitoring process for all CGAs.

Each agency is also reviewed by the AHC Account Clerk II whenever a reimbursement request is made. Expenditures identified on the request are checked against the contract line item budget, and any expenditure that does not match a line item is disallowed. The agency is notified by email of the adjustment to its request and the reason an item is disallowed. Concurrently, the project's goal achievement is assessed by comparing goals stated in the contract with accomplishment data submitted by the agency. An agency is denied payment if it has not filed its quarterly programmatic report, which is mandated by contract.

Development/Housing Projects Monitoring Process:

Step One: During the last month of the first quarter of every calendar year all AHC housing/development project points of contact are mailed "Annual Submission" letters. Points of contact are asked to submit copies of the previous year audited financial statements, TICs, the HOME Compliance Report related to the units listed on the AHC loan agreement, and the most recent copy of the property certificate of insurance.

Step Two: Requested documentation will be reviewed by an AHC staff member who verifies income eligibility, household size, and the affordability provision for funded projects for monitoring purposes.

Step Three: Any concerns related to requested documentation are addressed via email strictly for follow-up purposes until requests have been completed.

Step Four: Repayable Loans - If the loan agreement states the loan is repayable and financial statements submitted were reviewed and demonstrate an agency's ability to submit payment due to surplus cash listed, the AHC sends

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

correspondence to remind the agency of the upcoming payment due before year-end. This ensures repayable loans remain in compliance and adhere to the loan term listed in the file.

Step Five: Once payment is received, checks are cleared with the department's Accounting Clerk and tracked on the "Loan Portfolio Balance Sheet" for internal tracking purposes. A copy of the check is then placed in the Community Development Specialist II box for hardcopy files and no further action is necessary.

AHC Now Requires Inspection Reports

After the State Auditor recommended that the AHC improve its monitoring of development projects while they are under construction, the AHC, which does not have its own construction inspector, has begun requiring receipt of inspection reports throughout construction. When the project is receiving Missouri Housing Development Commission (MHDC) funding, the AHC requires and receives MHDC site observation reports prior to disbursing any funds. When the project is receiving city Community Development funding, the AHC requires and receives CDA inspection reports prior to disbursing any funds. When the project is not receiving funds from other agencies, the AHC requires either 1) the title company provide an inspection report (prior to the AHC disbursing funds) or, 2) the developer pay for a minimum of three inspections by a qualified architect throughout construction.

In addition, the AHC also visits/requests presentations from selected service grantees, and makes site visits to development projects that are of interest or concern.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Affordable Housing Commission Controls and Procedures

Finding Number: 5.C.

Finding: The AHC did not have adequate procedures to ensure loans to housing developers were repaid in compliance with loan agreements.

Recommendation: The AHC establish procedures to adequately follow up on developer loans to ensure loans are repaid in a timely manner.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Since 2011, a full-time Community Development Specialist monitors and oversees rental housing compliance requirements, and created tools to track loan payments and the submission of financial statements, tenant income, and insurance policies.

The AHC has also focused on improving its rental housing loan compliance, repayment, and tracking system. As the construction of each rental housing complex closes out and shifts to servicing, the AHC creates a repayment or forgiveness schedule for each project and advises the owner/developer/property manager of the loan terms and the annual submission requirements.

The repayment or forgiveness schedules amortize the loans, identify annual payments due if cash flow allows (or annual payments forgiven for forgivable projects), and link each project's balance to the AHC Loan Portfolio Balance Sheet.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Reutilization Authority Controls and Procedures

Finding Number: 6.A.

Finding: When the Land Reutilization Authority (LRA) sold properties, the sales records were not reconciled to inventory disposition records. Some properties were recorded more than once in the inventory records. The LRA did not periodically review the availability status of properties, as recorded on the inventory records.

Recommendation: The LRA establish procedures to ensure inventory records are complete and accurate. In addition, the LRA should routinely review the status of tracts of land to ensure the availability status of each tract is up-to-date.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The LRA conducts bi-weekly reconciliations between the Real Estate Closer database (used by individuals that close all real estate transactions and record the deeds) and the Administrative Assistant's database. The statuses checked are available, offer, accepted offer, option, and closed.

Contact Person: Laura Costello
Contact Phone Number: (314) 657-3725

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Reutilization Authority Controls and Procedures

Finding Number: 6.B.

Finding: The LRA did not have contracts related to costs incurred for property maintenance and upkeep. In addition, there was no documentation to support why amounts paid to the Forestry Division were less than the incurred charges for LRA properties.

Recommendation: The LRA enter into contracts for property maintenance and upkeep and ensure contracts contain adequate details and protections for the LRA.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The LRA issued an RFP for property maintenance in 2015. The LRA has contracted with the Forestry Division since 2016.

Contact Person: Laura Costello
Contact Phone Number: (314) 657-3725

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title:	Land Reutilization Authority Controls and Procedures
Finding Number:	6.C.
Finding:	Expenses incurred for maintenance and upkeep were not allocated to the individual properties.
Recommendation:	The LRA maintain records accounting for the operation, management, or other expenses related to each parcel of real estate as required by state law.
Status of Finding:	No Longer Applicable

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The LRA maintains individual records for all properties for status, maintenance calls, and all aspects associated with title and LRA board activities. The LRA incurs both property intake and maintenance costs that far exceed any revenue generated. Section 92.910, RSMo, authorizes that "individual tracts may be consolidated and grouped or regrouped for economy or convenience" which includes accounting. Accordingly, although the LRA does not expend its limited resources tracking costs and income by individual parcel for each of its 12,000 parcels we believe the LRA accounting and record keeping is in compliance with state law. The state legislation intended the LRA to have the latitude to maintain its accounting in order not to bankrupt the land bank and allow it to provide the public benefits enumerated in Section 92.875.2, RSMo. Accordingly, the LRA will continue to keep its records in the format it has used since 1971.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Land Reutilization Authority Controls and Procedures

Finding Number: 6.D.

Finding: LRA policies for land sale pricing were outdated or not adequately documented. The LRA's standard sales prices for properties were based on an analysis of land sales prior to 2002 and had not been updated since 2002. The LRA did not maintain documentation of how the prices were calculated. The LRA did not maintain supporting documentation for exceptions to the standard sales prices. Although LRA staff indicated appraisals were obtained for all commercial property prior to sale, the standard pricing policy indicated an appraisal was only required for commercial property located east of Broadway.

Recommendation: The LRA periodically update standard land sales prices to ensure the prices reflect the fair value of the property. Any exceptions to the standard pricing should be documented in writing or supported by a property appraisal.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The LRA continues to periodically update its pricing policy based on the land values established by the City Assessor on an ongoing basis. The LRA pricing policy is intended to be used as a guide and the policy itself states "prices may vary according to location and condition of property." Exceptions to standard prices are documented by resolution, in the individual property record, and in meeting minutes.

City of St. Louis - Community and Economic Development Offices
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Lead Remediation

Finding Number: 2.C.

Finding: Our review of lead remediation project files noted 26 of 75 (35 percent) were missing at least one required piece of documentation. Department of Public Safety, Building Division (BD) and CDA policy required documentation for proof of ownership, tax compliance, signed agreements, and proof of insurance be maintained in the project files.

Recommendation: The BD and the CDA ensure required documentation is obtained and maintained in remediation project files.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The BD has tailored its web-based database to make sure that all elements of a lead inspection/risk assessment (LIRA) are incorporated into the report so that the report produced is fully compliant with HUD and Environmental Protection Agency guidelines. In addition, management staff at the BD review each HUD project file to make sure all requirements of the grant are met. They have developed an Inspection Checklist so that each file can be reviewed to insure all components are included in the LIRA. They also utilize a Project Designer Close Out Checklist for each file so that they can confirm that all compliance requirements have been met.

The CDA developed a checklist after the last audit for the intake staff to use to make sure each project meets the program requirements. The checklist includes all items that a client needs to qualify for the program. The two intake staff members conduct peer reviews of each file so that there are two reviews of each file before it is determined to be eligible. CDA management periodically review these peer reviewed files as well.

The program was monitored by the HUD Office of Healthy Homes and Lead Hazard Control within the past year. There were no findings or concerns noted during the monitoring visit and the HUD stated that "the city's grant operation is exemplary and may be of benefit to other grantees."

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Director of the Department of Public Utilities
City of St. Louis, Missouri

We have compiled the statuses of the audit report findings contained in Report No. 2010-34, *City of St. Louis, Department of Public Utilities*, issued in March 2010, as part of our current audit of the City of St. Louis. These results were determined by city officials and have not been audited. We will evaluate each status and the procedures implemented to address the related audit findings as appropriate in our upcoming audit of the Department of Public Utilities. The objectives of the follow-up compilation were to:

1. Provide status information from city officials for each recommendation. The status of each recommendation will be one of the following:
 - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
 - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
 - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
 - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.
 - No Longer Applicable: The recommendation is no longer applicable.
2. Compile the information reported.

To obtain the status for each recommendation, we sent questionnaires to the Department of Public Utilities that included a brief summary of each finding and recommendation, and requested the status of each finding and a brief description of the steps taken or planned to implement the recommendation or reason(s) why the recommendation has not been implemented or is no longer applicable. This report is a compilation of the information provided, which we received in May 2018.

Audits of various officials and departments of the City of St. Louis are in process, and any findings and recommendations will be included in the subsequent reports.

Nicole R. Galloway, CPA
State Auditor

City of St. Louis - Department of Public Utilities

Follow-Up Report on Audit Findings

Status of Findings

Finding Title: Water Division Administration

Finding Number: 1.A.

Finding: The city did not pay the division for water use at city owned facilities. In addition, water was also consumed, but not paid for, by the city for other purposes including fighting fires and watering right-of-way property.

Recommendation: The Water Division meter city water use or develop other water use estimates for city owned buildings, facilities, and other water-using features, and work with the city to ensure payment is received from the city for water used by the city.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The city does not agree with this finding for the reasons stated in our response to the original audit. The city has installed meters for any new city connections and, as possible, for current city connections for tracking of water usage.

Contact Person: Curtis Skouby
Contact Phone Number: (314) 633-9012

City of St. Louis - Department of Public Utilities
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Water Division Administration

Finding Number: 1.B.

Finding: Large water rate increases had historically been implemented infrequently, rather than smaller, more frequent increases, which potentially created financial stress on individuals and families with low and fixed incomes. The division adequately projected system costs and was aware of the need to increase rates on a more timely basis; however, rate increases had not been submitted to the Board of Aldermen (Board) for approval. Discussions with division management indicated that, historically, rate increase requests to the Board had not been made until the increases were required to remain in compliance with revenue requirements of the division's bond covenants, cover increases in operating costs, and provide capital for system expansion and improvement.

Recommendation: The Water Division work with the city to ensure water rates are more evenly increased to allow customers to more easily absorb rate increases.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Water rates are set by city ordinance. The Water Division will continue to confer with the proper executive and rulemaking authorities on the proper frequency and amount of rate increases.

Contact Person: Curtis Skouby

Contact Phone Number: (314) 633-9012

City of St. Louis - Department of Public Utilities
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Water Division Administration

Finding Number: 1.C.

Finding: The division had not prioritized its list of system improvement projects to be funded with expected bond proceeds.

Recommendation: The Water Division prioritize the list of needed system improvement projects by critical need, cost, desirability of the effect on water production or delivery, and other relevant criteria.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division is in agreement with tracking the needs of system improvements, but does not agree with how the list is to be structured. The Water Division compiles and maintains a list of critical projects amounting to tens of millions of dollars. These projects are not rated or prioritized. Rather, all are important projects that should be completed at some point. Projects are matched to available funding and evaluated when additional funding is sought. Each project's need, benefit, and costs are center to the project selection process and funding.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Collection and Billing Adjustment Procedures

Finding Number: 2.A.

Finding: Monies received by the Water Division were not logged or receipted to allow reconciliation of monies received to monies transmitted to the Collector of Revenue, and checks were not restrictively endorsed upon receipt.

Recommendation: The Water Division receipt or log all monies received and reconcile the receipt slips or log to transmittals and to payments recorded by the Collector of Revenue in the subsidiary accounts receivable ledgers. In addition, checks and money orders should be restrictively endorsed at the time of receipt.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division has taken steps to address this finding. All payments that are received at the Water Division's customer service window are restrictively endorsed immediately. In addition, these payments are scanned front and back and the images are stored in our database in lieu of keeping a receipt log. A daily reconciliation is performed by the finance section between the transmittals received by the Collector of Revenue and payments posted to the Water Division's general ledger.

Status of Findings

Finding Title: Collection and Billing Adjustment Procedures

Finding Number: 2.D.

Finding: Collections were not adequately safeguarded when they were transmitted to the Collector of Revenue's office. Receipt records were not prepared for water bill collections received by the division. In addition, the monies transmitted were not verified and signed by the Collector of Revenue's office at the time of transmittal, and monies were not secured in a locked bank bag during transmittal.

Recommendation: The Water Division obtain receipt slips from the Collector of Revenue's office to document monies transmitted and ensure collections are transmitted in a secured container.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division has taken steps to address this finding. All payments that are received at the Water Division's customer service window are scanned (front and back) upon receipt. We do not accept cash at the window. A transmittal form is included with the transmittal that contains a listing of the check or money order amount of each individual payment. This form shows the total number of payments and total amount of payments. The Collector of Revenue's office returns the transmittal form with a signature the next day after verifying that the transmittal form, the contents of the transmittal pouch, and the payment postings agree.

Finding Title: Inventory Controls and Procedures

Finding Number: 3.A.

Finding: Procedures were not adequate to ensure inventory balances and reorder quantities were maintained to provide only for current needs and prevent overstocking or stocking of obsolete items. The division's inventory records indicated a number of items with large quantities in stock relative to annual use information. Division personnel indicated the inventory management system had the capability to define reorder quantities and required stock levels based on inventory quantity data and order information parameters for the items; however, this information had not been effectively utilized to make inventory decisions. Finally, division personnel indicated periodic reviews of inventory balances were not performed to identify items on hand which were overstocked or obsolete and needed to be offered for sale at the city's surplus auction.

Recommendation: The Water Division utilize the inventory system management features to monitor inventory item order quantities and stock on hand. In addition, the division should review inventory on hand for overstocked or obsolete items which should be offered for sale at the city's surplus auction.

Status of Finding: Partially Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

Storeroom personnel review inventory on hand to avoid overstocking and ensure that they have the stock needed to support our operations. In a rare case in which obsolescence occurs because of a procedure or engineering change, obsolete items are taken out of inventory and sold as scrap or sold through the city's surplus system. Because of our aging infrastructure, slow-moving items are kept in the event that they are needed during repairs.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Inventory Controls and Procedures

Finding Number: 3.B.

Finding: Documentation was not maintained to show inventory balance adjustments were adequately investigated to determine the possible reasons for any inaccurate inventory balances. Discrepancies between annual physical counts and the accounting system's quantity were initially investigated by performing a recount. After the recount verified the actual balance, the accounting system's quantity was adjusted without any documented attempt to identify the reasons for the discrepancy.

Recommendation: The Water Division improve the documentation of any investigation of significant inventory discrepancies and implement procedures to prevent similar issues in the future.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division has taken steps to address this finding. The storeroom and finance section continuously work together to investigate inventory discrepancies. The Water Division's perpetual inventory system does not allow negative inventory. Therefore, discrepancies are investigated to allow our finance section to post storeroom issues (variances) within the subsidiary ledger. Additionally, a full physical inventory count is performed annually.

City of St. Louis - Department of Public Utilities
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Inventory Controls and Procedures

Finding Number: 3.C.

Finding: Procedures to monitor the pipeyard's fuel inventory and use reports were not adequate. There were no procedures to reconcile the beginning and ending fuel balances to records of purchases and uses. Although the pipeyard fuel storage tanks provided readings on demand, inventory balances were not periodically reconciled to records of fuel deliveries and fuel dispensed to division vehicles and equipment. In addition, although a fuel use report was obtained from the city's Equipment Services Division and reviewed by the water distribution superintendent, the review procedures and objectives were not clearly defined and the review was not documented.

Recommendation: The Water Division implement procedures to periodically reconcile fuel inventory balances to records of fuel deliveries and fuel dispensed. In addition, procedures and objectives should be developed for the review of fuel use reports and supervisory reviews should be documented.

Status of Finding: In Progress

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division is now connected to the city's Equipment Service Division's (ESD) fuel monitoring system. To get fuel, a Water Division employee must scan his/her identification badge and the vehicle's fob before fuel can be dispensed. This is recorded by the system along with date, time, and quantity of fuel dispensed. A problem has developed in the communication link between the fueling station in our distribution yard and the monitoring system at ESD, requiring employees to manually record this information. Resolution of the problem has been further delayed due to construction activity around the fueling station. We are currently recording the information manually. The two fuel stations at the two treatment plants are in a similar situation where monitoring stations have been installed, but there are connectivity issues between the stations and the monitoring system. The information is currently being recorded manually at these two locations.

The fuel purchases are recorded as direct period expenditures within the Water Division's general ledger.

Contact Phone Number: (314) 633-9090

City of St. Louis - Department of Public Utilities
Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Vehicle Controls and Procedures

Finding Number: 4.

Finding: The Water Division did not actively monitor the usage of the division's 180 vehicle fleet (including heavy equipment) and, as a result, the fleet may have been larger than necessary. According to division officials, usage information was tracked at one time, but issues existed with the new system implemented by the city which did not allow all vehicle information tracked by the city's service department to be readily communicated to the division. The division did not request the information from the city's service department, but attempted to keep a separate log of vehicle usage. However, our review of this log showed it was not complete, contained various inaccuracies, and was not updated in a timely manner.

Recommendation: The Water Division study vehicle utilization and develop justification for the number of transportation and water distribution service vehicles required to conduct division activities. The Water Division should reduce the fleet size if underutilized or unneeded vehicles are identified.

Status of Finding: Not Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division does not understand the basis for this finding. The industry trend is to use fewer people to accomplish a given task. This leads to a higher vehicle-to-employee ratio. The Water Division has and is taking steps toward a better record system that will allow us to better track vehicles.

Follow-Up Report on Audit Findings
Status of Findings

Finding Title: Information System Controls and Procedures

Finding Number: 5.A.

Finding: Password controls of the general ledger system did not require active users to change passwords periodically. In addition, system access security violation logs were produced by the system but were not monitored or reviewed for attempts at unauthorized data access.

Recommendation: The Water Division ensure all user passwords expire and users are prompted to change passwords periodically. In addition, security violation logs should be monitored or reviewed for attempts at unauthorized data access.

Status of Finding: Implemented

Description of steps taken or planned to implement the finding or reason for not implementing or why finding is no longer applicable:

The Water Division has taken steps to address this finding. System passwords automatically expire on a set schedule requiring employees to change passwords. Violation logs are reviewed for attempts at unauthorized data access.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the Audit of Sex Offender Registration

Weaknesses Exist in the Enforcement of Registry Requirements

Chief Law Enforcement Officials (CLEOs) have not adequately pursued noncompliant offenders, resulting in CLEOs being unable to locate more than 1,200 noncompliant sex offenders. In addition, the CLEOs have not adequately updated the next registration dates for sex offenders in accordance with state law.

Missouri State Highway Patrol (MSHP) Procedures

MSHP procedures for maintaining the sex offender registration (SOR) database and supporting CLEO's efforts to enforce SOR requirements need improvement. The MSHP does not always update the compliance status of offenders within the SOR management system in accordance with internal policies. The MSHP has not established agreements with other state agencies to perform batch data matches in order to assist CLEO's enforcement of SOR requirements. The SOR management system does not utilize adequate edit checks to identify inaccurate or inappropriate information entered by the CLEOs.

Weakness in State Laws

Revision to state law is necessary regarding the SAO's access to certain court records. Information requested from the Office of State Court Administrators to evaluate the completeness of the SOR was denied. In addition, state law does not require background checks for school volunteers.

Due to the nature of this report no rating is provided.

Lieutenant Colonel Eric T. Olson, Acting Superintendent
Missouri State Highway Patrol
Jefferson City, Missouri

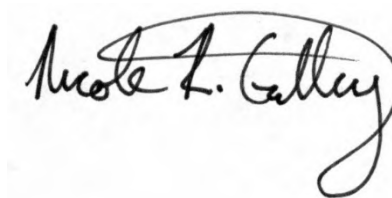

We have audited certain operations of Missouri's sex offender registration (SOR) program. Due to the importance of public safety and the nature of the offenses committed, the state's SOR program is a significant issue for Missouri residents. The program was established under Sections 589.400 through 589.425, RSMo. Offenders who have committed sexual offenses and certain other offenses are required to register as sexual offenders with the chief law enforcement officer in their county of residence. The objectives of our audit were to:

1. Evaluate the effectiveness of law enforcement in enforcing sex offender registration requirements.
2. Evaluate the economy and efficiency of certain management practices and operations related to sex offender registration.
3. Evaluate compliance with certain legal provisions related to sex offender registration.
4. Compare Missouri's sex offender registration laws with those of other states.

Except as discussed in the following paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and included such procedures as we considered necessary in the circumstances. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe the evidence obtained provides such a basis.

Government Auditing Standards require us to obtain and report the views of responsible officials of the audited entity concerning the findings, conclusions, and recommendations included in the audit report. Since there is no central agency charged with oversight of the SOR program, we were unable to obtain views of responsible officials for the findings, conclusions, and recommendations outlined in findings 1 and 3 of the Management Advisory Report. The views of responsible law enforcement officials were obtained and included where appropriate.

The accompanying Management Advisory Report presents our findings arising from our audit of the state's sex offender registration program.

Sex Offender Registration

Introduction

Background

The federal Violent Crime Control and Law Enforcement Act of 1994 established the sexual offender registration program. That act set forth minimum requirements states must meet regarding sexual offender registration or face the loss of some federal funding. Subsequently, the state of Missouri passed legislation in 1994 creating the Missouri Sex Offender Registry, which was implemented in January 1995. All convictions/pleas related to sexual offenses under Chapter 566 RSMo, dating from January 1, 1979, were offenses requiring registration.

The purpose of the sexual offender registration law is to require persons found guilty of sexual and certain other offenses to register their name, address, and other information with local law enforcement officials and to make a listing of those offenders available to the public. This information can then be utilized by citizens to monitor offenders and make informed decisions towards the protection of their families.

Sex offender registration in Missouri is primarily managed by the Criminal Justice Information Services Division of the Missouri State Highway Patrol (MSHP) at the state level and by the chief law enforcement officials (CLEOs) at the local level. The CLEOs represent county sheriffs and the St. Louis Metropolitan Police Department. These law enforcement agencies are assisted by the criminal court system, and the Department of Corrections (DOC) and its Division of Probation and Parole (DPP).

Sex offender registration provisions

Missouri's sex offender registration law requires all individuals who have been convicted of, pleaded guilty to, or conspired to commit crimes of a sexual nature along with certain non-sexual crimes, to register with the CLEO within the offender's county of residence every 6 months.¹ In addition, certain offenses such as those involving victims under the age of 18 require offenders to register every 90 days. Registration information obtained from offenders includes their name, Social Security Number (SSN), phone number, residence address, place of employment, vehicle information, any online identifiers, and crime specific information including the victim's age and gender.²

After initial registration, subsequent registrations with CLEOs consist of offenders verifying the accuracy of their reported information. If an offender changes his or her residence within the county of registration, the offender is required to notify the CLEO within 3 business days. If an offender changes their residence to another county, the offender is required to notify the CLEO of last registration and the CLEO of the new residence within 3 business days.

¹ Sections 589.400 to 589.425, RSMo. State statute references refer to state laws prior to the passage of Senate Bill (SB) 655 in 2018, unless otherwise noted. A summary of changes to sex offender registration requirements as a result of the bill is discussed on page 8.

² Per Section 43.651.1(4), RSMo, online identifiers include email addresses, screen names, user identifications, cell phone numbers, and other similar identifiers.

Sex Offender Registration Introduction

The failure to meet all registration requirements is a felony offense and state law mandates that a third conviction of noncompliance with registration requirements is punishable by a minimum of 10 years imprisonment.³

The MSHP maintains a central database of sex offenders required to register and an Internet website available to the public. CLEOs are responsible for maintaining sex offender registry information for their jurisdictions, ensuring offenders register or verify their information at the appropriate intervals, and providing updated registration and offender status change information to the MSHP. When courts place sexual offenders on probation for offenses committed, they are notified of their responsibility to register at that time and/or by a DPP officer. The DOC is responsible for notifying all applicable offenders of their duty to register as sex offenders upon release from incarceration from a correctional facility.⁴ When releasing an offender, the DOC is also responsible for completing the initial registration and notifying the MSHP and the CLEO of the county where the offender will be residing by forwarding the initial registration to the CLEO. If the offenders are under DPP supervision after release from prison, the supervising parole officers are responsible for ensuring they comply with the terms of their parole, including meeting the sex offender registration and verification requirements.

Figure 1 depicts the number of offenders actively registered as of February 14, 2018, by the offender's initial registration year, and their statutorily required registration interval of 6 months or 90 days. Approximately 90 percent of all registered offenders are required to register every 90 days.

⁴ Section 589.403, RSMo.

Sex Offender Registration Introduction

Figure 2 depicts the number of registered sex offenders as of December 31 for the last 10 years according to statistics maintained by the MSHP. The number of registered offenders has increased from 11,779 as of December 31, 2008, to 15,882 as of December 31, 2017. This represents a total increase of 34.8 percent. The average annual growth rate has been 3.4 percent over this 10-year period and 2.7 percent for the most recent 5 year period. In addition to new Missouri convictions requiring registry, the total number of registered sex offenders is also impacted by sex offenders moving either into or out of the state.

Figure 2: Total offenders registered as of December 31, 2008 to 2017

Source: MSHP records

Prior audits

The State Auditor's Office (SAO) issued an audit report of this program and compliance with its requirements in 2002.⁵ That audit reported, based on a review of records in certain counties, approximately 36 percent of sexual offenders in Missouri had failed to meet their most recent registration/verification requirement. There were about 8,000 known sexual offenders at that time. The audit recommended the General Assembly revise or establish various state laws to help improve the effectiveness of the sexual offender registration program. In addition, recommendations were made to the DOC and the MSHP for improving the registration program. We issued a follow-up audit of the program in 2010.⁶ That audit reported significant improvement had been made, but additional improvements, such as the need to obtain compliance with the federal Sex Offender Registration and Notification Act (SORNA) and improvements to data matching capabilities, were necessary to help improve the effectiveness of the program.

⁵ SAO, Report No. 2002-41, *Missouri Sexual Offender Registration Program*, issued in May 2002.

⁶ SAO, Report No. 2010-094, *Missouri Sexual Offender Registration Program Follow-Up*, issued in August 2010.

Sex Offender Registration Introduction

Comparison with other states

Missouri was one of 18 states that initially required lifetime registration for all sex offenders, regardless of the offense committed. The remaining 32 states have implemented laws that initially place a set number of years offenders are required to register depending on the severity of their crimes. Many of these states utilize a three-tiered approach that align with federal SORNA guidelines. These guidelines classify sex offenders into three tiers depending on the severity of the offense(s) committed and generally require minimum registration periods of 15 years for tier I offenders, 25 years for tier II offenders, and lifetime registration for tier III offenders.

Of the 18 states that initially required lifetime registration for all offenders, 16 states, including Missouri, provided a petition process allowing certain registered offenders to petition for removal from the registry. Prior to the passage of SB 655 in 2018, Missouri's petition requirements were highly restrictive and the number of petitioners that successfully petitioned to be removed from the registry was minimal. Section 589.400.7, RSMo, provided that offenders of certain crimes where no physical force or threat of physical force was used in the commission of the crime may petition for removal after 10 years. In addition, Section 589.400.8 RSMo, provided that offenders who were 19 years of age or younger and whose victims were 13 years or older and no physical force or threat of physical force was involved may petition for removal after 2 years.

Figure 3 illustrates the number of individuals removed from the registry through the petition process based on MSHP records. Missouri's legislation has undergone recent changes due to the passage of SB 655 and the number of petitioners is expected to significantly increase in the future.

Figure 3: Number of
removals by petition, by
statutory provision, by year,
2009 to 2017

Court rulings

Since the establishment of Missouri's sex offender registration program in 1995, various legislation and court cases have impacted the program. Since our 2010 report, three significant court rulings have further clarified sex offender registration requirements. On April 26, 2011, the Missouri Western

Sex Offender Registration Introduction

District Court of Appeals heard a case regarding suspended imposition of sentences (SIS). Defendants argued their SIS did not constitute a "conviction," which triggers SORNA's registration requirements. The District Court ruled that an SIS does not exempt offenders from registration requirements.⁷ On December 6, 2011, the Missouri Western District Court of Appeals determined, the requirement for sexual offenders to report a change in employment status does not violate the constitutional prohibition against retrospective laws.⁸ On April 24, 2012, the Missouri Eastern District Court of Appeals, ruled that a sexual offender leaving a residence with no intent to return is considered a "change" in residence, regardless of having a new permanent residence.⁹

SORNA compliance

On July 26, 2011, the United States Department of Justice's (DOJ) Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering, and Tracking (SMART) determined that Missouri had substantially implemented the provisions of the Sex Offender Registration and Notification Act (SORNA), Title I of the Adam Walsh Child Protection and Safety Act of 2006. The report determined Missouri exceeded SORNA's registration duration requirements of 15 years, 25 years, or the offender's lifetime depending on the offense committed due to Missouri requiring lifetime registration for all offenders.

Senate Bill 655

Senate Bill (SB) 655 was passed by the General Assembly and signed by the governor on July 13, 2018. The legislation became effective on August 28, 2018. SB 655 dramatically alters existing requirements regarding the registration of sexual offenders in Missouri. For example, the bill provides for a three-tiered system that more closely aligns with SORNA guidelines. The three tiers are based on the severity of the offense committed with Tier I sex offenders requiring a registration period of 15 years with the ability to petition the court for early removal after 10 years. Tier II offenders would require a registration period of 25 years, and Tier III offenders would continue to require lifetime registration. Tier III offenders adjudicated as a delinquent would be able to petition the court for removal from the registry after 25 years.

In addition, the bill also reduces the registration frequency for Tier I and Tier II offenders. Tier I offenders would be required to register with CLEOs annually while Tier II offenders would register every 6 months. The registration frequency for Tier III offenders remains unchanged from current requirements of every 90 days. The bill also removes registration requirements for some offenses that previously required registry as a sex offender.

⁷ *Doe v. Replogle*, 344 S.W.3d 757 (Mo. App. W.D. 2011)

⁸ *State v. Guyer*, 353 S.W.3d 458 (Mo. App. W.D. 2011)

⁹ *State v. Kelly*, 367 S.W.3d 629 (Mo. App. E.D. 2012)

Sex Offender Registration Introduction

Scope and Methodology

The scope of our audit included, but was not limited to, the year ended December 31, 2017. Our methodology included obtaining the sex offender database maintained by the MSHP. Due to system limitations, the MSHP could not provide the complete database as of December 31, 2017; therefore, we obtained the database as of February 14, 2018. We then analyzed the data and performed tests to determine if certain elements were accurate and in accordance with statutory requirements. We also obtained subsequent registry data as of May 23, 2018 for analysis purposes. Data on the number of registered offenders, noncompliant offenders, and the percent of noncompliant offenders are included at Appendix A, and are depicted in map form at Appendix B, C, and D.

To gain an understanding of the legal requirements governing Missouri's sex offender registration program, we reviewed relevant state statutes. We then compared Missouri's sex offender registration requirements with those of other states by reviewing relevant websites and applicable statutes pertaining to sex offender registries in other states. To gain an understanding of Missouri's laws in comparison to SORNA guidelines, we reviewed documentation from the DOJ's most recent SORNA compliance review.

To gain an understanding of the MSHP's and the DOC's policies and procedures regarding sex offender registration, we met with applicable officials from those agencies and reviewed each agency's relevant written policies and procedures. We then performed tests to determine compliance with certain policies and procedures.

To gain an understanding of certain enforcement and prosecution issues, we discussed with officials from six CLEO offices and six prosecuting attorney offices¹⁰ representing political subdivisions with both large and small sex offender registry populations. We also requested input from the Missouri Sheriff's Association regarding the issues noted in our report; however, the association declined to provide any responses.

To determine whether local law enforcement officials could use available wage information to pursue noncompliant offenders, we matched available state wage information for the first quarter of 2018 and the previous 3 quarters with noncompliant offender information from the MSHP database for all noncompliant offenders. Similarly, we also matched noncompliant offenders with driver license records maintained by the Department of Revenue.

We also obtained a listing of deaths recorded in the state for the period of 1995 to 2017 from the Missouri Department of Health and Senior Services

¹⁰ We interviewed personnel in the offices of the Sheriff and Prosecuting Attorney from Butler, Cedar, Jackson, St. Francois, and Stoddard counties and the City of St. Louis, including the Prosecuting Attorney for Butler and Stoddard counties.

Sex Offender Registration Introduction

(DHSS). We matched these records to SOR database records to determine if any registered sex offenders were deceased.¹¹ Although we used computer-processed data from other state agencies for our audit work, we did not rely on the results of any processes performed by these agencies in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objectives.

The General Assembly and applicable law enforcement agencies have generally implemented the recommendations in the prior report and the state has implemented the federal SORNA requirements.

¹¹ Acknowledgement: The data used in this document/presentation was acquired from the Missouri DHSS. The contents of this document including data analysis, interpretation or conclusions are solely the responsibility of the authors and do not represent the official views of the DHSS. This acknowledgement is a requirement of the data sharing MOU between the SAO and DHSS.

Sex Offender Registration Management Advisory Report State Auditor's Findings

1. Weaknesses Exist in the Enforcement of Registry Requirements

Chief Law Enforcement Officials (CLEOs) have not adequately pursued noncompliant offenders.¹² As a result, approximately 1,300 sex offenders, including approximately 800 of the most dangerous classification of sex offenders, are currently not in compliance with SOR reporting requirements and their locations are unknown. Arrest warrants have not been issued for the majority of these noncompliant sex offenders. In addition, CLEOs do not always require sex offenders to register in intervals required by state law and CLEOs do not always properly update the SOR registration system to identify absconding offenders. These issues have resulted in some sex offenders being incorrectly identified as compliant within the SOR management system and the MSHP's public website.

1.1 Inadequate enforcement of sex offender requirements

The enforcement of sex offender registration requirements by CLEOs is not adequate. According to the SOR database maintained by the MSHP, 1,259 (7.9 percent) registered sex offenders were noncompliant with SOR requirements as of February 14, 2018.¹³ This rate is based on information recorded in the SOR management system and does not take into account noncompliant offenders who were determined by auditors to be improperly identified as compliant (see MAR finding number 2.1).

The noncompliance rate of 7.9 percent is higher than the 7.1 percent noncompliance rate reported in our 2010 audit report.¹⁴ Our review determined many noncompliant sex offenders have been noncompliant for several years without adequate enforcement actions being taken by local law enforcement officials. Of the 1,259 sex offenders identified as noncompliant, 678 offenders (54 percent) have exceeded their scheduled registration dates by more than a year.

Noncompliant Tier III offenders

As noted in the background section, Senate Bill (SB) 655 dramatically revises the state law pertaining to the registration of sexual offenders. These changes include the use of three tiers to classify offenders based on the severity of the offenses committed. Tier III offenders have committed the most serious offenses such as rape, sodomy, child molestation, sexual trafficking, incest, and the use or promotion of a child in a sexual performance. Other offenses can also lead to a Tier III classification depending upon specific case information such as the age of the victim, whether the offense was of a sexual nature, or the length of the offender's imprisonment term. These offenses include sexual abuse, promoting prostitution, child molestation in third and

¹² This audit report uses the term "compliant" to refer to offenders who register with CLEOs at the intervals established by state law.

¹³ The MSHP SOR database is updated daily. Most CLEOs enter updated sex offender information directly into the SOR database while others submit paper registration forms to be entered into the SOR database by the MSHP.

¹⁴ SAO, Report No. 2010-94, *Missouri Sexual Offender Registration Program Follow-Up*, issued in August 2010.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

fourth degrees, sexual misconduct, and child abuse of a sexual nature. Tier III offenders must register with CLEOs every 90 days for their lifetime.

Based on our analysis of noncompliant offenders in the SOR, at least 794 of the 1,259 noncompliant offenders (63 percent) met the criteria for Tier III classification (see Appendix E).¹⁵ Of these 794 offenders, 568 (72 percent) had committed the offenses of rape, sodomy, and/or child molestation in the first or second degree.¹⁶ Given the substantial number of noncompliant offenders who meet the SB 655 criteria for Tier III classification, the passage of SB 655 will not significantly reduce the obligation of CLEOs to pursue offenders who were identified as noncompliant with SOR requirements prior to the bill's implementation.

CLEOs are responsible for the enforcement of SOR requirements and enforcement actions are conducted at their discretion. According to law enforcement officials interviewed, if offenders do not register on their scheduled registration dates, CLEOs will typically try to follow up with the offenders to notify them of the need to register. Follow-up actions may include contacting an offender by telephone or letter and/or sending an officer to an offender's registered address in an attempt to locate him/her. After any follow-up actions are conducted, CLEOs may decide to forward evidence of noncompliance to county prosecutors for the consideration of filing criminal charges and obtaining arrest warrants from the court.

Arrest warrants not being issued

Approximately 91 percent of noncompliant sex offenders do not have warrants outstanding for their arrest due to noncompliance with registry requirements. We obtained a listing of outstanding warrants in April 2018 from the MSHP's Missouri Uniform Law Enforcement System (MULES) and noted that only approximately 9 percent of offenders identified as noncompliant as of the data extraction date had an active arrest warrant for noncompliance with registry requirements.¹⁷

According to law enforcement officials interviewed, various reasons can contribute to warrants not being obtained for noncompliant sex offenders. Such reasons can include the prioritization of other law enforcement concerns, jail overcrowding, prosecutorial discretion to not pursue charges, and concerns

¹⁵ The number of estimated Tier III offenders is determined from offense and victim data within the SOR management system and the Tier III criteria established by SB 655. The figure presented is a minimum amount because classification for some offenders could not be determined without a review of case-specific details.

¹⁶ Offender count includes the statutory rape and statutory sodomy offenses.

¹⁷ MSHP officials indicated warrant data in MULES might not be complete because some warrants may not be correctly entered and/or updated timely by local law enforcement agencies. MULES data indicated 255 individuals with active warrants for failure to register regardless of whether the individuals could be matched with SOR records.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

regarding the proper jurisdiction when offenders move to other counties without properly notifying law enforcement officials. We also inquired with the Missouri Sheriff's Association regarding factors that could influence the low totals of outstanding warrants for noncompliant sex offenders. However, the association declined to provide a response.

The failure to obtain arrest warrants prevents other law enforcement agencies from taking enforcement actions when interacting with noncompliant sex offenders. Data for how many of the noncompliant offenders were in contact with local law enforcement officers after being deemed noncompliant cannot be determined. However, we obtained MSHP issued traffic citation information and determined that during the 2016 and 2017 calendar years the MSHP issued 27 traffic tickets to noncompliant sex offenders who were listed as noncompliant with registry requirements and remained noncompliant with registration requirements through our data collection date of February 14, 2018. Of these 27 individuals, 11 were listed as absconders in the SOR database, indicating the CLEO had confirmed the individual no longer resided at his or her registered address. For 26 out of the 27 individuals, no arrest warrants were outstanding at the time the citations were issued by MSHP officers. For one offender, an arrest warrant had been recently issued and was outstanding; however, the local law enforcement agency had not entered it into MULES to inform the MSHP and other law enforcement agencies. If arrest warrants had been obtained by CLEOs and properly entered into MULES, these sex offenders could have been arrested and charged with noncompliance with registration requirements.

When CLEOs do not obtain arrest warrants for noncompliant sex offenders after appropriate follow-up actions have been taken, sex offenders who commit the felony offense of noncompliance with registry requirements are able to reside in locations unknown to law enforcement officials and the public, sometimes for several years, with little risk they will be apprehended and prosecuted for their noncompliance.

Absconder status

CLEOs do not adequately update the status of noncompliant offenders as absconders in the SOR management system. Of the 1,259 noncompliant offenders, only 239 (19 percent) are classified as absconders. However, many of these offenders have been listed as noncompliant for an extended period of time without their status being updated to absconder and/or an arrest warrant being obtained for their arrest. We noted that of the 1,020 noncompliant offenders not classified as an absconder, the average length of time indicated by local law enforcement officials since the offender's most recent registration date was 3.12 years and 202 offenders (20 percent) had not registered with a CLEO in more than 5 years.

In some cases, an offender may not report to the CLEO on the scheduled registration date but remain at his or her registered residence. In these

Sex Offender Registration Management Advisory Report - State Auditor's Findings

circumstances, the offender is considered noncompliant with registry requirements but not an absconder. In other cases, an offender may miss the scheduled registration date because the offender has changed residences without properly notifying the CLEO within 3 business days, as required by state law.¹⁸ After confirming the location of the offender is unknown, CLEOs are to update the offender's status in the SOR management system to "absconder." This classification notifies other law enforcement officials and the public, through the MSHP's notification website, that the location of these offenders is unknown and the previously registered address cannot be relied upon. In accordance with SORNA guidelines, the MSHP also notifies the US Marshals Service when CLEOs identify an offender as an absconder in the SOR management system. Local law enforcement officials we spoke with indicated this delay in updating the absconder status was due to inadequate resources necessary to effectively verify whether noncompliant offenders remain at their registered addresses.

SORNA guidelines states that if information is received indicating a sex offender may have absconded, an effort to determine whether the sex offender actually absconded must be made. If follow-up actions indicate the offender has absconded or cannot be located, the registry is to be updated to reflect this status. In addition, a warrant must be sought for the sex offender's arrest, if the legal requirements for doing so are satisfied.

While all law enforcement officials must balance available resources with a wide variety of law enforcement obligations, local law enforcement officials should work to ensure SOR requirements are effectively enforced. If sex offenders laws are not effectively enforced, law enforcement is unable to track the location of registered sex offenders and citizens are not able to effectively use the sex offender registry when making decisions to protect themselves and their families.

1.2 Registration dates

CLEOs do not always schedule the next registration dates for sex offenders in accordance with state law. In addition, due to errors entered by CLEOs in the next registration date field, some sex offenders have avoided registration requirements while being identified as compliant within the SOR management system and the MSHP's public notification website.

Data entry errors

The next scheduled registration date for each offender is entered in the SOR management system by CLEOs during each offender's registration. While the MSHP reviews and accepts data submitted by CLEOs as part of maintaining the SOR management system, MSHP officials indicated their reviews of information submitted by CLEOs are limited to fields that are made public through the MSHP's sex offender website such as offender addresses, vehicle

¹⁸ Section 589.414, RSMo.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

information, and offenses committed by offenders and they do not review other database fields such as the offender's most recent registration date and the next scheduled registration date.

We reviewed the next scheduled registration dates and the most recent registration dates for offenders identified as compliant within the SOR management system and noted 266 offenders had a scheduled next registration date 30 days greater than the applicable 6 month or 90 day interval required by state law. We discussed this issue with local law enforcement agencies and no consensus as to why the next scheduled registration date would exceed the statutorily mandated intervals could be identified. Some officials indicated that law enforcement personnel at CLEOs might be aware of future local incarceration or hospitalization dates that would prompt officials to extend the registration dates of some offenders. We noted that for some offenders, either the most recent registration date or the next scheduled registration date were erroneously entered by local law enforcement officials. However, in other cases, an explanation regarding why the scheduled date exceeded the interval required by state law was not readily apparent.

The MSHP's normal procedures for maintaining the SOR management system include running a system process once per day that changes the compliance status of offenders from compliant to noncompliant if the CLEO has not reported their registration within 7 days of the offender's next registration date. However, this system process is only effective if the next scheduled registration dates are accurate and in accordance with statutory requirements. For instance, we noted 18 offenders whose next registration dates were in calendar years 2019 or later as of the data extraction date of February 14, 2018. Given that registration intervals are either every 6 months or 90 days, no offender should have had a next scheduled registration date in year 2019 or later. Table 1 identifies 3 of the 18 offenders with a 'next registration' date in 2019 or later.

Table 1: Sample of Offenders with 'Next Registration' Date of 2019 or Later

Example Number	Last Registration Date	Required Registration Interval	Next Scheduled Registration Date	Published Compliance Status	Actual Compliant Status	Days Noncompliant as of 2/14/18
1	07/01/2015	90 days	09/28/ 2105	Compliant	Noncompliant	869
2	06/23/2017	90 days	09/20/ 2107	Compliant	Noncompliant	146
3	11/10/2017	90 days	02/09/ 2019	Compliant	Noncompliant	6

For these examples, the CLEOs likely mistyped the year when entering the next scheduled registration field. These errors were not identified by the CLEO or the MSHP and resulted in the offender being improperly classified as compliant within the SOR management system and the MSHP's public notification website. For example 1, the offender was able to not register with the CLEO for approximately 2.5 years while still being classified as compliant

Sex Offender Registration Management Advisory Report - State Auditor's Findings

within the SOR management system and the MSHP's public notification website. For example 3, the offender had only been noncompliant for 6 days as of the data extraction date. However, the offender continued to be improperly listed as compliant on the MSHP's public notification website until April 2018 when we notified MSHP about the problem. For all three examples, we notified the MSHP of the errors once identified. The MSHP subsequently notified the corresponding CLEOs who corrected the dates and compliance statuses within the SOR management system.

As noted in the background section, state laws requires sex offenders to register with CLEOs every 6 months or 90 days depending on the offense committed. In order to ensure sex offenders are held accountable for registry obligations and offender compliance statuses with the SOR management system are accurate, CLEOs should ensure registration dates are in accordance with statutory requirements.

Recommendations

To the Chief Law Enforcement Officials of counties and the City of St. Louis:

- 1.1 Ensure follow-up actions are taken when noncompliant sex offenders violate registration requirements and properly update the SOR management system. In addition, when follow-up actions are not successful, pursue arrest warrants to help apprehend noncompliant offenders.
- 1.2 Ensure sex offenders are scheduled for registration dates in accordance with statutorily required intervals.

Auditee's Response

Due to no central state or local entity having oversight or management responsibilities over the Sex Offender Registration program on a statewide basis, no management response can be obtained.

2. Missouri State Highway Patrol Procedures

MSHP procedures for maintaining the SOR database and supporting CLEO's efforts to enforce SOR requirements need improvement.

2.1 MSHP database not updated timely

The MSHP does not always update the compliance status of offenders within the SOR management system in accordance with internal policies. The MSHP maintains the SOR management system and MSHP procedures indicate the system is to run a batch job once per day that updates the compliance status of an offender. This change of status is to occur if the offender has not registered within 7 days of the offender's next scheduled registration date entered by CLEOs.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

After receiving the SOR database from the MSHP as of February 14, 2018, we determined the compliance statuses of offenders had not been updated in accordance with MSHP's internal policy. As a result, the database contained 342 individuals classified as compliant when they should have been listed as noncompliant. The database indicated no offenders marked as noncompliant had a registration due date after January 9, 2018. For these 342 individuals, the numbers of days each individual had been noncompliant ranged from 8 to 35 days. When these individuals are added to those already identified as noncompliant, the noncompliance rate was approximately 10 percent as of February 14, 2018.

Updating the compliance status of offenders daily in conformity with internal policy will help ensure the SOR database and public notification website accurately reflect the compliance status of offenders.

2.2 Data matches

The MSHP has not established agreements with other state agencies to perform batch data matches to assist CLEO's enforcement of SOR requirements. Such data matches would help CLEOs locate noncompliant offenders and identify deceased offenders.

State wage matches

Similar to the prior audit, the MSHP has access to perform single inquiry data matches with state wage records maintained by the Department of Labor and Industrial Relations (DLIR). These single inquiry matches are performed by MSHP personnel when requested by CLEOs; however, the MSHP's agreement with DLIR does not provide the capability to perform batch cross-matches against the entire SOR database or a list of noncompliant offenders within a particular county. As a result, such information is not readily available to the MSHP to assist CLEOs in the pursuit of noncompliant offenders.

To determine if registry cross-matches continue to be relevant to law enforcement in the pursuit of noncompliant offenders, we performed a batch cross-match between the 1,259 noncompliant/absconder offenders in the SOR management system and state wage data reported to the Department of Labor and Industrial Relations (DLIR) for the first quarter of 2018 and the last 3 quarters in 2017. The results of our data match indicated 350 of the 1,259 (27.8 percent) noncompliant offenders had earnings reported in Missouri during the 4 quarters reviewed.

Driver license matches

Similarly, the MSHP is able to perform single query data matches with driver license records maintained by the Department of Revenue (DOR) but the MSHP's agreement with DOR does not provide the capability to perform batch cross-matches. We performed a batch cross-match between the 1,259 noncompliant/absconder offenders as of February 14, 2018, and driver license records maintained by the DOR. Based on our cross-match, during the period of January 1, 2016, through February 14, 2018, approximately 200 noncompliant offenders received a new or renewed a Missouri driver license.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

For the approximately 200 offenders identified, 46 (23 percent) were classified by CLEOs as absconders whose location was unknown. For those offenders, the average time period since they had last registered with a CLEO was approximately 5 years.

Both the issuance of a new driver license or the renewal of a driver's license requires proof of a Missouri residential address and such information is recorded by the DOR.

The use of batch cross-matches of both state wage information and driver license records would assist law enforcement in identifying the location of noncompliant sex offenders. MSHP personnel indicated that in order to keep data matching results accurate and compliant with privacy laws, the MSHP only obtains and distributes data matching results when specifically requested by CLEOs. However, it is unclear what privacy laws would be violated if batch data matches were proactively sent to CLEOs if proper confidentiality agreements were obtained.

Death matches

We also performed a cross-match between the SOR database and death records reported by the Department of Health and Senior Services (DHSS) in order to determine if some sex offenders were deceased.

We determined that 122 sex offenders, not identified as deceased in the SOR management system, matched with death records maintained by the DHSS.¹⁹ This match was performed based on a match of SSNs between the two databases. For 26 of the 122 matches, we determined the names and date of births recorded between the two databases did not match, which suggests that either the SSNs had been inaccurately recorded on the death records maintained by DHSS and/or the SSNs provided by the offenders and entered by the CLEOs were inaccurate. A listing of the offenders identified was provided to the MSHP.

While the MSHP currently submits requests on an individual basis to verify the status of offenders identified by CLEOs as deceased, a match against the entire SOR database could assist CLEOs by identifying deceased offenders who no longer need to be tracked and improving the accuracy of the public database.

2.3 SOR management system edit checks

The SOR management system maintained by the MSHP does not utilize adequate edit checks to identify inaccurate or inappropriate information

¹⁹ The data used in this document/presentation was acquired from the Missouri DHSS. The contents of this document including data analysis, interpretation or conclusions are solely the responsibility of the authors and do not represent the official views of the DHSS. This acknowledgement is a requirement of the data sharing MOU between the SAO and DHSS.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

entered by the CLEOs. The lack of adequate edit checks contributed to the following errors within the SOR database:

- As identified in MAR finding number 1.2, the next required registry date entered by CLEOs can exceed intervals required by state law. For example, we identified one sex offender was able to avoid registration requirements for approximately 2.5 years while being incorrectly identified in the SOR database and the MSHP's public notification website as compliant. The CLEO mistakenly entered the offender's next registration date with the year "2105" rather than "2015". Other errors by CLEOs included the use of the following years when scheduling offenders' next registration dates: 2104, 2022, 2048, 2108, and 2107.
- The offender's most recent registration date is not always accurately entered by CLEOs. We reviewed the most recent registration date fields for 25 offenders identified as compliant in the SOR database but who appeared to be noncompliant based on the most recent registration date entered by CLEOs. Our review noted that 16 of the 25 (64 percent) registration dates reviewed were incorrect based on documentation provided by the MSHP. In some cases, the date was not updated or the CLEO entered a date using a year prior to the actual registration date. For example, a CLEO entered a registration date of February 7, 2017 when the actual registration date was February 7, 2018.
- Edit checks are not in place to prevent duplicate or invalid SSN sequences from being submitted by offenders and then entered by CLEOs into the SOR database. We noted two offenders were registered using the same SSN while six other offenders were registered with invalid SSN sequences, including two offenders registered with the invalid sequence of "999-99-9999."

In addition, prior to the current audit, MSHP officials identified deficiencies with the SOR management system's ability to accurately upload Missouri's SOR database to the National Sex Offender Registry File maintained by the FBI's National Crime Information Center. MSHP personnel correct inaccurately uploaded SOR data when such information is identified. MSHP personnel indicated the exact cause of the problem has not been identified but believe the age of the current system is a contributing factor. The MSHP requested and was provided additional funding in its fiscal year 2019 budget to replace the current system and is in the process of procuring a new system. To help ensure the integrity of the data within the SOR database, the MSHP should ensure the next SOR management system includes adequate edit checks for key fields within the database. This control is especially necessary considering the nature of the SOR system and due to the reliance on the high number of CLEO users inputting data into the system.

Sex Offender Registration
Management Advisory Report - State Auditor's Findings

Recommendations

To the Highway Patrol:

- 2.1 Ensure the SOR database is updated in accordance with internal policy to accurately reflect the compliance status of sex offenders.
- 2.2 Obtain agreements with other state agencies that allow for batch data-matching to assist CLEOs pursue noncompliant offenders.
- 2.3 Ensure the new sex offender system includes adequate edit-checks to limit the input of incorrect and/or inappropriate data.

To the Chief Law Enforcement Officials of counties and the City of St. Louis:

- 2.2 Consider requesting periodic batch data-matching reports from the MSHP to assist with the enforcement of sex offender registry requirements.

Auditee's Response

The MSHP's written response is included at Appendix G.

3. Weaknesses in State Laws

Revision to state law is necessary regarding the SAO's access to certain court records. In addition, state law does not require background checks for school volunteers.

3.1 SAO access to court records

Information requested from the Office of State Courts Administrator to evaluate the completeness of the SOR was denied. The State Judicial Records Committee (SJRC) denied the SAO access to certain closed court records including records for cases disposed as a Suspended Imposition of Sentence (SIS) after the probationary period has been completed. As noted in the background section, Missouri courts have ruled that individuals who have committed crimes requiring sex offender registration and have received a SIS must still register as a sex offender.

In order to perform audit procedures to test whether individuals who committed crimes requiring registry actually registered, we requested case information for all individuals requiring registration as a sex offender from when the last circuit court went on the Judicial Information System in 2008 through December 31, 2017 (see Appendix F). The SJRC refused to provide closed court records regarding individuals who had committed offenses requiring registry as a sex offender, closed records for individuals who had committed the offense of noncompliance with SOR requirements, and identification information necessary to match individuals from court data with individuals in the SOR database. The SJRC provided no legal basis for the denial. See all correspondence with the SJRC at Appendix F.

Sex Offender Registration Management Advisory Report - State Auditor's Findings

Without information from the court regarding individuals committing offenses requiring registration as a sex offender, the completeness of the registry cannot be determined. A clarification in state law to clearly provide the SAO access to the information requested would allow the SAO to evaluate the completeness of the registry.

3.2 School volunteer background checks

State law does not require background checks for school volunteers. Section 168.133, RSMo, requires background checks for school employees, but does not require background checks for school volunteers. Department of Elementary and Secondary Education (DESE) officials indicated most school districts maintain policies requiring background checks for certain school volunteers based on sample policies developed by the Missouri School Board Association (MSBA).

The MSBA's sample policy regarding background checks recommends school districts perform a basic background check for school volunteers who will be left alone with students. The results from the basic background check through the MSHP's website would include results from the SOR database. The use of more thorough fingerprint background checks is left to the discretion of school superintendents. In addition, MSBA policy recommends that school sponsors, advisors, and coaches, who are not otherwise employed by a district, receive the same background checks as school employees. Sample policies from the MSBA are not required to be used and school districts may adopt either less or more stringent policies.

Within the last 5 years, other states such as Pennsylvania, Rhode Island, Nevada, and Oregon have passed legislation requiring schools to obtain background checks on certain school volunteers. Without a legal requirement, school officials may not conduct background checks for all school volunteers with contact with children and/or background checks that are performed may not include a check against the SOR database.

Recommendations

The General Assembly consider amending state law to:

- 3.1 Provide the SAO clear statutory authority to review court records.
- 3.2 Require school volunteers with access to students to receive backgrounds checks that include a check against the sex offender registry database.

Auditee's Response

Due to no central state or local entity having oversight or management responsibilities over the Sex Offender Registration program on a statewide basis, no management response can be obtained.

Jeff Roberts
Information Systems Senior Auditor
Missouri State Auditor's Office
P.O. Box 869
Jefferson City, MO 65102

Sent via email to: Jeff Roberts <Jeff.Roberts@auditor.mo.gov>

Dear Mr. Roberts:

The auditor's request to the State Judicial Records Committee (SJRC) for data was considered by committee at their April 20, 2018 meeting. Specifically, the auditor's office has requested:

1. All charges (all years) filed for failure to register as a sex offender (currently under RSMo 589.425) as of December 31, 2017.
2. All convictions (all years and including SIS's) for failure to register as a sex offender as of December 31, 2017.
3. All convictions (including SIS's) during the 10 years ended December 31, 2017 for offenses requiring registration as a sex offender.
4. The auditors informed me they are also interested in providing OSCA a list of people (State ID number, name, and/or SSN) to obtain a report of current outstanding warrants for each person.

The committee approved the request for a report for cases that were charged or disposed for failure to register as a sex offender (see charge codes below) for the years FY2009 -FY2017, excluding cases given an SIS. The data elements approved are listed below.

Charge Codes for Failure to Register as a Sex Offender

589.425-001Y200836__	22361__	FAIL TO REGISTER AS A SEX OFFENDER PURSUANT TO SECTIONS 589.400 - 589.425 - 1ST OFFENSE	F / D
589.425-002Y200836__0	22366__0	FAIL TO REGISTER AS A SEX OFFENDER PURSUANT TO SECTIONS 589.400 - 589.425 UNDERLYING OFFENSE IS AN UNCLASSIFIED FELONY UNDER CHAPTER 566, A OR B FELONY OR FELONY INVOLVING A CHILD UNDER THE AGE OF 14 - 1ST OFFENSE	F / C
589.425-003Y200636__0	22370__0	FAIL TO REGISTER AS A SEX OFFENDER PURSUANT TO SECTIONS 589.400-425 - 2ND OFFENSE	F / D

In addition, the committee approved the request for a report for offenses requiring registration as a sex offender (see charge codes listed on appendix A) for the years FY2009 –FY2017, excluding cases given an SIS. The data elements approved are listed below.

Approved Data Elements

- Case ID
- Name of defendant
- Charge code
- Offense description
- Circuit court identification
- Date of conviction (including SIS's)
- Date of filing of charges
- Type and Class of crime

The committee denied the request for a list outstanding warrants for a list of names that the auditor would submit. There is not an existing report or process in which to do the comparison that you have requested.

The Research Unit at the Office of State Courts Administrator will prepare the data that have been approved. Please contact Catherine Zacharias at 573-526-8857 if you have any further questions.

Sincerely,

Kenneth R. Garrett, III

NICOLE GALLOWAY, CPA
Missouri State Auditor

May 24, 2017

Kathy S. Lloyd, State Courts Administrator
Office of State Courts Administrator
2112 Industrial Drive
P.O. Box 104480
Jefferson City, MO 65110

Dear Ms. Lloyd:

As we discussed, the State Auditor's Office (SAO) currently has four outstanding requests related to the audit of the state sex offender registry (SOR). Our requests are as follows:

First, all charges filed for failure to register as a sex offender (currently under RSMo 589.425) for the period beginning when the last judicial circuit went on JIS through the year ended December 31, 2017. This request is necessary to compare the number of charges for SOR noncompliance to the number of individuals listed as noncompliant in the SOR. Based on information available, there are a high number of offenders that are not compliant with SOR requirements, but are not being charged. Without this data the SAO has no way of verifying this information. Our understanding is that your agency has agreed to this request as long as the data requested does not cover any pre-JIS activity.

Second, all individuals found or plead guilty for failure to register as a sex offender for the period beginning when the last judicial circuit went on JIS through the year ended December 31, 2017. This request is an extension of the first, but will provide additional context on how many individuals actually have been convicted for noncompliance.

Third, all individuals found or pleaded guilty during the period beginning when the last judicial circuit went on JIS through the year ended December 31, 2017 for offenses requiring registration as a sex offender. The requirement to register is Sections 589.400 to 589.429, RSMo, includes those that have been "convicted of, been found guilty of, or pled guilty or nolo contendere." This request is to verify that all individuals who should be on the registry are actually on the registry. Because it is up to the local law enforcement agencies to populate the registry, the SAO has no assurance that all individuals who were convicted or pled guilty to crimes that should result in being put on the registry actually ended up there. We have not had this third request in the past because there was no way to obtain the information in a usable form. The 2002 SOR audit was pre-JIS; therefore, auditors at that time did not have a means of determining the completeness of the SOR, and the 2010 report was primarily a follow-up to the issues noted in the 2002 report.

Appendix F
Sex Offender Registration
Office of State Courts Administrator Correspondence

Finally, the fourth request is a list of people with current outstanding warrants for SOR noncompliance. This request is also related to #1 and #2. The SAO will provide the information for individuals who are shown as noncompliant in the SOR to determine how many of them have warrants out for their arrest. According to discussions with Highway Patrol, OSCA may have knowledge of more outstanding warrants than what we identified by looking at the MULES system.

For all requests, it is important to have identifiers such as social security or state identification numbers. OSCA has indicated they will only send a limited number of data fields. The approved data elements are not adequate to properly match individuals identified by OSCA to the sex offender registry data provided by the MSHP. Name-only matches are insufficient to determine whether the list is complete because names are not placed in the systems consistently, unlike the identification numbers.

We believe that the SAO has the legal authority to obtain this information. The SAO is performing this audit under its constitutional and statutory authority as provided by the Missouri Constitution, Article IV, Section 13, and Chapter 29, RSMo. Under Section 29.130, RSMo, the state auditor shall have free access to all offices of this state for the inspection of such books, accounts and papers as concern any of her duties. Additionally, under Section 29.235, RSMo, the auditor's authorized agents are authorized to examine all books, accounts, records, reports, vouchers of any state agency or entity subject to audit, insofar as they are necessary to conduct an audit.

These statutes are specific to the auditor and her specific duties.¹ Because of these statutory and constitutional duties, the law only limits the SAO access in specific circumstances. For example, Section 105.955.17, RSMo, limits the SAO access to Ethics Commission documents related to documents pertaining to particular investigations. And Section 32.057.4, RSMo, limits the SAO on its use of tax data. In our review, no similar provisions exist as to the court records this office is requesting as a part of the sex offender registry audit.

Furthermore, under these statutory provisions and court operating rules, the State Auditor's Office is permitted access to more access than the general public. Under Court Operating Rule 2.05, "Dissemination of social security numbers and personal information appearing in court databases shall be restricted to court personnel and to those state or federal agencies to which the court has a statutory or constitutional duty to disclose." As such, the court operating rules allow OSCA to make available social security numbers and state identification numbers to the SAO.

With regard to the information obtained, the information remains confidential and cannot be discriminated outside of the Office of the State Auditor. Section 29.080, RSMo, makes it a

¹ The well-settled principle of statutory construction that a more specific statute controls over a general one should be noted here. *E.g., Dieser v. St. Anthony's Med. Ctr.*, 498 S.W.3d 419, 431 n.5 (Mo. banc 2016); *State ex rel. Taylor v. Russell*, 449 S.W.3d 380, 382 (Mo. banc 2014); *Turner v. Sch. Dist. of Clayton*, 318 S.W.3d 660, 668 (Mo. banc 2010). The State Auditor's authority is specific to her office and should control over general provisions related to other offices.

Appendix F

Office of State Courts Administrator Correspondence

felony for any examiner to disclose information they obtain during an audit to anyone other than the State Auditor. Only the final audit report is an open record. As provided by Section 29.200.17, all audit workpapers and other related supportive material are confidential and the SAO is only permitting to release information in the final report.

Sincerely,

A handwritten signature in black ink, which appears to read "R. Showers CPA", is positioned above the printed name.

Dear Mr. Showers:

The auditor's request to the State Judicial Records Committee (SJRC) to reconsider the committee's denial of release of confidential cases information was considered by committee at their July 27, 2018 meeting.

After careful consideration of your letter, the committee did not find the arguments persuasive. The decision to deny confidential cases still stands.

Please contact Catherine Zacharias at 573-526-8857 if you have any further questions.

September 5, 2018

Honorable Nicole R. Galloway
Missouri State Auditor
P.O. Box 869
Jefferson City, MO 65102

Dear Auditor Galloway:

The Patrol submits the following responses to the Sex Offender Registry (SOR) audit:

2.1 Ensure the SOR database is updated in accordance with internal policy to accurately reflect the compliance status of sex offenders.

Response:

2.1 The overall scope of this audit was focused mainly on the compliance of the registered offenders with the in-person registration requirements; more specifically, whether the offender reported to the Chief Law Enforcement Officer (CLEO) on the date scheduled to meet the statutorily required reporting timeframes. This is only one piece of the compliance requirements found in sections 589.400 to 589.425. An offender is technically non-compliant if a change occurs and the offender fails to report in-person within three days to the CLEO for any of the required reporting fields found in these statutory sections. Some of the examples that require this in-person reporting are change in residence, vehicles, employment, school, online identifiers, etc.

Current procedures provide for an automatic update of compliance status based on two separate registering provisions:

- For those offenders that are reported to the Missouri State Highway Patrol (MSHP) electronically, the automated process allows seven days past their regularly scheduled registration date before the compliance flag is switched to non-compliant to allow the CLEO to meet with the offender, review and submit the documents.
- For those offenders that are reported to the MSHP with manual reporting, the process allows thirty days past their regularly scheduled registration date before the compliance flag is switched to non-compliant to allow the CLEO to meet with the offender and review and submit the documents. Since it takes additional time for the MSHP to receive the records through the mail, the grace period is extended. This procedure prevents offenders from being labeled as non-compliant unfairly when they have met their statutory obligations. The Patrol realizes this process is not up-to-date in its procedure manual, but it is currently being updated.

Sex Offender Registration

Missouri State Highway Patrol Response

September 5, 2018
Honorable Nicole R. Galloway
-2

The process of systematically updating the compliance status remains a high priority, as well as a requirement of any new software procurement. This recommendation falls in line with the Patrol's ongoing goal of consistency in maintaining accurate information.

2.2 Obtain agreements with other state agencies that allow for batch data-matching to assist CLEOs to pursue noncompliant offenders.

Response:

2.2 The MSHP has established agreements with DLIR, DOR, and DHSS to utilize their data in a safe and secure manner as provided by statute and applicable security policies. As the data from any of these sources is only accurate for the time it is obtained, the usefulness of the information passed on to the CLEO without it being requested quickly dwindles. The need to ensure the protection of an individual's personal identifying information is a primary focus of the Patrol. Creating and sending batch files without a specific need or request would be a concern, but the Patrol is able and willing to respond to any requests that are made.

The Patrol worked diligently on securing an agreement with DHSS to allow batch data matches against the death records file which was approved on June 22, 2018. This batch file process is only utilized internally by MSHP staff to see if death certificates exist for those offenders who have been reported as deceased. While this batch process provides a faster response for potential matches against the registry, the true comparison must be completed manually by MSHP personnel to ensure exact matches.

Batch data matches may appear to be a useful tool, but there are limitations to their usefulness in the criminal justice field. The MSHP provides information to the CLEOs, upon request, on non-compliant and/or absconder offenders from DLIR and DOR, along with several other sources. If a CLEO requests the information on one or all of their offenders, it is promptly provided.

2.3 Ensure the new sex offender system is capable of providing data edit checks to limit the input of incorrect and/or inappropriate data.

Response:

The audit report indicated a lack of "adequate edit checks" with the current SOR database. The current software system does have edits that will not allow an incorrect date format or a non-numeric social security number (SSN). It should be noted that current procedures require the CLEO and offender to review the registration information before submission to the MSHP. The registration requires an offender to verify the information by way of a signature (electronic or manual reporting). Missouri statute requires a timeline for submission to the MSHP, some of which is still a manual process by a number of CLEOs. Until the manual information is received and entered electronically by MSHP staff, no edits can be applied.

The MSHP will ensure the technical requirements included in the procurement process for the new SOR system have the highest level of edit checks possible for all entry fields based on currently available commercial off-the-shelf software. Specifically related to this recommendation:

Appendix G
Sex Offender Registration
Missouri State Highway Patrol Response

September 5, 2018
Honorable Nicole R. Galloway
-3

- The MSHP will request specific edits to ensure a properly formatted SSN on electronic submissions.
- The MSHP will require specific edits on the electronic submission of future registration dates. These edits will limit the entry of dates exceeding thirty days outside the statutory registration intervals.

The addition of these automated edits will help reduce but may never be able to identify all the "human error" entries, either by the registering offender or the CLEO. Therefore, an emphasis on the identified accuracy issues will be addressed in future training sessions for personnel responsible for registering offenders.

Sincerely,

ERIC T. OLSON, Lieutenant Colonel
Acting Superintendent

Appendix G
Sex Offender Registration
Missouri State Highway Patrol Response

Auditor's Comment

- 2.1 The MSHP's response states the discrepancies in compliance status are due to current procedures not being aligned with internal policy. However, our analysis of registry data shows the difference in policy does not account for all deviations identified.

Office of Missouri State Auditor
Nicole Galloway, CPA

Temporary Assistance for Needy Families
(TANF) Data Analytics

CITIZENS SUMMARY

Findings in the audit of Temporary Assistance for Needy Families (TANF) Data Analytics

Out-of-State Transactions	The Department of Social Services (DSS) did not timely implement reviews of out-of-state TANF transactions, and could improve the effectiveness of such reviews. The DSS did not implement until January 2018 a recurring data analytic review to detect and investigate recipients whose out-of-state transactions approach or exceed 90 consecutive days. The DSS is not complying with state laws requiring the department to temporarily suspend benefit payments (pending a department investigation of the recipient's residency status) to the account of any recipient who does not make a TANF transaction in-state at least once every 90 days, and send a warning to any recipient who has gone 60 days without making an in-state transaction about possible suspension of benefits.
Timeliness of Prohibited Venues Reviews	The DSS's reviews of TANF spending at prohibited venues were not always completed timely during the audit period.
Establishment of Overpayment Claims	Upon detecting an incarcerated recipient and closing his/her case, the DSS did not always timely establish claims for known overpayments.
Vendor Contract	As discussed in the Supplemental Nutrition Assistance Program (SNAP) Data Analytics audit report (No. 2018-032), the DSS has not ensured services obtained from a key contract provide sufficient benefits to justify the amount paid for the services. The contract covers administration of the TANF and SNAP programs for the state.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Dr. Steve Corsi, Psy.D., Director
Department of Social Services
Jefferson City, Missouri

We have audited certain operations of the Department of Social Services, Temporary Assistance for Needy Families (TANF) program. This audit was conducted in fulfillment of our duties under Chapter 29, RSMo. The objectives of our audit were to:

1. Evaluate the use and effectiveness of data analytic techniques for preventing or detecting potential TANF program abuse or misuse.
2. Evaluate the department's efforts for complying with certain requirements of federal and state laws related to the TANF program.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) the need for improvement of data analytic techniques utilized by the department to prevent and detect potential program abuse or misuse within the TANF program and (2) noncompliance with state laws.

The accompanying Management Advisory Report presents our findings arising from our audit of TANF Data Analytics.

Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
Audit Manager:	Jeffrey Thelen, CPA, CISA
In-Charge Auditor:	Alex R. Prenger, M.S.Acct., CPA
Audit Staff:	Tyler Luebbert

TANF Data Analytics

Introduction

Background

On August 1, 1996, the United States Congress passed the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 to create the Temporary Assistance for Needy Families (TANF) program. The TANF program is designed to provide cash benefits to eligible low-income families for the household's children such as clothing, utilities and other services. Goals of the TANF program are to provide assistance to needy families so children can be cared for at home; reduce dependency of needy parents by promoting job preparation, work, and marriage; prevent and reduce the incidence of out-of-wedlock pregnancies; and encourage the formation and maintenance of two-parent families.

The U.S. Department of Health and Human Services (HHS) provides TANF funding to the states through a block grant. In Missouri, the Department of Social Services (DSS) Family Support Division (FSD) administers the TANF program, with the assistance of the Division of Legal Services (DLS), Division of Finance and Administrative Services (DFAS), and other DSS divisions. The FSD accepts applications, determines recipient eligibility, sets the amount of the monthly benefit, and monitors to ensure recipients are meeting program requirements. The DLS investigates allegations of public benefit fraud and misuse. The DLS and DFAS both receive and review monthly reports of TANF transaction data.

In calendar years 2016 and 2017, the state provided more than \$73.7 million in benefits to Missouri residents through the TANF program. The potential for abuse and fraud may be greater in such a large program unless appropriate agency controls are in place to help minimize these risks. The TANF program has been identified as susceptible to significant improper payments,¹ but is subject to statutory limitations that prohibit the HHS from requiring states to participate in a TANF improper payment measure.² As a result, the TANF program has not reported an improper payment error rate.

Both the state and federal government share responsibility for addressing TANF recipient fraud. The DSS is responsible for detecting, investigating, and prosecuting fraud, while the HHS is responsible for guiding and monitoring state activity.

According to the U.S. Government Accountability Office (GAO), reducing improper payments, including those that are the result of fraud, is critical to safeguarding funds and helping to achieve potential cost savings. As a result,

¹ Improper payments represent benefits distributed in error due to administrative as well as recipient errors, not all of which can be attributed to fraud.

² U.S. Department of Health & Human Services, Fiscal Year 2017 Annual Performance Plan and Report, February 2016, < https://www.hhs.gov/sites/default/files/fy2017-performance-plan_remediated.pdf>, accessed September 4, 2018.

TANF Data Analytics Introduction

leading practices highlighted by the GAO³ have increasingly focused on the need for program officials to take a strategic approach to managing improper payments and risks that include abuse and fraud. These leading practices can provide a guide for program managers to use when developing or enhancing efforts to combat fraud in a strategic, risk-based manner.

A critical strategic approach component involves implementing preventive and detective controls, including data analytics. Data analytics is a rapidly evolving field of information science that involves a variety of techniques to examine, analyze, and interpret large volumes of data, according to the GAO and other leading practitioners. Data analytics helps facilitate decision making by identifying patterns or trends, determining whether problems are widespread and systemic in nature, and evaluating program performance and outcomes.

Recent trends in data development and advanced analysis are creating innovation possibilities that carry the promise of far-reaching economic and societal benefits, according to the GAO. Areas such as health care and public benefit systems, may be improved or even transformed by innovations derived from new data analytics. Advanced analytics includes new tools for examining large amounts of data to uncover subtle or hidden patterns, correlations, and other insights, such as anomalies, trends, or potential abuse. The use of analytic results to improve actions or decisions is being transformed - improving decisions or actions and thereby extracting new economic and societal benefits, according to the GAO.

Eligibility

Initial eligibility and periodic recertifications are regulated by a number of complex factors that are beyond the scope of this audit. However, certain basic factors facilitate understanding the topics discussed in this report.

After a household is approved for benefits, it is required to complete an annual eligibility review (recertification). Neither initial applications nor recertifications require an in person interview.

New and recertifying households must meet certain criteria. Federal law requires a needy family must contain, at a minimum, a minor child living with a parent or caretaker relative (who acts as payee). State law requires the payees and children to be Missouri residents and U.S. citizens or qualified aliens. The DSS cannot provide assistance for a minor child who has been, or is expected by a parent or other caretaker relative, to be absent from the home for a period exceeding 90 consecutive days.

³ GAO, Report GAO-17-339SP, *Data Analytics to Address Fraud and Improper Payments*, March 2017, <<https://www.gao.gov/assets/690/683859.pdf>>, accessed September 4, 2018.

TANF Data Analytics Introduction

State law also establishes financial eligibility guidelines and participation requirements. Households must have gross income under 185 percent of a TANF-specific consolidated standard (for example, \$1,832 per month for a 4-person household). The TANF limit is consistently lower than the equivalent Supplemental Nutrition Assistance Program (SNAP) limit of 130 percent of the federal poverty level (for example, \$2,665 per month for a 4-person household). As a result, households eligible for TANF benefits are often also eligible for SNAP benefits.

DSS regulations require the benefit amount be based on financial need, subject to monthly maximums based on family size. For example, the maximum monthly benefit amount for a family of four is \$342.

Since program inception, federal law generally precluded TANF recipients from receiving benefits for more than 60 total months, whether consecutive or not. Federal law also allows states to have laws reducing the number of total months. Effective January 1, 2016, Section 208.040, RSMo, reduced the limit for Missouri recipients from 60 to 45 months. As a result, in 2016, many recipients lost eligibility. Recipients meeting certain conditions such as hardship can remain eligible and receive benefits for months that are excluded from the 45-month limit.

Recipients are required to report changes in their circumstances (such as residency, income, employment, household composition, and other factors) to the DSS within 10 days. However, as observed during audit test work and explained by DSS personnel, most recipients do not report such changes to the DSS, or do not do it timely. This weakness emphasizes the importance that the DSS use data analytics to detect and prevent program abuse or misuse.

Participation

The 185 percent consolidated standard used for TANF gross income eligibility determinations is also consistently lower than 100 percent of the federal poverty level. Therefore, all TANF recipients are living below the federal poverty line.

TANF Data Analytics Introduction

As shown in Figures 2 and 3, approximately 14,000 Missouri households, with 35,000 persons, participated in the TANF program during state fiscal year 2017, spending \$37 million in benefits.

Figure 2: Missouri TANF Recipients

TANF Data Analytics Introduction

The average benefit per Missouri recipient and household each state fiscal year from 2011 to 2017 is shown in Table 1.

Table 1: Missouri TANF Average Monthly Benefits

Year	Average Monthly Benefit per Recipient	Average Monthly Benefit per Household
2011	\$ 89.85	231.54
2012	88.80	229.12
2013	86.22	222.20
2014	84.95	218.23
2015	84.55	216.97
2016	83.54	209.09
2017	86.63	211.39

Source: SAO analysis of DSS-FSD annual data reports

Inappropriate transactions

Effective August 28, 2013, Section 208.024, RSMo, implemented federal requirements to prevent TANF assistance from being used in any electronic benefits transfer (EBT) transaction at any liquor store, casino, gambling casino, gaming establishment, or adult entertainment venue in which performers disrobe or perform in an unclothed state. The section further prohibited use of TANF assistance in any place for the purchase of alcoholic beverages, lottery tickets, tobacco products, or for any items primarily marketed for or used by adults 18 or older and are not in the best interests of the child or household. These changes generally reinforced existing state laws requiring TANF benefits be used for the benefit of the children in the household.

The August 28, 2013, effective date of Section 208.024, RSMo, was prior to both the December 2013 issuance of SAO Report No. 2013-143, *Temporary Assistance for Needy Families, Electronic Benefit Transfers* and a February 22, 2014, federal deadline to implement policies and practices to prevent inappropriate transactions. Near the conclusion of the previous SAO audit, the DSS was still in an early phase of developing measures to detect and prevent inappropriate transactions. Measures have since been established. By September 2013, the DSS created a recurring review to detect and follow up on inappropriate transactions. By January 2014, the DSS's contracted EBT vendor implemented a system control to preemptively block inappropriate transactions.

TANF Data Analytics Introduction

Measures established by the DSS have been effective at reducing inappropriate transactions. Shown in Table 2 are the amounts and counts of inappropriate transactions detected and followed up on by the DSS each year, since the review began in September 2013.

Table 2: Unallowable Activity Detected by DSS

Year	Amount of Inappropriate Transactions	Count of Inappropriate Transactions
2013*	\$ 84,936	1,032
2014	118,436	1,609
2015	61,016	685
2016	8,149	108
2017	3,363	39

*September 2013 through December 2013 activity only.

Source: SAO analysis of DSS reviews of inappropriate transactions

The amounts and counts listed in Table 2 declined with each passing year. This trend supports the long-term success of the review, which seeks to both detect inappropriate transactions and block them from reoccurring in the future. However, this trend should not be interpreted to mean that nearly all forms of inappropriate transactions have been blocked as of 2018. This is because factors outside of the DSS's control affect department personnel's ability to reasonably detect and review inappropriate spending. The most significant factor concerns cash withdrawals.

The majority of TANF recipients receive benefits on an EBT card, which allows access to benefits by purchasing items via a point-of-sale (POS) terminal at a merchant's location or by withdrawing cash at automated teller machines (ATMs) or POS terminals. Use of the EBT card generates transaction data; however, the data only includes the total amount of the cash withdrawn. It cannot be determined where the withdrawn cash was spent, or what was purchased. For example, cash could be obtained from POS terminals or ATMs in banks or other appropriate businesses, but ultimately be used to make purchases of inappropriate products or services in other locations. Once the benefits are converted to cash, tracking usage is not possible.

TANF Data Analytics Introduction

TANF benefits spending by source during the 2 years ended December 31, 2017, is shown in Table 3. Cash withdrawals at ATMs and POS terminals represent roughly 25 percent of transactions, but 60 percent of benefits spent. These percentages would likely be higher if POS cash purchases with cash back were included; however, the data for this transaction type cannot be split between cash purchase and cash back portions.

Table 3: TANF Benefits Spending by Source

Source	Type	Amount of Transactions	Count of Transactions
ATM	Cash withdrawal	\$ 45,351,406	341,201
POS	Cash purchase	13,494,062	736,575
POS	Cash purchase with cash back	15,876,507	212,530
POS	Cash withdrawal	1,424,683	15,633
FEE	Service fee	104,273	122,725
	Total	\$ 76,250,931	1,428,664

Source: SAO analysis of TANF transaction data

Regarding service fees, the DSS contracts with a vendor for EBT transaction purchasing. The EBT vendor charges each TANF recipient service fees of \$.85 (or the remaining balance if less than \$.85) per ATM withdrawal after the first ATM withdrawal of the month, and per POS cash withdrawal only transaction.

In addition, TANF recipients may choose to have benefits directly deposited into a personal bank account instead of using an EBT card. During the audit period, less than one percent of recipients received benefits totaling roughly \$949,000 via bank deposit. However, bank deposit usage does not generate transaction data, thus the DSS cannot review for inappropriate transactions (or any other potential purpose).

Out-of-state transactions

Out-of-state transactions covering an extended period of time may indicate the recipients are no longer Missouri residents. If the DSS proves non-residency, the recipients are ineligible to continue receiving TANF benefits. However, proving non-residency requires case-by-case research. A DSS report titled *Overview of Temporary Assistance for Needy Families*⁶ includes the following information regarding out-of-state usage of TANF benefits:

⁶ *Overview of Temporary Assistance for Needy Families*, August 2015, <<https://mydss.mo.gov/sites/mydss/files/temporary-assistance-overview.pdf>>, accessed January 18, 2018.

TANF Data Analytics Introduction

Benefits may be used out of state; however, there are restrictions on the length of time a [Temporary Assistance] participant may be out of state using their EBT card. . . . There are possible reasons a household may be using benefits in another state: it is more convenient and/or cost effective to shop in a bordering state; military families are receiving benefits in Missouri are transferred to another state; there are events such as natural disasters, domestic violence, divorce, etc. which make it necessary to seek shelter from out-of-state family members or friends; the family moved to find employment opportunities; the family is seeking medical care or in-home care from family members, or a household member is providing temporary care for aging parents or sick family members.

While reviewing out-of-state transactions, we found several situations indicative of reasonable border state activity. Such situations featured recipients who were Missouri residents living near the border and transacting in a border state within 30 miles of their homes. Such situations are an example of how additional data analytics considerations are necessary to successfully distinguish proper and improper activity.

In January 2018, the DSS implemented a recurring data analytic review to detect and follow up on recipients whose out-of-state transactions approach or exceed 90 consecutive days.

Investigations

The DSS-DLS Welfare Investigation Unit (WIU) investigates fraud and abuse committed by public assistance recipients. The WIU consists of approximately 18 investigators tasked with investigating alleged program violations for all welfare programs, including potential TANF benefit fraud, waste, and abuse. After investigation, claims can be established against the recipients involved. Claims are generally categorized as either agency errors or non-agency errors (which may be intentional violations or unintentional errors on the recipient's part).

TANF Data Analytics Introduction

The number of TANF claims established each year between 2011 and 2017, and the dollar values of those claims, are presented in Figures 6 and 7.

Figure 6: Total TANF Claims Established by Type

Figure 7: Total TANF Claims Established (and Outstanding) by Dollar Value

Source: SAO analysis of DSS claims accounting restitution system data

TANF Data Analytics Introduction

Scope and Methodology

The scope of our audit included evaluating (1) DSS management's approach to data analytics for preventing and detecting potential TANF program abuse, (2) policies and procedures, and (3) other management functions and compliance requirements in place during the period January 2016 to December 2017.

Our methodology included reviewing written policies and procedures, and interviewing various DSS personnel. We obtained an understanding of the applicable controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violation of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We obtained data files containing TANF transactions and recipient records⁷ for the period January 2016 through December 2017 from the DSS and the Office of Administration - Information Technology Services Division (ITSD). While the DSS owns this data, it is collected and managed by the contractor that operates the TANF program for the state. The contractor provides archived transaction data to the ITSD, and additional transaction data to the DSS. In addition, we obtained from the DSS other TANF data extracted from the Family Assistance Management Information System to assess other recipient and household details. To determine the reliability of TANF data, we evaluated the materiality of the data to our audit objective and assessed the data by various means, including (1) interviewing knowledgeable DSS officials, (2) reviewing existing information about the data and the system that produced them, (3) performing certain analytic techniques, and (4) reviewing internal controls. We concluded the data were sufficiently reliable for the purposes of our audit work.

We obtained a listing of deaths recorded in the state for the period 1995 to 2017 from the Missouri Department of Health and Senior Services (DHSS). We matched these records to TANF recipient records to determine if any deceased recipient cases continued to receive and spend program benefits after the recipient's death.⁸ Although we used computer-processed data from

⁷ The recipient records included records for Electronic Benefits Transfer (EBT) cardholders and did not include records for household members who do not have an EBT card.

⁸ Acknowledgement: The data used in this document/presentation was acquired from the Missouri DHSS. The contents of this document including data analysis, interpretation or

TANF Data Analytics Introduction

the DHSS for our audit work, we did not rely on the results of any processes performed by the DHSS system in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objectives.

We obtained a listing of individuals incarcerated by the state during the period January 2016 through December 2017 from the Missouri Department of Corrections (DOC). We matched those records to TANF recipient records to determine if incarcerated recipient cases continued to receive and spend benefits during the recipient's incarceration. Although we used computer-processed data from the DOC for our audit work, we did not rely on the results of any processes performed by the DOC system in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objectives.

We based our evaluation on accepted state, federal, and international standards and best practices related to information technology security controls from the following sources:

- National Institute of Standards and Technology (NIST)
- U.S. Government Accountability Office (GAO)
- ISACA (previously known as the Information Systems Audit and Control Association)

conclusions are solely the responsibility of the authors and do not represent the official views of DHSS.

TANF Data Analytics

Management Advisory Report

State Auditor's Findings

1. Out-of-State Transactions

The Department of Social Services (DSS) did not timely implement reviews of out-of-state transactions, and could improve the effectiveness of such reviews. In addition, the DSS is not complying with state laws to suspend recipient benefits following consistent prolonged out-of-state activity.

1.1 Out-of-state transaction reviews

State law⁹ effective August 28, 2014, requires the DSS to temporarily suspend a recipient's participation in the Temporary Assistance for Needy Families (TANF) program if the recipient spends TANF benefits exclusively outside the state for a period of 90 consecutive days. However, the DSS did not implement until January 2018 a recurring data analytic review to detect and investigate recipients whose out-of-state transactions approach or exceed 90 consecutive days. The DSS's first review in January 2018 covered transactions occurring from October 2017 through December 2017.

Consistent or exclusive purchase patterns outside the state of Missouri may be indicative of program abuse or misuse, if investigations determine recipients no longer meet residency requirements. Similar situations were identified in SAO Report No. 2013-143, *Temporary Assistance for Needy Families, Electronic Benefit Transfers*.

We reviewed all recipient transaction records for the audit period and found 595 recipients who, at some point during the audit period, transacted exclusively outside the state for a period of more than 90 consecutive days. Of the 595 recipient cases detected, we judgmentally selected 30 for a detailed review. We identified \$10,730 in preventable payments related to 9 cases as shown in Table 4. These payments represent situations where each recipient's circumstances indicated he/she was no longer residing in Missouri by the 91st consecutive day of out-of-state activity, but the DSS did not detect such instances and continued providing benefits.

⁹ Section 208.024.3, RSMo, amendment effective August 28, 2014.

TANF Data Analytics
Management Advisory Report - State Auditor's Findings

Table 4: Preventable Payments

Recipient	Preventable Payments	Preventable Months Paid
01	\$ 5,275	20
02	1,314	5
03	702	3
04	388	1
05	936	4
06	1,088	8
07	584	3
08	171	1
09	272	2

Source: SAO analysis of TANF transaction data

All 9 cases were closed by the time of our review, and relate to transaction activity prior to October 2017. We found 5 of 9 cases were closed through reactive controls related to out-of-state activity, such as undeliverable mail and an interstate data match. While these are crucial tools, these cases could have been detected more timely, and associated payments could have been prevented, if the DSS had implemented its review earlier. Following our review, the DSS took initial steps to establish claims for all 9 cases.

The DSS's January 2018 review covered transactions occurring from October 2017 through December 2017. This review successfully detected and investigated 24 recipients. However, certain aspects of the DSS's implemented review could be improved to increase effectiveness. For example, to detect potential recipients for further review, the DSS must first manually arrange and analyze transactions, and only a limited period of data is used. This manual process could be automated to enable more effective analyses under an expanded period.

While federal regulations allow TANF recipients to use their EBT cards out-of-state, state law requires the payees and children to be Missouri residents. To help prevent TANF abuse and misuse and to target cases to review, the DSS should continue improving the effectiveness of data analytics for identifying cases where TANF recipients appear to no longer be state residents.

1.2 Not complying with state laws

The DSS is not complying with state laws¹⁰ requiring the department to temporarily suspend benefit payments (pending a department investigation of

¹⁰ Sections 208.024.3 and 208.024.4, RSMo, amendments effective August 28, 2014.

TANF Data Analytics Management Advisory Report - State Auditor's Findings

the recipient's residency status) to the account of any recipient who does not make a TANF transaction in-state at least once every 90 days, and to send a warning to any recipient who has gone 60 days without making an in-state transaction about possible suspension of benefits.

The DSS is not complying due to department officials' interpretations of these laws. The laws cover both the TANF program and Supplemental Nutrition Assistance Program (SNAP), and the officials indicated they believe if the department is to comply with the laws, that must occur for both programs. As discussed in the SAO's audit of the SNAP program,¹¹ the DSS cannot temporarily suspend SNAP benefits, because doing so conflicts with the program's federal regulations. As a result, DSS officials indicated they are not attempting compliance for either program. In addition, existing EBT card controls only allow the DSS to suspend a recipient's card, and subsequently all TANF and SNAP benefits on the card. The DSS cannot limit suspensions to TANF or SNAP benefits only.

We contacted program officials with the U.S. Department of Health and Human Services (HHS) who explained they were not aware of any states suspending TANF benefits. They indicated the HHS does not prohibit suspending benefits, but expressed concern that depending on how the state implemented the suspensions there could be concerns with overall federal compliance. They also indicated the state laws are not clear regarding how suspensions of benefits are to be implemented.

Revising the state laws regarding temporary suspension of benefits is needed to eliminate any provisions that conflict with federal regulations and clarify issues that are unclear. This could potentially be done by requiring redetermination of a recipient's benefit eligibility when established criteria occurs.

Recommendations

The DSS:

- 1.1 Continue improving data analytic processes to more effectively identify and review recipients who spend the majority of their TANF benefits exclusively outside of the state to ensure appropriate use of TANF benefits.
- 1.2 Work with the General Assembly to revise Section 208.024, RSMo, to accomplish the intent of the law while complying with federal regulations.

¹¹ SAO, Report No. 2018-032, *Supplemental Nutrition Assistance Program (SNAP) Data Analytics Program*, issued June 2018.

TANF Data Analytics
Management Advisory Report - State Auditor's Findings

Auditee's Response

1.1 *The DSS will implement a process for identifying and taking action on cases with exclusive usage out of state by sending the recipient a request for contact (RFC) and will take action to either close the case or verify the recipient is still residing within the state of Missouri. If the household does not respond to the RFC or responds but refuses to provide sufficient information to clarify its circumstances, the state agency will issue a notice of adverse action as described in 45 CFR Section 205.10(4)(i)(A). If the household responds to the RFC with sufficient information, the DSS will act on the changes.*

1.2 *The DSS continues to review processes and institute appropriate program improvements. The DSS has recently developed in-house data analytic queries and processes designed to capture EBT transaction patterns indicative of misuse.*

In addition, the DSS will review the state statute to determine if changes are needed to align the statute with the federal regulation.

2. Timeliness of Prohibited Venue Reviews

The DSS's reviews of TANF spending at prohibited venues were not always completed timely during the audit period. As a result, some venues were not blocked timely to prevent continued TANF spending.

Effective August 28, 2013, Section 208.024, RSMo, provides that TANF benefits cannot be used in certain prohibited stores including, for example, liquor stores, casinos, or gaming establishments, or in any place for the purchase of alcoholic beverages, lottery tickets, or tobacco products or for any item the DSS determines is not in the best interests of the child or household.

From September 2013 to September 2016, DSS personnel performed monthly reviews to detect and block TANF spending at prohibited venues. Venues included both stores and certain automated teller machines (ATMs).

In October 2016, the DSS suspended the reviews due to significant staff turnover and also to reassess the efficiency and effectiveness of the reviews. At that time, the DSS's goal was to complete the reviews on a quarterly basis. However, DSS personnel did not complete reviews for the four quarters from October 2016 through October 2017 until early 2018.

The reviews for those quarters detected approximately 100 prohibited venues (mostly ATMs). However, because these venues were not blocked until early 2018, TANF transactions continued at those locations.

From October 1, 2016, through December 31, 2017, approximately 1,400 transactions totaling approximately \$62,400 occurred at these venues. Some of these transactions would have been blocked, if the review process had not been suspended. For example, the DSS used October 2016 transaction data to

TANF Data Analytics Management Advisory Report - State Auditor's Findings

identify an ATM to block in early 2018. If the DSS had timely implemented the quarterly reviews, the ATM would likely have been blocked by January 2017. However, due to the reviews being suspended, 114 transactions totaling \$7,635 occurred at this ATM from February 2017 through December 2017.

Without timely review, the effectiveness of the DSS's established controls to detect and block TANF spending at prohibited venues are diminished.

Recommendation

The DSS ensure reviews of TANF spending at prohibited venues, and resulting updates to block venues, are completed timely.

Auditee's Response

These reviews are currently being conducted quarterly.

3. Establishment of Overpayment Claims

Upon detecting an incarcerated recipient and closing his/her case, the DSS did not always timely establish claims for known overpayments. This weakness reduces opportunities to recover overpayments if the recipient's case is later reopened.

We compared records of recipients receiving TANF benefits to records of individuals in the custody of the Missouri Department of Corrections (DOC). We found 98 individuals who received TANF benefits but were incarcerated during a portion of the January 2016 to December 2017 period. We judgmentally selected 10 of these cases for a detailed review. Of these 10 cases, claims totaling \$7,020 were not entered for 8 cases. DSS personnel had established claims prior to our review for the other 2 cases. Following our review, the DSS took initial steps to establish claims for the 8 cases.

The DSS detects incarcerated recipients through a data match run quarterly for all recipients and daily for new and recertifying households. The data match's success is dependent on whether external entities timely make available the underlying incarceration data used to run the data match. Delays in notification about a recipient's incarceration status will result in payment of potentially ineligible benefits. Per DSS policy and guidance, DSS personnel establish claims to recover benefits from households due to ineligibility (possibly due to the household's failure to report changes to circumstances such as residency, income, employment, household composition, and other factors), and also due to inappropriate use of benefits, or DSS error.

An active (outstanding) claim for a given recipient does not affect his/her future eligibility under the TANF program, or prevent a case from being reopened. However, it automatically reduces future monthly benefit payments for the household by 10 percent, to gradually recover and satisfy the claim. For one of the cases reviewed where a claim had not been established, the recipient was incarcerated, and received ineligible benefits before the DSS could identify the incarceration and close the case. Sometime

TANF Data Analytics Management Advisory Report - State Auditor's Findings

after the recipient was released, the DSS reopened the case; however, because no claim was established, no payments made since the case was reopened were subject to the 10 percent recovery.

Our review found that once DSS personnel detected an incarcerated recipient, they acted timely to close the case and prevent new payments. However, by not establishing claims timely, the department has reduced opportunities to recover overpayments occurring between the client's incarceration and the department's identification of this status.

Recommendation

The DSS ensure that applicable claims are established timely upon detecting an incarcerated recipient and closing the case, in compliance with DSS policy and guidance.

Auditee's Response

The DSS continues to review processes and institute appropriate program improvements. The DSS will issue a memo reminding staff of the process to enter a claim and the importance of correct and timely entries of claims.

4. Vendor Contract

As discussed in the SNAP audit report,¹² the DSS has not ensured services obtained from a key contract provide sufficient benefits to justify the amount paid for the services. In addition, DSS investigators did not review, on behalf of the TANF program, any system alerts associated with the obtained services.

The DSS entered into a contract with a third-party provider in June 2011 to administer the TANF and SNAP programs for the state. The vendor's responsibilities include producing and distributing EBT cards, processing (adding) benefit authorizations to the cards, reimbursing retailers for benefits redeemed upon completion of transactions, and providing related support.

To implement requirements established under Section 208.024, RSMo, to prevent TANF activity at prohibited venues (see Management Advisory Report finding number 2), the DSS amended its contract with the vendor to add an additional system that allows prohibited purchases to be blocked.

In addition to blocking purchases at certain locations, the system allowed the DSS to add functionality capable of notifying DSS investigators of potentially suspicious benefit usage activity. Each time a specific activity pattern is detected, the system generates an "alert" that is sent to DSS investigators for determination if the activity might indicate TANF and SNAP abuse or fraud, requiring additional investigation.

¹² SAO, Report No. 2018-032, *Supplemental Nutrition Assistance Program (SNAP) Data Analytics Program*, issued June 2018.

TANF Data Analytics Management Advisory Report - State Auditor's Findings

According to the January 2014 contract amendment adding this additional functionality, the DSS pays the contractor \$0.001 (one-tenth of one cent) per transaction processed in the system, plus an additional charge ranging from \$1.00 to \$5.00 per "alert" generated (varies based on the criteria the alert triggered on). The DSS also agreed to a minimum charge, regardless of actual activity, of \$10,000 each month for these services. The state averages approximately 90,000 TANF transactions and 4.5 million SNAP transactions, or \$4,590, per month in per-transaction fees against this \$10,000 minimum payment. The remaining \$5,410 is available to pay the per-alert charges or other associated costs of the contract amendment.

DSS officials could not quantify or provide support indicating what benefits the DSS receives for the contracted services. They did not provide documentation reflecting the actual amount of services received, including the number of monthly transactions assessed the per-transaction charge or the number and dollar value of the per-alert charges. According to a DSS official, the contractor invoices the department \$10,000 a month for the contracted services but the official could not provide any documentation to support benefits or services received. DSS staff indicated the contractor has never billed the DSS an amount greater than \$10,000. As a result, the DSS has not used the full allotment of services for which it is paying. The contract, as amended, was renewed in its entirety without changes to this service in May 2016, June 2017, and June 2018.

During the 2 years ended December 31, 2017, the contractor's system recorded about 151,010 alerts. The majority of these alerts concern out-of-state activity or inappropriate transactions for the TANF and SNAP programs. DSS investigators did not review and investigate any of the alerts associated with the TANF program. They indicated the alerts are not reviewed due to a shortage of resources, and also because the alerts are not in an easy-to-use format and require significant manual processing to review. In addition, the DSS has established separate TANF data analytic procedures to detect situations covered by the alerts.

Without actively monitoring the contract terms to verify usage and benefits received, the DSS is at risk of contracting for more services than needed and not using taxpayer dollars in an effective manner.

Recommendation

The DSS formally evaluate the contract terms for system services to ensure the costs are appropriate for the benefits received.

Auditee's Response

The DSS is in the process of developing an RFP to be issued in 2020 that will include data improvements. The DSS continues to review processes and institute appropriate program improvements.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 11 political subdivisions required to file a financial report by August 31, 2018, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in August 2018, after their filing deadline. The filing status for these 117 entities is presented in summary on page 3 and by individual entity in Appendix B-D.

Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings

August 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the State Auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, effective August 28, 2017, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 11 political subdivisions, other than cities, towns, and villages, with a fiscal year end of February 28, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 11 political subdivisions, 7 filed an annual financial report by August 31, 2018.

This report also includes the filing status for 117 political subdivisions, other than cities, towns, and villages, that filed their financial report in August 2018, after their filing deadline.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by August 31, 2018, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 5 cities and 4 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in August 2018, after their filing deadline. The filing status for these 24 cities, 1 town, and 18 villages is presented in summary on pages 4 and by individual entity in Appendixes B to C.

Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Municipal Court and Revenue Filings

August 2018

Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at <http://auditor.mo.gov>.

Section 105.145, RSMo, effective August 28, 2017, requires the State Auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of \$500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than \$5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities operating a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that operates a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 5 cities and 4 villages with a fiscal year end of February 28, 2018, whose financial reports, addendums, or certifications were due by August 31, 2018. Of the 9 cities and villages required to file an annual financial report, 6 filed the annual financial report timely. Of the 3 cities and villages required to file an addendum and certification, 2 filed an addendum and none filed a certification timely.

Monthly Report on Municipal Court and Revenue Filings
August 2018
Executive Summary

This report includes the filing status for 24 cities, 1 town, and 18 villages that filed at least one of the items (financial report, addendum, or certification) in August 2018, after their filing deadline. Of these entities, 40 filed an annual financial report, 4 filed an addendum, and 1 filed a certification.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the County Commission
and
Officeholders of Clinton County, Missouri

The Office of the State Auditor is responsible under Section 29.230, RSMo, for auditing certain operations of Clinton County, and issues a separate report on that audit. In addition, the Office of the State Auditor has contracted for an audit of the county's financial statements for the 2 years ended December 31, 2017, through the state Office of Administration, Division of Purchasing and Materials Management. A copy of this audit, performed by McBride, Lock & Associates, LLC, Certified Public Accountants, is attached.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Clinton County, Missouri

Report on the Financial Statements

We have audited the accompanying financial statements of Clinton County, Missouri, which comprise the Statement of Receipts, Disbursements and Changes in Cash – All Governmental Funds – Regulatory Basis and the Comparative Schedules of Receipts, Disbursements and Changes in Cash – Budget and Actual – Regulatory Basis – All Governmental Funds as of and for the years ended December 31, 2017 and 2016, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles prescribed or permitted by Missouri law. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1, the financial statements are prepared by Clinton County, Missouri on the basis of the financial reporting provisions prescribed or permitted by Missouri Law, which is a basis of accounting other than accounting principles generally accepted in the United States of America.

The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the “Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles” paragraph, the financial statements referred above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Clinton County, Missouri, as of December 31, 2017 and 2016, or the changes in financial position, or cash flows thereof for the years then ended.

Unmodified Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of each fund of Clinton County, Missouri, as of December 31, 2017 and 2016, and their respective cash receipts and disbursements, and budgetary results for the years then ended, in accordance with the financial reporting provisions prescribed or permitted by Missouri Law as described in Note 1.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we also have issued our report dated August 13, 2018, on our consideration of Clinton County, Missouri’s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the County’s internal control over financial reporting and compliance.

The accompanying Notes to the Financial Statements are an integral part of these statements.

CLINTON COUNTY, MISSOURI
NOTES TO THE FINANCIAL STATEMENTS
DECEMBER 31, 2017 and 2016

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Clinton County, Missouri ("County") is governed by a three-member board of commissioners. In addition to the three board members, there are nine elected Constitutional Officers: Assessor, Circuit Clerk-Recorder, Collector, Coroner, County Clerk, Prosecuting Attorney, Public Administrator, Sheriff, and Treasurer.

As discussed further in Note 1, these financial statements are presented using accounting practices prescribed or permitted by Missouri Law, which differ from accounting principles generally accepted in the United States of America, which would include all relevant Government Accounting Standards Board (GASB) pronouncements. The differences include use of a prescribed definition of the reporting entity and the cash basis of accounting.

A. Reporting Entity

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, economic development, social and human services, and cultural and recreation services.

The financial statements referred to above include the primary government of Clinton County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise the County's legal entity. The financial statements also include the A.R. and Eleanor Alexander Memorial Fund which is controlled by the Senate Bill 40 Board.

Certain elected County officials, particularly the Collector and Treasurer, collect and hold monies in a trustee capacity as an agent of individuals, taxing units, or other governments. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements.

B. Basis of Presentation

Governmental Funds - Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. A fund is considered a separate accounting entity with self-balancing accounts that comprise its assets, liabilities, net assets, revenues/receipts and expenditures/disbursements. The County's funds are governmental funds. Governmental funds are those through which most governmental functions are financed. The County's expendable financial resources are accounted for through governmental funds.

C. Basis of Accounting

The financial statements are prepared on the cash basis of accounting; accordingly, amounts are recognized when received or disbursed in cash. This basis of accounting differs from accounting principles generally accepted in the United States of America. Those principles require revenues to be recognized when they become available and measurable or when they

are earned, and expenditures or expenses to be recognized when the related liabilities are incurred.

D. Budgets and Budgetary Accounting

The County follows these procedures in establishing the budgetary data reflected in the financial statements:

1. In accordance with Chapter 50 RSMo, the County's policy is to adopt a budget for each governmental fund.
2. On or before the second Monday in January, each elected officer and department director will transmit to the County Commission and County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.
3. The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures, on the cash basis of accounting, for all budgeted funds. Budgeting of appropriations is based upon an estimated fund balance at the beginning of the year as well as estimated revenues to be received.
4. State law requires that, at the individual fund level, budgeted expenditures not exceed budgeted revenues plus anticipated beginning fund balance. However, the County budgeted a negative fund balance (\$2) for the General Purpose Law Enforcement Fund in 2016.
5. A public hearing is conducted to obtain public comment on the budget. Prior to its approval by the County Commission, the budget document is available for public inspection, which usually takes place the third and fourth weeks of January.
6. Prior to February 1, the budget is legally enacted by a vote of the County Commission.
7. Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by a formal vote of the Commission. Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year.
8. Budgets are prepared and adopted on the cash basis of accounting.
9. Adoption of a formal budget is required by law. However, the County did not adopt a formal budget for the following funds: Clinton County Great Northwest Days and Local Law Enforcement Block Grant in 2017; and Health Reimbursement and Clinton County Great Northwest Days in 2016.

10. Section 50.740 RSMo prohibits expenditures in excess of the approved budgets. Actual expenditures exceeded budgeted amounts for the following funds:

	<u>2017</u>	<u>2016</u>
General Revenue	✓	N/A
Sheriff's Civil Fees	✓	N/A
General Purpose Law Enforcement	✓	N/A
Inmate Prisoner Debt	✓	N/A
Road & Bridge Escrow	✓	N/A
Recorder User Tax	✓	N/A
Prosecuting Attorney Administrative Handlin	✓	N/A
Collector's Tax Maintenance	✓	✓
P.O.S.T.	N/A	✓
Local Emergency Planning Commission	N/A	✓
Emergency Management	N/A	✓

Also, the actual expenditures of the following funds exceeded budgetary authority to the extent that formal budgets were not adopted: Health Reimbursement and Clinton County Great Northwest Days in 2016; and Clinton County Great Northwest Days in 2017.

- E. Property taxes are based on the voter-approved tax levy applied to the real and personal assessed property values. Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuations of the tangible taxable property, included within the County's boundaries for the calendar year 2017 and 2016, for purposes of taxation were:

	<u>2017</u>	<u>2016</u>
Real Estate	\$ 203,047,291	\$ 205,029,967
Personal Property	52,584,157	50,689,128
Railroad and Utilities	42,628,837	37,599,175
Total	<u>\$ 298,260,285</u>	<u>\$ 293,318,270</u>

For calendar years 2017 and 2016, the County Commission approved a tax levy per \$100 of assessed valuation of tangible taxable property as follows:

	<u>2017</u>	<u>2016</u>
General Revenue	\$ 0.2475	\$ 0.2552
Common Road District	0.2787	0.2787
Special Road & Bridge	0.3500	0.3500
Senate Bill 40 Board	0.0922	0.0922

The Special Road & Bridge Fund receives both the Common Road District and Special Road & Bridge levies. The County also receives 20% of taxes levied and collected by the Cameron and Plattsburg Special Road Districts.

F. Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer funds are pooled and invested to the extent possible. Interest earned from these balances is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents may include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, purchased at a price at or below par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash and investment balances are presented in Note 2.

G. Interfund Activity

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing. Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

2. CASH AND INVESTMENTS

The County maintains a cash and temporary investment pool that is available for use by all funds. Each fund's portion of this pool is displayed on the financial statements within the "Cash and Investments" caption. Cash includes deposits and short-term investments with maturities that are less than ninety days. Investments consist of certificates of deposit with original maturities that are greater than ninety days.

Custodial Credit Risk - Deposits – Custodial credit risk is the risk that in the event of a bank failure, a government's deposits may not be returned to it. Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits. At December 31, 2017 and 2016, the carrying amounts of the County's deposits were \$2,620,037 and \$3,888,505, respectively, and the bank balances were \$3,272,944 and \$5,126,038, respectively. Of the bank balances, \$501,809 for December 31, 2017 and \$507,982 for December 31, 2016, were covered by federal depository insurance. The remainder of the balances at December 31, 2017 and December 31, 2016 were covered by collateral held at the Federal Reserve Bank and the County's safekeeping bank agent in the County's name or by a line of credit held by the County or by its agent in the County's name.

At December 31, 2017 and 2016, the County Collector held, in addition to the cash and investments listed above, cash representing collections of property taxes on behalf of various taxing districts in

the County. Tax collections on deposit amounted to \$11,354,176 and \$2,596,536 at December 31, 2017 and 2016, respectively. The County Collector's deposits were covered by federal depository insurance of \$250,000 as of December 31, 2017 and 2016. The remainder of the balances at December 31, 2017 and December 31, 2016 were covered by a collateral held at the Federal Reserve Bank and the County's safekeeping bank agent in the County's name or by a line of credit held by the County or by its agent in the County's name.

3. COUNTY EMPLOYEES' RETIREMENT PLANS

A. Missouri Local Government Employees Retirement System (LAGERS)

1) Plan Description

Clinton County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries. LAGERS was created and is governed by statute, Section RSMo 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401 (a) and is tax exempt.

The Missouri Local Government Employees Retirement System issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, Missouri 65102 or by calling 1-800-447-4334, or by the following website, www.molagers.org.

2) Pension Benefits

Benefits are available to all full-time employees working in a LAGERS covered department. Benefits vest when an employee earns five years (60 months) of service credit in the system. Normal retirement age is 60 (General) or 55 (Police), and early retirement is 55 (General) and 50 (Police). Benefits are paid out using a formula that is based on the employee's final average salary and amount of credited service time.

3) Funding Policy

Full-time employees of Clinton County contribute 4% of their gross compensation to LAGERS. The June 30th statutorily required contribution rates were 1.4% and 2.2% (General), and 4.1% and 3.1% (Police), of annual covered payroll in 2017 and 2016, respectively. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute. For the years ended December 31, 2017 and 2016, the County contributed \$107,126 and \$109,732 to LAGERS.

4) Funding Status

As of June 30, 2017, the actuarial value of plan assets exceeded the accrued liabilities of the plan by \$637,430 for the General division and \$129,580 for the Police division. As of June 30, 2016, the actuarial value of plan assets exceeded the accrued liabilities of the plan by \$373,461 for the General division and \$42,008 for the Police division. These net pension assets are not recognized in the cash basis financial statements of the County.

B. County Employees' Retirement Fund (CERF)

The County Employees' Retirement Fund was established by the State of Missouri to provide pension benefits for County officials and employees.

1) Plan Description

The Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elective or appointed officer or employee whose performance requires the actual performance of duties during not less than one thousand (1,000) hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under Sections 56.800 to 56.840, RSMo, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under Sections 57.949 to 57.997, RSMo and certain personnel not defined as an employee per Section 50.1000(8), RSMo. The Fund was created by an act of the legislature and was effective August 28, 1994.

The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

2) Pension Benefits

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of \$10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement is at age fifty-five. Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, MO 65101, by calling 1-877-632-2373, or by the following website, www.mocerf.org.

3) Funding Policy

In accordance with State Statutes, the Plan is partially funded through various fees collected by counties and remitted to the CERF. Further, all participants hired on or after February 24, 2002 are required to contribute an additional 4% of their gross compensation to CERF, starting January 1, 2003. An active LAGERS participant who was employed with the County prior to February 24, 2002, is not required to make contributions. The County has elected not to make contributions on behalf of employees. During 2017 and 2016, the County collected and remitted to CERF employee withholdings and fees collected of \$69,854 and \$64,141, respectively, for the years then ended.

C. Prosecuting Attorney Retirement Fund

In accordance with state statute Section 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys and Circuit Attorney Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County contributed \$3,366 and \$2,618, respectively, for the years ended December 31, 2017 and 2016.

4. POST EMPLOYMENT BENEFITS

The County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by the County.

5. CLAIMS, COMMITMENT AND CONTINGENCIES

A. Compensated Absences

The County provides full-time employees accrued vacation time as follows: one week per year after one year of continuous service; two weeks per year after two years of continuous service; three weeks per year after 10 years of continuous service; and four weeks per year after 20 years of continuous service. Vacation time must be used during the anniversary year in which it is earned, with the exception of Sheriff's Department employees, who are allowed to carryover up to 200 hours. Full-time employees accrue 10 days of sick leave per year, and up to 10 days may be carried over from one year to the next, up to a maximum of 20 days. Employees are compensated for unused vacation time at termination, but are not compensated for unused sick time.

B. Federal and State Assisted Programs

The County has received proceeds from several federal and state grants. Periodic audits of these grants, when performed, could result in the disallowance of certain costs. Accordingly, such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds, if determined necessary, will be immaterial and, therefore, no provision has been made in the accompanying financial statements for the potential refund of grant monies.

C. Litigation

The County was involved in pending litigation as of December 31, 2017. The extent of the liability, if any, cannot be determined at this time.

6. RISK MANAGEMENT

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years. The County maintains general liability, public officials' errors and omissions and employment-related liability coverage through commercial insurance companies with limits of \$4,000,000 aggregate, and \$2,000,000 per occurrence.

The County is a member of the Missouri Association of Counties Self-Insured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to \$2,000,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

7. LONG TERM DEBT

The County entered into a loan with the Missouri Department of Natural Resources on November 6, 2008, for \$183,820 to finance various energy savings projects. The loan will be repaid with semi-annual payments of \$9,664 through August 1, 2020, and one payment of \$1,377 on February 1, 2021, which includes interest of 4.15%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	\$ 17,213	\$ 2,114	\$ 19,327
2019	17,935	1,392	19,327
2020	18,687	640	19,327
2021	1,349	28	1,377
Totals	<u>\$ 55,184</u>	<u>\$ 4,174</u>	<u>\$ 59,358</u>

On November 28, 2017, the County entered into a \$121,000 capital lease through John Deere Financial to purchase a motor grader for the Road & Bridge Department. The lease calls for two payments of \$64,044 to be paid February 2, 2019 and 2020, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2019	59,155	4,889	64,044
2020	61,845	2,199	64,044
Totals	<u>\$ 121,000</u>	<u>\$ 7,088</u>	<u>\$ 128,088</u>

On November 14, 2017, the County entered into an \$119,000 capital lease through John Deere Financial to purchase a motor grader for the Road & Bridge Department. The lease calls for two payments of \$42,521, on February 1, 2019 and 2020, and a final payment of \$42,522 on February 1, 2021, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2019	38,288	4,233	42,521
2020	39,650	2,871	42,521
2021	41,062	1,460	42,522
Totals	<u>\$ 119,000</u>	<u>\$ 8,564</u>	<u>\$ 127,564</u>

On October 5, 2017, the County entered into a \$100,500 capital lease through John Deere Financial to purchase a motor grader for the Road & Bridge Department. The lease called for two payments of \$51,128, on February 28, 2018, and February 29, 2019, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	51,128	-	51,128
2019	49,372	1,756	51,128
Totals	<u>\$ 100,500</u>	<u>\$ 1,756</u>	<u>\$ 102,256</u>

On July 18, 2017, the County entered into a six-year, \$51,878 capital lease through Farmers State Bank to purchase a transport van for the Sheriff's Department. The lease is to be paid in monthly payments of \$788, ending July 20, 2023, including interest of 3%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	8,113	1,345	9,458
2019	8,359	1,099	9,458
2020	8,613	845	9,458
2021	8,875	583	9,458
2022	9,145	313	9,458
2023	5,463	55	5,518
Totals	<u>\$ 48,568</u>	<u>\$ 4,240</u>	<u>\$ 52,808</u>

On March 2, 2017, the County entered into a three-year, \$27,303 capital lease through Goppert Bank to purchase a 2015 Ford for the Sheriff's Department. The lease is to be paid in monthly payments of \$800, ending March 1, 2020, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	9,018	582	9,600
2019	9,339	261	9,600
2020	2,386	14	2,400
Totals	<u>\$ 20,743</u>	<u>\$ 857</u>	<u>\$ 21,600</u>

On February 28, 2017, the County entered into a three-year, \$21,564 capital lease through Goppert Bank to purchase a 2015 Ford for the Sheriff's Department. The lease is to be paid in monthly payments of \$632, ending February 29, 2020, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	7,144	439	7,583
2019	7,398	185	7,583
2020	1,258	5	1,263
Totals	<u>\$ 15,800</u>	<u>\$ 629</u>	<u>\$ 16,429</u>

On February 2, 2017, the County entered into a three-year, \$26,503 capital lease through Goppert Bank to purchase a 2016 Ford for the Sheriff's Department. The lease is to be paid in monthly payments of \$777, ending February 5, 2020, including interest of 3.5%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	8,780	540	9,320
2019	9,093	227	9,320
2020	1,546	7	1,553
Totals	<u>\$ 19,419</u>	<u>\$ 774</u>	<u>\$ 20,193</u>

On January 17, 2017, the County entered into an \$115,775 capital lease through John Deere Financial to purchase a tractor and boom mower for the Road & Bridge Department. The lease called for a payment of \$57,888 on February 20, 2017 and \$60,121 on February 20, 2018, including interest of 3.25%.

Fiscal Year Ending December 31,	Principal	Interest	Total
2018	58,201	1,920	60,121

On March 5, 2015, the County entered into a three-year \$26,261 capital lease through Goppert Bank to purchase a Ford F-150 for the Sheriff's Department. The lease was paid off in 2017.

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of five 2013 Ford Interceptors at a cost of \$126,363. The final payment was made in 2016.

In 2013, the County entered into a cancelable lease purchase agreement to finance the purchase of a 2011 John Deere motor grader at a cost of \$180,000. The final payment was made in 2016.

The following schedule shows changes in long-term debt during the year ended December 31, 2017:

Description	Balance 12/31/2016	Additions	Payment	Balance 12/31/2017	Interest
2014 Ford F-150	\$ 10,510	\$ -	\$ (10,510)	\$ -	\$ 143
Tractor & Boom Mower	-	115,775	(57,574)	58,201	314
2008 Motor Grader	-	100,500	-	100,500	-
2010 Motor Grader	-	119,000	-	119,000	-
2011 Motor Grader	-	121,000	-	121,000	-
2015 Ford (1 of 2)	-	21,564	(5,764)	15,800	555
2015 Ford (2 of 2)	-	27,303	(6,559)	20,744	641
2016 Ford	-	26,503	(7,084)	19,419	682
Transport Van	-	51,878	(3,309)	48,569	632
MO DNR Loan	71,706	-	(16,521)	55,185	2,806
	<u>\$ 82,216</u>	<u>\$583,521</u>	<u>\$(107,321)</u>	<u>\$ 558,416</u>	<u>\$ 5,773</u>

The following schedule shows changes in long-term debt during the year ended December 31, 2016:

Description	Balance 12/31/2015	Additions	Payment	Balance 12/31/2016	Interest
2014 Ford F-150	\$ 19,184	\$ -	\$ (8,674)	\$ 10,510	\$ 562
2011 Motor Grader	91,907	-	(91,907)	-	2,601
2013 Interceptors	10,941	-	(10,941)	-	63
MO DNR Loan	87,562	-	(15,856)	71,706	3,471
	<u>\$ 209,594</u>	<u>\$ -</u>	<u>\$(127,378)</u>	<u>\$ 82,216</u>	<u>\$ 6,697</u>

8. SUBSEQUENT EVENTS

The County has evaluated events subsequent to December 31, 2017 to assess the need for potential recognition or disclosure in the financial statements. Such events were evaluated through August 13, 2018, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the County Commission and
Officeholders of Clinton County, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Clinton County, Missouri as of and for the years ended December 31, 2017 and 2016, and the related notes to the financial statements, which collectively comprise Clinton County, Missouri's basic financial statements and have issued our report thereon dated August 13, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Clinton County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Clinton County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Clinton County, Missouri's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. However, as described in the accompanying schedule of findings and recommendations, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the County's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described in the accompanying schedule of findings and recommendations as item 2017-001 to be a material weakness.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies described in the accompanying schedule of findings and recommendations as items 2017-002, 2017-003, and 2017-004 to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Clinton County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed two instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and are described in the accompanying schedule of findings and recommendations as items 2017-005 and 2017-006.

Clinton County, Missouri's Responses to Findings

Clinton County, Missouri's responses to the findings identified in our audit are described in the accompanying schedule of findings and recommendations. Clinton County, Missouri's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

FINDINGS AND RECOMMENDATIONS

CLINTON COUNTY, MISSOURI
FINDINGS AND RECOMMENDATIONS

MATERIAL WEAKNESSES IN INTERNAL CONTROL

2017-001: Treasurer's Bank Reconciliations

Criteria: A proper system of internal control requires periodic reconciliations between accounting system and bank records. Additionally, Section 54.150, RSMo requires county treasurers to perform semiannual settlements of account in June and December.

Condition: During the audit period, the Treasurer did not perform reconciliations of the monthly bank statement balances to the balances per the accounting records. Additionally, the Treasurer did not prepare settlements of account during the audit period. Settlements of account for the years ended December 31, 2015, 2016, and 2017 were prepared during audit fieldwork and were not reconciled to year-end bank statements.

Cause: Monthly bank reconciliations and semiannual settlements of account were not performed by the Treasurer during the audit period.

Effect: Not performing timely reconciliations of the accounting records to the bank balances increases the likelihood of misstatements of the County's cash balances whether due to fraud or error.

Recommendation: We recommend the Treasurer immediately begin performing timely reconciliations of the monthly bank statements to the accounting records. We also recommend that the Treasurer complete semi-annual settlements in a timely manner and submit them to the County Commission as required.

County Response: Met with Treasurer. She is working to complete all reconciliations. Currently halfway through 2015. Intends to have completed by the end of the year.

Auditor's Evaluation: Bank statements should be reconciled to the accounting records on a monthly basis going forward. Semi-annual settlements must also be completed as required by state statute.

SIGNIFICANT INTERNAL CONTROL DEFICIENCIES

2017-002: Senate Bill 40 Board Internal Control

Criteria: A proper system of internal control requires adequate documentation and preservation of financial records and timely completion of reconciliations between the accounting system and bank records.

Condition: The Senate Bill 40 Board did not maintain adequate accounting records, including timely bank reconciliations. The December 2017 bank reconciliation was prepared in July 2018. Multiple certificate of deposit interest statements and monthly bank account statements could not be located. Financial records are maintained off-site by the Senate Bill 40 Board president in

unindexed plastic storage bins. A budget for 2018 has not been formally adopted by the Board and actual financial information for 2017 was never submitted to the County Clerk for inclusion in the County's budget documents.

Cause: The longtime Senate Bill 40 Board bookkeeper resigned in April 2017, and the Senate Bill 40 Board President has since maintained custody of all financial records. Bank statements are not timely reconciled by the outside accountant.

Effect: The Senate Bill 40 Board has not maintained adequate records to ensure accurate financial statements are timely completed and made available to the public.

Recommendation: We recommend the Senate Bill 40 Board design, implement and maintain internal controls adequate to ensure the timely completion of bank reconciliations, financial statements, and budgets.

County Response: The Senate Bill 40 Board did not provide comments.

Auditor's Evaluation: The audit report has been provided to the Senate Bill 40 Board to implement the recommendations.

2017-003: Sheriff's Internal Controls

Criteria: A proper system of internal controls requires adequate custodial control over credit cards, appropriate approval and documentation of purchases, and timely payment to avoid interest and late charges.

Condition: The Sheriff's office opened a credit card account in January 2017, bearing interest at 13.25%, and maintains Visa cards in the custody of the Sheriff and two employees of the Sheriff's office. Credit card statements were occasionally submitted late to the County Clerk for payment and without itemized receipts to accompany the charges. January 2017 and October 2017 credit card statements could not be located. Interest and late fees aggregated \$711 over the 10 months in 2017 for which statements were documented.

Additionally, a Finish Line fuel card is maintained in each of the Sheriff's fleet vehicles for fuel purchases. The cards require an odometer reading entry in order to activate the pump. Odometer readings on the monthly fuel card statements were inconsistent, including instances in which odometer readings decreased between transactions. No reconciliations between statements and actual odometer readings were performed. Fuel purchases were also made with the Visa credit cards issued through Goppert Bank, which lack controls over fuel purchases such as requiring an odometer reading to be entered.

Cause: Receipts and credit card statements were not adequately documented, reviewed and submitted timely for payment.

Effect: Lack of oversight of credit card and fuel card purchases increases the likelihood that cards could be used for inappropriate or unnecessary purchases or for personal use.

Recommendation: We recommend the County adopt and implement a policy to ensure credit card statements are submitted for payment timely and are reconciled to supporting documentation prior

to payment. We further recommend the Sheriff implement procedures to review monthly fuel card statements, noting any discrepancies in each vehicle's odometer readings.

County Response: Met with Sheriff Fish and members of his staff. Have implemented procedures to assist with credit card billings. They are looking for other options on credit companies and pay as you go options. They have addressed the fuel account issue with mileages and employee names.

Auditor's Evaluation: The response is appropriate to correct the concern.

2017-004: Internal Controls Over Employee Timesheets and Pay

Criteria: A proper system of internal controls requires adequate documentation of time worked and rates of pay for each employee and each pay period.

Condition: We tested 30 payroll transactions for propriety and noted no evidence of a timesheet for one employee, discrepancies in the number of hours worked between two employees' timesheets and the payroll register, one timesheet lacking the required employee and supervisor signatures, and three discrepancies between documented pay rates and the pay rates per the payroll register.

Cause: The County's established internal controls over the payroll process were not consistently followed during the audit period or were not sufficiently designed to prevent errors.

Effect: Discrepancies between payroll registers, employee timesheets and documented pay rates could result in employees being paid incorrectly.

Recommendation: We recommend the County implement procedures to ensure that employee's hours worked and rates of pay per payroll registers are accurate and properly supported.

County's Response: All employees turn in timesheets in a timely manner with the exception of the Sheriff's office. They are not always timely.

Auditor's Response: The response does not address the concern. The County should implement procedures to ensure that amounts paid to employees are supported by hours reported on timesheets that are attested to by the employee and a supervisor.

ITEMS OF NONCOMPLIANCE

2017-005: Budgetary Compliance

Criteria: Section 50.540, RSMo requires the preparation of a budget for all County funds. Section 50.740, RSMo prohibits expenditures in excess of the approved budget.

Condition: Budgets were not prepared for two funds in 2017 and two funds in 2016. Expenditures exceeded budgeted appropriations for eight funds in 2017 and four funds in 2016. The detailed list of funds can be found in Notes 1.D.9 and 1.D.10 to the financial statements.

Cause: The County did not prepare formal budgets for all County funds and did not adequately review and amend budgeted expenditures of each fund to ensure actual expenditures did not exceed the budget amounts.

Effect: In order to ensure the integrity of the budgeting process, a budget must be adopted for each County fund and the spending limits should be adhered to.

Recommendation: We recommend the County ensure compliance with state statutes by adopting a budget for each County fund and by refraining from approving expenditures in excess of budgeted amounts. In the event that the originally adopted budget is inadequate to finance the current-year unforeseen expenditures, budgetary amendments should be discussed in a public meeting and formally adopted by the County Commission.

County Response: Prior auditors informed us it was not necessary to budget for these.

Auditor's Evaluation: The County should budget for all funds over which it exercises authority. The response does not address the issue regarding approving expenditures in excess of approved budgets. The County should refrain from approving expenditures in excess of approved budgets and amend the budget if necessary.

2017-006: Collector's Annual Settlements

Criteria: Section 139.190, RSMo requires the Collector to submit an annual settlement to the County Commission, and upon examination and approval by the Commission, the annual settlement is to be certified by the Clerk and filed with the Missouri Department of Revenue.

Condition: The Collector submitted a monthly register of tax collections to the Clerk and Treasurer. However, the Collector did not complete Form 205, Collector's Annual Settlement as required for the years ended February 29, 2016, February 28, 2017, or February 28, 2018.

Cause: The Collector did not complete annual settlements of account.

Effect: The Collector was not in compliance with state statutes.

Recommendation: We recommend the Collector prepare all required forms as prescribed by state statute.

County Response: Met with Collector. She is currently working to complete and intends to have done by the end of the year.

Auditor's Evaluation: The Collector's Annual Settlements should be completed on an annual basis moving forward as required.

CLINTON COUNTY, MISSOURI
FOLLOW-UP ON PRIOR AUDIT FINDINGS FOR AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

In accordance with Government Auditing Standards, this section reports the auditors' follow-up on action taken by Clinton County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2013 and 2012.

1. Actual expenditures exceeded budgeted expenditures for one fund (Recorder User Fee), and a budget was not prepared for one fund (Special Election).

Status: Not resolved. See Finding 2017-005.

2. Documentation of the County's internal controls have not been prepared.

Status: Resolved.

3. No formal fraud risk assessment was in place.

Status: Resolved.

4. The Collector's office was not making timely bank deposits.

Status: Resolved.

5. The Collector's office was not reconciling cash registers on a daily basis.

Status: Resolved.

INDEPENDENT AUDITOR'S REPORT

To the County Commission and
Officeholders of Miller County, Missouri

Report on the Financial Statements

We have audited the accompanying financial statements of Miller County, Missouri, as of and for the years ended December 31, 2017 and 2016, and the related notes to the financial statements, which collectively comprise Miller County, Missouri's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting practices prescribed or permitted by Missouri law. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 1 of the financial statements, the financial statements are prepared by Miller County, Missouri on the basis of accounting practices prescribed or permitted by Missouri law, which is a basis of accounting other than accounting principles generally accepted in the United States of America.

The effects on the financial statements of the variances between the regulatory basis of accounting described in Note 1 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the matter discussed in the *Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles* paragraph, the financial statements referred to above do not present fairly, in accordance with accounting principles generally accepted in the United States of America, the financial position of Miller County, Missouri as of December 31, 2017 and 2016, or changes in financial position thereof for the years then ended.

Unmodified Opinion on Regulatory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash balances of each fund of Miller County, Missouri as of December 31, 2017 and 2016, and their respective cash receipts and disbursements, and budgetary results for the years then ended in accordance with the basis of accounting practices prescribed or permitted by Missouri law as described in Note 1.

Other Matters

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Miller County, Missouri's basic financial statements. The Schedule of Expenditures of Federal Awards, as required by the audit requirements of Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The Schedule of Expenditures of Federal Awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated August 28, 2018 on our consideration of Miller County, Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over

financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Miller County, Missouri's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Miller County, Missouri's internal control over financial reporting and compliance.

**The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016**

Note 1 - Summary of Significant Accounting Policies

The County of Miller, Missouri ("County"), which is governed by a three-member board of commissioners, was established in 1837 by an Act of the Missouri Territory. In addition to the three Commissioners, there are 11 elected constitutional officers: County Clerk, Collector of Revenue, Treasurer, Circuit Clerk, County Surveyor, Recorder of Deeds, Sheriff, Assessor, Coroner, Public Administrator and Prosecuting Attorney.

As discussed further in Note 1, these financial statements are presented on the regulatory basis of accounting. This basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP).

Reporting Entity

As required by generally accepted accounting principles, as applicable to the regulatory basis of accounting, these financial statements present financial accountability of Miller County, Missouri and the Miller County Senior Citizens Service Board.

The County's operations include tax assessments and collections, state/county courts, county recorder, public safety, transportation, economic development, social and recreation services.

The financial statements referred to above include only the primary government of Miller County, Missouri, which consists of all funds, organizations, institutions, agencies, departments, and offices that are considered to comprise Miller County's legal entity. The Miller County Senior Citizens Service Board is controlled by a separate board and is also included under the control of the County. The Miller County Senate Bill 40 Board is controlled by a separate board which has issued separately audited financial statements. For information, please contact the Miller County Senate Bill 40 Board by calling (573) 348-3751 (or write to 776 Hwy. D, Osage Beach, MO 65065).

Certain elected County officials, such as the County Collector, Treasurer, and Sheriff, collect and hold monies in a trustee capacity as an agent of an individual, taxing units, or other government. These assets, which are held by these officeholders for the sole benefit of external parties, are not reported on the accompanying financial statements and are unaudited.

Basis of Presentation

The accompanying financial statements present the receipts, disbursements, and changes in cash of all funds of the County and the comparisons of such information with the corresponding budgeted information for all funds of the County. The funds presented are established under statutory or administrative authority, and their operations are under the control of the County Commission or an elected county official. The General Revenue Fund is the County's general operation fund, accounting for all financial resources except those required to be accounted for in another fund. The other funds presented account for financial resources whose use is restricted for specified purposes.

Basis of Accounting

The financial statements were prepared using accounting practices prescribed or permitted by Missouri law, which differ from accounting principles generally accepted in the United States of America. The effects of the variances between these regulatory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

**The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016**

Note 1 - Summary of Significant Accounting Policies (continued)

Basis of Accounting (continued)

As a result of the use of this regulatory basis of accounting, certain assets (such as accounts receivable and capital assets), certain revenues (such as revenue for billed or provided services not yet collected), certain liabilities (such as accounts payable, certificates of participation, bonds and obligations under capital leases), and certain expenditures (such as expenditures for goods or services received but not yet paid) are not recorded in these financial statements.

If the County utilized the basis of accounting recognized as generally accepted, the fund financial statements for governmental funds would use the modified accrual basis of accounting, while the fund financial statements for proprietary fund types, if applicable, would use the accrual basis of accounting. All government-wide financials would be presented on the accrual basis of accounting.

Budget and Budgetary Accounting

In accordance with Chapter 50 RSMo, Miller County adopts a budget for each governmental fund.

On or before January 15th, each elected officer and department director will transmit to the County Clerk, who serves as budget officer, the budget request and revenue estimates for their office or department for the budget year.

The County Clerk submits to the County Commission a proposed budget for the fiscal year beginning January 1. The proposed budget includes estimated revenues and proposed expenditures for all budgeted funds. Budgeted expenditures cannot exceed beginning available monies plus estimated revenues for the year. Budgeting of appropriations is based upon an estimated unencumbered fund balance at the beginning of the year as well as estimated revenues to be received. The budget to actual comparisons in these financial statements, however, do not present encumbered fund balances, but only compare budgeted and actual revenues and expenditures.

A public hearing is conducted to obtain public comment. Prior to its approval by the County Commission, the budget document is available for public inspection.

Prior to February 1, the budget is legally enacted by a vote of the County Commission.

Subsequent to its formal approval of the budget, the County Commission has the authority to make necessary adjustments to the budget by formal vote of the Commission. Adjustments made during the year are reflected in the budget financial statements.

Budgeted amounts are as originally adopted, or as amended by the County Commission throughout the year. Individual amendments were not material in relation to the original appropriations which were adopted.

Budgets are prepared and adopted on the cash basis of accounting.

The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016

Note 1 - Summary of Significant Accounting Policies (continued)

Budget and Budgetary Accounting (continued)

During our audit, it was noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The following funds had actual expenditures that exceeded the budgeted expenditures in 2017: Assessment Fund, Emergency Management Fund, 911 Emergency Fund, Prosecuting Attorney Delinquent Tax Fund, Norman Road/Hand Ln. Maintenance Fund, Norman Road/Hand Ln. Neighborhood Improvement District Fund, Peace Officers Standards and Training Commission Fund, and the Collector's Tax Maintenance Fund. The following funds had actual expenditures that exceeded the budgeted expenditures in 2016: Law Enforcement Training Fund, Emergency Management Fund, Capital Improvement Fund, Sheriff's Drug Awareness and Resistance Fund, Sheriff's Deputy Supplemental Salary Fund, and Jail Fund. The following funds did not have a prepared budget for 2017: County Road District Marina Tax Fund, and the County Law Enforcement Fund. The following funds did not have a prepared budget for 2016: County Road District Marina Tax Fund, and the County Law Enforcement Fund. We noted the following funds had budgeted a deficit in 2017: Sheriff's Deputy Supplemental Salary Fund, TIF #3 Osage National Retail Outlet Fund, W-15C Neighborhood Improvement District Fund, Law Enforcement Training Fund, and the Jail Fund. We noted the following funds had budgeted a deficit in 2016: Prosecuting Attorney's Bad Check Fund, 911 Emergency Fund, Sheriff's Drug Awareness and Resistance Fund, Cell Tower Fund, Sheriff's Deputy Supplemental Salary Fund, TIF #3 Osage National Retail Outlet Fund, W-15C Neighborhood Improvement District Fund, Peace Officer Standards and Training Commission Fund, and the Election Services Fund.

Taxes

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied on October 1 and tax bills are mailed to taxpayers in November, at which time they are payable. All unpaid property taxes become delinquent as of January 1 of the following year.

The assessed valuation of the tangible taxable property, included within Miller County's boundaries for the calendar year 2017 and 2016, respectively, for the purposes of County taxation was as follows:

	<u>2017</u>	<u>2016</u>
Real Estate	\$ 271,179,140	\$ 267,931,803
Personal Property	87,654,220	87,177,376
Railroad and Utilities	50,351,244	50,486,774
	<u>\$ 409,184,604</u>	<u>\$ 405,595,953</u>

The tax levy per \$100 assessed valuation of tangible taxable property for the calendar year 2017 and 2016, respectively, for the purpose of County taxation, was as follows:

	<u>2017</u>	<u>2016</u>
General Revenue	\$ 0.0040	\$ 0.0465
Special Road and Bridge	0.2583	0.2583
Senior Citizens Service Board	0.0493	0.0491

The County also receives sales tax collected by the State and remitted based on the County's sales tax rate to the total sales tax collected in the County.

The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016

Note 1 - Summary of Significant Accounting Policies (continued)

Cash Deposits and Investments

Deposits and investments are stated at cost, which approximates market. Cash balances for all the County Treasurer's funds are pooled and invested to the extent possible. Interest earned from such investments is allocated to each of the funds based on the funds' average daily cash balance. Cash equivalents include repurchase agreements and any other instruments with an original maturity of ninety days or less. State law authorizes the deposit of funds in banks and trust companies or the investment of funds in bonds or treasury certificates of the United States, other interest bearing obligations guaranteed as to both principal and interest by the United States, bonds of the State of Missouri or other government bonds, or time certificates of deposit, provided, however, that no such investments shall be purchased at a price in excess of par. Funds in the form of cash on deposit or time certificates of deposit are required to be insured by the Federal Deposit Insurance Corporation (FDIC) or collateralized by authorized investments held in the County's name at third-party banking institutions. Details of these cash balances are presented in Note 2.

Interfund Transactions

During the course of operations, interfund activity occurs for purposes of providing supplemental funding, reimbursements for goods provided or services rendered, or short and long-term financing.

Interfund activities are reported as "transfers in" by the recipient fund and as "transfers out" by the disbursing fund. However, interfund reimbursements have been eliminated from the financial statements in order that reimbursed expenditures are reported only in the funds incurring the costs.

Note 2 - Deposits and Investments

The County maintains a cash and temporary investment pool that is available for use by all funds. Deposits with maturities greater than three months are considered investments. Each fund type's portion of this pool is displayed on the statement of receipts, disbursements, and changes in cash arising from cash transactions as "Cash and Equivalents".

Deposits - Missouri statutes require that all deposits with financial institutions be collateralized in an amount at least equal to uninsured deposits.

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2017, as follows:

	<u>Carrying Value</u>	<u>Bank Balances</u>
Deposits	\$ 4,267,930	\$ 4,836,587
Investments	-	-
Total Deposits and Investments as of December 31, 2017	<u>\$ 4,267,930</u>	<u>\$ 4,836,587</u>

The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016

Note 2 - Deposits and Investments (continued)

The bank balances and carrying values of deposits and investments shown below are included in the financial statements at December 31, 2016, as follows:

	<u>Carrying Value</u>	<u>Bank Balances</u>
Deposits	\$ 3,166,596	\$ 3,774,067
Investments	-	-
Total Deposits and Investments as of December 31, 2016	<u>\$ 3,166,596</u>	<u>\$ 3,774,067</u>

Note: Bank balances are inclusive of all funds of the County, and as such, include balances of unaudited funds which are not included in the scope of this report.

Custodial Credit Risk - Deposits

For a deposit, custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. At December 31, 2017 and 2016, 100% of the County's deposits and investments were covered by the Federal Deposit Insurance Corporation (FDIC) or were collateralized.

Custodial Credit Risk - Investments

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by the party that sold the security to the County or its agent but not in the government's name. The County does not have a policy for custodial credit risk relating to investments.

All investments, evidenced by individual securities, are registered in the name of the County or of a type that are not exposed to custodial credit risk.

Investment Interest Rate Risk

Investment interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Concentration of Investment Credit Risk

Concentration of investment credit risk is required to be disclosed by the County for any single investment that represents 5% or more of total investments (excluding investments issued by or explicitly guaranteed by the U. S. Government, investments in mutual funds, investments in external investment pools and investments in other pooled investments). The County has no policy in place to minimize the risk of loss resulting from over concentration of assets of a specific maturity, specific issuer or specific class of securities.

Note 4 - State of Missouri County Employees Retirement Fund (CERF)

Plan Description

The County Employees' Retirement Fund is a cost-sharing multiple employer defined benefit pension plan covering any county elected or appointed officer or employee whose performance requires the actual performance of duties during not less than one thousand (1,000) hours per calendar year in each county of the state, except for any city not within a county and any county of the first classification having a charter form of government. It does not include county prosecuting attorneys covered under RSMo. Sections 56.800 to 56.840, circuit clerks and deputy circuit clerks covered under the Missouri State Retirement System, county sheriffs covered under RSMo. Sections 57.949 to 57.997, and certain personnel not defined as an employee per RSMo. Section 50.1000(8). The Fund was created by an act of legislature and was effective August 28, 1994.

The general administration and the responsibility for the proper operation of the fund and the investment of the fund are vested in a board of directors of eleven persons.

Benefits Provided

Beginning January 1, 1997, employees attaining the age of sixty-two years may retire with full benefits with eight or more years of creditable service. The monthly benefit for County Employees is determined by selecting the highest benefit calculated using three different prescribed formulas (flat-dollar formula, targeted replacement ratio formula, and prior plan's formula). A death benefit of \$10,000 will be paid to the designated beneficiary of every active member upon his or her death.

Upon termination of employment, any member who is vested is entitled to a deferred annuity, payable at age sixty-two. Early retirement is at age fifty-five. Any member with less than eight years of creditable service forfeits all rights in the fund but will be paid his or her accumulated contributions.

**The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016**

Note 4 - State of Missouri County Employees Retirement Fund (CERF) (continued)

The County Employees' Retirement Fund issues audited financial statements. Copies of these statements may be obtained from the Board of Directors of CERF by writing to CERF, 2121 Schotthill Woods Drive, Jefferson City, Missouri, 65101, by calling (573) 632-9203, or by visiting the CERF website at www.mocerf.org.

Contributions

In accordance with State Statutes, the Plan is partially funded through various fees collected by counties and remitted to CERF. All participants hired on or after February 24, 2002 are required to contribute an additional 4% of their gross compensation to CERF starting January 1, 2003. An active LAGERS participant who was employed with the County prior to February 24, 2002, is not required to make contributions. During 2017 and 2016, the County collected and remitted to CERF employee contributions of \$102,235 and \$100,236, respectively, for the years ended.

Note 5 - Local Government Employees Retirement System (LAGERS)

Plan Description

The County participates in the Missouri Local Government Employees Retirement System (LAGERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agent for local government entities in Missouri. LAGERS is a defined benefit pension plan which provides retirement, disability, and death benefits to plan members and beneficiaries. LAGERS was created and is governed by statute, RSMo. Sections 70.600-70.755. As such, it is the system's responsibility to administer the law in accordance with the expressed intent of the General Assembly. The plan is qualified under the Internal Revenue Code Section 401(a) and is tax exempt.

The Missouri Local Government Employees Retirement System issues a publically available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to LAGERS, P.O. Box 1665, Jefferson City, Missouri, 65102, by calling (800) 447-4334, or by visiting the LAGERS website at www.molagers.org.

Benefits Provided

Benefits are available to all full-time employees working in a LAGERS covered department. Benefits vest when an employee earns five years (60 months) of service credit in the system. Normal retirement age is 60 (General) or 55 (Police) and early retirement age is 55 (General) and 50 (Police). Benefits are paid out using a formula that is based on the employee's final average salary and the amount of credited service time.

Contributions

Full-time employees of the County contribute 4% to the pension plan. The January 1st statutorily required employer contribution rates were 5.4% (General) and .8% (Police) of annual covered payroll for the year ended December 31, 2017, and 5.3% (General) and .3% (Police) of annual covered payroll for the year ended December 31, 2016. The contribution requirements of plan members are determined by the governing body of the political subdivision. The contribution provisions of the political subdivision are established by state statute. For the years ended December 31, 2017 and 2016, the County contributed \$126,797 and \$118,285 to LAGERS.

	<u>\$ 81,535</u>	<u>\$ 6,344</u>	<u>\$ 87,879</u>

Note 7 - Prosecuting Attorney Retirement Fund

In accordance with state statute Section 56.807 RSMo, the County contributes monthly to the Missouri Office of Prosecution Services for deposit to the credit of the Missouri Prosecuting Attorneys' and Circuit Attorneys' Retirement System Fund. Once remitted, the State of Missouri is responsible for administration of this plan. The County has contributed \$12,597 and \$8,075, respectively, for the years ended December 31, 2017 and 2016.

Note 8 - Post-Employment Benefits

Osage County does not provide post-employment benefits except as mandated by the Consolidated Omnibus Budget Reconciliation Act (COBRA). The requirements established by COBRA are fully funded by employees who elect coverage under the Act, and no direct costs are incurred by Miller County.

Note 9 - Claims, Commitments and Contingencies

Litigation

The County is subject to various claims and legal proceeding covering a wide range of matters that arise in the ordinary course of its business activities. Management believes that any liability that may ultimately result from the resolution of these matters will not have a material adverse effect on the financial condition of the County.

Compensated Absences

The County provides employees with annual leave. Each employee earns leave based upon his or her term of service with the County earning one day per month for the first ten years, 1.25 days per month for 10-15 years of service, 1.5 days per month for 15-20 years of service, 1.75 days per month for 20-25 years of service, and 2 days per month for over 25 years of service. Annual leave must be used in the year it is earned; however, 100 hours leave may be carried over from year to year for employees with 1-5 years of service, 180 hours for employees with 6-15 years of service, and 240 hours for employees with over 15 years of service. Any unused leave time in excess of these amounts will be forfeited at the end of the calendar year. Annual leave accrual shall commence with the employee's date of employment with Miller County.

**The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016**

Note 9 - Claims, Commitments and Contingencies (continued)

Compensated Absences (continued)

In the event an employee becomes ill and requires the use of accrued vacation time along with sick leave, he or she may do so with the understanding that accrued vacation time cannot be used in excess of what is remaining and due given the employees' tenure and the aforementioned schedule. During a scheduled vacation, sick leave shall not be granted. As vacation is granted for a period of recreation, no employee shall be permitted to waive such leave for the purpose of receiving double pay. Upon termination of employment, any employee who has accumulated vacation time shall be paid for unused time at the final regular rate received by such employee. This terminates all prior service with the County. Sick time is not reimbursable upon termination of employment with the County.

Other Commitments

Part of the County's taxing district contains a redevelopment area subject to a TIF plan where the County must remit certain economic activity taxes to a local City for the purpose of reimbursing certain costs of development. The County is committed to remitting these taxes through the year ended December 31, 2023; future amounts are based on overall taxes collected for the development area and cannot be estimated. Payments remitted for the years ended December 31, 2017 and 2016 totaled \$784,476 and \$729,316, respectively.

Federal and State Assisted Programs

The County receives proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned. Such audits could result in refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the potential refund of grant monies.

Note 10 - Risk Management

The County is exposed to various risks of losses related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees and natural disasters, and has established a risk management strategy that attempts to minimize losses and the carrying costs of insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

The County is a member participant in a public entity risk pool which is a corporate and political body created pursuant to state statute (Section 537.700 RSMo.). The purpose of the risk pool is to provide liability protection to participating public entities, their officials, and employees. Annual contributions are collected based on actuarial projections to produce sufficient funds to pay losses and expenses. Should contributions not produce sufficient funds to meet its obligations, the risk pool is empowered with the ability to make special assessments. Members are jointly and severally liable for all claims against the risk pool.

The County is also a member of the Missouri Association of Counties Self-Injured Workers' Compensation and Insurance Fund. The County purchases workers' compensation insurance through this Fund, a non-profit corporation established for the purpose of providing insurance coverage for Missouri counties. The Fund is self-insured up to \$500,000 per occurrence and is reinsured up to the statutory limit through excess insurance.

The County of Miller
Tuscumbia, Missouri
Notes to the Financial Statements
For the years ended December 31, 2017 & 2016

Note 11 - Subsequent Events

The County has evaluated events subsequent to December 31, 2017 to assess the need for potential recognition or disclosure in the financial statements. Such events have been evaluated through August 28, 2018, the date the financial statements were available to be issued. Based upon this evaluation, it was determined that no subsequent events occurred that require recognition or additional disclosure in the financial statements.

Note 12 - Prior Period Adjustment

Beginning cash balances of the County have been restated to include the activities of the Collector's Tax Maintenance Fund and remove the activities of the Bagnell Special Marina Tax fund, Kaiser Special Road District Marina Tax Fund and the Time Payment Fee Fund. The net effect of this adjustment will increase the beginning cash and equivalents of the County. This adjustment will have no material effect on operations of the County.

Total cash and equivalents, as Previously stated - December 31, 2015	\$ 3,283,988
Prior Period Adjustment 1	<u>8,940</u>
Total cash and equivalents, as Restated - December 31, 2015	<u><u>\$ 3,292,928</u></u>

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL
REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF
FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING
STANDARDS*

To the County Commission and
Officeholders of Miller County, Missouri

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of Miller County, Missouri as of and for the years ended December 31, 2017 and 2016, and the related notes to the financial statements, which collectively comprise Miller County, Missouri's basic financial statements, and have issued our report thereon dated August 28, 2018.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Miller County, Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Miller County, Missouri's internal control. Accordingly, we do not express an opinion on the effectiveness of Miller County, Missouri's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and questioned costs that we consider to be significant deficiencies as items 2017-002, 2017-003, 2017-004, 2017-006, 2017-007, 2017-008, and 2017-009.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Miller County, Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*, and which are described in the accompanying schedule of findings and questioned costs as items 2017-001 and 2017-005.

Miller County, Missouri's Responses to Findings

Miller County, Missouri's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. Miller County, Missouri's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR THE MAJOR FEDERAL
PROGRAM AND REPORT ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE
WITH THE UNIFORM GUIDANCE

To the County Commission and
Officeholders of Miller County, Missouri

Report on Compliance for the Major Federal Program

We have audited Miller County, Missouri's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on Miller County, Missouri's major federal program for the years ended December 31, 2017 and 2016. Miller County, Missouri's major federal program is identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for Miller County, Missouri's major federal program based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the major federal program occurred. An audit includes examining, on a test basis, evidence about Miller County, Missouri's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for the major federal program. However, our audit does not provide a legal determination of Miller County, Missouri's compliance.

Opinion on the Major Federal Program

In our opinion, Miller County, Missouri complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on its major federal program for the years ended December 31, 2017 and 2016.

Other Matters

The results of our auditing procedures disclosed an instance of noncompliance which is required to be reported in accordance with the Uniform Guidance and which is described in the accompanying schedule of findings and questioned costs as item 2017-010. Our opinion on the major federal program is not modified with respect to this matter.

Miller County, Missouri's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Miller County, Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control over Compliance

Management of Miller County, Missouri is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Miller County, Missouri's internal control over compliance with the types of requirements that could have a direct and material effect on the major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for the major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Miller County, Missouri's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies, and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified a deficiency in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as item 2017-010, that we consider to be a significant deficiency.

Miller County, Missouri's response to the internal control over compliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Miller County, Missouri's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

A handwritten signature in dark ink, appearing to read "Stopp & VanHoy". The signature is written in a cursive, flowing style with a small flourish at the end.

**The County of Miller
Tuscumbia, Missouri
Notes to the Schedule of Expenditures of Federal Awards
For the years ended December 31, 2017 & 2016**

Note 1 - Summary of Significant Accounting Policies

Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards has been prepared to comply with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). This Uniform Guidance requires a schedule that provides total federal awards expended for each federal program and the Catalog of Federal Domestic Assistance (CFDA) number or other identifying number when the CFDA number is not available.

This schedule includes all federal awards administered by Miller County, Missouri.

Basis of Presentation

The *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* includes these definitions, which govern the contents of the schedule:

Federal financial assistance means assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals.

Federal award means Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities. It does not include procurement contracts, under grants or contracts, used to buy goods or services from vendors.

Because the Schedule presents only a selected portion of the operations of Miller County, Missouri, it is not intended to and does not present the financial position, changes in net assets, or cash flows of Miller County, Missouri.

Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented on the cash basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowed or are limited as to reimbursement.

Miller County, Missouri has not elected to use the 10% de minimis indirect cost rate.

Note 2 - Subrecipients

Miller County, Missouri provided no federal awards to subrecipients during the years ended December 31, 2017 and 2016.

**The County of Miller
Tuscumbia, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2017 & 2016**

Section 2 - Financial Statement Findings

2017-001 **Criteria:** Missouri statutes requires Counties to prepare an annual budget as applicable to each fund. Expenditures are not to exceed the budget and funds are not to be budgeted at a deficit.

Condition: During our audit, it was noted that the County was not in compliance with Missouri budgetary state statute Chapter 50 RSMo. The following funds had actual expenditures that exceeded the budgeted expenditures in 2017: Assessment Fund, Emergency Management Fund, 911 Emergency Fund, Prosecuting Attorney Delinquent Tax Fund, Norman Road/Hand Ln. Maintenance Fund, Norman Road/Hand Ln. Neighborhood Improvement District Fund, Peace Officers Standards and Training Commission Fund, and the Collector's Tax Maintenance Fund. The following funds had actual expenditures that exceeded the budgeted expenditures in 2016: Law Enforcement Training Fund, Emergency Management Fund, Capital Improvement Fund, Sheriff's Drug Awareness and Resistance Fund, Sheriff's Deputy Supplemental Salary Fund, and Jail Fund. The following funds did not have a prepared budget for 2017: County Road District Marina Tax Fund, and the County Law Enforcement Fund. The following funds did not have a prepared budget for 2016: County Road District Marina Tax Fund, and the County Law Enforcement Fund. We noted the following funds had budgeted a deficit in 2017: Sheriff's Deputy Supplemental Salary Fund, TIF #3 Osage National Retail Outlet Fund, W-15C Neighborhood Improvement District Fund, Law Enforcement Training Fund, and the Jail Fund. We noted the following funds had budgeted a deficit in 2016: Prosecuting Attorney's Bad Check Fund, 911 Emergency Fund, Sheriff's Drug Awareness and Resistance Fund, Cell Tower Fund, Sheriff's Deputy Supplemental Salary Fund, TIF #3 Osage National Retail Outlet Fund, W-15C Neighborhood Improvement District Fund, Peace Officer Standards and Training Commission Fund, and the Election Services Fund.

Cause: Oversight

Effect: Due to exceeding budget in certain funds, lack of budget in certain funds, and deficit budget in certain funds, the County is in violation of Missouri Revised Statutes.

Recommendation: We recommend that the County adopt a budget for all funds, not budget a deficit, and periodically review its actual expenditures as compared to budgeted amounts. An amended budget should be prepared and approved as necessary to comply with statutes.

Management's Response: The County Clerk will perform a detailed review of budgetary schedules and actual expenditures in order to ensure budgetary compliance, and amendments to the budget will be prepared and approved by the County Commission, if necessary. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

2017-002 **Criteria:** Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Effect: Lack of an appropriate fraud risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

**The County of Miller
Tuscumbia, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2017 & 2016**

Section 2 - Financial Statement Findings (continued)

2017-002 **Cause:** Management has not prepared documentation of risk assessments, including identifying risks and mitigating controls.
(cont.)

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze, and manage these risks.

Management's Response: The County will work to prepare a risk assessment procedure. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

2017-003 **Criteria:** Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Effect: Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: Management has not prepared documentation of internal controls.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Management's Response: The County will work to prepare internal control documentation. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

2017-004 **Criteria:** Strong internal controls over payroll expense require that there be a formal process over the approval of payroll processing and disbursement of payroll expense.

Condition: During our audit, we noted payroll reports were not being approved by management prior to the disbursement of cash related to payroll expense and the Sheriff's department was not turning in time cards.

Effect: Without a formal approval process over payroll processing and disbursement of payroll expense, improper cash disbursements related to payroll could be processed and disbursed either due to error or fraud.

Cause: The County has not developed and implemented formal controls over payroll processing and disbursement of payroll expense.

**The County of Miller
Tuscumbia, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2017 & 2016**

Section 2 - Financial Statement Findings (continued)

- 2017-004 **Recommendation:** We recommend the Sheriff's department submit time cards for each payroll period, and the
(cont.) County develop and implement a process to ensure payroll reports are being reviewed and approved prior to the
disbursement of cash related to payroll.

Management's Response: The County has developed and implemented a process to ensure payroll reports are being reviewed by management prior to the cash being disbursed and is now receiving time cards from the Sheriff's department. The expected completion date is August 15, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

- 2017-005 **Criteria:** Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources.

Condition: During our audit, we noted the Collector has not prepared an annual settlement for the tax years ended February 28, 2018, February 28, 2017, or February 29, 2016.

Effect: By not preparing timely annual settlements, the County Collector has not provided the County Commission or the taxpayers with a complete accounting of property tax transactions.

Cause: The County Collector had not prepared annual settlements of property taxes.

Recommendation: We recommend that the County Collector prepare and file annual settlements as required by state law.

Management's Response: The Collector will work to prepare a Collector's annual settlement for the tax year-ended February 28, 2019. The expected completion date is March 31, 2019. The County Collector (Bill Harvey) office phone number is (573) 369-1925.

- 2017-006 **Criteria:** The County should maintain sufficient summary schedules and other related documentation for all debt.

Condition: During the audit, it became evident that the County did not maintain adequate debt schedules to track the County's debt.

Effect: Without proper tracking of debt, improper payments could be made or payments could be missed.

Cause: The County did not maintain proper amortization schedules to properly report and budget debt expenditures nor did it maintain a debt schedule listing.

Recommendation: We recommend that the County obtain sufficient documentation for all debt, leases, notes, short-term notes, etc. to properly record and account for expenditures and to also maintain a debt schedule so that debt may be adequately tracked.

Management's Response: The County was able to provide the auditors with all of the documentation required. Going forward the County will actively track and maintain all of its debt. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

**The County of Miller
Tuscumbia, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2017 & 2016**

Section 2 - Financial Statement Findings (continued)

2017-007 **Criteria:** Reconciliations must be performed to ensure proper cash handling and cash management for all funds.

Condition: During our audit we noted several funds that had negative fund balances.

Effect: Not monitoring accurate cash balances can create a negative balance which could hinder the financial reporting process and cause funds not to be maintained properly.

Cause: Management is not monitoring cash balances to ensure the positive fund balances for all funds.

Recommendation: We recommend that management maintain positive fund balances within all governmental funds.

Management's Response: The Treasurer's and County Clerk's office will work to maintain positive fund balances in the future by monitoring fund balances. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910 and the Treasurer's (Phil Lawson) office phone number is (573) 369-1920.

2017-008 **Criteria:** Bank reconciliations must be performed to ensure all transaction are being recorded and cash is being properly reported.

Condition: During our audit, we noted that there was no bank reconciliation being prepared for the Collector's Tax Maintenance Fund.

Effect: Not preparing a bank reconciliation could lead to the improper reporting of revenue, expense, and cash balance of the fund.

Cause: Management has not prepared a bank reconciliations for the Collector's Tax Maintenance Fund.

Recommendation: We recommend the Collector start preparing a bank reconciliation for the Collector's Tax Maintenance Fund.

Management's Response: The Collector will start preparing a bank reconciliation for the Collector's Tax Maintenance Fund. The expected completion date is December 31, 2018. The County Collector (Bill Harvey) office phone number is (573) 369-1925.

2017-009 **Criteria:** Strong internal controls over property tax require the property tax system access be restricted to only allow officials and personnel to access functions necessary for their duties, and the County Clerk and County Commission review additions and abatements entered into the property tax system by the County Collector.

Condition: During our audit, we noted the County Collector has full access to make changes to the property tax system. Also, the County Clerk and County Commission do not review additions and abatements entered into the property tax system by the County Collector.

**The County of Miller
Tuscumbia, Missouri
Schedule of Findings and Questioned Costs
For the years ended December 31, 2017 & 2016**

Section 2 - Financial Statement Findings (continued)

2017-009 **Effect:** Because of the Collector's full access to make changes to the property tax system and without a regular review of tax additions and abatements, erroneous or fraudulent changes to the property tax system may occur and not be caught in a timely manner.
(cont.)

Cause: The County Collector has full access to make changes to the property tax system, and the County Clerk and County Commission do not review additions and abatements entered into the property tax system by the County Collector.

Recommendation: We recommend the County Commission and the County Collector ensure property tax system access is restricted to only allow officials and personnel to access functions necessary for their duties. We also recommend the County Clerk and County Commission review additions and abatements entered into the property tax system by the County Collector.

Management's Response: The County will develop and implement a process in writing to review additions and abatements entered into the property tax system by the County Collector. The expected completion date is December 31, 2018. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

Section 3 - Federal Award Findings and Questioned Costs

2017-010 Federal Grantor: All Programs
Pass-Through Grantor: All Programs
Federal CFDA Number: All Programs
Program Title: All Programs

Criteria: Title 2 U.S. *Code of Federal Regulations* Part 200 requires auditees to prepare an accurate Schedule of Expenditures of Federal Awards (SEFA) containing awards expended, CFDA title and number, award number, name of the Federal agency, and name of pass-through entity.

Condition: The Schedule of Expenditures of Federal Awards (SEFA) contained errors.

Effect: Federal expenditures reported in the SEFA were incorrect.

Cause: Management did not follow reporting requirements related to the Schedule of Expenditures of Federal Awards.

Recommendation: We recommend management develop internal controls over reporting and consult with outside accountants, if possible, to ensure an accurate SEFA is prepared.

Management's Response: The County Clerk is working towards capturing all grant transactions in a manner sufficient to report the necessary information required on the SEFA by the next audit period. The County Clerk's (Clinton Jenkins) office phone number is (573) 369-1910.

**The County of Miller
Tuscumbia, Missouri
Summary Schedule of Prior Year Findings and Responses
For the years ended December 31, 2017 & 2016**

In accordance with *Government Auditing Standards*, this section reports the auditor's follow-up on action taken by Miller County, Missouri, on the applicable findings in the prior audit report issued for the two years ended December 31, 2015 & 2014.

Prior Year Financial Statement Findings

FS 2015-001 **Criteria:** Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit*, which is effective for periods ending on or after December 15, 2009, as amended by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, considers inadequate documentation of the components of internal control to be at least a significant deficiency.

Condition: Documentation of the County's internal controls has not been prepared.

Context: During discussions with management, we noted that internal control documentation has not been prepared.

Effect: SAS 122 considers inadequate documentation of the components of internal control to be at least a significant deficiency. Without documented internal controls, the County may not be able to ensure that controls are in place, communicated and operating effectively.

Cause: The County did not prepare the required documentation.

Recommendation: We recommend that the County develop the required internal control documentation. In addition, we recommend studying the COSO internal control guidance and tools as a means to begin the process. Once this documentation is complete, those charged with governance have a responsibility to understand the controls and ensure they are operating effectively.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clinton Jenkins) office phone number is (573)369-1910.

Status: Management has not corrected this issue and the finding is repeated as finding 2017-003 in the current year. This finding initially occurred in the 2015 and 2014 fiscal years.

FS 2015-002 **Criteria:** Antifraud programs and controls are the policies and procedures put in place by an organization to help ensure that management directives are carried out. They are part of the overall system of internal control established to achieve reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

Condition: During our audit, we noted there is no formal fraud risk assessment in place.

Context: During discussions with management, we noted there were no formal fraud risk assessments implemented.

Effect: Lack of an appropriate risk assessment process may result in certain risks not being identified by County's management. Opportunities to commit and conceal a fraud or irregularity may go undetected by management without proper assessment procedures.

**The County of Miller
Tuscumbia, Missouri
Summary Schedule of Prior Year Findings and Responses
For the years ended December 31, 2017 & 2016**

Prior Year Financial Statement Findings (continued)

FS 2015-002 **Cause:** Management has not prepared documentation of risk assessments, including identified risks and mitigating (Cont.) controls.

Recommendation: We recommend that the County address various risks in the environment, including risk of fraud occurring by performing assessments to identify, analyze and manage these risks.

Views of responsible officials and planned corrective actions: The County will begin the process of internal control documentation in 2014. The County Clerk's (Clinton Jenkins) office phone number is (573)369-1910.

Status: Management has not corrected this issue and the finding is repeated as finding 2017-002 in the current year. This finding initially occurred in the 2015 and 2014 fiscal years.

FS 2015-003 **Criteria:** The County should maintain sufficient summary schedules and other related documentation for all debt.

Condition: The County does not maintain a debt schedule detailing all debt owed by the County.

Context: During the audit, it became evident that the County did not maintain adequate debt schedules to track the County's debt.

Effect: Lack of documentation resulted in the County making a debt payment twice.

Cause: The County did not maintain proper amortization schedules to properly report and budget debt expenditures nor did it maintain a debt schedule listing.

Recommendation: We recommend that the County obtain sufficient documentation for all debt, leases, notes, short-term notes, etc. to properly record and account for expenditures and to also maintain a debt schedule so that debt may be adequately tracked.

Views of responsible officials and planned corrective actions: The County was able to provide the auditors with all of the documentation required. Going forward the County will actively track and maintain all of its debt. The County Clerk's (Clinton Jenkins) office phone number is (573)369-1910.

Status: Management has not corrected this issue and the finding is repeated as finding 2017-006 in the current year. This finding initially occurred in the 2015 and 2014 fiscal years.

FS 2015-004 **Criteria:** Reconciliations must be performed to ensure proper cash handling and cash management for all funds.

Condition: During our testing, we noted that the Drug Awareness and Resistance Education Fund and Sheriff's Deputy Salary Supplement Fund had deficit cash balances at December 31, 2015. We also noted during our testing that the Emergency Management Fund, 911 Fund, Sheriff's Deputy Salary Supplement Fund and Jail Fund had deficit cash balances at December 31, 2014.

Context: This deficiency became apparent through our testing of cash accounts for the County's accounts.

**The County of Miller
Tuscumbia, Missouri
Summary Schedule of Prior Year Findings and Responses
For the years ended December 31, 2017 & 2016**

Prior Year Financial Statement Findings (continued)

FS 2015-004 **Effect:** Not monitoring accurate cash balances can create a negative balance which could hinder the financial (Cont.) reporting process and cause funds not to be maintained properly.

Cause: Management does not maintain proper bank reconciliations to ensure the positive fund balances.

Recommendation: We recommend that management maintain positive fund balances within all governmental funds.

Views of responsible officials and planned corrective actions: The Treasurer's and Clerk's office will work to maintain positive fund balances in the future by monitoring fund balances. The County Clerk's (Clinton Jenkins) office phone number is (573)369-1910 and the Treasurer's (Phil Lawson) office phone number is (573)369-1920.

Status: Management has not corrected this issue and the finding is repeated as finding 2017-007 in the current year. This finding initially occurred in the 2015 and 2014 fiscal years.

FS 2015-005 **Criteria:** SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit*: An Amendment to SAS No. 55.

Condition: Lack of sufficient segregation of duties within the Treasurer's office.

Context: During the engagement, we noted that an individual is allowed to receive, record, deposit, as well as write, approve, sign and reconcile expenditures and receipts to the bank statement.

Effect: The design of the internal control over financial reporting could adversely affect the ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements.

Cause: Size and budget constraints limiting the number of personnel within each of the corresponding departments.

Recommendation: These areas should be reviewed periodically and consideration should be given to improving the segregation of duties.

Views of responsible officials and planned corrective actions: The Treasurer's office will continue to be monitored and additional personnel will be when possible. The Treasurer's (Phil Lawson) office phone number is (573)369-1920.

Status: Management has corrected this issue.

Background

The former City Administrator, Kevin Atwood, was responsible for oversight of financial accounting functions, assisting the Mayor with various city activities, and providing general supervision of all city departments and functions. He was hired as a police officer in October 2000 and was promoted to Police Chief in January 2004. He was appointed City Administrator in May 2013, but continued to also serve as Police Chief.

Our office received an anonymous hotline call in August 2017 regarding concerns over credit card purchases and gun inventory issues. Our office initially referred the matter to the Department of Public Safety (DPS) for the Missouri State Highway Patrol (MSHP) to investigate, and notified the Howard County Prosecuting Attorney. Subsequently, the Howard County Prosecuting Attorney contacted the MSHP on September 19, 2017, and requested the MSHP to investigate.

The Board suspended the former City Administrator for 30 days with pay on October 19, 2017, and he submitted a letter of resignation that day, effective November 19, 2017.

The State Auditor's Office was contacted in November 2017 by the City Attorney to request an audit of the city, indicating city officials suspected possible misappropriation of funds and/or fraudulent activity, particularly regarding improper purchases and expense reimbursements. On December 4, 2017, the Board passed an ordinance formally requesting and authorizing an audit and the audit began on February 26, 2018.

Missing Monies

The audit identified an estimated \$3,248 in bulk water sales receipts for the period May 2013 through October 2017 that were not deposited. Improper and unsupported credit card payments were made by the city for the former City Administrator's personal credit card. The city paid a total of \$5,508 to the credit card company from May 2016 to August 2017 without any supporting documentation, and of that amount, \$3,917 pertained to transactions that were improper and personal in nature. The city recouped \$1,130 from the former City Administrator, but \$2,787 remains unpaid. In addition, a check for \$1,050 was issued to the former City Administrator in January 2017, supposedly to be used for "drug buy" money by a confidential informant. No evidence was provided to the city to indicate this money was used for a controlled drug buy or any other city purpose and is considered missing.

Disbursements

The former City Administrator made some purchases during 2017, including various electronic items and added phone lines, that were unnecessary and not a prudent use of city resources, costing the city over \$1,600 in unnecessary charges. The city lacks adequate procedures to account for fuel used by the public works and police departments, and did not require individual fuel tickets to be turned in for each purchase and no usage or fuel logs were required for any city vehicles. Citizen concerns were expressed to the city in October 2017 that the former City Administrator was using city fuel cards to purchase fuel for personal vehicles. Due to the lack of records

required by the city, it is difficult to determine if all fuel purchases were appropriate.

Clothing Allowance Program
and Gun Inventory

The city does not have adequate policies and procedures over a clothing allowance program offered to certain city employees, which allows the employees to repay the city for work-related equipment and uniforms, as well as personal items initially purchased by the city on their behalf. Several concerns were noted with this program including, allowing the purchase of personal items, not updating records accurately or timely, allowing high receivable balances or credit balances, using compensatory time earned as credit against amounts owed, and not ensuring proper taxes are paid. The city has failed to maintain inventory records of city guns and did not perform an annual inventory of city-owned guns. As a result, city personnel cannot account for all city-owned guns and the city's investigation of concerns expressed regarding gun purchases was more difficult.

Accounting Controls and
Procedures

The city had not established adequate segregation of duties and independent or supervisory reviews over the various financial accounting functions performed by the former City Administrator and his staff. In addition, the combination of the positions of City Administrator and Police Chief violated state law and created a potential conflict of interest.

<p>In the areas audited, the overall performance of this entity was Poor.*</p>

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Glasgow, Missouri

We have audited certain operations of the City of Glasgow as they relate to the city's finances in fulfillment of our duties under Section 29.200.3, RSMo. Due to concerns regarding missing monies and improper disbursements, the State Auditor initiated the audit with the approval of the City of Glasgow Board of Aldermen. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2017, and the period from July 1, 2017, through November 1, 2017. The objectives of our audit were to:

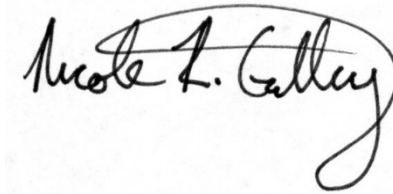

1. Evaluate the city's internal controls over significant management and financial functions.
2. Evaluate the city's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.
4. Determine the amount of missing monies and improper disbursements to the extent possible.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) missing monies and improper disbursements totaling approximately \$7,100. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Glasgow.

A handwritten signature in black ink, reading "Nicole R. Galloway". The signature is fluid and cursive, with a large loop at the end of the last name.

Nicole R. Galloway, CPA

City of Glasgow

Introduction

Background

The former City Administrator, Kevin Atwood, was responsible for oversight of financial accounting functions, assisting the Mayor with various city activities, and providing general supervision of all city departments and functions. He was hired as a police officer in October 2000 and was promoted to Police Chief in January 2004. He was appointed City Administrator in May 2013, but continued to also serve as Police Chief.

Our office received an anonymous hotline call in August 2017 regarding concerns over credit card purchases and gun inventory issues. Our office initially referred the matter to the Department of Public Safety (DPS) for the Missouri State Highway Patrol (MSHP) to investigate, and notified the Howard County Prosecuting Attorney. Subsequently, the Howard County Prosecuting Attorney contacted the MSHP on September 19, 2017, and requested the MSHP to investigate. The MSHP issued a subpoena to the city in October 2017 for various financial records, including copies of credit card statements and supporting documentation. The city provided the MSHP with various financial records related to the subpoena. In an October 9, 2017, closed meeting, the Board of Aldermen (Board) discussed concerns expressed about credit card usage with the former City Administrator. The Board suspended the former City Administrator for 30 days with pay on October 19, 2017, and he submitted a letter of resignation that day, effective November 19, 2017.

The State Auditor's Office was contacted in November 2017 by the City Attorney to request an audit of the city, indicating city officials suspected possible misappropriation of funds and/or fraudulent activity, particularly regarding improper purchases and expense reimbursements. On December 4, 2017, the Board passed an ordinance formally requesting and authorizing an audit and the audit began on February 26, 2018.

The city's fiscal year is July 1 through June 30. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2017, and the period from July 1, 2017, through November 1, 2017. We applied procedures to receipts, utility billings, and disbursements to identify the amount of missing monies and improper disbursements made by or on behalf of the former City Administrator.

City of Glasgow

Management Advisory Report

State Auditor's Findings

1. Missing Monies

The audit identified an estimated \$3,248¹ in bulk water sales receipts for the period May 2013 through October 2017 that were not deposited. See Appendix C for details regarding undeposited receipts. In addition, unsupported and improper disbursements were made by/to the former City Administrator.

Bulk water receipts

The city has an automatic water sales machine, which is a currency-operated machine that automatically dispenses water to customers who haul bulk water themselves. The machine is connected to the water system and dispenses gallons of water based on the amount of money inserted by customers (i.e., 25 cents will buy 40 gallons of water). A flow meter is also attached to the system to track the gallons sold. Each month, water department personnel read the meter and provide the reading to the City Collector. According to city personnel, the former City Administrator collected the monies from the currency machine beginning in May 2013, after his promotion to City Administrator, through October 2017, but was not always transmitting the monies to the City Collector for deposit. An employee in the water department collected the monies prior to May 2013, when a new meter was installed. Meter readings prior to December 2013 could not be located by city personnel, but it is reasonable to conclude the meter was at zero when installed. This meter was reported broken in July 2017 and was not replaced until December 2017. In November 2017, after the former City Administrator was suspended from his position (and ultimately resigned), water department personnel again began collecting the monies from the currency machine in addition to reading the meter.

Currently, two employees empty the currency machine together and verify the monies removed before transmittal of the meter reading and monies to the City Collector for deposit. The meter is not read on the same day the monies are removed from the machine, so a precise reconciliation of the amount transmitted to gallons of water sold cannot be performed.

According to city personnel, the former City Administrator was the only person with a key to the currency machine from May 2013 to October 2017. For the period May 2013 through February 2018, we estimated 649,600 gallons were pumped and sold at a cost of \$6.25 per 1,000 gallons, generating revenue of approximately \$4,060. This total includes an estimation of usage for the period July to December 2017 when the meter was broken.

Revenues generated while the former City Administrator was responsible for collections totaled approximately \$3,800, but records indicate only \$552 in cash was transmitted to the city for deposit. These transmittals were made

¹ Amounts presented in the report findings are rounded to the nearest dollar, whereas amounts presented in Appendix C are not rounded.

City of Glasgow
Management Advisory Report - State Auditor's Findings

between August 2013 and January 2014. City records indicate no transmittals of cash from bulk water sales were made from February 2014 to October 2017. Three checks, totaling \$825, were received by the City Clerk in 2017 and posted to the system as bulk water sales receipts. The City Clerk indicated she posted the checks in that manner because she was instructed to do so by the former City Administrator. We determined two of the checks, totaling \$750, were actually deposits paid to the city by a contractor who needed to perform street cuts. We were unable to determine the purpose of the third check. It is possible the former City Administrator instructed the City Clerk to perform this miscoding to hide the shortage in the bulk water sales account.

From November 2017 to February 2018, when water department employees had taken over the duty of collecting monies from the currency machine, an estimated 41,600 gallons of water were sold, generating \$260 in sales. The amount collected and transmitted for deposit during that period was \$273. The difference of \$13 is likely a result of the estimates used in our calculations, and/or is a timing difference, as there is no documentation to show the last date the currency machine was emptied by the former City Administrator.

Based on meter readings taken by the city, transmittal and deposit records, and our estimation of water usage for the months the meter was broken, we determined an estimated \$3,248 in bulk water sales receipts was collected but not deposited and is missing. See Appendix C for details regarding meter readings, gallons used, calculated bulk water sales receipts, and transmittals to the city.

Improper and
unsupported credit card
charges

There were improper and unsupported credit card payments made by the city. The city paid a total of \$5,508 to a credit card company from May 2016 to August 2017 without any supporting documentation, and of that amount, \$3,917 pertained to transactions that were improper and personal in nature.

The payments were made toward a credit card in the former City Administrator's name. Five of the 12 payments made by the city were for even dollar amounts rounded to the nearest hundred (e.g., \$300, \$900, \$1,000). No support was submitted to city personnel, the Mayor, or a board member for any of the credit card payments.

The former City Administrator started using a credit card to purchase items in April 2016. City personnel indicated they initially believed this was a city credit card, but later determined it was a personal credit card in the name of the former City Administrator. Monthly statements were addressed directly to the former City Administrator at city hall. The City Clerk indicated she prepared payment vouchers for the credit card disbursements at the direction of the former City Administrator, who told her how much to pay. The City Clerk indicated she prepared payment vouchers for all 12 payments made to

City of Glasgow
Management Advisory Report - State Auditor's Findings

the credit card company; however, only 5 vouchers were available for our review. The City Clerk indicated the other vouchers were removed from city records by the former City Administrator. Our review of the 5 vouchers available showed that 3 were signed by the Mayor and there was no evidence he questioned the lack of supporting documentation for the amounts paid. The other 2 were signed by the former City Administrator.

Questions were raised by members of the public regarding the even-dollar-amount payments to the credit card vendor and the city's independent auditor also raised questions regarding these payments and lack of support for them. The Missouri State Highway Patrol (MSHP) investigation included a review of credit card charges. The MSHP obtained copies of the statements and prepared a schedule of charges by vendor. This listing was provided to the city, which in turn provided it to our office. The listing shows purchases made by the former City Administrator totaling \$6,413, including \$811 to Amazon Marketplace, \$1,099 to Amazon.com, \$107 for H&R Block training, and \$591 for Xbox Live subscriptions. The city paid a total of \$5,508 to the credit card vendor. Based on discussions with city personnel, we determined \$1,591 from the MSHP listing appeared to be legitimate city expenses. The city recouped \$1,130 from the former City Administrator through payroll deductions and his clothing allowance, leaving the balance of personal charges not repaid at \$2,787. The city should seek reimbursement of this amount.

Similarly, payments made to a vendor used for supplies and uniform purchases were not always supported by actual invoices, sometimes only statements were provided. While these disbursements appeared reasonable and related to city operations, there should have been adequate support to justify approval for such payments.

Without actual invoices, the city cannot determine if the purchases were for legitimate work-related items or were personal items that should have been paid for by the employees. The lack of documentation supporting the credit card payments should have caused suspicion and alerted the Board to the misappropriation.

All disbursements should include proper supporting documentation and be approved by the board to ensure the obligations were actually incurred and the disbursements represent appropriate use of public funds.

Drug buy money

A check for \$1,050 was issued to the former City Administrator on January 25, 2017, supposedly to be used for "drug buy" money by a confidential informant. The former City Administrator received approval for this transaction from the Mayor. The City Clerk prepared a payment voucher documenting the various city accounts to which she was instructed to post the check by the former City Administrator. Those accounts were petty cash

City of Glasgow Management Advisory Report - State Auditor's Findings

accounts for police, city hall, streets, water plant, and drug buy, with \$200 charged to each account except drug buy was charged \$250. This payment voucher was signed by the Mayor.

When the Deputy Police Chief was informed of this transaction in September 2017, he indicated he contacted the Howard County Drug Unit to determine if any controlled drug buys had been coordinated with the former City Administrator, and was informed no such buys had been coordinated. No evidence was provided to the city to indicate the money was spent for a controlled drug buy or for any other city purpose, or that it was returned to the city. Due to the lack of support for this transaction, this money is considered missing and should be repaid.

Following is an image of the check. The payee's address and the city's bank account and routing numbers have been redacted.

Overall conclusion

The lack of segregation of duties, inadequate controls, and the absence of proper oversight by the Board, as discussed in the remainder of this report, resulted in missing bulk water receipts, and unsupported and improper disbursements.

Recommendation

The Board of Aldermen work with law enforcement officials regarding criminal prosecution for the missing cash receipts and improper disbursements, and take the necessary actions to obtain restitution. In addition, supporting documentation should be obtained to support all disbursements.

Auditee's Response

We will work with law enforcement officials regarding criminal prosecution and will take necessary action to obtain restitution if possible. We have already changed procedures regarding disbursements and will ensure supporting documentation is reviewed and maintained for all disbursements in the future.

City of Glasgow
Management Advisory Report - State Auditor's Findings

2. Disbursements

Significant weaknesses exist in the controls and procedures over disbursements.

2.1 Questionable purchases

Some purchases were unnecessary and not a prudent use of city resources.

In July 2017, the former City Administrator purchased a tablet computer with a new cellular phone line for internet service. A second phone line was added for himself and a new phone was purchased for that line, along with a smart watch and watch adapter, apparently for his personal use. The City Clerk indicated she questioned him about the increased charges when the July 2017 phone bill arrived, but was told the increased charges were caused by purchasing new phones for his and several other city phone lines. She indicated he did not mention the additional costs were for additional phone lines for himself, a smart watch, or a tablet. Around the same time the former City Administrator was suspended, and based on other concerns raised, the cellular phone provider was contacted and it was determined the additional charges incurred during the second half of 2017 were partially due to the purchases listed above. The city canceled the extra phone lines, but had to pay off the installment balances still due for the new devices, which totaled \$1,180, in December 2017. The monthly charges associated with the additional two unnecessary service lines were \$313 from July to December 2017.

We also identified a pair of earphones purchased in July 2017 and included on the phone bill totaling \$129. It is unclear for whom these were purchased and they are not in the city's possession. The city reduced the number of phone lines from eight to four in December 2017. The former City Administrator was required to return the additional devices when he was suspended on October 19, 2017. City officials indicated the tablet is locked and they do not know the password so it is not usable to the city. They also indicated the smart watch that was returned to the city was not the same model watch that was purchased with city funds.

Taxpayers have placed a fiduciary trust in the Board to spend public funds in a necessary and prudent manner. These expenditures were not a necessary use of city resources.

2.2 City fuel and vehicle usage

The city lacks adequate procedures to account for fuel used by the Public Works and Police Departments. The city purchases gasoline using fuel cards at a local business. During the period July 1, 2016, through June 30, 2018, the city disbursed a total of \$20,849 for fuel charged on fuel cards.

The Public Works Department has 3 fuel cards (1 card assigned to each of the 3 employees) and the Police Department has 3 cards assigned to it for checkout by officers to use as needed. While the former City Administrator had a vehicle assigned for business use, he did not have a separate card

City of Glasgow
Management Advisory Report - State Auditor's Findings

assigned for his use. However, city personnel indicated the former City Administrator had duplicates of all city fuel cards, along with the associated personal identification numbers (PINs). The city did not require individual fuel tickets to be turned in for each purchase and no usage or fuel logs were required for any city vehicles, making it difficult to determine if all fuel purchases were for city vehicles.

In mid-October 2017, shortly before the former City Administrator was suspended (and ultimately resigned), the Deputy Police Chief investigated a call from a citizen that the former City Administrator was using a city fuel card to fuel his personal vehicle. Photographs are taken at the vendor pumps at the time a card is swiped, so photographs were requested from the vendor by the Deputy Police Chief for fuel purchases made on the day in question (October 14, 2017). For one of the three fuel purchases that day, there was a photo of an employee other than the former City Administrator. The remaining two transactions, which were both charged to a public works fuel card, showed a blank image, appearing as though the camera was covered to avoid the photo. The Deputy Police Chief informed us that when he began working for the city the former City Administrator told him that a photograph is taken of the card user at the pump, while other city employees we spoke with indicated they were not aware a photograph was taken each time a card was used.

We reviewed monthly credit card fuel billings from July 2016 through June 2018 and found the total average monthly fuel cost from July 2016 through November 2017, when the former City Administrator had access to fuel cards, was \$949. After his resignation in November 2017, average monthly fuel costs dropped to \$674 for the period December 2017 to May 2018. City personnel were unable to provide any explanation for this significant decrease in fuel usage. There was no change in the number of vehicles being fueled through cards, except that the one driven by the former City Administrator was no longer being used. However, since fuel use dropped over 100 gallons per month, it is unlikely the decrease in usage is attributable to just that one change. Also, since usage/mileage logs are not maintained for any city vehicles we are unable to determine how much the former City Administrator's vehicle was used.

We also reviewed purchases made on weekends with the public works fuel cards, because use of Police Department fuel cards on weekends would be expected. Public works employees do not typically work on weekends unless there is a city emergency. We contacted public works employees to discuss how often they worked weekends. The workers we spoke with recalled only a few instances in which weekend work was required, although the Public Works Supervisor did indicate he had worked a few weekends in the last year and a half and would not have recorded it on a timesheet because he is a salaried employee.

City of Glasgow
Management Advisory Report - State Auditor's Findings

The period of our review was July 2016 through November 2017. We identified 22 purchases of fuel, totaling \$778, made on weekends when payroll records did not indicate overtime was worked by public works employees. We contacted the fuel vendor and requested photographs from the pump for these questionable uses of the fuel cards. The vendor indicated new cameras were installed sometime in early 2017 and the picture quality was much better after that, so only photographs after May 2017 were made available to us. Of the 22 items requested, 11 photographs were provided by the vendor for purchases from June 2017 through October 2017. Three photographs showed city employees purchasing fuel, 1 photograph showed a partial image of a person buying fuel (which city personnel identified as the former City Administrator), and 7 photographs were blank giving the appearance that the camera was covered by the card user.

Due to the lack of records required by the city for fuel purchases, it is difficult to determine if all fuel purchases were appropriate. Requiring fuel tickets be signed by the user, submitted to the City Clerk, and reconciled to invoices helps provide assurance that the fuel billed was charged by city employees and fuel expenses were reasonable and necessary. Failure to account for fuel purchases could result in loss, theft, or misuse going undetected. Without complete and detailed usage/mileage logs, the city cannot effectively monitor the appropriateness of vehicle use and ensure fuel costs are reasonable.

Recommendations

The Board of Aldermen:

- 2.1 Ensure purchases are reasonable and prudent uses of public funds. In addition, the Board should evaluate whether to pursue reimbursement of unnecessary charges from the former City Administrator.
- 2.2 Establish adequate records and procedures to effectively monitor vehicle and fuel use. Fuel tickets should be submitted to the City Clerk and reconciled to fuel invoices. Usage/mileage logs should be maintained for all vehicles and compared to fuel use.

Auditee's Response

- 2.1 *We agree and are in the process of instituting procedures to ensure all purchases are reasonable and prudent uses of public funds. In addition, we will discuss with our city attorney the possibility of seeking reimbursement of the unnecessary charges. We are currently attempting to sell the electronics and phone equipment that was purchased in order to recoup city funds. We plan to research if there is any way to unlock the tablet so we can sell it also.*
- 2.2 *We are in the process of updating our records involving fuel and vehicle usage and are currently establishing policies to monitor vehicle and fuel usage. Fuel tickets are now required to be submitted and usage and mileage logs are now being maintained. The City*

City of Glasgow
Management Advisory Report - State Auditor's Findings

Clerk will begin reconciling usage and purchase invoices monthly with oversight provided by the Mayor.

3. Clothing Allowance Program and Gun Inventory

The city does not have adequate policies and procedures over a clothing allowance program offered to certain city employees. This program allows employees to repay the city for work-related equipment and uniforms, as well as personal items initially purchased by the city on their behalf. In addition, the city has failed to maintain inventory records of city guns and as a result, city personnel cannot account for all city guns.

3.1 Clothing allowances

The city provides a clothing allowance, but formal policies and procedures for the program do not exist and numerous problems were identified with its use. The former City Administrator (who also served as the Police Chief) and police officers received a \$120 quarterly clothing allowance, and the City Clerk and City Collector each received a \$250 annual clothing allowance. Some of these employees had the city make work-related purchases of clothing, equipment, or other uniform items for them directly, along with some purchases of personal items unrelated to work.

The City Clerk maintained manual receivable records (spreadsheets) to track the balances owed by the employees for the purchases made. Clothing allowances were paid to the former City Administrator and police officers quarterly; however, if an amount was shown as owed to the city on an employee's spreadsheet the allowance was used to reduce the amount owed rather than being paid to the employee through payroll. If the quarterly allowance payment was insufficient to fully repay the amount due, then a payroll deduction was also withheld from each paycheck until the amount was repaid. The City Clerk also had a spreadsheet to track personal purchases made by the city on her behalf, but she used payroll deductions to repay amounts owed and did not have her clothing allowance credited to her spreadsheet similar to police department employees. The City Collector did not have the city make purchases on her behalf and thus did not have a spreadsheet. The City Clerk and City Collector received their clothing allowance payments in December of each year.

The city refers to this as a clothing allowance, but our review shows this program operated as an employee loan or savings program. We identified several concerns regarding purchases made and balances carried by employees.

- No formal policies or procedures exist to govern how this program works, such as what type of purchases are allowable, limits on amounts that can be spent, who must approve the purchase, and how repayment will be handled.

City of Glasgow
Management Advisory Report - State Auditor's Findings

- The program is not limited to the purchase of work-related items. We identified numerous personal items purchased by the city for various employees. The city purchased several guns for the former City Administrator and police officers, along with various clothing items, such as sweatshirts and polo shirts. The City Clerk used city-owned gift cards, valued at \$1,200 according to city personnel, to buy home remodeling supplies from a home improvement store. Only \$1,110 was added to her clothing allowance spreadsheet and it is unclear how the remaining \$90 was used. There were also numerous personal purchases for the City Clerk from an office supply store.
- The city has not developed adequate procedures to ensure personal purchases made by the city on behalf of an employee were included on an employee's spreadsheet. Some purchases of personal items made on behalf of the former City Administrator were not added to his spreadsheet timely. When the Deputy Police Chief (later appointed Police Chief after the former City Administrator/Police Chief resigned) began investigating city gun purchases made in recent years and trying to inventory city-owned guns, he identified at least 2 gun purchases not charged to the former City Administrator. One of these guns was purchased by the city in September 2016 and the other in August 2011, but were not added to the former City Administrator's spreadsheet until October 2017 due to the Deputy Police Chief's investigation.

Also added to the former City Administrator's spreadsheet in October 2017 were personal purchases made using his credit card that were paid by the city (see Management Advisory Report (MAR) finding number 1), and a holster and mounted aiming light paid for by a city check. These items, although purchased in preceding years, had not previously been identified for reimbursement to the city. All amounts added to the former City Administrator's spreadsheet were repaid by his resignation date through payroll deductions. It is unclear if the failure to add these to the spreadsheet was an oversight or intentional, but the lack of adequate procedures contributed to the problem.

- Spreadsheets do not always provide sufficient detail to indicate what was actually purchased. Each entry provides only the vendor name and total amount added. Invoices supporting amounts purchased from various vendors related to this program are not filed separately.
- Receivable balances maintained for some city employees utilizing the program were allowed to get very high. Balances for the former City Administrator were as high as \$2,800 at one point and were above \$2,000 for extended periods of time. If all his personal purchases had been added to his spreadsheet timely, the balance could have potentially been even higher at times. Most employees utilized payroll deductions to help

City of Glasgow
Management Advisory Report - State Auditor's Findings

reduce their balances, but the deductions were typically small amounts (e.g., \$25 per pay period) and did not appear to be based on the significance of the balance carried. From 2013 to mid-2016, the former City Administrator had a \$25 deduction taken out each pay period, even though the balance due was substantial during that time period. Our review of the former City Administrator's spreadsheet for the period March 2013 to November 2017 showed his receivable balance ranged from \$60 to \$2,839. Beginning in September 2014, the balance owed was in excess of \$1,000 almost every month, and in many months the balance rose to above \$2,000. To repay these amounts due, payroll withholdings started at \$25 per paycheck, but were increased to \$75 per paycheck in July 2016 as the balance continued to increase. Eventually the balance reached over \$2,800 shortly before the City Administrator was suspended, causing the city to withhold significant portions of his final three paychecks, totaling \$2,094, upon his resignation to recoup amounts due.

Similarly, balances for several other employees were in excess of \$500 on numerous occasions and the City Clerk had a balance in excess of \$1,000 at one point. One employee had a balance due to the city in excess of \$400 for almost a year. Even though \$25 deductions were taken from each paycheck during that period, repayment of his balance was not done timely and eventually the city had to withhold \$570 from his final paycheck upon his resignation as a full-time officer to obtain repayment.

- Some employees continued to have withholdings taken from each paycheck, regardless of purchase activity, resulting in credit balances to the employees. In 2 instances, individuals left city employment with a credit balance that the city had to pay them upon their resignation.
- Multiple instances were noted in which compensatory time earned was used to give employees credit on their clothing allowance spreadsheet for amounts owed, rather than handling these payments through the normal city payroll process. As a result, these amounts were not subject to payroll withholdings and were not reported on the respective W-2 forms.
- Procedures have not been established to ensure proper taxes are paid. Internal Revenue Service (IRS) regulations were not followed regarding clothing allowances. Employees receiving a clothing allowance do not submit invoices or itemized expense reports to support the allowances, nor were the allowances reported on their W-2 forms. While some employees are using the clothing allowance to repay the city for work-related equipment and uniform purchases, others are clearly using it to repay the city for personal items and thus, should be paying income taxes on the clothing allowances received. Also, the practice of having the city

City of Glasgow
Management Advisory Report - State Auditor's Findings

purchase personal items to be repaid later allowed employees to avoid paying applicable sales taxes.

- The manner in which employees utilized clothing allowances was allowed to expand into more of a loan or savings program for employees. This resulted in additional and unnecessary recordkeeping and monitoring on the part of the city. Lending money to employees in this manner violates constitutional provisions against lending credit to individuals.

This program should be limited to only work-related purchases if it continues to be operated in this manner. If the clothing allowance provided is insufficient to repay the city for items purchased, the city should be promptly repaid any amounts due. A written policy is necessary to establish and document what is allowed to be purchased under this program and to ensure approval is obtained for any purchases made. Policies and procedures related to this program should be reviewed to ensure all relevant purchases are properly reimbursed and to ensure employees are not abusing the program for personal gain. IRS regulations require employee business expenses not accounted for to the employer be considered gross income and payroll taxes be withheld from the undocumented payments. Article VI, Section 23 of the Missouri Constitution specifically prohibits political subdivisions of the state from lending credit or granting public money to any corporation, association, or individual.

3.2 Gun inventory

Numerous guns were purchased for police officers through their clothing allowance in recent years and city personnel did not perform an annual inventory to ensure city-owned guns were accounted for properly. Due to the lack of a written policy or procedures for the clothing allowance program and other concerns identified in section 3.1, the city's investigation of concerns expressed about the purchase of guns was made more difficult. City personnel believe several city-owned guns are missing.

The former City Administrator and several police officers had the city purchase guns for them in recent years, which were then added to their clothing allowance spreadsheet to allow them to reimburse the city for the purchases over time. Based on the poor records maintained by the city for these gun purchases, it is unclear whether the guns were service-related or purchased for personal use. Between April 2013 and October 2017, the former City Administrator purchased 8 guns, costing a total of \$5,070, through this program. One of these guns had to be returned by the former City Administrator after investigation by the Deputy Police Chief discovered it was an automatic weapon which can only be owned by a law enforcement agency or the military. The others are believed to have been purchased by the former City Administrator and resold to private citizens or kept for personal use.

City of Glasgow
Management Advisory Report - State Auditor's Findings

Another entry on the former City Administrator's spreadsheet indicates 2 guns were purchased from a public works employee in September 2016 for \$600, but it appears no guns were actually purchased. We discussed this transaction with the public works employee who indicated the former City Administrator asked him to say some guns were purchased by the city from him for \$600 and to cash the check and give the funds to the former City Administrator, which he did. The amount of the supposed purchase was added to the former City Administrator's spreadsheet and was later repaid. It appears this transaction was essentially a cash advance from the city to the former City Administrator, facilitated by creating a story about buying guns.

The Deputy Police Chief attempted to sort through invoices for gun purchases to determine what guns should have been on hand within the police department and was unable to locate all weapons purchased. In several instances, upon questioning the former City Administrator, the Deputy Police Chief determined a gun was not on hand and should be added to the spreadsheet maintained for the former City Administrator as the purchase of a personal weapon requiring repayment to the city. The gun purchase invoices we reviewed do not clearly indicate if the guns were purchased as city service weapons or for personal use. The Deputy Police Chief believes as many as 3 weapons purchased by the city, and not paid for by an employee, are missing.

In addition, the practice of having the city purchase guns and then allowing city employees to purchase for personal use allows officers to avoid paying all applicable taxes on the purchases. City purchases of guns are exempt from federal excise taxes.

The Board should determine whether to continue operating this program. The overall lack of records related to gun purchases increases the likelihood that this program will be abused and city-owned guns will not be accounted for properly. To ensure all city owned guns are properly accounted for, periodic inventories of all city-owned guns should be performed.

Recommendations

The Board of Aldermen:

- 3.1 Develop a written policy for the clothing allowance program, make a determination if the allowance is necessary for all employees, and ensure all items purchased are work related. In addition, ensure employees submit itemized reports of uniform clothing purchases or report the allowance payments as other income on the W-2 forms. In addition, ensure policies are established so that constitutional provisions are not violated and all appropriate taxes are paid.
- 3.2 Determine if the city will continue to provide service-related weapons through the clothing allowance program and ensure periodic inventories of city-owned guns are performed.

City of Glasgow
Management Advisory Report - State Auditor's Findings

Auditee's Response

- 3.1 *We plan to discuss the continuance of this program with our City Attorney. If continued, we will develop necessary policies and procedures to govern the program in accordance with constitutional provisions, which will include who is eligible, what type of purchases are allowable, and what type of records need to be maintained to support any purchases made. We will ensure IRS regulations are followed based on whatever decision is made.*
- 3.2 *We will discuss this recommendation with our Police Chief and City Attorney and determine an appropriate course of action. If continued, applicable policies and procedures will be developed. In addition, we will ensure inventories of all city-owned guns are performed periodically.*

4. Accounting Controls and Procedures

4.1 Lack of oversight

The city has not established adequate oversight procedures. In addition, the Board combined city positions, creating a potential conflict of interest, in violation of state law.

The city had not established adequate segregation of duties and independent or supervisory reviews over the various financial accounting functions performed by the former City Administrator and his staff.

The City Clerk and City Collector were each responsible for all accounting functions of the city, to be performed at the direction of the former City Administrator. The former City Administrator also had the ability to perform all accounting functions. However, duties were not assigned with any consideration of segregation or reviews.

No oversight of receipting procedures or deposits was performed by an independent person and oversight by the Board was insufficient. For receipting functions performed by the former City Administrator himself, such as bulk water sales collections, no procedures were in place to ensure funds were transmitted and deposited, and questions were not asked by city staff regarding discrepancies. As discussed in MAR finding number 1, various weaknesses existed with posting transactions to the accounting system and transmittals of funds collected. There is no evidence the Mayor or members of the Board were notified of discrepancies. Independent oversight of receipt and deposit functions by an independent person is necessary because receipt reports provided to the Board at meetings are not intended to be detailed enough for Board members to determine if a particular receipt was actually deposited.

While the Board did receive a detailed listing of each disbursement that showed the vendor, amount, and fund from which each payment was made, the Board was apparently not asking questions or seeking explanation for any

City of Glasgow
Management Advisory Report - State Auditor's Findings

of the questionable disbursements listed, such as credit card payments. The payments made to the credit card company for the former City Administrator's credit card were included on the listings, but there is no evidence that the Board questioned any of those payments, even though several were for rounded dollar amounts and the city did not have a credit card. In addition, the Board should have been aware, that invoices and/or statements from the credit card company were not available for review because the Mayor approved several payment vouchers without supporting invoices or statements. Furthermore, while checks do require two signatures, the signers other than the City Clerk do not review supporting documentation for each check before signing it, and the numerical sequence of checks issued is not accounted for by an independent person. These weaknesses are significant and demonstrate a lack of proper oversight by the Board.

The Board should take steps to ensure it is adequately monitoring city accounting functions and records, and the financial activity of various city funds. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded.

The lack of adequate controls and the absence of proper oversight by the Board allowed unsupported and questionable payments, improper personal purchases, and missing monies to occur. If proper controls and oversight procedures had been in place, it is likely some of the problems noted in this report would have been detected more timely and/or prevented.

4.2 Combined positions

The combination of the positions of City Administrator and Police Chief violated state law and created a potential conflict of interest.

The former City Administrator was initially hired as a city police officer in October 2000 and promoted to Police Chief in January 2004. The Board appointed him as City Administrator in May 2013, but he also continued to serve as the Police Chief until his resignation in November 2017. The City Administrator was responsible for oversight of financial accounting functions and for providing general supervision of the various departments and functions of the city (including the police department). The combination of these positions represented a violation of state law and resulted in potentially conflicting duties.

Section 77.044, RSMo, states that a city administrator shall devote his full time to the performance of the duties of his office. Statutes require the city administrator's position be full time, and therefore, would prohibit this combination of positions.

City of Glasgow
Management Advisory Report - State Auditor's Findings

Recommendations

The Board of Aldermen:

- 4.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.
- 4.2 Ensure any future City Administrator does not serve in a dual role capacity.

Auditee's Response

- 4.1 *We will work together to develop appropriate independent oversight procedures for all city accounting functions performed by city staff.*
- 4.2 *We are not currently planning to fill this position; however, in the event we do hire another City Administrator, we will not hire an individual in a dual role capacity.*

City of Glasgow

Organization and Statistical Information

The City of Glasgow is located in Howard and Chariton Counties. The city was incorporated in 1836 and is currently a fourth-class city. The city employed 9 full-time employees and 24 part-time employees on June 30, 2017.

City operations include utility services (water, sewer, and trash), police, maintenance of streets, and parks.

Mayor and Board of Aldermen

The city government consists of a mayor and 6-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2017, are identified below. The Mayor is paid \$300 per month and the Board of Aldermen members are paid \$25 per meeting. The compensation of these officials is established by ordinance.

Fred Foley, Mayor
Chris Damron, North Ward Alderman
Cheryl Adams, North Ward Alderwoman
Kirk Biere, Central Ward Alderman
Kendrick Davis, Central Ward Alderman
Don White, South Ward Alderman
James (J.Y.) Miller, South Ward Alderman

Other Principal Officials

The City Administrator, City Clerk, City Collector, and Police Chief are appointed positions. The City Attorney is a contracted position. The City's principal officials at June 30, 2017, are identified below:

Kevin Atwood, City Administrator/Police Chief (1)
Jenny Fuemmeler, City Clerk
Flora Emmerich, City Collector
Randall Barron, City Attorney

(1) Kevin Atwood resigned November 19, 2017. Charlie Polson was appointed Police Chief on December 18, 2017. The City Administrator position was not filled and remains vacant.

Financial Activity and Supporting Documentation

Appendixes A and B present a summary of the city's financial activity for the year ended June 30, 2017. The information was obtained from the city's independent financial statement audit report.

Appendix C provides supporting documentation of missing monies from the currency-operated bulk water sales machine.

- A The flow meter was installed sometime in May 2013, but actual meter readings from June through November 2013 were not maintained.
- B Transmittals were made on August 6, 2013, for \$131, September 13, 2013, for \$221, and November 19, 2013, for \$80.
- C This is estimated usage because the flow meter was broken during this time. The estimated usage is based on total gallons sold from January 2014 to June 2017 (462,100) divided by months (42), or approximately 11,000 gallons per month. Applying the cost of \$6.25 per thousand gallons results in a calculated revenue estimate of \$68.75 per month. A new meter was installed on December 15, 2017.

Office of Missouri State Auditor
Nicole Galloway, CPA

**Smithville Area Fire Protection
District**

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Smithville Area Fire Protection District

Incentive Payments	The Smithville Area Fire Protection District paid \$209,072 in year-end incentive payments (including fringe benefits), to all full-time district employees (including the Fire Chief and Assistant Fire Chief) between December 2011 and December 2015. These payments are likely bonuses and in violation of the Missouri Constitution, because they are not part of a formal pay plan and seem to represent additional payments for services previously rendered because there is no documentation of additional hours worked by district employees to support the payments.
Fire Station #3	The Board authorized the issuance of general obligation bonds in 2015 with the proceeds to be used for the construction of a new fire station, Station #3, at a cost of approximately \$1.8 million. However, the Board did not ensure the district had sufficient funding available to staff the station and cover ongoing and future operational and maintenance costs associated with it. Additionally, the district did not retain any documents related to preplanning and development of the station.
Firefighter Safety and Training	The district has not established adequate policies and procedures for firefighter safety and health, training, and respiratory protection. The district has not established a written occupational safety and health program or a written training, education, and professional development program. The district has not implemented a written respiratory protection program and has not performed testing on respirators as recommended by the manufacturer.
Procurement Procedures and Contracts	Controls and procedures over procurement and district contracts need improvement. The district has not established policies and procedures for the selection of vendors providing professional services. In addition, the district did not solicit requests for proposals for various professional services, has not periodically conducted a competitive selection process for various professional services, and did not always enter into written contracts with the providers selected. The district does not have a formal bidding policy and bids were not solicited for several purchases.
Accounting Controls and Procedures	Weaknesses exist with the district's accounting controls and procedures. The Board has not established adequate segregation of duties and review processes over the various financial accounting functions performed by the Fire Chief and Administrative Assistant. The district does not have procedures to follow up on and resolve differences between accounting records and bank reconciliations timely. Significant weaknesses exist in the district's procedures for receipting monies and making deposits.
Disbursements	Controls and procedures over district travel and training expenditures, credit card purchases, and payment for local meals need improvement. The district incurred unnecessary travel and training costs due to the former Fire Chief traveling to the location of but not attending a conference. In addition, the district paid excessive travel advances for meals and incidental expenses to district employees. The district did not maintain adequate documentation to support some disbursements made using district credit cards and district review procedures for credit card purchases need improvement. The Board has not established a policy for providing employee meals while not on travel status.

Sunshine Law	The Board's procedures for complying with the Sunshine Law, maintaining minutes of meetings, and retaining copies of certain email messages need improvement. The Board did not comply with state law regarding meeting minutes and closed sessions. The district did not retain adequate documentation to support certain Board decisions and meeting minutes do not typically include Board discussions held to support decisions made. The district has not adopted a written policy regarding public access to district records as required by state law. The district does not send the Fire Chief (the custodian of records) copies of email messages that are considered to be a public record under state law.
District Policies And Procedures	District policies and procedures need improvement. The Board has not established written bylaws or other formal policies and procedures for the administration of the district. The district's Standard Operating Guidelines, which serve as a guide for operations within the district and are designed to assist employees in performing their job duties, do not include guidelines to address certain important issues. The Board did not prepare annual budgets for all district funds as required by state law and budget documents did not include all statutorily required information.
District Property and Vehicle Usage	Controls and procedures over district property and vehicle usage need improvement. District procedures for the maintenance and repair of vehicles and equipment are not adequate. The district's employment contract with the former Fire Chief stated the district must provide him with a vehicle and fuel to be used for district business and personal use. However, the contract did not include language that limited or further explained allowable/unallowable personal use and any associated record-keeping or reporting requirements. The district has not developed procedures to identify capital asset purchases and dispositions throughout the year and records to account for district property are not adequate.
Employment Contracts	The district entered into multi-year employment contracts without terms allowing the district to terminate the employee for reasons other than for cause.
Electronic Data Security	The district does not have security controls in place to lock computers after a specified number of incorrect logon attempts. In addition, the district does not periodically test for recovery of data from backup files.

In the areas audited, the overall performance of this entity was **Poor**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Board of Directors
Smithville Area Fire Protection District

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Smithville Area Fire Protection District. We have audited certain operations of the district in fulfillment of our duties. The district engaged Accounting Solutions Group, LLC, a Certified Public Accounting firm, to audit the district's financial statements for the year ended December 31, 2016. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2016. The objectives of our audit were to:

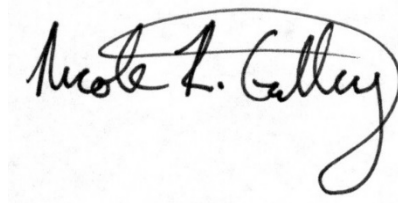

1. Evaluate the district's internal controls over significant management and financial functions.
2. Evaluate the district's compliance with certain legal provisions.
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; inspection of capital assets; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and its audited financial report and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Smithville Area Fire Protection District.

Smithville Area Fire Protection District

Management Advisory Report

State Auditor's Findings

1. Incentive Payments

The Smithville Area Fire Protection District paid \$209,072 in year-end incentive payments¹ (including fringe benefits), to all full-time district employees (including the Fire Chief and Assistant Fire Chief) between December 2011 and December 2015. While these payments were authorized by the Board of Directors, the actual payments exceeded initial estimates presented to the Board for approval by \$32,500 (before taxes). In addition, we found the incentive payments made were based on inaccurate or unreasonable calculations, which inflated the total amount paid by \$86,360.

These payments are likely bonuses and in violation of the Missouri Constitution, because they were not part of a formal pay plan and seem to represent additional payments for services previously rendered because there is no documentation of additional hours worked by district employees to support the payments. In November 2011, the Board approved a one-time payment in lieu of a raise (incentive payment) based on 10 percent of the annual budget carryover as recommended in a proposal from the former Fire Chief. Board meeting minutes indicated these incentive payments continued to be authorized annually between 2012 and 2015. According to the former Fire Chief's proposal to the Board, he recommended that the district implement an annual employee incentive program to encourage district employees to be "conservation minded in all aspects of the (district's) operations." There is no documentation indicating the employees were informed of the purpose of the incentive payments or that the employees were subsequently evaluated on the success of the program prior to the incentives being paid each year.

Incentive payment process not formalized

While the Board approved the proposed funding of these incentive payments annually based on the former Fire Chief's estimated annual budget carryover, the Board did not directly approve individual incentive payments and we saw no documentation to indicate the Board received detailed information on individual incentive payments made or was informed the actual incentive payments significantly exceeded the initial estimates provided. In addition, the process to award these incentive payments to district employees was not formalized or documented to clearly define how the annual budget carryover amount used to determine these incentive payments would be calculated.

According to a November 16, 2011, letter to the Board from the former Fire Chief, the incentive payments would be based on 10 percent (increased to 15 percent in 2014) of the annual budget carryover and would be included on the employee's last paycheck before Christmas. However, the process to determine the annual budget carryover was never clearly defined. While this

¹ Annual incentive payments paid to district employees between 2011 and 2015 totaled \$174,176. The district incurred \$21,571 in additional costs for retirement benefits and \$13,325 in employer payroll taxes (Social Security and Medicare).

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

2011 letter did not provide an estimated incentive payment total, letters submitted to the Board in subsequent years included an estimated incentive payment amount per employee based on 12 full-time employee (FTE) positions.

The following table shows the estimated incentive payment per district employee and the total estimated incentive payment amount presented to the Board by the former Fire Chief. In addition, this table includes the combined actual incentive payment amounts paid for the years 2012 through 2015 and documents the difference between estimates presented to the Board for approval and actual incentive payments made.

Incentive Year	Estimate per FTE	Total Estimate Presented to Board	Actual	Difference
2012	\$ 1,600	19,200	28,469	9,269
2013	1,350	16,200	21,005	4,805
2014	3,000	36,000	47,037	11,037
2015	3,600	43,200	50,589	7,389
Total	\$ 9,500	114,600	147,100	32,500

The actual incentive payments paid in each of these years exceeded the estimated amount presented to the Board. In total, between 2012 and 2015, actual incentive payments exceeded estimated amounts presented to the Board by approximately \$32,500 (before taxes).

Incentive payment
calculations

In July 2017, the State Auditor's Office (SAO) began requesting documentation from the district detailing how these annual incentive payments had been calculated. Initially, district personnel could not locate any documentation detailing how the former Fire Chief calculated the budget carryover amount used each year when determining employee incentive payments. On October 10, 2017, they located documentation detailing how the incentive payments had been calculated between 2012 and 2015. The SAO issued subpoenas to both the district and the former Fire Chief (see Appendixes B and C) to obtain documentation of how the 2011 incentive payments had been calculated. However, neither district personnel nor the former Fire Chief could locate documentation to support incentive payment calculations for 2011.

We reviewed incentive payment calculation documentation provided by the district to determine how the former Fire Chief had calculated the annual budget carryover amount used in the annual incentive payment calculation. Based on our review, the former Fire Chief determined the budget carryover amount each year based on the sum of variances between budgeted and actual revenues and expenditures. However, the budget variances documented in

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

supporting documentation were not always mathematically accurate. In addition, budget variances were determined prior to the end of the year and did not always include adjustments for remaining year-end activity.

The following table shows the former Fire Chief's estimated budget carryover for each year the district authorized incentive payments based on documentation obtained from the district, with the exception of 2011, as compared to the actual budget carryover we calculated based on audited financial statements. For 2011, we calculated the estimated budget carryover of \$270,770 based on the \$27,077 in incentive payments paid that year. We determined that the estimated budget carryover amounts significantly exceeded the actual budget carryover amounts (per audited financial statements). In total, for the 5 years in which incentive payments were given, the estimated carryover exceeded the actual carryover by more than \$672,000.

	2015	2014	2013	2012	2011	Total
Estimated Carryover	\$ 337,258	313,579	209,781	284,690	270,770	1,416,078
Actual Carryover (1)	149,283	120,065	116,814	242,230	114,826	743,218
Difference	187,975	193,514	92,967	42,460	155,944	672,860
Board Approved Incentive	15%	15%	10%	10%	10%	
Excess Incentive Payment	\$ 28,196	29,027	9,297	4,246	15,594	86,360

(1) Based on the General Fund's excess of cash receipts over cash expenses reported in the district's annual financial statement audit.

Differences between the estimated carryover amount calculated by the former Fire Chief and the actual carryover amount calculated by the SAO based on audited financial statements, include:

- The former Fire Chief included property tax revenue derived from the district's general obligation bond levies in Clay County and Platte County in excess of budgeted amounts in the estimated carryover calculation. However, this revenue is restricted for the principal and interest on the district's general bond obligations and is not used for ongoing operational costs of the district. Therefore we excluded it when calculating the actual carryover balance for the General Fund.
- Variances between budgeted and actual revenues and expenditures used to calculate the estimated budget carryover were based on actual revenues and expenditures through mid-December and adjustments to these variances, if any, for additional revenues and/or expenditures incurred through the remainder of the year were not sufficient. Our actual carryover amount calculation was based on actual total revenues and expenditures for the year.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

Conclusion

Because the former Fire Chief inflated the estimated carryover each year by including restricted revenues and not including all General Fund revenues and expenditures for the year, incentive payments made to district employees between 2011 and 2015 exceeded amounts authorized by the Board by \$86,360 (before taxes).

The annual incentive payments likely represented additional compensation for services previously rendered and, as such are in violation of Article III, Section 39(3), the Missouri Constitution, and contrary to Attorney General's Opinion No. 72-1955 (June 14, 1955), which states, "... a government agency which derives its power and authority from the Constitution and laws of this state would be prohibited from granting extra compensation in the form of bonuses to public officers or servants after the service has been rendered."

Recommendation

The Board of Directors should ensure all employee compensation is authorized by the Board, documented in a formal pay plan as appropriate, and in compliance with state law.

Auditee's Response

The "incentive payment" program has not been followed since 2015. No member of the current Board of Directors approved the implementation or execution of the program and the current Fire Chief has no plans to propose any similar payments.

The Board agrees that the payments, as approved and made in 2011 through 2015, were an improper use of public funds in violation of the Missouri Constitution. The Board also agrees that it appears the payment amounts were calculated improperly, and were overpayments of even the amounts "approved" by the former Board.

The current Board and the Fire Chief are committed to a pay plan that fairly compensates the district's employees, helps ensure the professionalization of the staff, and complies with state and federal law.

2. Fire Station #3

The Board authorized the issuance of general obligation bonds in 2015 with the proceeds to be used for the construction of a new fire station, Station #3, at a cost of approximately \$1.8 million. However, the Board did not ensure the district had sufficient funding available to staff the station and cover ongoing and future operational and maintenance costs associated with it. Additionally, the district did not retain any documents related to preplanning and development of the station.

Station #3, located at 18315 Collins Road in Smithville, Missouri, was placed into operation in May 2017 with minimal equipment and no staff. As of August 1, 2018, this station continues to be unstaffed and all emergencies are responded to from Station #2. While district officials have indicated they will not be able to staff Station #3 without a tax increase, which requires approval

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

by district citizens, they have not completed a cost analysis to support this statement.

In 2009, the district received a donation of 2 acres of land for the construction of a new fire station and in November 2012 voters approved issuance of \$3 million in general obligation bonds to construct and furnish a new fire station and acquire fire trucks and other firefighting and rescue equipment. However, the associated general property tax levy increase necessary to finance increased staffing and the subsequent operations and maintenance of the new fire station failed at that election (November 2012) and again in a special election in August 2013. The district has not attempted to pass a general property tax levy increase since August 2013.

In July 2013, the district paid an architectural firm to prepare a preliminary design of the new fire station. The district opted to move forward with the construction of the new fire station in July 2014, even though the general property tax levy increase had failed to pass. The district published a request for qualifications (RFQ) for an architectural firm to assist in the construction of the station in September 2014. However, as discussed further in MAR finding number 4.1, the evaluation of RFQ's received was not documented. The district authorized the issuance of the general obligation bonds in December 2015.

According to the former Fire Chief, the district decided to move forward with the construction of the new fire station in 2015, even though the general property tax levy increase had failed to pass, because construction costs and costs to purchase equipment for the new fire station continued to increase annually thereby decreasing the bond's purchasing power. In addition, the district wanted to place the station in operation in hopes it would improve the district's fire protection rating and lower the cost of homeowners insurance for district citizens.

District officials could not provide any documentation to support how they determined the bond amount necessary to fund the construction of the new fire station and purchase additional equipment. In addition, the district has not performed an analysis of the proposed additional costs that would be associated with staffing, operating, and maintaining the new fire station and documented that an increase to the district's general operating tax levy is necessary to fund the new fire station's operations. The SAO obtained assurances from the district that this documentation does not exist after we were forced to issue subpoenas to the district and former Fire Chief (see Appendixes B and C) after making multiple requests to obtain the documentation.

Long-term financial planning, including determining funding needs for all operating and maintenance costs of the district, is essential to ensure district resources are used effectively and efficiently. Failure to adequately plan for

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

future needs and potential contingencies may result in wasted resources and/or underutilized assets.

Recommendation

The Board of Directors should determine additional funding necessary to pay for expenses associated with ongoing and future operations and maintenance costs, including staffing, for Station #3. In addition, the Board should evaluate options to fund these additional costs.

Auditee's Response

The Board of Directors agrees that the 2015 authorization of general obligation bonds committed the district to the construction of a fire station without a clear funding plan for staffing the station. None of 2015 Board members remain on the Board. Since that time, the district has increased the number of directors from three to five, hired a new Fire Chief, and increased staffing levels. With new, stabilized leadership in place, and construction on station #3 complete, the Board will evaluate options for funding operations at the new station. This will be a part of the district's current engagement with a consultant to develop a strategic plan for the district's next 3 to 5 years. The Board expects this to play a big role in addressing the audit concerns over operations and staffing at Fire Station #3. Through this process, the Board hopes to demonstrate commitment and competence to the citizens of the district, and present a funding plan appropriate for the district's future.

3. Firefighter Safety and Training

The district has not established adequate policies and procedures for firefighter safety and health, training, and respiratory protection.

3.1 Safety and training programs

The district has not established a written occupational safety and health program or a written training, education, and professional development program. All volunteer district firefighters are required to have basic firefighter certification. All full-time district firefighters are required to have firefighter I and II certifications. The district has numerous training sessions on a variety of topics available in-house; however, a written training program has not been developed.

A written safety program is necessary to protect firefighters from injury and occupational diseases resulting from exposure to hazardous materials and environments. A written training program is necessary to provide firefighters with the best possible preparatory knowledge, skills, and abilities in order to provide district citizens with safe, efficient, and effective emergency response services. In addition, written safety and training programs could limit the district's potential liability for insurance and legal claims.

3.2 Respiratory protection

The district has not implemented a written respiratory protection program and has not performed testing on its respirators as recommended by the manufacturer.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

The district did not perform annual performance and fit testing² on the respirators (self-contained breathing apparatuses [SCBA]) used by district employees between 2013 and 2016. The former Fire Chief stated he was not aware these tests were needed. These tests were scheduled by the current Fire Chief upon being appointed as Acting Fire Chief in March 2017. Performance tests were performed in April 2017 and fit tests were performed in June 2017.

A written respiratory protection program is necessary to ensure (1) fit testing and performance testing are performed on the SCBA's in accordance with the manufacturer's recommendations, (2) the SCBA's are properly inspected and maintained, and (3) employees are trained on potential respiratory hazards and proper use of the respirators. The manufacturer recommends fit testing prior to initial use of the respirator, whenever a different respirator face piece is used, and at least annually thereafter. In addition, the manufacturer recommends SCBA's be tested on a breathing machine at least annually.

Recommendations

The Board of Directors:

- 3.1 Seek assistance from available resources, including the state Fire Marshal's Office in the Missouri Division of Fire Safety and the University of Missouri Fire and Rescue Training Institute, and develop a written occupational safety and health program and a written training program for district firefighters.
- 3.2 Establish a written respiratory protection program and ensure self-contained breathing apparatuses are tested in accordance with the manufacturer's recommendations.

Auditee's Response

- 3.1 *The district will be evaluating and developing a training and professional development program, including a program on occupational safety and health, for future implementation through the development of new Standard Operating Guidelines (SOGs) which are in the process of being rewritten.*
- 3.2 *Annual SCBA testing had resumed prior to this audit's findings being issued, with testing occurring in 2017 and 2018. A written policy will be developed during the Board's strategic planning and the development of new SOGs.*

² A fit test ensures the seal between the respirator's face piece and the face are adequate to prevent leaks. A performance test ensures the SCBA maintains positive pressure in the face piece throughout the breathing cycle to ensure the wearer will not inhale any of the external atmosphere.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

4. Procurement Procedures and Contracts

Controls and procedures over procurement and district contracts need improvement.

4.1 Professional services and contracts

The district has not established policies and procedures for the selection of vendors providing professional services. In addition, the district did not solicit requests for proposals for various professional services, has not periodically conducted a competitive selection process for various professional services, and did not always enter into written contracts with the providers selected. Our review of disbursements for professional services incurred during the year ended December 31, 2016, noted the following issues:

Service Provided	Cost (1)	Competitively Procured	Written Contract
Litigation services	\$ 16,973	No	Yes
Information systems and information technology services	9,996	No	Yes
Auditing services	5,200	No	Yes
Legal services	2,430	No	No

(1) Total amount expended for the year ended December 31, 2016.

Until March 2017, the same attorney provided legal services to the district for approximately 6 years without solicitation of proposals during that period and the district had not entered into a written contract for these services. In March 2017, the Board informally solicited proposals for a new attorney based on a list of attorneys recommended. While the Board received proposals from 3 separate law firms, district officials did not document the evaluation process used to select the new attorney and did not enter into a written contract with the attorney for these services. The Board President indicated the attorney selected was the least expensive of the attorneys interested in representing the district. In addition, the district has used the same independent CPA firm since 1991 to perform its annual financial statement audits and no proposals have been solicited during that period.

In addition, while the district published a notice requesting qualifications of architectural firms for design and consulting services associated with the construction of Station #3 in September 2014; the district did not document the evaluation process used to determine the most qualified architectural firm. The district received qualifications from 5 architectural firms and selected the architectural firm that had previously provided preliminary designs for Station #3 in July 2013. The district paid the firm \$110,785 for the design services. The SAO obtained assurances from the district that this evaluation does not exist after we were forced to issue subpoenas to the district and former Fire Chief (see Appendixes B and C) after making multiple requests to obtain the documentation.

Smithville Area Fire Protection District Management Advisory Report - State Auditor's Findings

Soliciting proposals for professional services is a good business practice, helps provide a range of possible choices, and allows the district to make better-informed decisions to ensure necessary services are obtained from the best qualified provider taking expertise, experience, and cost into consideration. In addition, documentation of the evaluation and selection process should be retained to demonstrate compliance with applicable laws or regulations and support decisions made. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

4.2 Bidding

The district does not have a formal bidding policy and bids were not solicited for the following purchases made during the year ended December 31, 2016.

Item	Cost
Comprehensive general and automobile liability insurance	\$ 30,078
Pumper 12 repairs	14,000
Pumper 11 repairs	14,084

In addition, while the former Fire Chief indicated all bidding requirements were followed for the installation of a solar electric system and solar panels at Station #3 (\$146,495), the installation of a paging and alert system at Station #2 (\$20,973), the replacement of the roof at Station #1 (\$33,176), and the purchase of a pumper hose (\$10,698), district personnel could not provide any documentation showing the district published a notice for these bids, as required by state law. The SAO obtained assurances from the district that this documentation does not exist after we were forced to issue subpoenas to the district and former Fire Chief (see Appendixes B and C) after making multiple requests to obtain the documentation.

Section 321.220(4), RSMo, requires the district to publish notice for bids on purchases of \$10,000 or more. In addition, competitive bidding helps ensure all parties are given an equal opportunity to participate in the district's business. Documented formal bidding procedures provide a framework for economical management of district resources and help ensure the district receives fair value by contracting with the lowest or best bidders. Complete documentation should be maintained for all bids received and reasons noted why the bid was selected.

Recommendations

The Board of Directors:

- 4.1 Periodically solicit proposals for professional services and enter into written contracts for those services. In addition, the Board should establish a policy to address the selection of professional services.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

- 4.2 Establish formal bidding policies and procedures, including documentation requirements related to bid specifications, the bids or quotes received, and justification for bids selected and maintain documentation of decisions made.

Auditee's Response

- 4.1 *The district has begun the process of rebidding its legal, accounting, and informational technology providers and plans to have new agreements in place by the end of 2018. New agreements will be in writing. Written guidance on the subject will be developed and implemented with the SOGs rewrite that is in progress.*
- 4.2 *Bid policies and procedures will be developed in conjunction with the SOGs rewrite that is in progress.*

5. Accounting Controls and Procedures

Weaknesses exist with the district's accounting controls and procedures. The district receives monies for sales and property taxes, permits, inspections, reports, and other miscellaneous items.

5.1 Segregation of duties and oversight

The Board has not established adequate segregation of duties and review processes over the various financial accounting functions performed by the Fire Chief and Administrative Assistant.

The Administrative Assistant is responsible for all duties related to collecting and recording monies received, preparing and making deposits, making disbursements based on authorization by the Fire Chief, and performing monthly bank reconciliations. The Fire Chief typically documents his review and approval of authorized disbursements, but does not perform a documented review of other accounting functions and records.

While a Board member signs all checks, a documented review and approval of individual invoices and other supporting documentation is not performed. In addition, the list of disbursements approved by the Board each month does not include payroll disbursements (approximately \$53,440 per month during the year ended December 31, 2016).

The lack of segregation of duties and adequate oversight allowed many of the issues described throughout this report to occur.

To reduce the risk of loss, theft, or misuse of funds, and ensure all transactions are accounted for properly and assets are adequately safeguarded, adequate controls, including proper segregation of duties, and Board oversight of accounting functions is necessary. In addition, the Board should require a complete and accurate list of all disbursements be provided for its review approval and ensure the list is compared to individual invoices and other supporting documentation.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

5.2 Bank reconciliations

The district does not have procedures to follow up on and resolve differences between accounting records and bank reconciliations timely. The Capital Project Fund's book balance was overstated by \$3,204,132 for almost 2 years. In December 2015, the district received \$3,204,132 in bond proceeds and the district's accountant posted a journal entry in the accounting system to record this transaction. In January 2016, the Administrative Assistant recorded the receipt of these bond proceeds again in the accounting system, not realizing the accountant had already posted this transaction to the system, resulting in an overstatement of \$3,204,132. In October 2016, the district's accountant provided the Administrative Assistant the journal entry necessary to reverse the duplicate entry; however, this reversing entry was posted incorrectly to the financial records and the accounting error not corrected until November 2017.

Failure to resolve differences and reconciling items timely increases the risk that other errors or misstatements will not be detected and corrected timely.

5.3 Receipting and depositing

Significant weaknesses exist in the district's procedures for receipting monies and making deposits. Receipt slips were not issued for some monies received. In addition, deposits were not made timely or intact and receipts are not kept in a secure location until deposited.

- District personnel do not always issue receipt slips for monies received. A cash count performed on May 9, 2017, identified 7 of 10 receipts, including 6 checks and 1 cash receipt totaling \$7,925 of the \$8,000 counted, had not been receipted. The Administrative Assistant indicated she issues receipt slips for all monies she receives; however, receipt slips are not always issued for monies received when she is not present.
- The Administrative Assistant does not deposit receipts intact or timely and does not account for the numerical sequence of receipt slips issued. The Administrative Assistant indicated deposits are typically prepared about every 2 weeks. Our review of the March 9, 2016, deposit noted receipt slips 380367, 380466, 380468, and 380470 issued between February 19 and March 1, 2016, and totaling \$320, were not deposited until March 9, 2016. In addition, receipt slip 380469 for a \$25 check, receipted on February 25, 2016, was not included in this deposit and was not deposited until April 12, 2016. The Administrative Assistant could not provide an explanation as to why this receipt was excluded from the March 9, 2016, deposit.
- The Administrative Assistant does not always record the method of payment on manual receipt slips. As a result, the composition of receipts (cash, check, or money order) cannot be reconciled to the composition of deposits.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

- Checks and money orders received are not restrictively endorsed at the time of receipt and are only endorsed when deposits are prepared.
- Receipts are not always kept in a secure location until deposited. The Administrative Assistant indicated monies received when she is not present are placed on her desk, which is accessible by all district personnel.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies and the likelihood that errors will go undetected. Procedures should be established to ensure all monies are properly receipted, maintained in a secure location, and deposited intact and timely upon receipt.

Recommendations

The Board of Directors:

- 5.1 Segregate accounting duties to the extent possible and implement appropriate review and monitoring procedures. In addition, the Board should ensure complete lists of disbursements are prepared and compared to invoices and other supporting documentation.
- 5.2 Ensure any differences between accounting records and reconciliations are investigated and resolved timely.
- 5.3 Ensure receipt slips are issued for all monies received with the method of payment indicated on the receipt slip, and the composition of deposits is reconciled to the composition recorded on receipt slips. The district should also ensure receipts are maintained in a secure location until deposited, checks and money orders are restrictively endorsed immediately upon receipt, and deposits are made timely and intact.

Auditee's Response

- 5.1 *The Board continues to examine the feasibility of segregation of financial duties, but small support staff limits that option. The new Board approves all disbursements on a monthly basis, including payroll disbursements.*
- 5.2 *The Board has evaluated its reconciliation procedures and has directed staff to perform reconciliations and investigate and resolve any discrepancies identified timely. Written guidance on the subject will be developed and implemented with the SOGs rewrite that is in progress.*
- 5.3 *The district discontinued fees for burn permits, which was the only cash accepted by the district. Now, all payments received are by*

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

check. Policies on receipting, depositing, and restrictive endorsements will be implemented as part of the SOGs rewrite.

6. Disbursements

6.1 Travel and training expenditures

Controls and procedures over district travel and training expenditures, credit card purchases, and payment for local meals need improvement.

The district incurred unnecessary travel and training costs due to the former Fire Chief traveling to the location of but not attending a conference. In addition, the district paid excessive travel advances for meals and incidental expenses to district employees. Travel costs totaled \$6,169 for the year ended December 31, 2016. As discussed in MAR finding number 8.2, the district does not have a travel policy to address per diem rates for meal and incidental expenses.

The district paid the conference registration fees of \$615, lodging totaling \$738, and a travel advance of \$444 for meals and incidentals for the former Fire Chief to attend the Fire-Rescue International's annual conference held in Dallas, Texas, from August 13, 2014, through August 16, 2014. The Fire Chief stated the former Fire Chief did not arrive at the conference until the first day's session had ended and did not attend any of the remaining sessions of the conference, and the district has no record of his attendance. While the district received a refund of \$50 from the former Fire Chief because he returned from the conference one day early, the district wasted \$1,747 due to the former Fire Chief incurring unnecessary travel costs.

The Fire Chief indicated the district prepays for meals and incidental expenses at the federal Continental United States (CONUS) per diem rate when employees travel. However, our review noted rates for the first and last day of travel were not reduced in accordance with the CONUS schedule, the daily amount advanced was more than CONUS rates authorized, and the number of days advanced appeared wasteful or unnecessary. For example:

- The Fire Chief, in his previous role as the Deputy Fire Chief, was advanced \$623 including \$483 for meals and incidentals and \$140 for parking for the Fire Department Instructor's conference in Indianapolis, Indiana, in April 2016, although the federal CONUS rate allowable was \$352 for this 7 day trip. According to the Fire Chief, he provided documentation to the former Fire Chief to support the monies advanced for parking fees, however district personnel could not locate it.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

Date	Amount Advanced	CONUS Rate*	Amount Overpaid
April 17, 2016	\$ 69	41	28
April 18, 2016	69	54	15
April 19, 2016	69	54	15
April 20, 2016	69	54	15
April 21, 2016	69	54	15
April 22, 2016	69	54	15
April 23, 2016	69	41	28
Total	\$ 483	352	131

* CONUS rates were obtained from the United States General Service Administration website.

- The former Fire Chief was advanced \$358 for meals and incidentals for a Missouri Fire Chief's training conference held in Ridgedale, Missouri, from February 25, 2016, through February 27, 2016. While the former Fire Chief was advanced per diem through February 28, 2016, the conference ended at 3:30 P.M. on February 27, 2016, and therefore per diem for the additional day was not considered necessary.

Date	Amount Advanced	CONUS Rate*	Amount Overpaid
February 24, 2016	\$ 62	41	21
February 25, 2016	74	54	20
February 26, 2016	74	54	20
February 27, 2016	74	41	33
February 28, 2016	74	0	74
Total	\$ 358	190	168

* CONUS rates were obtained from the United States General Service Administration website.

To ensure travel and training expenditures are necessary and legitimate, the district should reimburse documented travel expenses rather than providing travel advances to district employees. In addition, the district should implement a procedure to require submission of training certificates to provide proof of attendance and support training expenditures incurred by the district. Taxpayers have placed a fiduciary trust in the Board to spend public funds only on items necessary and beneficial to the district.

6.2 Credit cards

The district did not maintain adequate documentation to support some disbursements made using district credit cards and district review procedures for credit card purchases need improvement. The district spent \$14,822 using credit cards between December 2015 and May 2017.

According to the district's guidelines for credit card purchases, receipts for each credit card purchase are required to be turned in to the Administrative

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

Assistant and attached to the credit card bill. Both the Fire Chief and Deputy Fire Chief were issued a district credit card.

Our review of 161 credit card transactions made between December 2015 and May 2017 identified 34 transactions totaling \$2,793 where adequate documentation to support the transaction was not retained. For these transactions, either the receipt slip retained was illegible, or information documenting how the purchase related to the operation of the district was not included. These transactions included food and drink purchases at local restaurants, food and gift cards for a Christmas event, and purchases at a local surplus store.

In addition, we noted 32 transactions totaling \$880 that did not have any receipt submitted to support the purchase. These transactions included purchases at convenience stores, restaurants, auto supply stores, the post office, and hotels. As a result, monthly statements cannot be reconciled to actual purchases and the appropriateness of purchases cannot be evaluated.

Neither the Board nor someone independent of the disbursement process reviews and documents their approval of individual transactions charged to the district credit card or ensures supporting documentation for all credit card transactions is reconciled to the credit card statement.

All credit card disbursements should include proper supporting documentation that is reconciled to billing statements, and be approved by the Board to ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds.

6.3 Local meals

The Board has not established a policy for providing employee meals while not on travel status. Our review of all credit card transactions between December 2015 and May 2017 discussed in section 6.2 also noted the former Fire Chief and the Deputy Fire Chief spent approximately \$760 for food and drink purchases at local restaurants. Most of these transactions were not supported by information demonstrating how the purchase related to the operation of the district or detailing the persons in attendance. It could not be determined why the purchases were necessary.

To ensure expenditures are necessary and appropriate, the Board should develop a comprehensive policy regarding food purchases and evaluate the need for paying local meal expenses. Food expenses should be reasonable and necessary for conducting district business. Guidelines should establish the situations in which local food purchases are allowed, limits on the purchases, and required documentation. At a minimum, documentation should include a business purpose and a list of persons in attendance.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

Recommendations

The Board of Directors:

- 6.1 Reimburse documented travel expenses rather than providing travel advances, require employees to submit documentation of training attendance, and obtain reimbursement for all costs associated with the training not attended or completed.
- 6.2 Establish controls and procedures for the review and approval of all credit card purchases and ensure all purchases are supported by appropriate documentation and are reconciled to billing statements.
- 6.3 Develop a comprehensive policy regarding food purchases and ensure purchases made with district credit cards are reasonable and prudent uses of public funds.

Auditee's Response

- 6.1 *The Board is actively discussing the changes recommended, including a move to reimbursement, rather than advancement, of travel expenses. The Board will require documentation of training attendance be submitted and the district be reimbursed for costs incurred if the training is not attended. These recommendations will be considered and incorporated into the SOGs rewrite that is in progress.*
- 6.2 *These recommendations will be considered and incorporated into the SOGs rewrite.*
- 6.3 *These recommendations will be considered and incorporated into the SOGs rewrite.*

7. Sunshine Law

The Board's procedures for complying with the Sunshine Law, maintaining minutes of meetings, and retaining copies of certain email messages need improvement. The Board met in closed session 35 times between February 16, 2016, and April 24, 2018.

7.1 Closed meetings and minutes

The Board did not comply with state law regarding meeting minutes and closed sessions.

- The Board did not prepare meeting minutes for 20 of 35 closed sessions held. Minutes of closed sessions were generally only prepared and retained if the Board took a vote in the session.
- The Board did not document in open meeting minutes the specific reasons or section of law allowing the meetings to be closed for 15 of 35 closed sessions held.

Smithville Area Fire Protection District Management Advisory Report - State Auditor's Findings

Section 610.022, RSMo, requires governmental bodies to prepare and maintain minutes of closed meetings and requires public bodies announce the specific reasons allowed by law for going into a closed meeting and to enter the vote and reason into the minutes.

7.2 Board decisions

The district did not retain adequate documentation to support certain Board decisions and meeting minutes do not typically include Board discussions held to support decisions made. For example, on August 16, 2012, the Board approved a resolution to place a \$3 million general obligation bond issue on the November 2012 ballot to construct a new fire station, purchase a new pumper, and pay bond issuance costs. However, the meeting minutes leading up to this decision do not document any discussions the Board had regarding plans to construct a new fire station. As noted in MAR finding number 2, the district could not provide any planning documents, such as a cost analysis or estimated construction costs, to support the Board's decision to move forward with this project.

Failure to maintain adequate documentation to support Board decisions can lead to subsequent uncertainty about the Board's intentions and possible incorrect interpretation of Board actions taken by the general public or other outside entities. Because minutes are the official record of actions taken by the Board, care should be taken to ensure they are accurate and provide sufficient information to identify issues discussed and decisions made, and ensure outside users understand what occurred.

7.3 Public access policy and requests for records

The district has not adopted a written policy regarding public access to district records as required by state law. A written policy regarding public access to district records would establish guidelines for the district to make records available to the public. This policy should identify a person to contact, provide an address to mail such requests, and establish fees that may be assessed for providing copies of public records. In addition, while we did not identify specific concerns with Sunshine Law requests, the district does not maintain a log or other record of public records requests to ensure all requests are handled in compliance with the Sunshine Law.

Section 321.200.1, RSMo, requires all board meeting minutes and other records be available for public inspection at the district firehouse. Section 610.023, RSMo, lists requirements for making records available to the public, including designating a custodian of records to receive these requests. Section 610.026, RSMo, allows the district to charge fees for providing access to and/or copies of public records and provides requirements related to the fees. Section 610.028, RSMo, requires a written policy regarding release of information under the Sunshine Law. To ensure compliance with state law, the district should document sufficient information in a log to determine if requests are adequately and timely completed. Necessary information includes, but is not limited to, the date of request, a brief description of the

Smithville Area Fire Protection District Management Advisory Report - State Auditor's Findings

request, the date the request is completed or reason why the request cannot be completed, and any associated costs.

7.4 Email

The district does not send the Fire Chief (the custodian of records) copies of email messages that are considered to be a public record under state law. Section 610.025, RSMo, states that the custodian of records must be provided email messages sent between a majority of the public body's members. As a result, these communications are not available for public inspection and copying as required by the Sunshine Law.

Recommendations

The Board of Directors:

- 7.1 Prepare minutes for all closed meetings and ensure the specific reasons for closing a meeting are documented in open meeting minutes.
- 7.2 Ensure meeting minutes include sufficient information necessary to provide a complete and accurate record of significant matters discussed and actions taken.
- 7.3 Develop written policies regarding procedures to obtain access to, or copies of, public records and establish a request log.
- 7.4 Ensure email messages sent between a majority of the Board's members are sent to the Fire Chief and made available for public inspection and copying in accordance with state law.

Auditee's Response

- 7.1 *The Board recognized and addressed this deficiency prior to the audit findings, having hired a professional stenographer to attend and take minutes of regular meetings. Moving forward, the Board will ensure specific reasons for closing a meeting are documented in the open meeting minutes.*
- 7.2 *The Board agrees that the deficiencies uncovered by the audit revealed that prior Board decisions were not adequately reflected in the meeting minutes. This Board, no member of which served prior to April 2016, has included complete agendas for meetings and taken appropriate steps to ensure that minutes capture and appropriately describe the actions of the Board.*
- 7.3 *The Board agrees that a new public records policy is needed, and will be developed as part of the SOGs rewrite that is in progress.*
- 7.4 *The Board has taken steps to ensure emails related to district business are properly archived and that the custodian of records is*

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

included on district correspondence. These policies will be examined and promulgated as part of the SOGs rewrite.

8. District Policies and Procedures

District policies and procedures need improvement.

8.1 Bylaws

The Board has not established written bylaws or other formal policies and procedures for the administration of the district. Instead, the Board President indicated the Board follows "Rules for Missouri Fire Protection Districts" provided by the University of Missouri Extension office.

Section 321.220(12), RSMo, provides that fire protection districts have the authority to adopt and amend bylaws necessary for ". . . carrying on of the business, objects and affairs of the board and of the district . . ." In addition, good business practice dictates the district adopt bylaws to govern board elections, meetings, and rules for transacting district operations and financial matters and to ensure compliance with the bylaws. Bylaws can be used as a management tool for establishing district policies and procedures.

8.2 Standard operating guidelines

The district's SOGs, which serve as a guide for operations within the district and are designed to assist employees in performing their job duties, do not include guidelines to address certain important issues, including the following.

- SOGs do not address employee performance evaluations. The district does not perform annual performance evaluations for any district employees, except the Fire Chief. Performance evaluations are necessary to adequately assess employee performance and provide documented feedback to employees. Performance evaluations also assist in personnel decisions and provide support for those decisions.
- The district does not have a travel policy to address meal and incidental expense per diems, mileage reimbursements, acceptable lodging rates, and submission of related supporting documentation. A travel policy should be adopted to ensure the district only pays for actual and reasonable travel expenses. The policy should outline items such as daily meal allowances and incidentals or per diem rates, mileage reimbursements, and acceptable lodging rates. In addition, the policy should outline the documentation required to be submitted for expenses.
- The district does not have a policy on the use of internet and email, or personal use of district provided portable electronic devices including laptops, tablets, and cell phones to ensure compliance with Internal Revenue Service (IRS) regulations for limited personal use of a district-provided device.

Smithville Area Fire Protection District Management Advisory Report - State Auditor's Findings

Complete and up-to-date written policies and procedures are necessary to provide a basic understanding between all parties regarding rights and responsibilities, provide guidance should questions or disputes arise, and help ensure policies are fairly and consistently applied to all district employees.

8.3 Budgets

The Board did not prepare annual budgets for all district funds as required by state law. In addition, budget documents did not include all statutorily required information.

The district has three funds (General, Capital Improvement, and Debt Service). Our review of district budgets from 2011 to 2017 noted that the district had not prepared budgets for the Capital Improvement or Debt Service Funds for any of those years.

The budgets prepared for the General Fund did not include a budget summary or debt service information. In addition, the budgets only included a comparative statement of estimated receipts and disbursements for the prior year when state law requires a comparative statement of actual or estimated receipts and disbursements for the 2 preceding years.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and sets specific guidelines for the format. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of district operations. It also assists in setting tax levies and informing the public about district operations and current finances. In addition, Section 67.080, RSMo, provides that no expenditures of public monies should be made unless it is authorized in the budget.

Recommendations

The Board of Directors:

- 8.1 Adopt written bylaws.
- 8.2 Maintain complete, comprehensive, and up-to-date SOGs to help employees carry out district operations.
- 8.3 Prepare annual budgets for all funds that include all information required by state law.

Auditee's Response

- 8.1 *The district is evaluating the necessity of adopting bylaws through discussions with legal counsel and state organizations. While bylaws can provide guidance on governance issues for organizations, state law dictates the district's procedure on electing board members, district officers, and defining the powers of the Board.*

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

- 8.2 *The process to follow these recommendations has been initiated by hiring a consultant to assist the district in a comprehensive revision of the district's SOGs. Apart from the audit findings, the Board has discovered the gaps in the SOGs regarding district operations—in too many areas there simply is no guidance on district policy. Working with this consultant, the district will enact and revise its SOGs so that they reflect the practices of the district, and provide guidance to the Board, the Fire Chief, and district staff.*
- 8.3 *Beginning with fiscal year 2019, the Board will review and pass a budget related to expenditures and revenues for all district funds and ensure all information required by state law is included.*

9. District Property and Vehicle Usage

Controls and procedures over district property and vehicle usage need improvement. District-owned capital assets, net of depreciation, including land, buildings, equipment, and other property were valued at \$4,280,411 at December 31, 2016.

9.1 Maintenance and repairs

District procedures for the maintenance and repair of vehicles and equipment are not adequate. An inspection of all district vehicles and equipment is performed on a daily basis and any maintenance and repair issues noted are documented on the Daily Truck Check Maintenance Appendix. Items are removed from the appendix when repaired or replaced. In addition, district personnel indicated items were also removed from the appendix at the request of the former Fire Chief if he determined the issue would not be repaired or replaced. However, the appendix does not document when and how identified issues were resolved.

Comprehensive maintenance records should be kept and periodically reviewed to ensure that preventive maintenance procedures are performed. Maintenance and repair records would also help the district in making budgetary decisions and in deciding when to dispose of a particular vehicle or item of equipment.

9.2 Vehicle usage

The district's employment contract with the former Fire Chief stated the district must provide the former Fire Chief with a vehicle and fuel to be used for district business and personal use. The contract did not include language that limited or further explained allowable/unallowable personal use and any associated record-keeping or reporting requirements. The former Fire Chief was not required to maintain a vehicle usage log or any other record of business and personal use of the district vehicle. In addition, the district did not report the value of the former Fire Chief's personal use of a district vehicle on W-2 forms as required by the IRS. Prior to October 2016, this vehicle was not marked as a public safety vehicle.

Smithville Area Fire Protection District Management Advisory Report - State Auditor's Findings

In addition, the district's employment contract with the current Fire Chief also states the district must provide the Fire Chief with a vehicle and that it is provided for instances where the Fire Chief would be willing and able to respond directly to the incident as needed. The contract does not prohibit personal use of the vehicle. The current Fire Chief is not required to maintain a vehicle usage log or any other record of business and personal use of the vehicle. As a result, his personal use should be considered a taxable benefit and should be included on W-2 forms as required by the IRS. Prior to October 2016, this district vehicle was not appropriately marked.

As a general rule, district vehicles should be used for a public purpose, for the benefit of the district's citizens, and not for personal gain. If the district intends to allow the Fire Chief to use a district vehicle for anything other than official district purposes, the Board should follow IRS reporting guidelines.

IRS reporting guidelines indicate that use of a qualified nonpersonal use vehicle (including commuting) is required to be included in gross income as a working condition fringe benefit unless specific requirements for the type of vehicle are met (i.e., vehicle is clearly marked as a public safety vehicle, employee is always on call, personal use outside of the firefighter's jurisdiction is prohibited, and the employee is required to use the vehicle for commuting). Since the district vehicles were not appropriately marked prior to October 2016, and the district did not meet the other requirements, the personal use of the vehicle is required to be reported as a taxable fringe benefit. District officials should submit amended W-2 forms for the unreported compensation. The district may also be subject to penalties and/or fines for failure to report all taxable benefits.

9.3 Capital assets

The district has not developed procedures to identify capital asset purchases and dispositions throughout the year and records to account for district property are not adequate. Capital asset records are maintained by the district's accountant for depreciation purposes and includes the approximate values for financial statement valuation and for property and liability insurance purposes; however, these records lack some necessary information such as purchase date, vendor, model or serial number, and disposition information such as the date and method of disposal. In addition, assets are not tagged or otherwise identified as district property and an annual physical inventory is not performed.

Adequate capital asset records and procedures are necessary to provide controls over district property. Capital asset records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur. Records should include a detailed description of the assets such as acquisition costs, descriptions, make and model number, and asset identification numbers; the physical location of the assets; and the date and method of disposition of assets. In addition, property controls tags should be

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

affixed to all property items to help improve accountability and ensure assets are properly identified as belonging to the district. The district should conduct annual physical inventories and compare the results to the detailed property records.

Recommendations

The Board of Directors:

- 9.1 Establish adequate procedures to ensure vehicles and equipment receive preventative maintenance and repairs timely. At a minimum, require maintenance logs be kept for each district vehicle and equipment and that these logs be reviewed periodically.
- 9.2 Refer to IRS guidelines regarding use of employer-provided vehicles and adopt appropriate policies and requirements. In addition, the Board should also ensure all compensation is properly reported on W-2 forms, and amend W-2 forms for unreported compensation, as appropriate.
- 9.3 Ensure complete and detailed capital asset records are maintained on a perpetual basis, assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records.

Auditee's Response

- 9.1 *The Fire Chief, with the Board's approval, has deployed software for maintenance logging and review. Moreover, beginning in 2017, the Fire Chief (acting as interim Fire Chief at the time) increased attention to preventative maintenance and repairs.*
- 9.2 *The Board intends to discuss compliance with IRS guidelines with legal counsel and its accountant and amend W-2 forms as appropriate. In addition, the Board will take all appropriate action to make the district's vehicle usage policy consistent with federal law.*
- 9.3 *The Fire Chief, acting under direction of the Board, will undertake an inventory of capital assets after the drafting and approval of a SOG regarding the minimum value of assets to be tracked. This SOG will be developed as part of the SOGs rewrite that is in progress and will address maintaining capital asset records on a perpetual basis.*

10. Employment Contracts

The district entered into multi-year employment contracts without terms allowing the district to terminate the employee for reasons other than for cause.

The district entered into an employment contract with terms allowing the district to terminate the former Fire Chief for cause, but the contract did not address termination for other reasons. In addition, the contract automatically

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

renewed each year so that following each extension, the agreement term remained 5 years. The district placed the former Fire Chief on administrative leave on August 21, 2017, until a separation of employment agreement could be negotiated. According to the agreement dated January 23, 2018, the former Fire Chief remained employed with the district until February 28, 2018. During this 6-month period, the district had no alternative other than to pay the former Fire Chief's salary and benefits totaling \$92,814.

The current Fire Chief's contract also does not address termination without cause and renews automatically each year so that following each extension, the agreement term remains 3 years.

The district should ensure employment contracts are in the best interest of the district and provide adequate protections to both the employer and employee.

Recommendation

The Board of Directors ensure employment contracts properly safeguard district interests.

Auditee's Response

The Board agrees that the sort of "auto-renewal" provision found in the former Fire Chief's contract operated to the detriment of the district. The same provision was found in the deputy chief's contract and, upon his elevation to the fire chief position, it remained in the contract, although it was shortened to 3 years. At the time of the current chief's appointment, it was necessary to provide stability and certainty to the district. The district is reviewing current contracts, and is evaluating options for amendment of the contract to adequately safeguard the district's interest and simultaneously provide for continuity of district management.

11. Electronic Data Security

The district does not have security controls in place to lock computers after a specified number of incorrect logon attempts. In addition, the district does not periodically test for recovery of data from backup files.

Log on attempt controls lock the capability to access a district computer after a specified number of consecutive invalid logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. In addition, periodic testing to ensure the backup process is adequate would provide reasonable assurance data could be recovered or restored if necessary. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendation

The Board of Directors require each computer to have security controls in place to lock it after a specified number of incorrect logon attempts. In addition, ensure recovery of data from backup files is tested on a regular basis.

Smithville Area Fire Protection District
Management Advisory Report - State Auditor's Findings

Auditee's Response

The Fire Chief has worked with the district's information technology (IT) provider to place adequate "lock out" protections on the district's computers for failed logon attempts. The IT provider also backs up district data every 24 hours, and keeps all data and records indefinitely on a separate server. As part of the SOGs rewrite that is in progress, new computer use policies will be implemented to address remaining concerns.

Smithville Area Fire Protection District

Organization and Statistical Information

The Smithville Area Fire Protection District was incorporated in 1989 and is organized pursuant to Chapter 321, RSMo. The district covers the City of Smithville and the surrounding area (112 square miles) and has 2 operating fire stations. The district employed 12 full-time employees (excluding the Fire Chief and Assistant Fire Chief) and 2 volunteer fire fighters at December 31, 2016.

The elected Board acts as the policy-making body for district operations. Pursuant to Section 321.120.5, RSMo, the Board of Directors was increased from 3 to 5 members in April 2018, based on approval by voters in August 2017. Board members serve 6-year terms without compensation. Current and former Board members and other key personnel serving the district are as follows:

Board of Directors, Current

Name	Date of Election	Term Expires
Debbie Childress, President	April 5, 2016	April 2022
Brian Laybourne	April 3, 2018	April 2024
Charlie Waters	April 3, 2018	April 2024
Bob Painter	April 3, 2018	April 2022
Duane Garmeson	April 3, 2018	April 2020

Board of Directors, Former

Name	Dates of Service
Greg Atkins (1)	April 2012 - January 23, 2018
Michael (Mick) Summers (2)	April 2014 - December 20, 2016
Berry Parks	April 2010 - April 19, 2016

- (1) Resigned from the Board effective January 23, 2018. This seat remained vacant until April 24, 2018, when newly elected members took office.
- (2) Resigned from the Board effective December 20, 2016. Bob Painter was appointed in March 2017 by remaining Board members to fill the unexpired term. He was subsequently elected to the Board on April 3, 2018.

Fire Chief and Assistant Fire Chief

Name	Date of Appointment
Current:	
Dave Cline, Fire Chief	March 1, 2018
Vacant, Deputy Fire Chief	N/A

Name	Dates of Service
Former:	
John Callahan, Fire Chief (1)	February 4, 2008 - February 28, 2018
Dave Cline, Deputy Fire Chief (2)	January 27, 2003 - February 28, 2018

- (1) Placed on administrative leave August 21, 2017. According to the negotiated separation of employment agreement dated January 23, 2018, he was employed by the district until February 28, 2018.
- (2) Appointed Acting Fire Chief on March 28, 2017, and appointed Fire Chief effective March 1, 2018.

Smithville Area Fire Protection District
Organization and Statistical Information

Financial Activity and
Subpoenas

Appendix A is a summary of the district's financial activity for the year ended December 31, 2016 (obtained from the district's audited financial statements).

Appendixes B and C are copies of subpoenas served to the district and the former Fire Chief in October 2017 to obtain testimony and records requested by the State Auditor's Office.

OFFICE OF MISSOURI STATE AUDITOR

SUBPOENA

To: Custodian of Records and Corporate Designee
Smithville Fire Protection District
341 Park Drive
Smithville, MO 64089

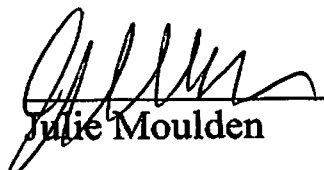

YOU ARE COMMANDED AND REQUIRED to appear personally before the State Auditor or her representative, Joel Anderson, Chief Litigation Counsel, at 1410 Genessee St, Room 151, Kansas City, MO 64102, at 1:00 p.m. on October 30, 2017, for purposes of providing testimony and producing for examination, copying, and interrogation the following records and documents listed on Exhibit A attached to this Subpoena.

ISSUED this 11th day of October, 2017, pursuant to Section 29.235.4(1), RSMo.

Nicole Galloway
Missouri State Auditor

I served the foregoing subpoena by Dave Cline on this 11 day of October 2017.

Julie Moulden

EXHIBIT A

You are to preserve for production and inspection, and then appear as instructed on the attached subpoena and produce for inspection and examination, the following items in your possession or under your control as previously requested by the State Auditor's Office (see Exhibit B):*

- 1. All documentation supporting the calculations used to determine employee bonuses given in 2011.**
- 2. All pre-planning documentation for station #3, including documentation of the following:**
 - a. Cost analysis (calculation) showing how the tax levy increase, which was requested but failed, was determined.**
 - b. Supporting documentation for original estimated cost of station #3 (\$3 million bond levy).**
- 3. Documents showing the evaluation of the bids or requests related to the proposals for architectural and engineering services for station #3**

You must also bring sufficient witnesses to testify on the record regarding the following:

- 1. The existence of the above referenced documents and the search conducted to find the records.**

*** This request for records includes all materials that exist in paper ("hard copy") or electronic form (including but not limited to records and data maintained on computers, tablets, smart phones, external electronic storage drives, thumbnail drives, remote servers or back up tapes). All information requested in the items above are subject to inspection, review and copying by the state auditor. Section 29.235.4(1), RSMo.**

NICOLE GALLOWAY, CPA
Missouri State Auditor

October 3, 2017

Debbie Childress, Board President
 Dave Cline, Deputy Fire Chief
 Smithville Area Fire Protection District
 341 Park Drive
 Smithville, MO 64089

John H. Callahan, Fire Chief
 108 Platte River Road
 Farley, MO 64028

Re: Missouri State Auditor's Office Request for Records

Dear Ms. Childress, Mr. Cline, and Mr. Callahan:

As you know, this office is currently auditing the Smithville Fire Protection District. The auditors from this office have requested but not received the following from the district:

1. Calculations used to determine employee bonuses given in 2011, 2012, 2013, 2014, and 2015.
2. Pre-planning documentation for station #3, including the following:
 - a. Cost analysis (calculation) showing how the tax levy increase, which was requested but failed, was determined.
 - b. Supporting documentation for original estimated cost of station #3 (\$3 million bond levy).
3. Proof of publication and bids or requests for qualifications and proposals for the following:
 - a. Architect for station #3
 - b. Engineering services for station #3

This information was specifically requested on July 20, July 26, and August 3. Audit Manager Heather Stiles again requested this information via email on September 26. As to #3 above, while information was provided related to the proof of publication, the remaining information was incomplete. No other information requested was provided.

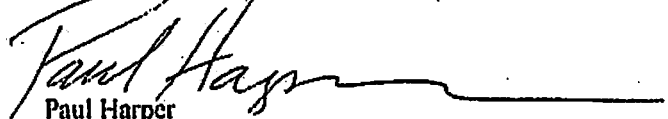

Section 29.235.1, RSMo, requires this office to conduct its audits in accordance with standards established by the Comptroller General of the United States (commonly known as the "Yellow Book"). The Yellow Book requires that auditors obtain sufficient and appropriate evidence to support all of its findings. Furthermore, under Section 29.235, RSMo, the auditor is authorized to examine all books, accounts, records, reports, and vouchers of any entity subject to audit. Section 29.235, RSMo, further authorizes the State Auditor's office to issue subpoenas as needed to conduct an audit under Chapter 29.

The auditors have requested these documents so that they can complete the audit of the district. Any further delay will increase both the time it takes to complete this audit and the cost of performing the

audit. Please send this documentation by 5 p.m. on October 6, 2017, or we will initiate further action to ensure that we can complete the audit.

If you have any questions, you may contact me by email at Paul.Harper@auditor.mo.gov or by telephone at (573) 751-4213.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul Harper", followed by a long horizontal line extending to the right.

**Crime Victims' Compensation System
Data Analytics**

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Crime Victims' Compensation System Data Analytics

Data Validation	Some Crime Victims' Compensation (CVC) system edit checks are not working correctly or effectively. Establishing additional edit checks would further help to ensure the accuracy of CVC records.
Automation Opportunity	The Department of Public Safety (DPS) could improve the efficiency and effectiveness of processes used to ensure Missouri courts submit CVC Program fees collected to the state.
Payment Reductions	The DPS has not formally documented procedures for reducing payments to victims due to noncompliance with program rules and state law.

In the areas audited, the overall performance of this entity was **Good**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Sandra K. Karsten, Director
Department of Public Safety
Jefferson City, Missouri

We have audited certain operations of the Department of Public Safety, Crime Victims' Compensation (CVC) system. This audit was conducted in fulfillment of our duties under Chapter 29, RSMo. The objectives of our audit were to:

1. Evaluate the use and effectiveness of data management, monitoring, and analytic techniques for ensuring restitution obligations are satisfied and for preventing or detecting potential CVC Program abuse or misuse.
2. Evaluate whether the CVC system maintains and reports accurate restitution data.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) the need for improvement of data management, monitoring, and analytic techniques utilized by the department to prevent and detect potential CVC Program abuse or misuse and (2) no evidence of inaccurate restitution data maintained or reported by the CVC system. The accompanying Management Advisory Report presents our findings arising from our audit of Crime Victim's Compensation System Data Analytics.

An additional report, No. 2018-064, *Crime Victims' Compensation System Data Security*, was issued in August 2018.

Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
Audit Manager:	Jeffrey Thelen, CPA, CISA
In-Charge Auditor:	Patrick M. Pullins, M.Acct., CISA
Audit Staff:	Kent Aaron Dauderman, M.Acct., CPA

Crime Victims' Compensation System Data Analytics

Introduction

Background

The Missouri Crime Victims' Compensation (CVC) Program is designed to financially assist victims who have sustained bodily or psychological injury in paying for reasonable medical expenses, counseling expenses, funeral expenses, and lost wages or loss of support incurred as the result of being a victim of a crime. The CVC Program is a payor of last resort that pays for financial losses not covered by other sources, such as insurance, worker's compensation, or restitution from the offender.

The program was established in 1981 under the administration of the Department of Labor and Industrial Relations, Division of Worker's Compensation. By Executive Order 07-07, the program was transferred to the control of the Department of Public Safety (DPS), effective August 28, 2007. The CVC Program is in the DPS Office of the Director.

The current CVC computer system was custom-developed for the state by a third-party contractor and replaced legacy computer systems supporting the program. The department placed the current system into operation in April 2016. Ongoing technical support for the CVC system, including security guidance, the operating environment, and other services is provided by the Office of Administration - Information Technology Services Division (OA-ITSD). In addition to the CVC Program, the computer system also supports the operations of the Sexual Assault Forensic Examination (SAFE) Program and the Child Physical Abuse Forensic Examination (CPAFE) Program.

According to the Government Accountability Office (GAO), reducing improper payments, including those that are the result of fraud, is critical to safeguarding funds and helping to achieve potential cost savings. As a result, leading practices highlighted by the GAO¹ have increasingly focused on the need for program officials to take a strategic approach to managing improper payments and risks that include abuse and fraud. These leading practices can provide a guide for program managers to use when developing or enhancing efforts to combat fraud in a strategic, risk-based manner.

A critical strategic approach component involves implementing preventive and detective controls, including data analytics. Data analytics is a rapidly evolving field of information science that involves a variety of techniques to examine, analyze, and interpret large volumes of data, according to the GAO and other leading practitioners. Data analytics helps facilitate decision making by identifying patterns or trends, determining whether problems are widespread and systemic in nature, and evaluating program performance and outcomes.

¹ GAO, Report GAO-17-339SP, *Data Analytics to Address Fraud and Improper Payments*, March 2017, < <https://www.gao.gov/assets/690/683859.pdf> >.

Crime Victims' Compensation System Data Analytics Introduction

Recent trends in data development and advanced analysis are creating innovation possibilities that carry the promise of far-reaching economic and societal benefits, according to the GAO. Areas such as health care and public benefit systems may be improved or even transformed by innovations derived from new data analytics. Advanced analytics includes new tools for examining large amounts of data to uncover subtle or hidden patterns, correlations, and other insights, such as anomalies, trends, or potential abuse. The use of analytic results to improve actions or decisions is being transformed - improving decisions or actions and thereby extracting new economic and societal benefits, according to the GAO.

Program funding

The CVC system processes claims for program expenditures from the following funds:

- The Crime Victims' Compensation Federal Fund was established to account for federal monies maintained in the state treasury for the use of the CVC Program. These funds may be received in advance, when related expenditures are made, or after related expenditures are made. Appropriations from this fund authorize disbursements for crime victims' payments.
- The Crime Victims' Compensation Fund was established to award compensation to, or on behalf of, victims of crimes. Appropriations from this fund authorize payments directly to the provider of services for medical or funeral expenses, or expenses for other services as allowed as a payor of last resort for the victim. Other appropriations from this fund pay expenses of the SAFE Program, the statewide crime victim notification system, court automation, and the Office for Victims of Crime. These appropriations are not part of the CVC Program.
- The General Revenue Fund is used for expenditures of the CPAFE Program and other expenditures of the SAFE Program

Victims may file a claim for payment from the CVC Program for up to 2 years after the date of the crime. The CVC Program reimburses a maximum of \$25,000 per claim for crime-related expenses. Some benefit categories have lower limits, which are also included in the \$25,000 maximum payout,² as follows:

- \$400 per week for lost wages
- \$5,000 for funeral expenses
- \$2,500 for counseling expenses
- \$250 for personal property (such as clothing or bedding) seized by law enforcement as evidence of the crime
- Attorney's fees, up to 15 percent of the total award

² Sections 595.025 and 595.030, RSMo.

Crime Victims' Compensation System Data Analytics Introduction

The primary funding source for the CVC Program is a surcharge of \$7.50 assessed as costs on all criminal cases. For all courts, except municipal courts, the fee is collected and the entire amount is remitted to the Department of Revenue (DOR). The first \$250,000 collected each fiscal year is deposited to the State Forensic Laboratory Fund. Next, funds are allocated for payments associated with the administrative and operational costs of the Office for Victims of Crime and for the operation of the statewide automated crime victim notification system. Remaining funds are deposited equally to the Crime Victims' Compensation Fund and the Services to Victims Fund. Only the funds deposited to the Crime Victims' Compensation Fund are available to pay the expenses of the CVC Program. Receipts deposited to other funds are used for the purposes of the respective funds.

For surcharges assessed against municipal court cases, the municipality is allowed to retain 5 percent of the collections. The remaining 95 percent of collections is remitted to the DOR, where it is deposited equally between the Crime Victims' Compensation Fund and the Services to Victims Fund.³

In addition, except in cases of certain specified crimes, each case in which a plea of guilty or a finding of guilt is made, a judgement must be entered against the defendant in the amount of \$68 (for a class A or B felony), \$46 (for a class C or D felony), or \$10 (for a misdemeanor), to be deposited into the Crime Victims' Compensation Fund.

The Crime Victims' Compensation Fund is also allowed to retain interest earnings on the monies in the fund and to receive gifts and contributions for the benefit of victims.

³ Section 595.045, RSMo.

Crime Victims' Compensation System Data Analytics Introduction

Program payments

Total claims processed through the CVC computer system from the Crime Victims' Compensation Federal Fund and the Crime Victims' Compensation Fund related to the CVC Program during state fiscal years 2013 through 2018 are presented in Figure 1.

Figure 1: CVC Claims Paid by Fiscal Year

Source: Data from the state's accounting system (SAM II).

Crime Victims' Compensation System Data Analytics Introduction

Total claims processed through the CVC computer system from the Crime Victims' Compensation Federal Fund and the General Revenue Fund related to the SAFE Program during state fiscal years 2013 through 2018 are presented in Figure 2.

Figure 2: SAFE Claims Paid by Fiscal Year

Crime Victims' Compensation System Data Analytics Introduction

Total claims processed through the CVC computer system from the General Revenue Fund related to the CPAFE Program during state fiscal years 2013 through 2018 are presented in Figure 3. The CPAFE Program was created in fiscal year 2015, with the first expenditures occurring in fiscal year 2016.

Figure 3: CPAFE Expenditures by Fiscal Year

Source: Data from the state's accounting system (SAM II).

Scope and Methodology

The scope of our audit included evaluating (1) DPS management's approach to data analytics for preventing and detecting potential CVC program abuse, (2) policies and procedures, and (3) other management functions and compliance requirements in place during the period April 2016 (when the system was implemented) to June 2018.

Our methodology included reviewing written policies and procedures, and interviewing various DPS personnel. We obtained an understanding of the applicable controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violation of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

Crime Victims' Compensation System Data Analytics Introduction

Under the supervision of DPS staff and utilizing a test environment, we entered data into the CVC system to test the functionality and accuracy of certain system data edits.⁴ We provided DPS officials with a listing of the edits we identified that did not properly work and had discussions with them about additional edits that might be added to improve functionality.

We obtained data files containing CVC transactions for the period January 2016 through May 2018 from the OA-ITSD (the division that maintains of the data). Included in this data were transaction records for claims filed before this period but still in the process of being paid. While the DPS owns this data, it is managed by the OA-ITSD on the department's behalf. To determine the reliability of the CVC data, we evaluated the materiality of the data to our audit objectives and assessed the data by various means, including (1) interviewing knowledgeable DPS officials, (2) reviewing existing information about the data and the system that produced them, (3) performing certain analytic techniques, and (4) reviewing internal controls. Based on this evaluation, we determined the data and information were sufficiently reliable for the purposes of this audit.

We based our evaluation on accepted state, federal, and international standards and best practices related to information technology security controls from the following sources:

- National Institute of Standards and Technology (NIST)
- U. S. Government Accountability Office (GAO)
- ISACA (previously known as the Information Systems Audit and Control Association)

⁴ An edit, also known as a data validity check, is program code that tests the input for correct and reasonable conditions; such as account numbers falling within a range; numeric data being all digits; and dates having a valid day, month, and year; etc.

Crime Victims' Compensation System Data Analytics

Management Advisory Report

State Auditor's Findings

1. Data Validation

Some Crime Victims' Compensation (CVC) system edit checks are not working correctly or effectively. Establishing additional edit checks would further help to ensure the accuracy of CVC records.

Depending on the type of input data, the CVC system may verify field values to help ensure the system only accepts accurate data. This process, referred to as an edit check, alerts a user with a message when data entered is invalid or outside the expected range of values for a specific input field. These edits are either "hard" meaning a valid value must be submitted before processing can continue, or "soft" indicating a value outside the expected range has been entered, but can still be accepted by the system after the user verifies the information is accurate.

Program limits and hierarchy

The Department of Public Safety (DPS) does not have fully-effective automated controls in place to ensure program payments adhere to established limits and the payment hierarchy.

As described in the background section, certain types of claim expenses have limits to the amount of funds that can be awarded. For example, a claim for the loss of personal property is limited to \$250. During testing, we entered a claim for loss of personal property in the amount of \$500 that was accepted by the test system.⁵

In addition, we determined the program payment hierarchy was not working correctly. Program rules⁶ specify when multiple expenses are included in a single claim, there is a specific order claim expenses should be paid until the maximum payment amount is reached. We entered a claim with seven expenditures to various parties including an attorney, the victim, and third parties such as a hospital, counselor, and a funeral home, totaling \$146,000. According to the program hierarchy, the system should have paid \$3,500 to the attorney and \$21,500 to the victim. The third party claimants, such as the hospital, counselor, and funeral home, should not have received funds because the maximum payment of \$25,000 would have been reached. Instead, the system correctly paid the attorney \$3,500, incorrectly paid the victim \$14,000, and awarded the remaining \$7,500 to the funeral home and counselor (with no award to the hospital).

When reviewing an extract of actual claim data from the live system, we did not identify any instances where a claim exceeded the limits for any expenditure line or any instances where the payment hierarchy was violated.

⁵ Testing was performed in a test system, which mirrors the controls in the production (live) system. This method ensures testing does not affect real records and eliminates the possibility of improper payments being issued.

⁶ 8 Code of State Regulations (CSR) Section 50-6.010(11)

Crime Victims' Compensation System Data Analytics Management Advisory Report - State Auditor's Findings

We asked DPS staff how they ensured no improper claim payments were processed if system controls were not working properly. Staff said training to understand the limits and hierarchy, and manual reviews and approvals of transactions during processing allowed them to detect any anomalies. According to DPS management, the Office of Administration - Information Technology Services Division (OA-ITSD) has been requested to correct the hierarchy issue impacting how payments feed through the system when multiple claims are in pending status and to add the personal property limit to the system.

Relying on manual controls over automated controls significantly increases the risk that improper payments could be processed by the CVC system and not be detected timely.

System dates

During edit testing, we identified instances where illogical dates were accepted by the system. For example, the system would accept (1) the date a crime occurred as a future date, (2) dates of birth indicating a person would be well over 200 years old, and (3) a police report date prior to the date of the crime being reported.

In addition, in the section of the system for recording claims due to time lost from work, the beginning and ending date of the time lost from work as well as the number of days missed are entered. However, the system does not ensure the number of days missed does not exceed the difference between the beginning and ending dates. DPS staff were aware of this issue, and noted that program rules only state a limit of \$400 per week in lost wages, but the rules do not specify how any non-standard (such as part-time or flextime) wages should be calculated. In addition, the number of days of lost work is manually calculated outside the system because the system does not have the capability to accept multiple periods of time lost from work (such as an initial hospitalization and later follow-up appointments) on a single claim.

While date fields may not be critical for accurate processing of claims, allowing inaccurate data to populate the system decreases the usability of the data for potential future analysis.

Amounts

Several amount fields in the system improperly accepted negative amounts. Additionally, we noted a refund could be posted for an amount that exceeded the amount of the transaction being refunded.

Improper processing of claims because of inaccurate amount fields could lead to victims receiving improper payments due to miscalculations or a claim being improperly denied.

Monitoring of controls

The DPS does not have procedures in place to monitor and verify the effectiveness of existing edit checks and system controls.

Crime Victims' Compensation System Data Analytics Management Advisory Report - State Auditor's Findings

During the testing process, we identified system edits that were not functioning properly as previously discussed. DPS staff indicated they were not aware these controls were not functioning correctly. The staff indicated the DPS relies on manual reviews of transactions to identify potential improper payments.

Periodic reviews of controls are necessary for the DPS to ensure controls are not inadvertently modified and to decrease the risk of inaccurate data being entered and processed by the CVC system.

Conclusion

Inadequate data validation and missing edit checks could allow inaccurate data to be input and processed by the CVC system. Manual reviews for unexpected results can detect inaccuracies and inconsistencies; however, by preventing inaccurate data input, staff resources can be more efficiently used for other purposes.

Recommendation

The DPS, in conjunction with the OA-ITSD, work to ensure existing edit checks function properly to help prevent the entry and processing of inaccurate data and determine if any additional edit checks could be established to improve data integrity. In addition, the DPS should implement controls to periodically verify the continued effectiveness and integrity of the edits.

Auditee's Response

As cited in the audit report, the DPS is working with the OA-ITSD to improve the performance of the CVC system. As the State Auditor's Office (SAO) noted in its report, a review of an extract of actual claim data from the live system did not identify any excessive claims or violations of the payment hierarchy. This successful performance is a credit to the careful attention and diligence of CVC claims processors. The CVC system steering committee will address the recommendation for further controls.

2. Automation Opportunity

The DPS could improve the efficiency and effectiveness of processes used to ensure Missouri courts submit CVC Program fees collected to the state. Currently, the process is mostly a manually intensive review of reports of fees submitted.

History

As discussed in the background section, the CVC Program is funded primarily by fees assessed on court cases filed in Missouri courts. The courts are responsible for collecting these fees and forwarding the collections to the Department of Revenue (DOR).

In addition to remitting fees collected to the DOR, courts are responsible for reporting to the Office of State Courts Administrator (OSCA) monthly the amount of fees collected. For courts using the statewide Judicial Information System (JIS), the OSCA obtains this data directly from the system. Other courts must report this information to OSCA manually.

Crime Victims' Compensation System Data Analytics Management Advisory Report - State Auditor's Findings

A previous audit⁷ reported the program had not established procedures to ensure all courts remitted the fees that had been collected to the DOR as required. In their response, the Department of Labor and Industrial Relations officials (then the department overseeing the CVC Program) agreed to attempt to develop a process to ensure all applicable courts remit CVC collections to the DOR.

Current procedure

The DPS currently receives monthly reports from the DOR showing all entities that remitted CVC collections during the month. Quarterly, a DPS staff member manually compares these reports to a list of counties and municipalities known to have courts to identify any entities not remitting collections. These entities are then contacted to determine if funds should have been remitted. This staff member indicated it is not uncommon for smaller entities to not hold court or collect any fees during a month, and therefore, have no collections to remit to the DOR. Other common reasons for not remitting collections include staffing and training issues.

The staff member also noted department personnel can only determine from the reports provided if the court submitted a remittance to the DOR, but not if the remittance is accurate. As a result, the DPS has only limited assurances that courts are properly remitting CVC Program fees. DPS officials noted this process requires a considerable amount of time for their staff to perform the review and follow up on discrepancies noted. Further, the officials noted the DPS has no authority to require entities to remit collections. For these reasons, DPS officials indicated they have considered suspending the process of reviewing remittances.

Data analytics can provide high rates of return, offering potential for significant return on investment of resources needed to establish and maintain such a program. Using data analytic techniques to automate the process of reviewing and monitoring remittances, in addition to improving the efficiency of the process, could help to increase collections and to decrease the amount of staff time required to perform the reviews.

Recommendation

The DPS use data analytics to increase efficiencies in the process of monitoring the collections of CVC fees and for ensuring all entities remit funds as appropriate.

Auditee's Response

When available and appropriate, the DPS welcomes the use of data analytics and other tools to improve the performance of its programs. The DPS has met with the DOR and is working with the OSCA to determine the proper allocation of responsibilities regarding monitoring the collections of CVC fees and ensuring all entities remit funds as appropriate.

⁷ SAO, Report No. 2001-028, *Crime Victims Compensation Program*, issued in March 2001.

3. Payment Reductions

The DPS has not formally documented procedures for reducing payments to victims due to noncompliance with program rules and state law. As a result, the DPS may have treated victims unequally and arbitrarily when determining compensation payments to award.

State law allows the DPS to reduce the claim amount awarded to a victim if sufficient funds are not available in the CVC Fund,⁸ and requires claim payments be reduced to the extent that other resources, such as insurance or direct restitution from the offender, are available to cover the expenses.⁹ The DPS is also allowed to reduce or deny a claim in instances where the victim "contributed to the infliction of the victim's injury or death,"¹⁰ and is specifically prohibited from paying a claim if "police records show [the report of the crime] was made more than forty-eight hours after the occurrence of such crime, unless the department of public safety finds that the report to the police was delayed for good cause."¹¹

We reviewed four cases where the DPS paid claims at a reduced rate. In each case, supporting documentation from the CVC system was obtained to determine why the claim payments were reduced.

In the first case, the claim was reduced by 50 percent because the victim refused to cooperate with the police. A police report in the case file indicates the victim gave conflicting stories to investigators about when and where the crime occurred. When the victim was asked by investigators why he/she would lie to investigators, the report says the victim stated he/she did not trust the police. No documentation was provided to support why the DPS determined a 50 percent reduction was appropriate in this case.

A second case involved a victim who reported the crime to hospital staff when seeking treatment for his/her injuries. The victim stated he/she assumed the hospital would notify the police; however, the police were not notified within 48 hours of the crime. Because of this delay, program rules and state law indicate the victim's claim should have been denied. However, a letter in the case file from the DPS indicates the claim would be paid at a 50 percent reduction because the police report was not filed timely. The letter further states the DPS considers the exception in state law related to good cause to only apply to instances of domestic violence.

⁸ Section 595.045.12, RSMo.

⁹ Section 595.035.2, RSMo.

¹⁰ Section 595.035.3, RSMo.

¹¹ Section 595.030.2, RSMo. Effective August 28, 2018, this section was amended to remove the 48-hour limit to report a crime.

Crime Victims' Compensation System Data Analytics Management Advisory Report - State Auditor's Findings

In a third case, the victim did not provide the medical provider with insurance information necessary for the provider to bill the insurance company. In this case, the DPS paid the remainder of the claim in full, but reduced this line item by 50 percent because other resources (insurance) were available to be used instead of the CVC program. The case file does not document how the DPS determined a 50 percent reduction was appropriate.

In the final case, the victim did not report the crime to police within 48 hours. The case file indicates the victim spoke with a police officer at his/her church 2 days after the crime, who told the victim to come to the police station the following day to file a report. A handwritten note in the case file initialed by the CVC Program manager states "[The victim] was not going to report on [his/her] own - Reduce 25%." A letter to the victim in the case file indicates the reduction occurred solely because a police report was not filed within 48 hours of the crime.

When asked about these cases, DPS officials indicated that, although allowed to deny the claims outright for the program violations noted, "the DPS prioritizes service to victims through the use of CVC funds" and thus approved the claims to provide assistance to the victims. While commendable, in two of these four cases the decision is in direct violation of a state law prohibiting claims if a police report is not filed within 48 hours unless the department determines there is good cause for the delay. Department personnel could not provide us a documented policy defining what constitutes good cause. The only documented information available in a case correspondence indicated the department considers the good cause exception to only apply to instances of domestic violence. Further, in these two cases the victims were treated inequitably, with one claim reduced 25 percent for the victim's failure to file timely and the other reduced 50 percent for the same reason.

While state law allows the department to waive timely filing requirements "for good cause," because the department considers good cause as applying only to instances of domestic violence, waiving the requirements for other reasons may constitute a violation of state law. Without documented policies and procedures regarding when waivers may be granted and how reductions in claims should be determined, the DPS is at risk of treating victims in similar circumstances inequitably.

Recommendation

The DPS formally develop and document internal policies and procedures regarding the circumstances in which victim's claims may be reduced, and by how much, in order to ensure victims are treated equitably, including defining the term "good cause." In addition, the DPS should ensure these policies are in compliance with state law.

Crime Victims' Compensation System Data Analytics
Management Advisory Report - State Auditor's Findings

Auditee's Response

The DPS concurs with this recommendation. It will develop a schedule of reductions to be utilized by the CVC unit when addressing claim reductions. The DPS strives to ensure that victims are treated compassionately and provided all benefits they are entitled to by law.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Callaway County Collector and Property Tax System

Background	<p>On March 15, 2018, information was brought to the attention of the Prosecuting Attorney regarding suspicious activity in a bank account under the custody of the County Collector. The Prosecuting Attorney contacted the Sheriff, and they referred this matter to the Federal Bureau of Investigation (FBI). The Sheriff and the Presiding Commissioner then met with the County Collector, and Pamela Oestreich subsequently resigned on March 15, 2018, as County Collector, effective immediately.</p> <p>State law requires an audit be conducted after a vacancy occurs in the office of the County Collector. In addition, due to the circumstances of the vacancy, the County Commission passed a resolution on March 19, 2018, to request the State Auditor conduct an audit of the County Collector's office. We began an audit of the office on March 26, 2018.</p> <p>An investigation by the FBI is ongoing. The Prosecuting Attorney requested the appointment of a special prosecutor and the Missouri Attorney General accepted that appointment. The U.S. Attorney for the Western District of Missouri is handling the criminal prosecution of former County Collector Pamela Oestreich. The Sheriff, current County Collector, County Auditor, County Clerk, and County Commission continue to cooperate with state and federal investigators and prosecutors.</p>
Misappropriated Monies	<p>Between January 1, 2016, and March 15, 2018, monies totaling at least \$316,758 were misappropriated from the County Collector's office. Cash shortages totaling at least \$244,782 were identified as well as \$71,976 in improper disbursements the County Collector made to herself.</p>
Questionable Transactions	<p>The County Collector made questionable disbursements totaling \$8,414, and abated a protested tax bill for \$7,208 after the monies had been distributed.</p>
Property Tax System Controls and Procedures	<p>We noted significant weaknesses in controls and procedures over the county's property tax system. The County Collector's annual settlements for the years ended February 28, 2018, and 2017, were not complete and accurate. The County Clerk does not prepare the current tax books and does not verify the accuracy of the current tax books. The financial activities of the County Collector were not adequately reviewed by the County Clerk, the County Auditor, or the County Commission. The County Commission and the County Clerk do not adequately review changes (e.g., additions, abatements, and deletions) entered into the property tax system.</p>

County Collector's Controls and Procedures

Significant weaknesses existed in the County Collector's accounting controls and procedures. Accounting duties were not adequately segregated and independent reviews of accounting and bank records were not performed. The County Collector did not record property tax collections totaling \$217,936, in the property tax records. The County Collector made unsupported transfers totaling \$76,778 from the general account to the installment account between January 2018 and March 2018. The County Collector did not have adequate procedures for receipting, recording, reconciling, and depositing monies; and handling cash. Bank reconciliations prepared by the County Collector for the general account were not always complete and accurate and bank reconciliations for the installment account were not always complete, accurate or timely prepared. The lists of liabilities prepared by the County Collector for the general and installment accounts were not complete and accurate. The County Collector did not issue checks in numerical sequence for the installment account.

In the areas audited, the overall performance of this entity was **Poor**.*

*The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

- Excellent:** The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.
- Good:** The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.
- Fair:** The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.
- Poor:** The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA

Missouri State Auditor

County Commission
and
County Collector
Callaway County, Missouri

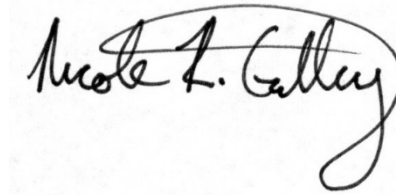

We have audited the County Collector and Property Tax System of Callaway County. Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. In addition, under Section 50.055, RSMo, the County Commission of Callaway County, Missouri, requested the State Auditor to audit the office of County Collector of Callaway County, Missouri. On March 15, 2018, a vacancy occurred in the office of the County Collector of Callaway County. A successor was appointed and sworn into office effective April 11, 2018. The scope of our audit included, but was not necessarily limited to, the period from January 1, 2016, through March 15, 2018. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant property tax functions.
2. Evaluate the county's compliance with certain legal provisions.
3. Determine the extent of monies misappropriated from the County Collector's office.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owed to the county or the former County Collector. For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) misappropriated monies totaling at least \$316,758. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector and Property Tax System of Callaway County.

Callaway County Collector and Property Tax System

Introduction

Background

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29). Property taxes and other monies collected by the Callaway County Collector's office totaled approximately \$44.1 million during the year ended February 28, 2018.

Pamela Oestreich was elected Callaway County Collector in November 1998 and took office in March 1999, and was subsequently elected to the position every 4 years thereafter. During the year ended February 28, 2018, she received compensation of \$57,092, which includes \$5,000 of commissions for collecting city property taxes. Compensation was in accordance with statutory provisions. The County Collector supervised the daily operations of the County Collector's office and employed 3 full-time employees as of February 28, 2018.

On March 15, 2018, information was brought to the attention of the Prosecuting Attorney regarding suspicious activity in a bank account under the custody of the County Collector. The Prosecuting Attorney contacted the Sheriff, and they referred this matter to the Federal Bureau of Investigation (FBI). The Sheriff and the Presiding Commissioner then met with the County Collector, and Pamela Oestreich subsequently resigned on March 15, 2018, as County Collector, effective immediately.

The Governor appointed Tim Wilkerson as County Collector and he was sworn into office on April 11, 2018. With the exception of finding recommendations, which are addressed to the current County Collector, the use of County Collector throughout the report is in reference to Pamela Oestreich.

Under Section 52.150, RSMo, the State Auditor must commence an audit within 20 days of notification by the person appointed to fill the vacancy in the County Collector's office. However, due to the circumstances of the vacancy, the County Commission passed a resolution on March 19, 2018, to request the State Auditor conduct an audit of the County Collector's office. Under Section 50.055, RSMo, second class counties such as Callaway County may request the State Auditor audit any particular officer or office of the county. This request allowed the audit process to be expedited, rather than waiting until after the appointment of a new county collector.

We began an audit of the County Collector's office on March 26, 2018. The scope of our audit included, but was not necessarily limited to, the period from January 1, 2016, through March 15, 2018. In coordination with law enforcement officials, we reviewed the activity of the County Collector's bank

Callaway County Collector and Property Tax System Introduction

accounts, including the general operating bank account (general account) and the installment payment plan bank account (installment account), and reviewed property tax records maintained by the County Collector's office. After identification of monies misappropriated and the methods used to perpetrate and conceal the theft, we also applied limited procedures to certain property tax records and bank records for the period February 1, 2012, through December 31, 2015.

Installment account

Our review identified improper deposits and disbursements involving the installment account. The installment program was established in January 2012, as authorized by a court order of the County Commission and Section 139.052, RSMo. The account is maintained by the County Collector's office to manage payments made by taxpayers on an installment basis, with transactions beginning in February 2012. For each taxpayer enrolled in the installment program, quarterly payments are made towards the taxpayer's upcoming tax liability. Beginning in January 2017, each taxpayer provided authorization for the County Collector's office to process automated quarterly payments directly from the taxpayer's bank account. Prior to 2017, the taxpayers were responsible for making quarterly payments to the County Collector's office. Taxpayers who are also county employees may participate in the program by having amounts withheld from their semimonthly pay. After each payroll cycle, the amounts withheld are transferred from a county bank account to the installment account.

Installment payments are held in escrow in the installment account and payments are tracked for each taxpayer on a spreadsheet ledger until the tax bill is fully paid, whereupon a check is issued from the installment account to transfer the monies to the general account. The County Collector's office may issue a separate check from the installment account for each taxpayer as his/her tax liability is paid in full, or one check may be issued from the installment account to transfer monies for several taxpayers. Once the monies are transferred from the installment account, the payments are recorded in the property tax system for each respective taxpayer to reflect the payment of his/her tax liability, and the monies are deposited into the general account for distribution to applicable taxing authorities. As of December 2017, there were approximately 100 taxpayers and 50 county employees participating in the installment program. In addition, according to bank records, deposits and disbursements for the installment account totaled¹ \$366,122 and \$295,225 for the year ended December 31, 2017, and \$150,013 and \$111,483 for the year ended December 31, 2016.

¹ Totals have not been adjusted for errors or improper transactions discussed throughout the report.

Callaway County Collector and Property Tax System Introduction

Criminal investigation

The Prosecuting Attorney and Sheriff referred the matter to federal law enforcement authorities. An investigation by the FBI is ongoing. The Prosecuting Attorney requested the appointment of a special prosecutor and the Missouri Attorney General accepted that appointment. The U.S. Attorney for the Western District of Missouri is handling the criminal prosecution of former County Collector Pamela Oestreich. The Sheriff, current County Collector, County Auditor, County Clerk, and County Commission continue to cooperate with state and federal investigators and prosecutors.

Callaway County Collector and Property Tax System

Management Advisory Report

State Auditor's Findings

1. Misappropriated Monies

Between January 1, 2016, and March 15, 2018, monies totaling at least \$316,758² were misappropriated from the County Collector's office. During this period, we identified cash shortages totaling at least \$244,782. The County Collector also made improper disbursements to herself, totaling \$71,976, from the County Collector's installment payment plan bank account (installment account). In addition, to conceal the monies misappropriated, property tax collections totaling \$267,130 were mishandled.

See Appendix A for details regarding cash deposit shortages occurring because cash was taken after the daily deposit had been prepared but before the deposit had been taken to the bank. See Appendix B for details regarding cash receipt shortages occurring because cash was taken from the daily cash drawer before the daily deposit had been prepared. See Appendix C for details regarding improper disbursements issued to the County Collector and Appendix D for improper deposits/transfers into the installment account. The misappropriation went undetected due to a lack of segregation of duties, inadequate controls, and the absence of proper oversight. The following table provides a summary of the amounts misappropriated.

Method	Year Ended December 31,		Period Ended March 15, 2018	Total
	2016	2017		
Cash Deposit Shortages - General Account (Appendix A)	\$ 12,670	109,512	82,224	204,406
Cash Receipt Shortages - General Account (Appendix B)	17,376	22,000	1,000	40,376
Total Cash Shortages	30,046	131,512	83,224	244,782
Improper Disbursement Issued to the County Collector (Appendix C)	1,826	48,650	21,500	71,976
Total Misappropriation	\$ 31,872	180,162	104,724	316,758

Cash deposit shortages

Cash collections totaling \$204,406 and recorded on the County Collector's daily deposit records were not deposited into the County Collector's general operating account (general account).

Near the end of each business day, the cash drawers were balanced and a daily balance sheet report was prepared, typically by the Chief Deputy Collector. The daily balance sheet report was prepared to summarize the taxes collected for the day by method of payment (e.g., cash, check, or credit card) and to identify any miscellaneous deposits made into the general account. Cash collections were physically taken to a local bank usually by the County Collector, for deposit into the general account, while checks received were scanned by employees using a remote deposit system and electronically

² Amounts presented in the report findings are rounded, whereas amounts presented in Appendixes A, B, C, and D are not rounded.

Callaway County Collector and Property Tax System Management Advisory Report - State Auditor's Findings

deposited into the general account, and credit card collections were electronically deposited into the general account. The cash deposit amount reported on the daily balance sheet report agreed to the cash amount deposited per the original daily deposit slip, unless the deposit included checks or money orders not processed through the remote deposit system.

Our review of daily balance sheet reports, County Collector's office copies of deposit slips (when available), and bank backup documentation obtained for each cash deposit for the period January 1, 2016, through March 15, 2018, identified 102 instances where the cash deposit amount per the County Collector's records was more than the actual cash amount deposited per the bank documentation. These discrepancies, identified as cash deposit shortages, totaled \$204,406 (see Appendix A). In 67 instances the cash shortage represented a portion of the total cash to be deposited for the day, and in 35 instances, the cash shortage represented the entire amount of cash to be deposited for the day.

For 84 of these deposits, a check had been issued from the installment account to substitute for the cash shortage amount. Each of these installment account checks was signed only by the County Collector. Per our understanding of the office's procedures, and discussions with office employees, there is no legitimate reason for a check from the installment account to be inserted into the general account deposit after the cash drawers had been balanced and the daily balance sheet report prepared. Our comparison of the copies of the deposit slips included with the bank backup documentation to the County Collector's office copies of the original deposit slips (when available), identified numerous instances where the cash amounts recorded on original deposit slips had been altered and the installment checks had been added to the deposit slips. For some deposits, new deposit slips had been prepared with decreased or no cash amounts and the addition of the installment checks. In addition, for installment checks issued for a portion of the cash deposit amount, the check amounts were usually round dollar amounts, such as \$1,000, \$2,000, \$3,000, etc., which is suspicious. Also, most installment account checks used to substitute for the cash deposit shortages discussed earlier, had no description or purpose written on the memo line.

We also identified 4 deposits where a check had been issued from the general account to substitute for the cash shortage amount. In addition, we identified 2 deposits where checks from both the installment account and the general account were substituted for cash in the same deposit. The disbursement of these checks from the general account is questionable and no documentation could be provided to support the purpose of these checks. For details regarding each of these questionable disbursements, see MAR finding number 2.

Callaway County Collector and Property Tax System Management Advisory Report - State Auditor's Findings

For the remaining 12 deposits with cash shortages, we found no evidence to indicate the cash shortage amount was replaced, and for these deposits the entire cash shortage amount was unaccounted for.

Cash receipt shortages

In addition to the shortages noted in the cash deposit amounts, we identified an additional \$40,376 in cash shortages in daily receipt collections.

When real estate and personal property tax receipts were collected and recorded in the property tax system, the method of payment was also recorded in the property tax system. County Collector's office personnel did not reconcile the composition of receipts recorded in the property tax system with the composition of receipts deposited; therefore, composition differences were not investigated or documented (see MAR finding number 4.4). They did ensure the total monies deposited for the day agreed to total monies receipted in the property tax system.

Our comparison of the composition of recorded receipts to the composition of monies to be deposited per the daily balance sheet identified 30 instances, totaling \$40,376, where checks issued from the installment account were used to substitute for cash receipts collected during the day (see Appendix B). By substituting the installment account checks for the cash receipts, the total amount of monies to be deposited still agreed to the total receipts recorded per the property tax system report. Because office personnel do not reconcile the composition of receipts recorded to the composition of receipts to be deposited, cash receipts were removed from the cash drawer and substituted with checks from the installment account without detection. Each of these installment account checks used to substitute for cash receipts was signed only by the County Collector.

When a taxpayer participating in the installment program had paid his/her tax liability in full, a check was issued from the installment account to transfer the monies to the general account and the taxpayer's name was to be recorded on the memo line of the installment check. However, our review noted the taxpayer's name was not always written on the memo line of the installment account check. In addition, in late December or early January, one installment check was usually written to transfer monies to the general account for several taxpayers. For the installment checks issued to substitute for cash receipt shortages, there was no evidence or documentation to support that these checks were issued for the payment of a taxpayer's tax liability. Although some of these checks had a name written on the memo line, only the surname was identified, and the surnames were generally just common names. No correlation was found between the names noted on those installment checks and the taxpayers with paid tax liabilities on the corresponding days. In addition, as noted on Appendix B, the installment checks were usually round dollar amounts, such as \$1,000, \$2,000, \$2,500, etc. It is uncommon for

Callaway County Collector and Property Tax System Management Advisory Report - State Auditor's Findings

Improper disbursements to the County Collector

checks issued from the installment account for the payment of a tax liability to be round dollar amounts.

Improper checks totaling \$71,976 were written to the County Collector personally from the installment account (see Appendix C). Our review noted the County Collector issued 25 checks from the installment account with the payee as "Pam Oestreich," "Pamela J. Oestreich," or "Pamela Oestreich," not as County Collector. Again, these checks were usually round dollar amounts. There is no reasonable explanation for these disbursements to be issued to the County Collector personally.

The checks issued from the installment account used to substitute for cash deposit and receipt shortages discussed earlier were paid to the order of the County Collector, and were typically restrictively endorsed with a stamp for the County Collector. In addition, the checks issued from the installment account to legitimately transfer tax monies to the general account were also paid to the order of the County Collector and restrictively endorsed with a stamp for the County Collector. In comparison, the endorsement for the checks paid to the County Collector personally consisted of Pamela Oestreich's scripted signature. Also, we found no evidence to indicate these checks paid to the County Collector personally had been deposited into the general account.

Concealment of misappropriation
